Foreword

The Employment and Un-employment surveys of National Sample Survey (NSS) are primary sources of data on various indicators of labour force at National and State levels. These are used for planning, policy formulation, decision support and as input for further statistical exercises by various Government organizations, academicians, researchers and scholars. NSS surveys on employment and un-employment with large sample size of households have been conducted quinquennially from 27th round (October 1972 – September 1973) onwards. The NSS 66th round carried out during July 2009 - June 2010 was the eighth quinquennial round in the series, covering subjects of (i) Household Consumer Expenditure and (ii) Employment and Un-employment.

Field work of the survey is carried out by the Field Operations Division (FOD) of National Sample Survey Office (NSSO) in which the central samples are covered. Most of the State Governments also participate in the survey on matching sample size basis. The results of quinquennial surveys on Employment and Un-employment are brought out by the NSSO in a number of reports, based on its central sample. It has been the persistent endeavour of NSSO to bring out its survey results at the earliest to meet the timely requirements of its users. With that aim in mind and with a view to making available the salient results of the survey, well in advance of the release of its reports, the NSSO is bringing out this report on Key Indicators of NSS 66th round on Employment and Un-employment. With this effort, NSSO is making an attempt in meeting an important aspiration and demand of its data users to have the key results within one year of the completion of the fieldwork.

I thankfully acknowledge and appreciate the efforts made by the officials of Data Processing Division and Survey Design & Research Division of NSSO in meticulous planning and execution of various activities involved in bringing out this report by the target date. I am also thankful to National Statistical Commission (NSC) for its constructive criticism of present system of Processing of Data and release of reports by NSSO, which prompted us to take this new initiative. I hope, this report on key results will be found useful by planners, policy makers, academicians and researchers. Suggestions for improvement of its content and coverage will be highly appreciated.

New Delhi
June 2011

J. Dash
Director General & Chief Executive Officer
NSSO

| Table S37 | Distribution (per 10000) of workers according to usual status (ps+ss) approach by occupation divisions for each state/u.t. | 83-91 |
| Table S38 | Average wage/ salary earnings (Rs. 0.00) per day received by regular wage/ salaried employees (activity status codes: 31, 71, 72) of age 15-59 years for each State/u.t. | 92-94 |
| Table S39 | Average wage/ salary earnings (Rs. 0.00) per day received by casual labours of age 15-59 years engaged in works other than public works (activity status codes: 51) for each State/U.T. | 95-96 |
| Table S40 | Average wage/ salary earnings (Rs. 0.00) per day received by casual labours of age 15-59 years engaged in public works other than MGNREG public works (activity status codes: 41) for each State/U.T. | 97 |
| Table S41 | Average wage/ salary earnings (Rs. 0.00) per day received by casual labours of age 15-59 years engaged in MGNREG public works (activity status codes: 42) for each State/U.T. | 98 |

Detailed Tables

| Table No. | Title | Page |
|------------------|---|-------------|
| Table P1 | Number of villages/ UFS blocks, households and persons surveyed by state/ u.t. | 99 |
| Table P2 | Number of households and persons surveyed by age and sex for each state/ u.t. | 100-102 |
| Table P3 | Estimated number of households and persons by age and sex for each state/ u.t. | 103-105 |
| Table P4 | Distribution (per 1000) of persons by principal usual activity category for each age-group | 106-114 |
| Table P5 | Distribution (per 1000) of persons by usual activity category taking also into consideration the subsidiary economic status of persons categorized 'not working' in the principal status (ps+ss) for each age-group | 115-123 |
| Table P6 | Distribution (per 1000) of persons by current weekly activity for each age-group | 124-132 |
| Table P7 | Distribution (per 1000) of person-days by current daily activity for each age-group | 133-141 |
| Table P8 | Distribution (per 1000) of usually working persons by industry of work | 142-173 |
| Table P9 | Distribution (per 10000) of workers by occupation sub-division /division | 174-176 |

NOTES ON TABLES

1. Estimates are provided separately for rural and urban areas and for males and females.
2. The estimates presented in the report, in general, refer to the mid-point of the survey period (July 2009 – June 2010) of NSS 66th round, i.e., 01.01.2010.
3. It may be noted that as the tables are generally presented as ‘per 1000 distribution’ or ‘estimates per 1000’, the figures are rounded off. Thus, while using the ratios from the survey results, it is to be noted that the accuracy of these derived aggregates will be limited to the number of significant digits available in the ratio or percentage estimates presented in the report. The estimated aggregates, wherever possible, can be used to get ratios with more significant digits.
4. If there are no sample households/persons in a particular category, the estimates/estimated proportions of households/persons in that category becomes 0. Estimated number per 1000 are also shown as 0, when they are greater than 0 but less than 0.5.
5. In the detailed tables, in some of the deeper classifications, some sample sizes may be small and this may have a bearing on the precision of the corresponding estimates.
6. The cell-level figures in the tables, when added up, may not exactly be equal to the figure shown against the ‘total’ column (or line) due to (i) rounding off and/or (ii) presence of non-response cases.

Chapter One

Introduction

1.1.1 The National Sample Survey Office (NSSO) during the period July 2009 - June 2010 carried out an all-India household survey on the subject of employment and unemployment in India as a part of 66th round of its survey programme. In this survey, the nation-wide enquiry was conducted to generate estimates of various characteristics pertaining to employment and unemployment and labour force characteristics at the national and State levels. Information on various facets of employment and unemployment in India was collected through a schedule of enquiry (Schedule 10) adopting the established concepts, definitions and procedures. Based on the data collected during the entire period of survey, estimates of some key employment-unemployment characteristics in India and States have been presented in this document.

1.2 Objective of the survey on employment and unemployment

1.2.1 The main objective of the employment-unemployment surveys conducted by NSSO at periodic interval is to get estimates of level parameters of various employment and unemployment characteristics at national and State level. These statistical indicators on labour market are required for planning, policy and decision making at various levels, both within the government and outside. The critical issues in the context of labour force enquiries pertain to defining the labour force and measuring participation of labour force in different economic activities. The activity participation of the people is not only dynamic but also multidimensional: it varies with region, age, education, gender, level of living, industry and occupational category. These aspects of the labour force are captured in detail in the NSS survey on employment and unemployment and estimates are generated for labour force participation rate, worker population ratio, unemployment rate, wages of employees, etc. The indicators of the structural aspects of the workforce such as status in employment, industrial distribution and occupational distribution are also derived from the survey. Besides, from the data collected on the particulars of enterprises and conditions of employment, the aspects of employment in the informal sector and informal employment are reflected through the conceptual framework of the survey.

1.3 Genesis of NSS Employment and Unemployment Survey

1.3.1 The quinquennial survey on employment-unemployment is one of the important surveys conducted regularly by the NSSO. The first such survey was done during September 1972 - October 1973 corresponding to the 27th round of NSSO. The present survey is the eighth in the series.

1.3.2 *Past Quinquennial Surveys*: To assess the volume and structure of employment and unemployment, starting with the 9th round (May - September, 1955), NSSO conducted a number of surveys on employment and unemployment. The core conceptual framework for conducting such surveys was firmed up by an “Expert Committee on Unemployment Estimates” (popularly known as the Dantwala Committee), set up by the Planning Commission. The Expert Committee reviewed these surveys and the indicators generated from such surveys conducted by NSS in the past. The concepts and definitions recommended by this committee formed the basis of the first quinquennial survey on employment and unemployment conducted in the 27th round of NSS (September 1972 – October 1973). Since then, six comprehensive quinquennial surveys on employment and unemployment situation in India have so far been carried out by the NSSO prior to the present quinquennial survey. These were carried out during the 32nd round (July 1977 – June 1978), 38th round (January 1983 – December 1983), 43rd round (July 1987 – June 1988), 50th round (July 1993 – June 1994), 55th round (July 1999 – June 2000) and NSS 61st round (July 2004- June 2005) in which concepts, definitions and procedures were based primarily on the recommendations of the Dantwala Committee. The results of these surveys have been brought out in the form of NSS reports. In NSS 55th round, the aspects of enterprise characteristic of employment and in NSS 61st round the qualitative aspects of informal employment was added in the survey module of the quinquennial round.

1.3.3 *Other surveys on employment-unemployment*: Apart from these quinquennial surveys on employment and unemployment, NSSO has been regularly collecting information on certain key items on employment and unemployment, as a part of annual series, from a smaller sample of households in each round since its 45th round (July 1989 - June 1990) through the schedule on Household Consumer Expenditure (Schedule 1.0). The objective of data collected in the annual series was to measure employment and unemployment indicators in terms of the usual and current weekly statuses only and study of these indicators in respect of category of employment, industrial distribution of the usually employed, etc. These procedures continued till the 59th round (January-December 2003) of NSS. In the 60th round (January-June 2004), a separate schedule on employment and unemployment was canvassed for the first time in an annual round and particulars on employment and unemployment was collected in the same manner as that of the quinquennial rounds. In NSS 62nd round (July 2005 - June 2006) and in NSS 64th round (July 2007- June 2008) also a separate schedule on employment and unemployment, similar to the one canvassed during NSS 60th round, was canvassed and particulars on labour force were collected in the manner similar to the quinquennial rounds.

1.4 NSS 66th Round Reports on Employment and Unemployment

1.4.1 The results of NSS rounds are released in reports based on comprehensive tabulation of subject parameters and indicators in various cross classifications generated from the central sample data. Corresponding to NSS 66th round quinquennial survey on Employment and Unemployment, the results are planned for release in eight reports. The tentative titles of these eight reports are:

- (i) *Employment and Unemployment Situation in India, 2009-10*
- (ii) *Informal Sector and Conditions of Employment in India: 2009 – 10*
- (iii) *Employment and Unemployment situation among Social Groups in India: 2009 – 10*
- (iv) *Status of Education and Vocational Training in India: 2009 – 10*
- (v) *Participation of Women in Specified Activities along with Domestic Duties: 2009 - 10*
- (vi) *Employment and Unemployment situation in Cities and Towns in India: 2009 – 10*
- (vii) *Home-based Workers in India 2009-10*
- (viii) *Employment and Unemployment situation among Major Religious groups in India: 2009 – 10.*

1.5 Contents of this document

1.5.1 This document brings out the key results of NSS 66th round within the year of completion of the field work for the use in decision support, policy inferences and salient analysis. It contains Three Chapters and Four Appendices. Following the present introductory chapter (Chapter One), Chapter Two outlines the features of the Employment and Unemployment Survey along with the architecture of the key employment and unemployment indicators. Key employment and unemployment indicators are presented in Chapter Three. The corresponding tables elaborating the results for all-India and States are appended to this Chapter. The formats of presentation of the results in the Tables are as follows:

- summary tables (Tables are numbered like, Table S1, Table S2, and so on) provide the key employment and unemployment characteristics for each State/u.t./all-India, and
- detailed tables (Tables are numbered like, Table P1, Table P2, and so on) give the detailed results at the all-India level along with the estimates in absolute numbers and samples in the margins.
- Table S1, provides some important employment and unemployment indicators at all-India level at a glance for NSS 66th round (July 2009-June 2010) and 61st round (July 2004-June 2005).
- In Table S1.1, the estimates of labour force, workforce and unemployed persons are given in absolute numbers adjusting with the Census Projected population referenced to the mid-point of the survey periods of NSS 66th round (i.e., 1st January 2010) and NSS 61st round (i.e., 1st January 2005).

1.5.2 The concepts and definitions of some important terms used in the survey are explained in Appendix A. An outline of the sample design and estimation procedure is presented in Appendix B. In Appendix C, the Projected Population as on 1st March 2009 and 1st March 2010 supplied by RGI Office have been presented along with those projected for 1st January 2010 using compound rate of growth. The projections have been

NSS KI: Key Indicators of Employment and Unemployment in India, July, 2009 - June, 2010

given for, male and female, separately, for rural and urban for each State/U.T. Appendix D gives a facsimile of the schedule canvassed in the survey.

1.5.3 The estimates of key employment and unemployment characteristics are generally presented, as ratios. However, the estimates of aggregates are also given in the margin of the detailed tables presented for all-India levels. It may be noted that estimates of ratios are generally expected to be robust and the estimates of aggregates may be used only to combine the ratios. However, to estimate an absolute number in any category, the survey estimates of ratios may be applied to the census population or projections¹. It may also be noted that as the tables are generally presented as 'per 1000 distribution' or rates 'per 1000', the figures are rounded off. Thus, while using the ratios from the survey results, it is to be noted that the accuracy of these derived aggregates will be limited to the number of significant digits available in such ratios. The estimates presented in this document, in general, refer to the mid-point of the survey period (July 2009 – June 2010) of NSS 66th round, i.e., 01.01.2010.

1.5.4 The estimates of key indicators of employment and unemployment have been presented for all the States and U.Ts. While using the estimates for the smaller States, it may be kept in mind that the sample sizes for them may not be adequate enough for getting sufficiently reliable estimates.

¹ In Appendix C, the Projected Population as on 1st March 2009 and 1st March 2010 supplied by RGI Office have been presented along with those projected for 1st January 2010 using compound rate of growth. The projections have been given for, male and female, separately, for rural and urban for each State/U.T.

Chapter Two

Features of the Survey on Employment and Unemployment

2.1.1 The critical issues in the context of labour force enquiries pertain to defining the labour force and measuring participation of labour force in different economic activities. The activity participation of the people is not only dynamic but also multidimensional; it varies over regions, age, education, gender, industry and occupational categories. In NSS surveys, persons are classified into various activity categories on the basis of activities pursued by them during certain specified reference periods. Three reference periods are used in NSS surveys, viz. (i) one year, (ii) one week and (iii) each day of the reference week. Based on these three periods, three different measures of activity status are arrived at. The activity status determined on the basis of the reference period of one year is known as the usual activity status (US) of a person, that determined on the basis of a reference period of one week is known as the current weekly status (CWS) of the person and the activity status determined on the basis of the engagement on each day during the reference week is known as the current daily status (CDS) of the person.

2.2 The survey outline of NSS 66th round survey

2.2.1 *Geographical coverage:* The survey covered the whole of the Indian Union *except* (i) interior villages of Nagaland situated beyond five kilometres of the bus route and (ii) villages in Andaman and Nicobar Islands which remained inaccessible throughout the year. However, all the sample first stage units of both rural and urban areas of Leh, Kargil and Poonch districts of Jammu & Kashmir became casualty and therefore these districts were outside the survey coverage.

2.2.2 *Sub-round:* The fieldwork of the 66th round of NSSO started from 1st July, 2009 and continued till 30th June, 2010. As usual, the survey period of this round was divided into four sub-rounds, each with a duration of three months, the 1st sub-round period ranging from July to September 2009, the 2nd sub-round period from October to December 2009 and so on. An equal number of sample villages/blocks (FSUs) was allotted for survey in each of these four sub-rounds. The survey used the interview method of data collection from a sample of randomly selected households.

2.2.3 Out of the total number of 12,808 FSUs (7,524 villages and 5,284 urban blocks) allotted for the central sample² (including 24 state sample FSUs of Leh and Kargil districts of J & K: 16 for rural sector and 8 for urban sector), 12,654 FSUs (7,402 villages and 5,252 urban blocks) could be surveyed at the all-India level for canvassing Schedule 10. The number of households surveyed was 1,00,957 (59,129 in rural areas and 41,828 in urban areas) and number of persons surveyed was 4,59,784 (2,81,327 in rural areas and

² The sample selected for NSS 66th round which was surveyed by NSSO is termed "Central sample". As is usual in the regular NSS rounds, most States and Union Territories participated in the survey: the sample surveyed by State Government officials is termed as "State sample".

1,78,457 in urban areas). The sample design and estimation procedure used for the survey is given in Appendix B of this document.

2.3 Details of information collected in NSS 66th round Survey on Employment and Unemployment

2.3.1 In NSS 66th round, data on employment-unemployment characteristics were collected through Schedule 10. The schedule captured a range of information on the following aspects:

- i) *Household characteristics*, like household size, religion, social group, land possessed, land cultivated, etc. For the rural households information was collected, on whether the household has Mahatma Gandhi National Rural Employment Guarantee (MGNREG) job card, whether got work in MGNREG works during the last 365 days, number of days got work in MGNREG works and mode of payment of the wages earned in MGNREG works. Information on household monthly consumer expenditure was also collected through a worksheet to study the employment-unemployment characteristics with the level of living of the population.
- ii) *Demographic particulars*, like age, sex, educational level, status of current attendance and vocational training.
- iii) *Usual principal activity status and subsidiary economic activity status* of the all persons.
- iv) *Particulars of the enterprise* for all the usual status workers (excluding those engaged in growing of crops and growing of crops combined with farming of animals) viz., location of work place, type of enterprises, number of workers in the enterprise etc. and some *particulars on the conditions of employment* for the employees, like type of job contract, eligibility for paid leave, availability of social security benefits, etc. For self-employed persons in the usual status, some particulars were collected for identification of home-based workers.
- v) *Extent of underutilization of the labour time and on the qualitative aspects of employment*, like changes in activity status, occupation /industry, existence of trade unions/associations, nature of employment (permanent/temporary), etc.
- vi) *Participation in specified activities* by the household members who are classified as engaged in domestic duties in the usual principal activity status.

2.4 Conceptual Framework of Key Employment and Unemployment Indicators

2.4.1 ***Labour force participation rate (LFPR)***: LFPR is defined as the number of persons/ person-days in the labour force per 1000 persons /person-days

2.4.2 **Worker Population Ratio (WPR):** WPR defined as the number of persons/person-days employed per 1000 persons/person-days.

2.4.3 **Proportion Unemployed (PU):** It is defined as the number of persons/person-days unemployed per 1000 persons/person-days.

2.4.4 **Unemployment Rate (UR):** UR is defined as the number of persons/person-days unemployed per 1000 persons/person-days in the labour force (which includes both the employed and unemployed).

2.4.5 **Usual status adjusted UR:** Unemployment rates for the reference period of 365 days, i.e., in usual *principal status (ps)* approximates an indicator of chronically unemployed. Some of the persons categorised as unemployed according to the *usual principal activity status* might be working in a subsidiary capacity. Therefore, another estimate of the unemployed excluding those employed in a subsidiary capacity during the reference period can be derived. The former is called the usually unemployed according to the *principal status (ps)* and the latter, the usually unemployed excluding employed in *subsidiary status* or *usual status adjusted* i.e., *us (adjusted)*, which would conceptually be lower than the former.

2.4.6 The architecture of key employment-unemployment indicators are given below in tabular form:

| activity profile* | | key indicators |
|---|---------------------|--|
| activity status (code) | category of persons | |
| 11, 12, 21, 31, 41, 42, 51, 61, 62, 71, 72 | workers | 1. Labour Force Participation Rate (LFPR): $\frac{\text{no. of employed persons} + \text{no. of unemployed persons}}{\text{total population}}$ |
| 81, 82 | unemployed | |
| 91, 92 93, 94, 95, 97, 98 | not in labour force | 2. Worker Population Ratio (WPR): $\frac{\text{no. of employed persons}}{\text{total population}}$ |
| | | 3. Proportion Unemployed (PU): $\frac{\text{no. of unemployed persons}}{\text{total population}}$ |
| | | 4. Unemployment Rate (UR): $\frac{\text{no. of unemployed persons}}{\text{no. of employed persons} + \text{no. of unemployed persons}}$ |
| Note: *: 1. Activity status codes, 42, 61, 62, 71, 72, 82, and 98 are used only in <i>the current status</i> (in CWS and CDS) and the remaining activity status codes are used in both <i>usual in current status</i> 2. Details of the activity status codes are given in Appendix A (Concepts and Definitions) | | |

Chapter Three

Key Findings of NSS 66th round (July 2009- June 2010) survey on Employment and Unemployment

The key findings presented here are based on the 66th round survey on employment and unemployment conducted during July, 2009 to June, 2010. The survey covered a sample of 1,00,957 households (59,129 in rural areas and 41,828 in urban areas) and number of persons surveyed was 4,59,784 (2,81,327 in rural areas and 1,78,457 in urban areas). As elaborated in Appendix A, the employment and unemployment indicators are measured in three different approaches, viz. *usual status* (US) with a reference period of one year, *current weekly status* (CWS) with a one-week reference period and *current daily status* (CDS) based on the daily activity pursued during each day of the reference week. The labour force indicators measured in US and CWS are in persons and in CDS in person-days. In respect of US approach which is based on major time criteria, the indicators are measured in the usual principal status (PS) and subsidiary status (SS). Key findings of Employment and Unemployment have been discussed for persons considering ‘all ages’ and for persons of age 15-59 years.

Some of the key findings are stated below.

A. Demographic Characteristics

- As per the concept of household used in the survey, the average household size in India was 4.4. The rural household size (4.6) was higher than urban household size (4.1). The sex ratio (females per 1000 of males) at the all-India level was 936. Sex ratio in rural areas was 947 compared to 909 in urban areas.

[Ref: Table P3]

- The population in the age group 15-59 years, which is considered to be economically active, comprised about 59 per cent of males and 61 per cent of females in rural areas and about 66 per cent each of males and females in urban areas.

[Ref: Table S2]

B. Labour force participation rate (LFPR)

Labour force refers to the population which supplies or offers to supply labour for pursuing economic activities for the production of goods and services and, therefore, includes both ‘employed’ and ‘unemployed’ persons/person days. Labour-force participation rate (LFPR) is defined as the proportion of persons/person days in the labour-force to the total

persons/person-days. These ratios are given in per 1000 of persons/person-days. The estimates of LFPR in different approaches provide information on the following aspects:

- i) number of persons in labour-force - i.e., employed or unemployed-- according to usual *principal status* (*ps*) and according to the *principal* and *subsidiary status* taken together (*ps + ss*),
- ii) number of persons in labour-force – i.e., employed or unemployed -- on an average in a week of 7 days preceding the date of survey in CWS, and
- iii) number of person-days in labour-force – i.e., employed or unemployed --per day on an average during the reference period of 7 days preceding the date of survey in CDS.

Features of labour force have been discussed here in *usual status* (*ps+ss*), CWS and CDS.

B1: LFPR for all persons

- According to the *usual status* (*ps+ss*), 40 per cent of population belonged to the labour force: 41 per cent in rural and 36 per cent in urban areas. LFPR was significantly lower for females than for males in both rural and urban areas. It was about 56 per cent for each of rural male and urban male. For females, LFPR was 27 per cent in rural areas and 15 per cent in urban areas.

[Ref: Table S20]

- LFPR in CWS approach was 38 per cent at the all-India level, which was nearly 2 percentage point lower than the LFPR obtained in *usual status* (*ps+ss*). For rural areas, in CWS, male LFPR was nearly 55 per cent compared to 23 per cent for female and in urban areas, male LFPR was nearly 56 per cent compared to 14 per cent for female.

[Ref: Table S21]

- In CDS approach the estimates of LFPR showed further dip compared to the estimates obtained in *usual status* (*ps+ss*) across all the four segments of the population, viz., rural male, rural female, urban male and urban female. At the all-India level, LFPR in CDS was 37 per cent. The reduction in LFPR was more for females compared to males: rural male LFPR in CDS was 54 per cent compared to 20 per cent for rural female and urban male LFPR was 55 per cent compared to 13 per cent for urban female.

[Ref: Table S22]

B2: LFPR for persons of age 15-59 years

- For the age group 15-59 years, LFPR at the all-India level was nearly 60 per cent in *usual status* (*ps+ss*): 85 per cent for rural male, 40 per cent for rural female, 81 per cent for urban male and 21 per cent for urban female.

[Ref: Table S4]

- At the all-India, for persons of age 15-59 years, LFPR according the CWS was nearly 57 per cent: 84 per cent for rural male, 35 per cent for rural female, 81 per cent for urban male and 20 per cent for urban female.

[Ref: Table S5]

- Estimates of LFPR in CDS approach for the age group 15-59 years were also lower compared to the *usual status (ps+ss)* estimates. In CDS, LFPR was nearly 55 per cent at the all-India level with significant gender differentials: 82 per cent for rural male, 30 per cent for rural female, 80 per cent for urban male and 19 per cent for urban female.

[Ref: Table S6]

Figure 1: LFPRs for different segments of the population considering all ages.

C. Worker Population Ratio (WPR)

The estimates of employed (or worker) according to the *usual principal status* gives the number of persons who worked for a relatively long part of the 365 days preceding the date of survey. The work force, considering both the *usual principal status* and the *subsidiary status*, includes the persons who (a) either worked for a relatively long part of the 365 days preceding the date of survey and (b) also those persons from among the remaining population who had worked at least for 30 days during the reference period of 365 days preceding the date of survey. The workforce measured in terms of *current weekly status* gives the average of the workforce in a short period of one week during the survey period. The estimate of workforce, according to the *current weekly status* provides the number of persons worked for at least 1 hour on any day during the 7 days preceding the date of survey. The workforce measured in terms of *current daily status* gives the average picture of the person-days worked in a day during the survey period. For each person, 7 person-days were assigned for the 7 days preceding the date of survey and the estimate of the number of person-days worked in the reference week was obtained on the basis of the person-days worked according to the *current daily status* approach. The number of person-days worked on a day during the survey period is obtained by dividing the person-days worked in a week by 7.

The *usual status* approach, having the long reference period of last 365 days, adopted for classification of the population is unable to capture changes in the activity pattern caused by seasonal fluctuations. But the estimates obtained by adopting the *current weekly* and *current daily status* approaches are expected to reflect the overall effect caused by intermittent changes in the activity pattern during the year. The latter reflects even the changes that take place during a week and enables to account for person-days in work participation.

C1: WPR for all persons

- WPR according to *usual principal status* (PS) approach was 37 per cent at the all-India level. WPR in the rural areas (37 per cent) was higher than that in urban areas (34 per cent). Both in respect of rural as well as urban, WPR for male was significantly higher than the corresponding female WPR: 54 per cent for both rural male and urban male compared to 20 per cent for rural female and 12 per cent for urban female.

[Ref: Table S23]

- WPR in *usual status* (ps+ss) was 39 per cent. Rural WPR (41 per cent) was higher than urban WPR (35 per cent). In both rural and urban areas, female WPRs were considerably lower than male WPRs: while male WPR was nearly 55 per cent in rural areas, it was 26 per cent for females and urban male WPR was nearly 54 per cent compared to 14 per cent of urban female WPR.

[Ref: Table S24]

- The WPRs obtained from usual principal status (PS) and *usual status* (ps+ss) reflected higher increase in the female WPR from PS to *usual status* (ps+ss) than in case of males both in rural and urban areas. This increase was more for rural females compared to urban females implying that higher percentage of females were included in the workforce by their engagement in economic activity in subsidiary status only. Rural female workforce increased from 20 percent in the PS to 26 per cent in *usual status* (ps+ss) and for urban females the increase was from 12 per cent in PS to 14 per cent in *usual status* (ps+ss). The corresponding increase for rural males were from 54 per cent to 55 per cent and for urban males it was nearly unchanged at 54 per cent in PS as well as in *usual status* (ps+ss).

[Ref: Table S23 and Table S24]

- In CWS approach, WPR was lower than the WPR obtained in *usual status* (ps+ss) approach. At the all-India level, WPR in CWS was 37 per cent: 38 per cent in rural areas and 34 per cent in urban areas. Gender differentials in WPR in both rural and urban areas widened in CWS compared to those observed in *usual status* (ps+ss) estimates: rural male WPR was 53 per cent compared to rural female WPR of 22 per cent and urban male WPR was 54 per cent compared to urban female WPR of 13 per cent.

[Ref: Table S25]

- Estimates of WPR in CDS were further lower than those obtained in *usual status* (*ps+ss*). In CDS, WPR at the all-India level decreased to 34 per cent and this decrease in WPR was observed across all four segments of the population though in case of females such reduction was sharper. In rural areas, male WPR was 50 per cent compared to female WPR of 18 per cent and in urban areas, male WPR was 52 per cent compared to female WPR of 12 per cent.

[Ref: Table S26]

C2: WPR for persons of age 15-59 years

- WPR for persons of age 15-59 years in the *usual status* (*ps+ss*) was 58 per cent at the all-India level. WPR in rural areas was 62 per cent and in urban areas it was 51 per cent. Among the four segments of the population WPR, for rural male was the highest (83 per cent) followed by urban male (79 per cent), rural female (39 per cent) and it was the lowest for urban female (20 per cent).

[Ref: Table S8]

- At the all-India level, WPR in CWS was at 55 per cent. WPR in rural areas was 58 per cent in CWS (4 percentage points decrease compared to *usual status* (*ps+ss*)) and 49 per cent in urban areas (2 percentage points decrease compared to *usual status* (*ps+ss*)). Female WPRs in both rural and urban areas were lower compared to their male counterparts: rural male WPR was 81 per cent compared to rural female WPR of 34 per cent and urban male WPR was nearly 78 per cent compared to urban female WPR of 19 per cent.

[Ref: Table S9]

- Estimates of WPR in CDS at the all-India level was 34 per cent: 52 per cent in rural areas and 48 per cent in urban areas. Moreover, in CDS, rural female WPR was 27 per cent compared to 77 per cent for rural male and it was 17 per cent for urban females compared to 76 per cent of urban male.

[Ref: Table S10]

Figure 2: WPRs for different segments of the population considering all ages.

D. Unemployment rate (UR)

Unemployment Rate (UR) is the ratio of number of unemployed persons/person-days to the number of persons/person-days in labour force (i.e., number of employed and unemployed person/person-days). Estimates of UR are obtained by the three approaches used for classification of the activity statuses of the person. These are:

- i) number of persons usually unemployed based on '*usual status*' approach,
- ii) number of persons unemployed on an average in a week, based on the *current 'weekly status'*(CWS) approach, and
- iii) number of person-days unemployed on an average, on a day during the reference period of seven days preceding the date of survey, based on the *current 'daily status'*(CDS) approach.

In case of CDS, the UR is the ratio of number of unemployed person-days to the number of person-days in labour force.

Of these three, the first estimate indicates the numerical magnitude of the persons unemployed for a relatively long period during a reference period of 365 days, i.e., in usual *principal status* (PS) and approximates an indicator of chronically unemployed. However, some of the unemployed on the basis of this criterion might be working in a subsidiary capacity. One can, therefore, get alternative estimate of the unemployed excluding those employed in a subsidiary capacity during the reference period. The former is called the usually unemployed according to the *principal status* (PS) and the latter, the usually unemployed excluding those employed in *subsidiary status* or usual status adjusted i.e., *us (adjusted)*, which would conceptually be lower than the former.

The second estimate is based on the *current weekly status* and gives the average weekly picture during the survey year. It includes both chronic unemployment and also seasonal unemployment of those categorised as usually employed caused by seasonal fluctuations in economic activity.

The third estimate based on the *current daily status* concept considers person-days and gives average level of unemployment on a day during the survey year.

D1: UR for all persons

- UR in the *usual principal status* (PS) was nearly 3 per cent. Compared to the UR observed in the rural areas, UR in urban areas was higher: 2 per cent in rural areas and 4 per cent in urban areas. Female UR in urban areas was the highest (nearly 7 per cent) followed by urban male (3 per cent). In rural areas, URs for both male and female were nearly at the same level (2 per cent).

[Ref: Table S31]

- UR in the *usual status (adjusted)* was nearly 2 per cent with the rate in urban areas higher than that in rural areas (3 per cent in urban areas compared to 2 per cent in rural areas). Moreover, in rural areas UR for both male and female was at the same level (nearly 2 per cent) while in urban areas UR for females was double to that of the male UR (6 per cent for females compared to 3 per cent for males).

[Ref: Table S32]

- URs measured in CWS were higher than those obtained in the *usual status (adjusted)*. At the all-India level, UR in CWS was nearly double of the rate obtained in *usual status (adjusted)*. (2 per cent in *usual status (adjusted)* compared to 4 per cent in CWS). Like in *usual status (adjusted)*, in urban areas, UR in CWS was higher than that in rural areas (4 per cent in urban areas compared to 3 per cent in rural areas). In both rural and urban areas, URs of females were higher than those of males: in rural areas, UR was 3 per cent for males and 4 per cent for females while in urban areas the UR was 4 per cent for males and 7 per cent for females.

[Ref: Table S33]

- UR estimated in CDS was the highest (nearly 7 per cent) compared to those obtained in either in *usual status (adjusted)* or in CWS. UR in CDS was found to be higher in rural areas than those in urban areas: it was 7 per cent in rural areas compared to nearly 6 per cent in urban areas. In CDS, gender differentials in UR was observed in both rural and urban areas, with URs in females in both the rural and urban areas were higher than those of males: rural female UR was 8 per cent compared to 6 per cent for rural male and urban female UR was 9 per cent compared to 5 per cent for urban males.

[Ref: Table S34]

D2: UR for persons of age 15-59 years

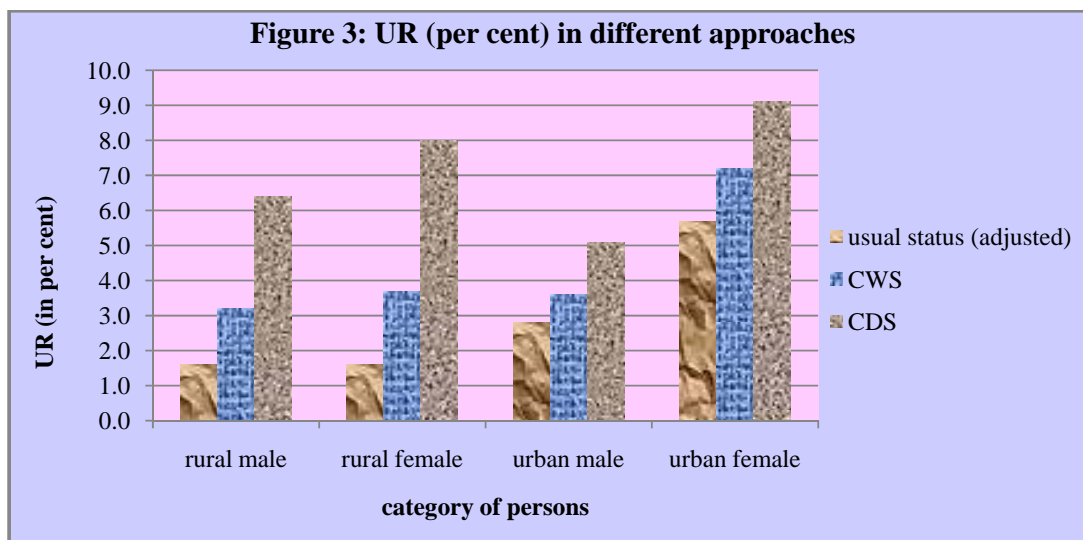

- In the *usual status (adjusted)*, URs for persons of age 15-59 years was at the same level as that for all the persons, nearly 2 per cent at the all-India level. Moreover, for all the four segments of the population, UR for persons of age 15-59 years was also found to be of the same order as that of all persons: nearly 2 per cent each for rural male and female, 3 per cent for urban male and 6 per cent for urban female.

[Ref: Table S16]

- In the *current statuses* also (CWS and CDS), URs for persons of age 15-59 years was at the same level as that for all the persons measured in these two approaches: at the all-India level, UR was nearly 4 per cent in CWS and 7 per cent in CDS. Moreover, not much variation in the URs for persons of age 15-59 years and for all persons was observed, except 1 percentage point increase in the UR for urban females of age 15-59 years in CDS compared to the UR (9 per cent) observed for females of all ages in the urban areas.

[Ref: Table S17 and S18]

Figure 3: URs measured in different approaches for all ages.

E. Distribution of usual status (*ps+ss*) workers according to by employment status

Employed persons are categorized into three broad activity groups according to their status of employment. These broad groups are: (i) *self-employed*, (ii) *regular wage/salaried employees* and (iii) *casual labour*. The distribution of the workers in different employment statuses have been presented in the *usual status (ps+ss)*.

- Among the three statuses in employment, at the all-India level in the rural areas, *self-employment* had the dominant share (nearly 54 per cent) in *usual status (ps+ss)* workforce, while the share of *casual labour* stood at 39 per cent and the rest (7 per cent) of the workforce was *regular wage/salaried employees*. In the urban areas, the share of *self-employment* and *regular wage/salaried employees* in the total *usual status (ps+ss)* workforce was 41 per cent each and the rest (18 per cent) was *casual labour*.

[Ref: Table S35]

- In both rural and urban areas, the share of female in *regular wage/salaried employees* was lower than that shared by males: in rural areas, nearly 9 per cent of the male workforce and 4 per cent of the female workforce was *regular wage/salaried employees*, whereas in urban areas 39 per cent of the female workforce and 42 per cent of the male workforce was *regular wage/salaried employees*.

[Ref: Table S35]

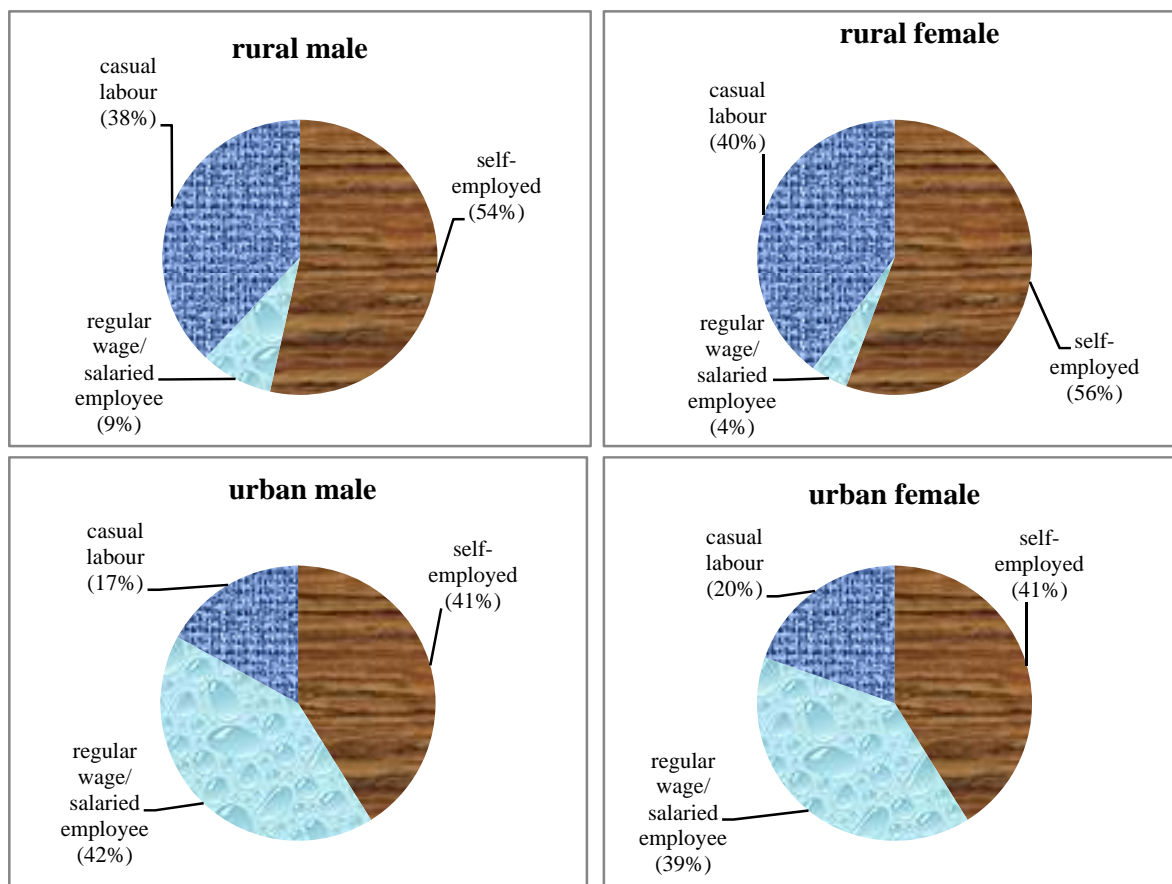

- Share of *casual labour* in female *usual status (ps+ss)* workforce was higher than that of males in both rural and urban areas: in rural areas, nearly 38 per cent of the male workforce and 40 per cent of the female workforce was *casual labour*, whereas in urban areas 17 per cent of the male workforce and 20 per cent of the female workforce was *casual labour*.

[Ref: Table S35]

- Share of *self-employment* in the rural female *usual status* (*ps+ss*) workforce was higher than that of males (56 per cent of rural females were *self-employed* against 54 per cent of males) whereas in urban areas for both male and female the share of *self-employment* was equal (41 per cent each).

[Ref: Table S35]

Figure 4: Percentage share of different broad statuses of employment in total workforce according to usual status (*ps+ss*)

F. Industrial distribution of workers according to usual status (*ps+ss*)

Information relating to the sector (industry) of employment in which a person was working was collected in this survey for the persons categorised as *employed*. In case of *usually employed*, this information was collected for both the *principal status* (*ps*) as well as *subsidiary status* (*ss*) workers. The industry classification followed in the survey was NIC 2004 for collection of information on industry of the employed. The results are discussed here with respect to the industrial distribution of *usual status* (*ps+ss*) workers at the broad sectoral level (i.e., agricultural sector, secondary sector including ‘mining and quarrying’ and tertiary sector¹).

¹ The broad groups of industries viz., agriculture, secondary and tertiary refer to the NIC-2004 industry divisions 01-05, 10-45 and 50-99, respectively.

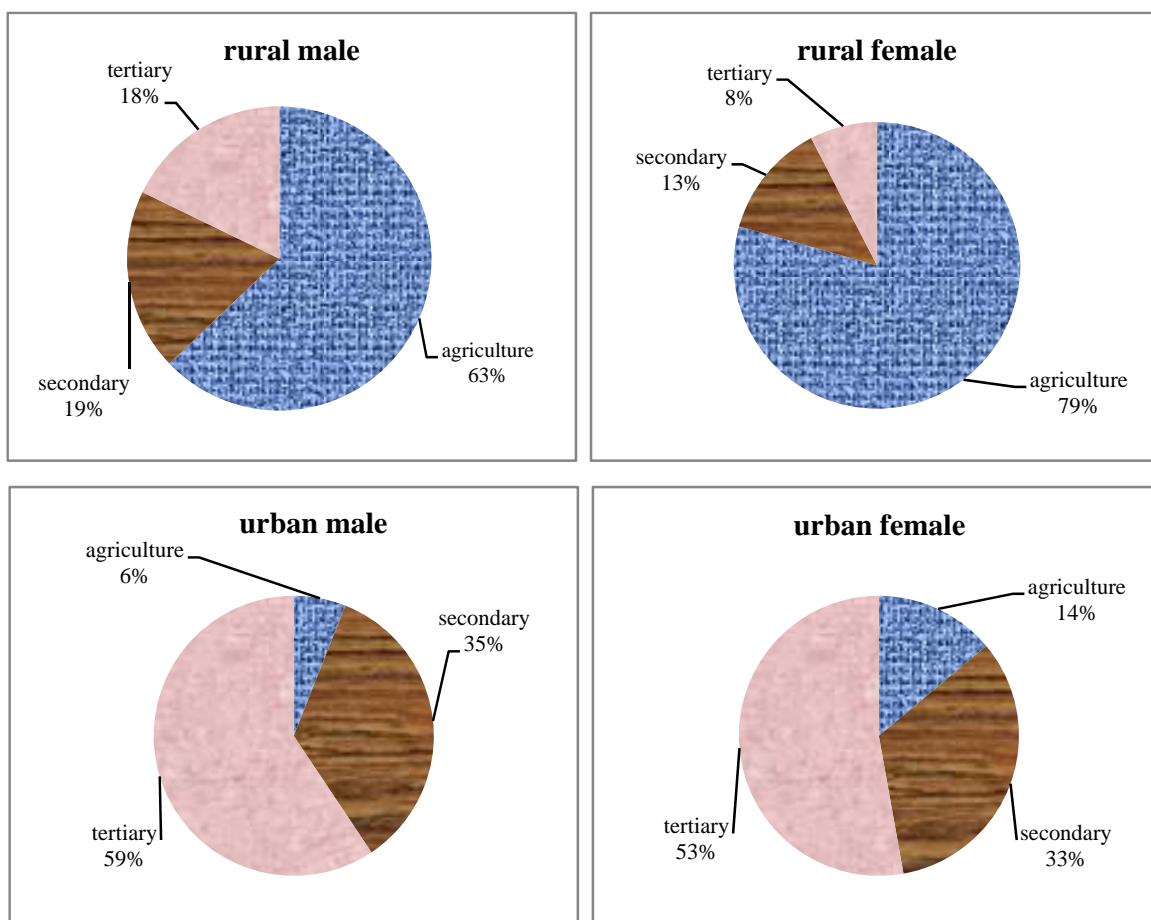

- In rural areas, nearly 63 per cent of the male *usual status (ps+ss)* workers were engaged in the *agricultural sector* while in the *secondary* and *tertiary sectors* nearly 19 per cent and 18 per cent of the male workers were engaged. There was a higher dependence of female workers on *agricultural sector*: nearly 79 per cent of them were engaged in *agricultural sector* while *secondary* and *tertiary sectors* shared 13 per cent and 8 per cent of the female workers, respectively.

[Ref: Table S36]

- The industrial distribution of the *usual status (ps+ss)* workers in the urban areas was distinctly different from that of rural areas. In urban areas the share of the *tertiary sector* was dominant followed by that of *secondary sector* while *agricultural sector* engaged only a small proportion of total workers for both male and females. It is seen that in urban areas, nearly 59 per cent of male workers and 53 per cent of the female workers were engaged in the *tertiary sector*. The *secondary sector* employed nearly 35 per cent of the male and 33 per cent of the female workers. The share of urban workforce in *agriculture* was nearly 6 per cent of male and 14 per cent for female workers.

[Ref: Table S36]

Figure 5: Percentage share of the three broad industrial sectors in total workforce in usual status (ps+ss)

G. Occupational structure of the workers in usual status (*ps+ss*)

For the workers in the *usual status (ps+ss)*, information on the type of occupation in which they were engaged was collected using the 3-digit classification of National Classification of Occupation (NCO-2004). Main findings of the occupational structure of the *usual status (ps+ss)* workforce are given below for different occupation divisions².

- In rural areas, about 86 per cent of the *usual status (ps+ss)* workers were engaged in three occupation divisions, viz., 'skilled agricultural and fishery workers', 'elementary occupations' and 'craft and related trades workers'. Among the rural male *usual status (ps+ss)* workers, occupation of nearly 38 per cent was 'skilled agricultural and fishery workers' and another 35 per cent had 'elementary occupations', while that of 10 per cent was 'craft and related trades workers'. For rural females also, the occupational structure of the workforce was similar to that of the male workforce: nearly 47 per cent was 'skilled agricultural and fishery workers' and another 39 per cent had 'elementary occupations', while 7 per cent was 'craft and related trades workers'.

[Ref: Table S37]

- In urban areas, among male *usual status (ps+ss)* workers, the share of 'craft and related trades workers' was the highest (19 per cent) followed by that of 'elementary occupations' (17 per cent) and 'service workers and shop & market sales workers' (16 per cent). Among the female *usual status (ps+ss)* workers in the urban areas, the share of 'elementary occupations' was the highest (26 per cent) followed by that of 'craft and related trades workers' (19 per cent). The occupation divisions, 'professionals', 'technicians and associate professionals' and 'service workers and shop & market sales workers' each accounted for 10 per cent share of the *usual status (ps+ss)* female workers.

[Ref: Table S37]

H. Daily Wage Rates of Regular Wage/Salaried Employees and Casual Labourers

Data on the average daily wage earnings received by *casual labourers and regular wage/salaried* employees during each of the seven days of the reference week were collected in this survey. Moreover, data on wages was collected for three categories of casual labours: *casual labour in public works other than MGNREG public works*, *casual labour in MGNREG public works* and *casual labour in works other than public works*. For *casual labour in public works*, the wage rates are presented for rural areas. It may be noted that *regular wage/salaried* earners, generally, receive bonus and perquisites such as free

² The occupation divisions of NCO-2004 are: **Division 1:** Legislators, senior officials and managers, **Division 2:** Professionals, **Division 3:** Technicians and associate professionals, **Division 4:** Clerks, **Division 5:** Service workers and shop & market sales workers, **Division 6:** Skilled agricultural and fishery workers, **Division 7:** Craft and related trades workers, **Division 8:** Plant and machine operators and assemblers, **Division 9:** Elementary occupations and **Division x:** Workers not classified by occupations,

accommodation, reimbursement of expenditure for medical treatment, free telephones, etc., and those are evaluated at the cost to the employer at retail prices and duly apportioned for the reference week and also included in their earnings. In contrast, *casual labourers* are not entitled to the additional benefits besides the wage/salary that are enjoyed by the *regular wage/salaried* workers. Some findings on the wage rates (per day) of *casual labourers and regular wage/salaried* are presented.

- In urban areas, the average wage/salary was Rs. 364.95 and for the rural areas it was Rs. 231.59. In the rural areas, average wage/salary earnings per day received by male *regular wage/salaried* employees was Rs. 249.15 and for females it was Rs. 155.87, indicating the female-male wage ratio as 0.63. In urban areas, male wage rate was Rs. 377.16 against the female wage rate of Rs. 308.79, indicating female-male wage ratio as 0.82.

[Ref: Table S38]

- Wage rates (per day) for *casual labour in works other than public works* in rural areas was Rs. 93.06 and in urban areas it was Rs. 121.83. In the rural areas, average wage/salary earnings per day received by male *casual labours engaged in works other than public works* was Rs. 101.53 and for females it was Rs. 68.94 while in urban areas, the wage rates for *casual labours other than public works* was Rs. 131.92 for males and Rs. 76.73 for females.

[Ref: Table S39]

- In rural areas, wage rates (per day) for *casual labour in public works other than MGNREG public works* was Rs. 98.33 for males and Rs. 86.11 for females. For *casual labour in MGNREG public works*, wage rate (per day) in rural areas was Rs. 90.93 for males and Rs. 87.20 for females.

Labour force participation rate (LFPR): LFPR is defined as the number of persons/person-days in the labour force per 1000 persons/person-days

Worker Population Ratio (WPR): WPR defined as the number of persons/person-days employed per 1000 persons/person-days.

Proportion Unemployed (PU): It is defined as the number of persons/person-days unemployed per 1000 persons/person-days.

Unemployment Rate (UR): UR is defined as the number of persons/person-days unemployed per 1000 persons/person-days in the labour force (which includes both the employed and unemployed).

The labour force indicators derived from the NSS employment and unemployment surveys are generally presented as ratios. Using the projected populations made available by the office of the Registrar General of India (RGI), referenced to 1st January 2010, which is the mid-point of the survey period of NSS 66th round, the estimates of absolute number of labour force, workforce and unemployed are derived and the same are presented in Table S1.1. For comparison purposes, these numbers have been derived for 61st round also for the mid-point of the survey period of NSS 61st round (i.e, 1st January 2005), in respect of male and female in rural and urban domains, respectively.

| Table S1.1: Estimated persons/person-days (in million) in different broad activity statuses | | | | |

Appendix A

Concepts and Definitions

Appendix - A

Concepts and Definitions

1 The concepts and definitions of some important terms used in the survey and relevant to this report are explained in the following paragraphs.

1.1 **Household:** A group of persons who normally lived together and took food from a common kitchen constituted a household. The adverb “normally” means that temporary visitors and guests (whose total period of stay in the household was expected to be less than 6 months) were excluded but temporary stay-aways (whose total period of absence from the household was expected to be less than 6 months) were included. Thus a child residing in a hostel for studies was excluded from the household of his/her parents, but a resident domestic servant or paying guest (but not just a tenant in the house) was included in the employer’s/host’s household. “Living together” was given more importance than “sharing food from a common kitchen” in drawing the boundaries of a household in case the two criteria were in conflict. However, in the special case of a person taking food with his family but sleeping elsewhere (say, in a shop or a different house) due to shortage of space, the household formed by such a person’s family members was taken to include the person also. Each inmate of a hotel, mess, boarding-lodging house, hostel, etc., was considered to be a single-member household except that a family living in a hotel (say) was considered one household only. The same principle was applicable for the residential staff of such establishments. The size of a household is the total number of persons in the household.

1.2 **Age (years):** The age in completed years, as on the date of survey, of the household members were recorded.

1.3 **Economic activity:** The entire spectrum of human activity falls into two categories – economic activities and non-economic activities. Any activity resulting in production of goods and services that add value to national product was considered as an economic activity for the employment and unemployment survey. Such activities included production of all goods and services for market (i.e. for pay or profit) including those of government services, and, the production of primary commodities for own consumption and own account production of fixed assets.

1.3.1 The full spectrum of economic activities as defined in the UN system of National Accounts was not covered in the definition adopted for the NSS 66th round survey of Employment and Unemployment. Production of any good for own consumption is considered as economic activity by UN System of National Accounts but production of only primary goods for own consumption was considered as economic activity by NSSO. While the former considers activities like own account processing of primary products as economic activities, in the NSS surveys, processing of primary products for own consumption was not considered as economic activity.

1.3.2 The term 'economic activity' as defined in the employment and unemployment survey of NSS 66th round, therefore, included:

- (i) all the market activities performed for pay or profit which result in production of goods and services for exchange.
- (ii) of the non-market activities,
 - (a) all the activities relating to the primary sector (i.e. industry Divisions 01 to 14 of NIC-2004) which result in production (including free collection of uncultivated crops, forestry, firewood, hunting, fishing, mining, quarrying, etc.) of primary goods for own consumption
 - and
 - (b) activities relating to the own-account production of fixed assets, which include production of fixed assets including construction of own houses, roads, wells, etc., and of machinery, tools, etc., for household enterprise and also construction of any private or community facilities free of charge. A person may be engaged in own account construction in the capacity of either a labourer or a supervisor.

As per the practice followed in earlier rounds, certain activities like prostitution, begging, etc., which though fetched earnings, were not considered as economic activities. Activity status of a person was judged irrespective of the situation whether such activity was carried out illegally in the form of smuggling or not.

1.4 **Activity status:** It is the activity situation in which a person was found during the reference period with regard to the person's participation in economic and non-economic activities. According to this, a person could be in one or a combination of the following three broad activity statuses during a reference period:

- (i) working or being engaged in economic activity (work) as defined above,
- (ii) being not engaged in economic activity (work) but either making tangible efforts to seek 'work' or being available for 'work' if 'work' is available and
- (iii) being not engaged in any economic activity (work) and also not available for 'work'.

Broad activity statuses mentioned in (i) and (ii) above are associated with 'being in labour force' and the last with 'not being in the labour force'. Within the labour force, broad activity status (i) and (ii) were associated with 'employment' and 'unemployment', respectively.

1.4.1 Identification of each individual in terms of a unique activity status could pose a problem when more than one of the three broad activity statuses listed above were concurrently obtained for a person. In such an eventuality, the identification uniquely under any one of the three broad activity statuses was done by adopting either *the major time* or *priority criterion*. The former was used for classification of persons according to the 'usual activity status' approach and the latter for classification of persons according to the 'current activity status'

approach. Each of the three broad activity statuses was further sub-divided into several detailed activity categories. If a person categorised as engaged in economic activity by adopting one of the two criteria mentioned above was found to be pursuing more than one economic activity during the reference period, the appropriate detailed activity status code related to that activity in which relatively long time had been spent. A similar procedure was adopted for assigning detailed activity code for persons categorised as engaged in non-economic activity and pursuing more than one non-economic activities.

1.4.2 The detailed activity statuses under each of the three broad activity statuses (viz. employed, unemployed and not in labour force) and the corresponding codes used in the survey are given below:

| <u>code</u> | <u>description</u> |
|--|---|
| working (or employed) | |
| <i>self-employed</i> | |
| 11 | worked in household enterprises (self-employed) as own-account worker |
| 12 | worked in household enterprises (self-employed) as an employer |
| 21 | worked in household enterprises (self-employed) as helper |
| <i>regular wage/ salaried employee</i> | |
| 31 | worked as regular wage/salaried employee |
| <i>casual labour</i> | |
| 41 | worked as casual wage labour in public works other than Mahatma Gandhi NREG public works |
| 42 | worked as casual wage labour in Mahatma Gandhi NREG public works |
| 51 | worked as casual wage labour in other types of works |
| 61 | did not work owing to sickness though there was work in household enterprise |
| 62 | did not work owing to other reasons though there was work in household enterprise |
| 71 | did not work owing to sickness but had regular salaried/wage employment |
| 72 | did not work owing to other reasons but had regular salaried/wage employment |
| not working but seeking/available for work (or unemployed) | |
| 81 | sought work or did not seek but was available for work (for usual status approach) |
| 81 | sought work (for current weekly status approach) |
| 82 | did not seek but was available for work (for current weekly status approach) |
| neither working nor available for work (or not in labour force) | |
| 91 | attended educational institutions |
| 92 | attended to domestic duties only |
| 93 | attended to domestic duties and was also engaged in free collection of goods (vegetables, roots, firewood, cattle feed, etc.), sewing, tailoring, weaving, etc. for household use |
| 94 | rentiers, pensioners, remittance recipients, etc. |
| 95 | not able to work owing to disability |
| 97 | others (including beggars, prostitutes, etc.) |
| 98 | did not work owing to sickness (for casual workers only) |
| 99 | children of age 0-4 years |

It may be noted that codes 61, 62, 71, 72, 82 and 98 were applicable for current weekly status and current daily status approaches only. Moreover, activity status code 41 in the usual status is used for casual wage labour in all types of *public works*, whereas in the current activity status, code 41 is for casual wage labour in *public works* other than MGNREG public works and code 42 is for casual wage labour in MGNREG public works.

1.5 Workers (or employed): Persons who were engaged in any economic activity or who, despite their attachment to economic activity, abstained from work for reason of illness, injury or other physical disability, bad weather, festivals, social or religious functions or other contingencies necessitating temporary absence from work, constituted workers. Unpaid helpers who assisted in the operation of an economic activity in the household farm or non-farm activities were also considered as workers. Relevant activity status codes 11 to 72 were assigned for workers. Workers were further categorized as *self-employed* (relevant activity status codes: 11, 12, 21, 61, 62), *regular salaried/wage employee* (relevant activity status codes: 31, 71, 72), and *casual wage labour* (relevant activity status codes: 41, 42 and 51).

1.6 Seeking or available for work (or unemployed): Persons who, owing to lack of work, had not worked but either sought work through employment exchanges, intermediaries, friends or relatives or by making applications to prospective employers or expressed their willingness or availability for work under the prevailing conditions of work and remuneration, were considered as those 'seeking or available for work' (or unemployed). Activity status codes 81 or 82 were assigned for unemployed.

1.7 Labour force: Persons who were either 'working' (or employed) or 'seeking or available for work' (or unemployed) constituted the labour force. Persons with activity status codes 11 – 82 constituted the labour force.

1.8 Not in labour force: Persons who were neither 'working' nor 'seeking or available for work' for various reasons during the reference period were considered as 'not in labour force'. Persons under this category are students, those engaged in domestic duties, rentiers, pensioners, recipients of remittances, those living on alms, infirm or disabled persons, too young persons, prostitutes, etc. and casual labourers not working due to sickness. Activity status codes 91-95, 97 and 98 were assigned for persons belonging to category 'not in labour force'.

1.9 Self-employed: Persons who operated their own farm or non-farm enterprises or were engaged independently in a profession or trade on own-account or with one or a few partners were deemed to be self-employed in household enterprises. The essential feature of the self-employed is that they have *autonomy* (decide how, where and when to produce) and *economic independence* (in respect of choice of market, scale of operation and finance) for carrying out their operation. The remuneration of the self-employed consists of a non-separable combination of two parts: a reward for their labour and profit of their enterprise. The combined remuneration is wholly determined by the revenue from sales after netting out value of purchased inputs used in production.

1.9.1 Categories of self-employed persons: Self-employed persons were categorised as follows:

- (i) **own-account workers**: those self-employed persons who operated their enterprises on their own account or with one or a few partners and who, during the reference period, by and large, ran their enterprise without hiring any labour. They could, however, have had unpaid helpers to assist them in the activity of the enterprise;
- (ii) **employers**: those self-employed persons who worked on their own account or with one or a few partners and, who, by and large, ran their enterprise by hiring labour; and
- (iii) **helpers in household enterprise**: those self-employed persons (mostly family members) who were engaged in their household enterprises, working full or part time and did not receive any regular salary or wages in return for the work performed. They did not run the household enterprise on their own but assisted the related person living in the same household in running the household enterprise.

1.10 **Regular wage/salaried employee**: These were persons who worked in others' farm or non-farm enterprises (both household and non-household) and, in return, received salary or wages on a regular basis (i.e. not on the basis of daily or periodic renewal of work contract). This category included not only persons getting time wage but also persons receiving piece wage or salary and paid apprentices, both full time and part-time.

1.11 **Casual wage labourer**: A person who was casually engaged in others' farm or non-farm enterprises (both household and non-household) and, in return, received wages according to the terms of the daily or periodic work contract, was a casual wage labourer.

1.12 **Public works**: 'Public works' were those activities which were sponsored by Government or Local Bodies, and which covered local area development works like construction of roads, dams, bunds, digging of ponds, etc., as relief measures, or as an outcome of employment generation schemes under the poverty alleviation programme such as *Mahatma Gandhi National Rural Employment Guarantee* (MGNREG) public works, Sampoorna Grameen Rozgar Yojana (SGRY), National Food for Work Programme (NFFWP), etc. The coverage of schemes under 'public works' was restricted to those schemes through which the Government generated wage employment under poverty alleviation programme, or relief measures. The types of works that were generally undertaken through these schemes, were watershed development, drought proofing, land levelling, flood control, laying pipes or cables, sanitation, water harvesting, irrigation canal, development of orchard, road construction, building construction / repair, running crèche, etc. To distinguish between 'public works' and works not classifiable as 'public works', some broad characteristics of 'public work' were identified, viz. the primary objective is generation of wage employment and poverty alleviation, and creation of community asset as an outcome in achieving those main objectives. It is to be noted that the existing activity status code 41 (casual wage labour in public works) was split into two codes for assigning activity status codes as per current daily activity status and current weekly activity status, as follows:

- (i) worked as casual wage labour in public works other than Mahatma Gandhi National Rural Employment Guarantee (MGNREG) public works – 41

- (ii) worked as casual wage labour in Mahatma Gandhi National Rural Employment Guarantee (MGNREG) public works – 42

However, in the usual activity status, code 41 was used for casual wage labour in public works, which included all types of public works and code 42 was not applicable in the usual activity status.

1.13 Different approaches followed to determine activity status: The persons surveyed were classified into various activity categories on the basis of the activities pursued by them during certain specified reference periods. There were three reference periods for this survey. These are: (i) one year (ii) one week and (iii) each day of the reference week. Based on these three periods, three different measures of activity status are arrived at. These are termed respectively as usual status, current weekly status and current daily status. The procedures adopted to arrive at the usual status, current weekly status and current daily status are elucidated below.

1.13.1 Usual principal activity status: The usual activity status relates to the activity status of a person during the reference period of 365 days preceding the date of survey. The activity status on which a person spent relatively long time (i.e. major time criterion) during the 365 days preceding the date of survey is considered as the *usual principal activity status* of the person. To decide the usual principal activity of a person, first a two stage dichotomous classification was followed for determining the broad usual principal activity status (employed or unemployed or not in labour force) of the person. At the first stage, persons were first categorised as those in the *labour force* (either employed or unemployed) and those *not in the labour force* depending on the major time spent during the 365 days preceding the date of survey. Persons thus adjudged as not belonging to the labour force were assigned the broad activity status 'neither working nor available for work' (*not in the labour force*). At the second stage, for persons belonging to the labour force, the broad activity status of either 'working' (*employed*) or 'not working but seeking and/or available for work' (*unemployed*) was ascertained based on the same criterion viz. relatively long time spent in accordance with either of the two broad statuses within the labour force during the 365 days preceding the date of survey. Within the broad activity status so determined, the detailed activity status of a person pursuing more than one such activity was determined once again on the basis of the relatively long time spent on such activities. In terms of activity status codes, codes 11-51 were assigned to persons classified as workers and codes 91-97 to those not in the labour force. In the usual status approach, a single code 81 was assigned to persons seeking or available for work (unemployed persons) while two separate codes 81 (sought work) and 82 (did not seek but was available for work) were assigned to unemployed persons according to current weekly status and current daily status approach.

1.13.2 Usual subsidiary economic activity status: A person whose usual principal status was determined on the basis of the major time criterion could have pursued some economic activity for a shorter time throughout the reference year of 365 days preceding the date of survey or for a minor period, which is not less than 30 days, during the reference year. The status in which such economic activity was pursued was the subsidiary economic activity status of that person. Activity status codes 11 to 51 only were used for the subsidiary economic activity performed

by a person. It may be noted that engagement in work in subsidiary capacity may arise out of the two following situations:

- (i) a person may be engaged in a relatively long period during the last 365 days in some economic (non-economic) activity and for a relatively minor period, which is not less than 30 days (not necessarily for a continuous period), in another economic activity (any economic activity). The economic activity, which was pursued for a relatively minor period *but not simultaneously with principal activity*, was considered as his/her subsidiary economic activity.
- (ii) a person may be pursuing an economic activity (non-economic activity) almost throughout the year in the principal status and also simultaneously pursuing another economic activity (any economic activity) for a relatively shorter time in a subsidiary capacity. The economic activity, which was pursued for a relatively shorter time, was considered as his/her subsidiary economic activity.

1.13.3 Usual activity status considering principal and subsidiary status taken together: The usual status, determined on the basis of the usual principal activity and usual subsidiary economic activity of a person taken together, is considered as the usual activity status of the person and is written as usual status (ps+ss). According to the usual status (ps+ss), workers are those who perform some work activity either in the principal status or in the subsidiary status. Thus, a person who is not a worker in the usual principal status is considered as worker according to the usual status (ps+ss), if the person pursues some subsidiary economic activity for 30 days or more during 365 days preceding the date of survey.

1.13.4 Current weekly activity status: The current weekly activity status of a person is the activity status obtaining for a person during a reference period of 7 days preceding the date of survey. It is decided *on the basis of a certain priority cum major time criterion*.

1.13.4.1 According to the *priority criterion*, the status 'working' gets priority over the status 'not working but seeking or available for work' that, in turn, gets priority over the status 'neither working nor available for work'. A person was considered working (or employed) if he/she, while pursuing any economic activity, had worked for at least one hour on at least one day during the 7 days preceding the date of survey. A person was considered 'seeking or available for work (or unemployed)' if, during the reference week, no economic activity was pursued by the person but he/she made efforts to get work or had been available for work any time during the reference week though not actively seeking work in the belief that no work was available. A person who had neither worked nor was available for work any time during the reference week was considered as engaged in non-economic activities (or not in labour force).

1.13.4.2 After deciding the *broad current weekly activity status* of a person on the *basis of 'priority' criterion*, the *detailed current activity status* was then decided *on the basis of 'major time' criterion if that person pursued multiple economic activities*. The current weekly activity status of a person could be any of the valid codes within 11 to 98. Of these codes, 11 to 72 pertained to workers, 81 to 82 for unemployed and 91 to 98 for persons not in the labour force.

1.14 **Current daily activity status:** The activity pattern of the population, particularly in the informal sector, is such that during a week, and sometimes, even during a day, a person could pursue more than one activity. Moreover, many people could even undertake both economic and non-economic activities on the same day of a reference week. The current daily activity status for a person was determined on the basis of his/her activity status on each day of the reference week *using a priority-cum-major time criterion* (day to day labour time disposition). Time disposition was recorded for every member of the sample households. This involved recording of different activities pursued by the members along with the time intensity in quantitative terms for each day of the reference week. The different activities were identified and recorded in terms of 'activity status' and 'industry' codes for persons in urban areas and 'activity status', 'industry' and 'operation' codes for persons in rural areas. The description (and codes used) of current daily activity statuses is the same as those of current weekly activity status. The terms 'industry' and 'operation' are explained later. The following points were considered for assigning the time intensity and determining the current daily status of a person:

- i) Each day of the reference week was looked upon as comprising either two 'half days' or a 'full day' for assigning the activity status. For recording time disposition for activities pursued by a person in a day, an intensity of 1.0 was given against an activity that was done for 'full day' and an intensity of 0.5 against the activity which was done for 'half day'.
- ii) A person was considered 'working' (employed) for the full day if he/she had worked for 4 hours or more during the day.
- iii) If a person was engaged in more than one of the economic activities for 4 hours or more on a day, he/she was assigned two out of the various economic activities on which he/she devoted relatively long time on the reference day. In such cases, an intensity of 0.5 was given for each of these two economic activities.
- iv) If the person had worked for 1 hour or more but less than 4 hours, he/she was considered 'working' (employed) for half-day and 'seeking or available for work' (unemployed) or 'neither seeking nor available for work' (not in labour force) for the other half of the day depending on whether he was seeking/available for work or not.
- v) If a person was not engaged in any 'work' even for 1 hour on a day but was seeking/available for work for 4 hours or more, he was considered 'unemployed' for the entire day. But if he was 'seeking/available for work' for more than 1 hour and less than 4 hours only, he was considered 'unemployed' for half day and 'not in labour force' for the other half of the day.
- vi) A person who neither had any 'work' to do nor was available for 'work' even for half a day was considered 'not in labour force' for the entire day and was assigned one or two of the detailed non-economic activity statuses depending upon the activities pursued during the reference day.

1.14.1 The current weekly status of a person is derived from the intensities assigned for the daily activities performed by a person during the 7 days of the reference week.

1.15 Industry and occupation of the work activity: For the employed persons, to record the industry of work, 5-digit classification of NIC-2004 was used and to record the type of occupation, 3-digit classification of NCO-2004 was used. To identify certain category of workers under Division 95 (Private households with employed persons) of NIC-2004, eight additional codes were used in the survey viz., housemaid /servant (95001), cook (95002), gardener (95003), gatekeeper/chowkidar/watchman (95004), governess/baby-sitter (95005), tutor (95006), driver (95007) and 'others' (95009). Industry Divisions 96 and 97 of NIC-2004 were not used for the purpose of collection of information on industry of activity. The entire activities described under Division 97 are not under the production boundary of Indian System of National Accounts (ISNA) and are not also considered as economic activities in the NSS survey. A part of the activities under Division 96 (viz., hunting and gathering, farming and the production of shelter), which is within the production boundary of ISNA, is also considered as economic activities in NSS surveys and the industry of these undifferentiated activities were judged in the usual manner as done now, by considering the industry in which major time was spent. Thus, this part of activities got classified against the respective industries under divisions 01-14 relating to the primary sector or 45 relating to construction. The rest of Division 96 is outside the production boundary of ISNA and was not considered as economic activity for the NSS survey. Broad structure of NIC-2004 (Sections and Divisions) and description of occupation divisions/sub-divisions of NCO-2004 have been presented at the end of this Chapter.

1.16 Procedure followed for collecting employment and unemployment particulars in different NSS rounds: In the annual rounds from 45th (July 1989-June 1990) to 59th (January to December 2003), only activity status and industry of work according to usual principal status, subsidiary status and current weekly status approach were collected through a few columns of the demographic block of the Consumer Expenditure Schedule (Schedule 1.0). Particulars of employment and unemployment according to the usual principal status and usual subsidiary status were collected in the annual rounds by following a similar approach as in the quinquennial rounds. In the quinquennial rounds, particulars of current daily status of the household members are collected and current weekly status is derived from them, whereas in the annual rounds, current weekly status has been obtained through a direct query. In the 60th round (January-June 2004), a separate schedule on employment and unemployment was canvassed for the first time in an annual round and particulars on employment and unemployment was collected in the same manner as that of the quinquennial rounds. In NSS 62nd round (July 2005 - June 2006) also a separate schedule, similar to the one canvassed during NSS 60th round, on employment and unemployment was canvassed and in this round also particulars on employment and unemployment was collected in the same manner as that of the quinquennial rounds. In the NSS 64th round (July 2007-June 2008) a separate schedule was also used to collect data on employment and unemployment. The scope of the schedule was further enhanced with the inclusion information on the some particulars of the migrant households, migrant household members and out-migrants. In this round also particulars on employment and unemployment was collected in the same manner as that of the quinquennial rounds.

BROAD STRUCTURE OF NIC 2004
(SECTIONS & DIVISIONS)

Section A: Agriculture, hunting and forestry

Division 01: Agriculture, hunting and related service activities

Division 02: Forestry, logging and related service activities

Section B: Fishing

Division 05: Fishing, aquaculture and service activities incidental to fishing

Section C: Mining and quarrying

Division 10: Mining of coal and lignite; extraction of peat

Division 11: Extraction of crude petroleum and natural gas; service activities incidental to oil and gas extraction, excluding surveying

Division 12: Mining of uranium and thorium ores

Division 13: Mining of metal ores

Division 14: Other mining and quarrying

Section D: Manufacturing

Division 15: Manufacture of food products and beverages

Division 16: Manufacture of tobacco products

Division 17: Manufacture of textiles

Division 18: Manufacture of wearing apparel; dressing and dyeing of fur

Division 19: Tanning and dressing of leather; manufacture of luggage, handbags, saddlery, harness and footwear

Division 20: Manufacture of wood and of products of wood and cork, except furniture; manufacture of articles of straw and plaiting materials

Division 21: Manufacture of paper and paper products

Division 22: Publishing, printing and reproduction of recorded media

Division 23: Manufacture of coke, refined petroleum products and nuclear fuel

Division 24: Manufacture of chemicals and chemical products

Division 25: Manufacture of rubber and plastics products

Division 26: Manufacture of other non-metallic mineral products

Division 27: Manufacture of basic metals

Division 28: Manufacture of fabricated metal products, except machinery and equipment

Division 29: Manufacture of machinery and equipment n.e.c.

Division 30: Manufacture of office, accounting and computing machinery

Division 31: Manufacture of electrical machinery and apparatus n.e.c.

Division 32: Manufacture of radio, television and communication equipment and apparatus

Division 33: Manufacture of medical, precision and optical instruments, watches and clocks

Division 34: Manufacture of motor vehicles, trailers and semi-trailers

Division 35: Manufacture of other transport equipment

Division 36: Manufacture of furniture; manufacturing n.e.c.

Division 37: Recycling

Section E: Electricity, gas and water supply

Division 40: Electricity, gas, steam and hot water supply

Division 41: Collection, purification and distribution of water

Section F: Construction

Division 45: Construction

Section G: Wholesale and retail trade; repair of motor vehicles, motorcycles and personal and household goods

Division 50: Sale, maintenance and repair of motor vehicles and motorcycles; retail sale of automotive fuel

Division 51: Wholesale trade and commission trade, except of motor vehicles and motorcycles

Division 52: Retail trade, except of motor vehicles and motorcycles; repair of personal and household goods

Section H: Hotels and restaurants

Division 55: Hotels and restaurants

Section I: Transport, storage and communications

Division 60: Land transport; transport via pipelines

Division 61: Water transport

Division 62: Air transport

Division 63: Supporting and auxiliary transport activities; activities of travel agencies

Division 64: Post and telecommunications

Section J: Financial intermediation

Division 65: Financial intermediation, except insurance and pension funding

Division 66: Insurance and pension funding, except compulsory social security

Division 67: Activities auxiliary to financial intermediation

Section K: Real estate, renting and business activities

Division 70: Real estate activities

Division 71: Renting of machinery and equipment without operator and of personal and household goods

Division 72: Computer and related activities

Division 73: Research and development

Division 74: Other business activities

Section L: Public administration and defence; compulsory social security

Division 75: Public administration and defence; compulsory social security

Section M: Education

Division 80: Education

Section N: Health and social work

Division 85: Health and social work

Section O: Other community, social and personal service activities

Division 90: Sewage and refuse disposal, sanitation and similar activities

Division 91: Activities of membership organizations n.e.c.

Division 92: Recreational, cultural and sporting activities

Division 93: Other service activities

Section P: Activities of private households as employers and undifferentiated production activities of private households

Division 95: Activities of private households as employers of domestic staff

Division 96: Undifferentiated goods-producing activities of private households for own use

Division 97: Undifferentiated service-producing activities of private households for own use

Section Q: Extraterritorial organizations and bodies

Division 99: Extraterritorial organizations and bodies

Appendix B

Sample Design and Estimation Procedure

Appendix - B

Sample Design and Estimation Procedure

1. Introduction

1.1 The 66th round (July 2009-June 2010) of NSS was earmarked for survey on 'Household Consumer Expenditure' and 'Employment and Unemployment'. The survey covered the whole of the Indian Union *except* (i) interior villages of Nagaland situated beyond five kilometres of the bus route and (ii) villages in Andaman and Nicobar Islands which remain inaccessible throughout the year. All the sample first stage units of both rural and urban areas of Leh, Kargil and Poonch districts of Jammu & Kashmir became casualty and therefore these districts were outside the survey coverage. In addition to these, all the sample first stage units of the following areas were casualty in different sub-rounds: (i) in sub-rounds 1, 2, and 4, both rural and urban areas of Rajouri district of Jammu & Kashmir, (ii) in sub-round 2, urban areas of Lakhisarai district of Bihar, (iii) in sub-round 3, rural areas of Doda district of Jammu & Kashmir. The estimates of the different sub-rounds, therefore, excluded these areas. The period of survey was of one year duration starting on 1st July 2009 and ending on 30th June 2010. The survey period of this round was divided into four sub-rounds of three months' duration each, the 1st sub-round period ranging from July to September 2009, the 2nd sub-round period from October to December 2009 and so on. In each of these four sub-rounds equal number of sample villages/ blocks (FSUs) were allotted for survey with a view to ensuring uniform spread of sample FSUs over the entire survey period.

2 Sample Design

2.1 A stratified multi-stage design was adopted for the 66th round survey. The first stage units (FSU) were the 2001 census villages (Panchayat wards in case of Kerala) in the rural sector and Urban Frame Survey (UFS) blocks in the urban sector. In addition, two non-UFS towns of Leh and Kargil of Jammu & Kashmir were also treated as FSUs in the urban sector. The ultimate stage units (USU) were households in both the sectors. Hamlet-groups/sub-blocks constituted the intermediate stage whenever these were formed in the sample FSUs.

2.2 *Selection of the first-stage units:* The various steps involved before making the selection of the FSUs are discussed at length in the following few paragraphs before taking up the issue of selection of USUs within FSUs.

2.2.1 *Sampling Frame for First Stage Units:* For the rural sector, the list of 2001 census villages (Panchayat wards in case of Kerala) constituted the sampling frame. For the urban sector, the list of latest available UFS blocks constituted the sampling frame. For non-UFS towns, frame consisted of the individual towns (only two towns, viz., Leh & Kargil constituted this frame).

2.2.2 *Stratification of the first stage units:* Within each district of a State/ UT, two basic strata were formed as follows:

- i) rural stratum comprising of all rural areas of the district and
- (ii) urban stratum comprising of all the urban areas of the district.

However, within the urban areas of a district, if there were one or more towns with population 10 lakhs or more as per population census 2001 in a district, each of them formed a separate basic stratum and the remaining urban areas of the district were considered as another basic stratum.

2.2.3 *Sub-stratification:* There was no sub-stratification in the urban sector. However, to net adequate number of child workers, for all rural strata, each stratum was divided into 2 sub-strata as follows:

sub-stratum 1: all villages with proportion of child workers (p) $> 2P$ (where P is the average proportion of child workers for the state/ UT as per Census 2001)

sub-stratum 2: remaining villages

2.2.4 *Allocation of FSU's among Strata:* At the all-India level, a total number of 12784 FSUs were allocated for survey in the central sample. In addition, 24 State sample FSUs (16 for rural sector and 8 for urban sector) of Leh and Kargil districts of J & K were included in the central sample. The total number of sample FSUs was allocated to the States and UTs in proportion to population as per census 2001 subject to the availability of investigators and ensuring minimum sample allocation to each State/ UT. The State/ UT level sample size was allocated between two sectors in proportion to population as per *census 2001* with double weightage to urban sector subject to the restriction that urban sample size for bigger states like Maharashtra, Tamil Nadu, etc. did not exceed the rural sample size. A minimum of 16 FSUs (to the extent possible) was allocated to each state/ UT separately for rural and urban areas. Further the State level allocations for both rural and urban areas were adjusted marginally in a few cases to ensure that each stratum/ sub-stratum got a minimum allocation of 4 FSUs. Within each sector of a State/ UT, the respective sample size was allocated to the different strata/ sub-strata in proportion to the population as per census 2001. Allocations at stratum/ sub-stratum level were adjusted to multiples of 4 with a minimum sample size of 4 and equal number of samples was allocated among the four sub rounds.

2.2.5 *Selection of first-stage units:* For the rural sector, from each stratum/ sub-stratum, required number of sample villages were selected by probability proportional to size with replacement (PPSWR), size being the population of the village as per Census 2001. For urban sector, from each stratum FSUs were selected by using Simple Random Sampling Without Replacement (SRSWOR). Both rural and urban samples were drawn in the form of two independent sub-samples.

2.3 *Selection of Ultimate Stage Units (USU) within a FSU:* The remaining paragraphs of this sub-section outlines the various steps leading to the actual selection of USUs within a FSU.

2.3.1 *Selection of hamlet-groups/sub-blocks:* Selected FSUs with approximate population 1200 or more were divided into a suitable number (say, D) of ‘hamlet-groups’ in the rural sector and ‘sub-blocks’ in the urban sector as stated below.

| approximate present population of the sample FSU | no. of hgs/sbs to be formed |
|--|-----------------------------|
| less than 1200 (no hamlet-groups/sub-blocks) | 1 |
| 1200 to 1799 | 3 |
| 1800 to 2399 | 4 |
| 2400 to 2999 | 5 |
| 3000 to 3599 | 6 |
|and so on | |

For rural areas of Himachal Pradesh, Sikkim, Uttarakhand (except four districts Dehradun (Plains), Nainital (Plains), Hardwar and Udham Singh Nagar), Poonch, Rajouri, Udhampur, Doda, Leh (Ladakh), Kargil districts of Jammu and Kashmir and Idukki district of Kerala, the number of hamlet-groups were formed as follows:

| approximate present population of the sample village | no. of hgs to be formed |
|--|-------------------------|
| less than 600 (no hamlet-groups) | 1 |
| 600 to 899 | 3 |
| 900 to 1199 | 4 |
| 1200 to 1499 | 5 |
|and so on | |

Hamlet-groups/ sub-blocks were formed in the sample FSU by more or less equalising populations. Two hamlet-groups (hg)/ sub-blocks (sb) were selected from a large FSU, wherever hamlet-groups/ sub-blocks were formed. This was done in the following manner – one hg/ sb with maximum percentage share of population was always selected and termed as hg/ sb 1; one more hg/ sb was selected from the remaining hg’s/ sb’s by simple random sampling (SRS) and termed as hg/ sb 2. Listing and selection of the households was done independently in the two selected hamlet-groups/ sub-blocks. The FSUs without hg/ sb formation were treated as sample hg/ sb number 1.

2.3.2 *Sampling frame of households:* All households listed in a village/UFS block where no hamlet-group/sub-block formation was done, or the households listed in the two selected hamlet-groups/sub-blocks of the village/UFS block where hamlet-group/sub-block formation was done, constituted the sampling frame of households.

2.3.3 *Stratification of rural households:* For employment and un-employment survey of NSS 66th round, all households listed in the selected FSU/hamlet group/sub-blocks were stratified into three second stage strata (SSS). The three second-stage-strata (SSS) formed in the rural areas were:

| SSS | Rural composition of SSS | number of households to be surveyed | |
|--------|---|-------------------------------------|---|
| | | FSU without hg/sb formation | FSU with hg/sb formation (for each hg/sb) |
| SSS 1: | relatively affluent households | 2 | 1 |
| SSS 2: | of the remaining, households having principal earning from non- agricultural activity | 4 | 2 |
| SSS 3: | other households | 2 | 1 |

Identification of affluent households was done by taking into account factors generally associated with affluent households such as: ownership of motor car/ jeep/ tractor/ combine-harvester/ truck/ bus/ etc.; consumer durables like DVD/ VCP/ refrigerator/ washing machine etc.; ownership of large business/ highly remunerative profession/ high salaried income etc.; ownership of spacious pucca house in good condition; ownership of 7 hectares or more of cultivable land; ownership of 3.5 hectares or more of irrigated land; ownership of a good number of cattle, buffaloes and camels (10 or more in number).

2.3.4 *Stratification of urban households:* Three second stage strata (SSS) were formed in the urban areas as follows:

| SSS | Urban composition of SSS | number of households to be surveyed | |
|--------|---|-------------------------------------|---|
| | | FSU without hg/sb formation | FSU with hg/sb formation (for each hg/sb) |
| SSS 1: | households having MPCE of top 10% of urban population (MPCE > B) | 2 | 1 |
| SSS 2: | households having MPCE of middle 60% of urban population ($A \leq MPCE \leq B$) | 4 | 2 |
| SSS 3: | households having MPCE of bottom 30% of urban population (MPCE < A) | 2 | 1 |

The cut-off points 'A' and 'B' (in Rs.) were determined from NSS 61st round data for **each NSS region** for urban areas in such a way that top 10% of the population have MPCE more than 'B' and bottom 30% of the population have MPCE less than A.

2.3.5 *Selection of households:* For employment-unemployment survey a total of 8 households were selected from each village/FSU. In both rural and urban areas, in case no hamlet-group/sub-block formation was done in the village/block, a number of 2, 4 and 2 households were selected from the second stage strata SSS1, SSS2 and SSS3, respectively. In case hamlet-groups/sub-blocks were formed in the village/block, a number of 1, 2 and 1 households were selected respectively from the second stage strata SSS1, SSS2 and SSS3 of each of the hamlet-groups/sub-blocks. The sample households from each of the second stage strata were selected by SRSWOR.

2.4 Number of village/blocks allotted for survey in the NSS 66th round along with the number of village/blocks actually surveyed and number of persons enumerated in respect of employment and unemployment survey are given for different states and union territories in Table 1 at the end of Appendix-B.

3. Estimation Procedure

Procedures for obtaining estimates of aggregates, ratios and their RSEs is briefly indicated below:

3.1 Notations:

s = subscript for s-th stratum

t = subscript for t-th sub-stratum (only for rural sector)

m = subscript for sub-sample (m = 1, 2)

i = subscript for i-th FSU [village (panchayat ward)/ block/ non-UFS town]

d = subscript for a hamlet-group/ sub-block (d = 1, 2)

j = subscript for j-th second stage stratum in an FSU/ hg/sb [j = 1, 2 or 3]

k = subscript for k-th sample household under a particular second stage stratum within an FSU/ hg/sb

D = total number of hg's/ sb's formed in the sample FSU

$D^* = 0$ if $D = 1$

= (D - 1) for FSUs with $D > 1$

N = total number of FSUs in any urban stratum

Z = total size of a rural stratum/sub-stratum (= sum of sizes for all the FSUs of a stratum/sub-stratum)

z = size of sample village used for selection.

n = number of sample FSUs surveyed including 'zero cases' but excluding casualty for a particular sub-sample and stratum/sub-stratum.

H = total number of households listed in a second-stage stratum of an FSU / hamlet-group or sub-block of sample FSU

h = number of households surveyed in a second-stage stratum of an FSU / hamlet-group or sub-block of sample FSU

x, y = observed value of characteristics x, y under estimation

\hat{X} , \hat{Y} = estimate of population total X, Y for the characteristics x, y

Under the above symbols,

y_{smidjk} = observed value of the characteristic y for the k-th household in the j-th second stage stratum of the d-th hg/ sb (d = 1, 2) of the i-th FSU belonging to the m-th sub-sample for the t-th sub-stratum of s-th stratum.

However, for ease of understanding, a few symbols have been suppressed in following paragraphs where they are obvious.

3.2 Estimation of aggregates for a particular sub-sample (m) and stratum (s):

3.2.1 Sub-sample estimate for a sub-stratum in rural areas:

For j-th second stage stratum of a sub-stratum:

$$\hat{Y}_j = \frac{Z}{n_j} \sum_{i=1}^{n_j} \frac{1}{z_i} \left[\frac{H_{i1j}}{h_{i1j}} \sum_{k=1}^{h_{i1j}} y_{i1jk} + D_i^* \times \frac{H_{i2j}}{h_{i2j}} \sum_{k=1}^{h_{i2j}} y_{i2jk} \right]$$

For all second-stage strata combined:

$$\hat{Y} = \sum_j \hat{Y}_j$$

3.2.2 Sub-sample estimate for a stratum in rural areas: Sub-sample estimate for a stratum will be obtained by adding sub-sample wise estimates of all the sub-strata (\hat{Y}_{st}) of the stratum.

3.2.3 Sub-sample estimate for a stratum in urban areas:

For j-th second stage stratum of a stratum:

$$\hat{Y}_j = \frac{N}{n_j} \sum_{i=1}^{n_j} \left[\frac{H_{i1j}}{h_{i1j}} \sum_{k=1}^{h_{i1j}} y_{i1jk} + D_i^* \times \frac{H_{i2j}}{h_{i2j}} \sum_{k=1}^{h_{i2j}} y_{i2jk} \right]$$

For all second-stage strata combined:

$$\hat{Y} = \sum_j \hat{Y}_j$$

3.3 Overall Estimate for Aggregates: Overall estimate for aggregates for a stratum (\hat{Y}_s) based on two sub-samples is obtained as:

$$\hat{Y}_s = \frac{1}{2} \sum_{m=1}^2 \hat{Y}_{sm}$$

3.4 Overall Estimate of Aggregates at State/UT/all-India level:

The overall estimate \hat{Y} at the State/ UT/ all-India level is obtained by summing the stratum estimates \hat{Y}_s over all strata belonging to the State/ UT/ all-India.

3.5 Estimates of Ratios: Let \hat{Y} and \hat{X} be the overall estimates of the aggregates Y and X for two characteristics y and x respectively at the State/ UT/ all-India level.

Then the combined ratio estimate (\hat{R}) of the ratio ($R = \frac{Y}{X}$) will be obtained as

$$\hat{R} = \frac{\hat{Y}}{\hat{X}}$$

3.6 *Estimates of Error*: The estimated variances of the above estimates will be as follows:

3.6.1 *For aggregate \hat{Y}* :

$V\hat{a}r(\hat{Y}) = \sum_s V\hat{a}r(\hat{Y}_s)$ where $V\hat{a}r(\hat{Y}_s)$ is given by

$V\hat{a}r(\hat{Y}_s) = \sum_t \frac{1}{4} (\hat{Y}_{st1} - \hat{Y}_{st2})^2$ for rural stratum, where \hat{Y}_{st1} and \hat{Y}_{st2} are the estimates for sub-sample 1 and sub-sample 2 respectively for stratum 's' and sub-stratum 't'.

and

$V\hat{a}r(\hat{Y}_s) = \frac{1}{4} (\hat{Y}_{s1} - \hat{Y}_{s2})^2$ for urban stratum, \hat{Y}_{s1} and \hat{Y}_{s2} being the stratum estimates for sub-sample 1 and 2 respectively.

3.6.2 *For ratio \hat{R}* :

$$M\hat{S}E(\hat{R}) = \frac{1}{4\hat{X}^2} \sum_s \sum_t \left[(\hat{Y}_{st1} - \hat{Y}_{st2})^2 + \hat{R}^2 (\hat{X}_{st1} - \hat{X}_{st2})^2 - 2\hat{R} (\hat{Y}_{st1} - \hat{Y}_{st2}) (\hat{X}_{st1} - \hat{X}_{st2}) \right]$$

for rural and

$$M\hat{S}E(\hat{R}) = \frac{1}{4\hat{X}^2} \sum_s \left[(\hat{Y}_{s1} - \hat{Y}_{s2})^2 + \hat{R}^2 (\hat{X}_{s1} - \hat{X}_{s2})^2 - 2\hat{R} (\hat{Y}_{s1} - \hat{Y}_{s2}) (\hat{X}_{s1} - \hat{X}_{s2}) \right]$$

for urban.

3.7 *Estimates of Relative Standard Error (RSE)*:

$$R\hat{S}E(\hat{Y}) = \frac{\sqrt{V\hat{a}r(\hat{Y})}}{\hat{Y}} \times 100$$

$$R\hat{S}E(\hat{R}) = \frac{\sqrt{M\hat{S}E(\hat{R})}}{\hat{R}} \times 100$$

Table B1: Number of FSUs (villages/urban blocks) allotted, number of FSUs surveyed and number of persons enumerated in different states and union territories

| State/UT/all-India | villages/blocks | | | | persons enumerated | |
|--------------------|-----------------|--------------|----------|-------|--------------------|--------|

Note: 1. Projected population as on 1st March 2009 and 1st March 2010 are from RGI (reference Tables 8 and 9 of the Population Projections for India and States: 2001-2026).

2. Table 8 provides projected population as on 1st March 2009 and 1st March 2010 for rural+urban combined and Table 9 provides projected population as on 1st March 2009 and 1st March 2010 for urban.

3. Projected population as on 1st January 2010 has been derived using the formula, $A = A1 * \left[\frac{A2}{A1}\right]^{[1/12]}^{10}$, where A1 is the population for 1st March 2009, A2 is the population for 1st March 2010 and A is the population for 1st January 2010.

4. Projected population as on 1st January 2010 has been derived for the rural+urban and urban separately and that for rural has been derived by subtracting these two.

Table C1: Projected population (000) as on 1st March 2009, 1st March 2010 and 1st January 2010 for each State/U.T

not literate -01, literate without formal schooling: EGS/ NFEC/ AEC -02, TLC -03, others -04; literate: below primary -05, primary -06, middle -07, secondary -08, higher secondary -10, diploma/certificate course -11, graduate -12, postgraduate and above -13.

col. (8): educational level - technical:

no technical education -01, technical degree in agriculture/ engineering/ technology/ medicine, etc. -02, diploma or certificate (below graduate level) in: agriculture -03, engineering/ technology -04, medicine -05, crafts -06, other subjects -07; diploma or certificate (graduate and above level) in: agriculture -08, engineering/ technology -09, medicine -10, crafts -11, other subjects -12.

col. (9): status of current attendance:

currently not attending:
never attended: school too far -01, to supplement household income -02, education not considered necessary -03, to attend domestic chores -04, others -05;
ever attended but currently not attending: school too far -11, to supplement household income -12, education not considered necessary -13, to attend domestic chores -14, others -15;
currently attending in: EGS/ NFEC/ AEC -21, TLC -22, pre-primary (nursery/ Kinder garten, etc.) -23, primary (class I to IV/ V) -24, middle -25, secondary -26, higher secondary -27, graduate in: agriculture -28, engineering/ technology -29, medicine -30, other subjects -31; post graduate and above -32, diploma or certificate (below graduate level) in: agriculture -33, engineering/ technology -34, medicine -35, crafts -36, other subjects -37; diploma or certificate (graduate level) in: agriculture -38, engineering/ technology -39, medicine -40, crafts -41, other subjects -42; diploma or certificate in post graduate and above level -43.

col. (10): type of institution: government -1, local body -2, private and aided -3, private and unaided -4, not known -5.**col. (12): whether receiving/received any vocational training:**

yes: receiving formal vocational training -1; received vocational training: formal -2, non-formal: hereditary-3, self-learning-4, learning on the job-5, others -6; did not receive any vocational training -7.

col. (13): field of training:

mechanical engineering trades -01, electrical and electronic engineering trades -02, computer trades -03, civil engineering and building construction related works -04, chemical engineering trades -05, leather related work -06, textile related work -07, catering, nutrition, hotels and restaurant related work -08, artisan/ craftsman/ handicraft and cottage based production work -09, creative arts/ artists -10, agriculture and crop production related skills and food preservation related work -11, non-crop based agricultural and other related activities -12, health and paramedical services related work -13, office and business related work -14, driving and motor mechanic work -15, beautician, hairdressing & related work -16, work related to tour operators/ travel managers -17, photography and related work -18, work related to childcare, nutrition, pre-schools and crèche -19, journalism, mass communication and media related work -20, printing technology related work -21, other -99.

col. (15): source from where degree/diploma/certificate received/to be received:

Industrial Training Institutes (ITIs)/Industrial Training centers (ITCs) -01, School offering vocational courses (Secondary, Higher Secondary level) -02, UGC (first degree level) -03, Polytechnics -04, Community Polytechniques/ Jansiksha Sanstha -05, National Open School -06, Hotel Management Institutes -07, Food craft & Catering Institutes -08, Small Industries Service Institutes/District Industries Centres/Tool Room Centres -09, Fashion Technology Institutes -10, Tailoring, Embroidery and Stitch Craft Institutes -11, Nursing Institutes -12, Rehabilitation/ Physiotherapy /Ophthalmic and Dental Institutes -13, Institutes giving Diploma in Pharmacy -14, Hospital and Medical Training Institutes -15, Nursery Teachers' Training Institutes -16, Institutes offering training for Agricultural Extension -17, Training provided by Carpet Weaving Centers -18, Handloom/ Handicraft Design Training Centers/ KVIC -19, Recognised Motor Driving Schools -20, Institute for Secretariat Practices -21, Recognised Beautician Schools -22, Institutes run by Companies/ Corporations -23, Institutes for Journalism and Mass Communication -24, other institutes -99.

col. (16): whether the vocational training was ever helpful in getting a job:

yes: was helpful in taking up self-employment activity- 1, was helpful in taking up wage/salaried employment-2; was not helpful-3, not applicable-4.

Codes for Block 5.1

col. (3): **status:**

worked in h.h. enterprise (self-employed): own account worker -11, employer-12, worked as helper in h.h. enterprise (unpaid family worker) -21; worked as regular salaried/ wage employee -31, worked as casual wage labour: in public works -41, in other types of work -51; did not work but was seeking and/or available for work -81, attended educational institution -91, attended domestic duties only -92, attended domestic duties and was also engaged in free collection of goods (vegetables, roots, firewood, cattle feed, etc.), sewing, tailoring, weaving, etc. for household use -93, rentiers, pensioners, remittance recipients, etc. -94, not able to work due to disability -95, others (including begging, prostitution, etc.) -97.

col. (5): **industry:** 5-digit code as per NIC -2004.

col. (6): **occupation:** 3-digit code as per NCO -2004.

col. (8): **location of workplace:**

workplace in rural areas and located in: own dwelling unit-10, structure attached to own dwelling unit-11, open area adjacent to own dwelling unit-12, detached structure adjacent to own dwelling unit-13, own enterprise/unit/office/shop but away from own dwelling-14, employer's dwelling unit -15, employer's enterprise/unit/office/shop but outside employer's dwelling -16, street with fixed location-17, construction site-18, others -19; workplace in urban areas and located in: own dwelling unit-20, structure attached to own dwelling unit-21, open area adjacent to own dwelling unit-22, detached structure adjacent to own dwelling unit-23, own enterprise/unit/office/shop but away from own dwelling-24, employer's dwelling unit -25, employer's enterprise/unit/office/shop but outside employer's dwelling -26, street with fixed location-27, construction site-28, others -29; no fixed workplace -99.

col. (9): **enterprise type:** proprietary: male -1, female -2; partnership: with members from same hh. -3, with members from different hh. -4; Government/public sector-5, Public/Private limited company-6, Co-operative societies/trust/other non profit institutions -7, employer's households(i.e., private households employing maid servant, watchman, cook, etc.) -8, others -9.

col. (11): **number of workers in the enterprise:** less than 6 -1, 6 & above but less than 10 -2, 10 & above but less than 20 -3, 20 & above -4, not known -9.

col. (12): **type of job contract:** no written job contract -1; written job contract: for 1 year or less -2, more than 1 year to 3 years -3, more than 3 years -4.

col. (14): **availability of social security benefits:**

eligible for: only PF/pension (i.e., GPF, CPF, PPF, pension, etc.) -1, only gratuity -2, only health care & maternity benefits -3, only PF/pension and gratuity -4, only PF/pension and health care & maternity benefits -5, only gratuity and health care & maternity benefits -6, PF/pension, gratuity, health care & maternity benefits -7; not eligible for any of above social security benefits -8.

col. (15): **method of payment:** regular monthly salary -1, regular weekly payment -2, daily payment -3, piece rate payment -4, others -5.

col. (16): **whether worked under given specifications:** yes: wholly -1, mainly -2, partly -3; no-4, not known -9

col. (17): **who provided credit / raw material / equipments:** own arrangement -1; provided by the enterprise: credit only -2, raw material only -3, equipments only -4, credit and raw material only-5, credit and equipments only -6, raw material and equipments only -7, credit, raw material and equipments -8; not known -9

col. (18): **no. of outlets of disposal:** one outlet -1, two outlets -2, three or more outlets -3; not known -9.

col. (21): **period of seeking/available for work during last 365 days:** sought/available for: less than 1 month -1, 1 month & above but less than 3 months -2, 3 months & above but less than 7 months -3, 7 months & above but less than 10 months -4, 10 months to 12 months -5; did not seek/not available -6.

col. (22): **seeking or available or suitable for the type of occupation:**
3-digit code as per NCO-2004.

Codes for Block 5.2

col. (3): **status:** codes as in col. 3, block 5.1, (only codes 11 to 51 are applicable here).

col. (5): **industry:** 5-digit code as per NIC-2004.

col. (6): **occupation:** 3-digit code as per NCO-2004.

col. (7): **location of workplace:** codes as in col. 8, block 5.1.

col. (8): **enterprise type:** codes as in col. 9, block 5.1.

col. (10): **number of workers in the enterprise:** codes as in col. 11, block 5.1.

col. (11): **type of job contract:** codes as in col. 12, block 5.1.

col. (13): **availability of social security benefits:** codes as in col. 14, block 5.1.

col. (14): **method of payment:** codes as in col. 15, block 5.1.

col. (15): **whether worked under given specifications:** codes as in col. 16, block 5.1.

col. (16): **who provided credit / raw material / equipments:** codes as in col. 17, block 5.1.

col. (17): **no. of outlets of disposal:** codes as in col. 18, block 5.1.

Codes for Block 5.3

col. (4) and (20): **status:** codes 11, 12, 21, 31, 51 and 91-95, 97 of col. (3), block-5.1 and also the following codes: worked as casual wage labour in public works other than NREG works – 41, worked as casual wage labour in NREG works – 42, had work in h.h. enterprise but did not work due to: sickness -61, other reasons -62; had regular salaried/wage employment but did not work due to: sickness -71, other reasons - 72; sought work -81, did not seek but was available for work -82, did not work due to temporary sickness (for casual workers only) -98.

col. (5): **industry division:** 2- digit division codes as per NIC-2004.

col. (6): **operation (for rural areas only):** manual work in cultivation: ploughing -01, sowing -02, transplanting -03, weeding -04, harvesting -05, other cultivation activities -06; manual work in other agricultural activities: forestry -07, plantation -08, animal husbandry -10, fisheries -11, other agricultural activities -12; manual work in non-agricultural activities -13, non-manual work in: cultivation -14, activities other than cultivation -15.

col. (18): **mode of payment:**

piece rate in cash: daily -01, weekly -02, fortnightly -03, monthly -04, other -05;

piece rate in kind: daily -06, weekly -07, fortnightly -08, monthly -09, other -10;
