CONTENTS

Chapter No.	Page No.	Name of the Chapter
1		State of the Economy in 2018-19: A Macro View
	1	Overview: Global Economic Scenario
	4	Overview: Indian Economy
	11	Drivers of Growth
	17	Supply Side of the Economy
	21	Outlook of the Economy
2		Fiscal Developments
	35	Central Government Finances
	51	State Finances
	53	General Government Finances
	54	Outlook
3		Monetary Management and Financial Intermediation
	64	Monetary Developments during 2018-19
	68	Liquidity Conditions and its Management
	70	Developments in the G-Sec Market
	70	Banking Sector
	71	Credit Growth
	72	Non-Banking Financial Sector
	73	Developments in Capital Market
	76	Insurance Sector
	77	Insolvency and Bankruptcy Code 2016: Resolving Corporate Stress in a Changed Paradigm
4		Prices and Inflation
	88	Introduction
	89	Current Trends in Inflation
	92	Drivers of Inflation
	95	Rural - Urban Inflation
	99	State-Wise Inflation
	101	Trends in Global Commodity Prices
	102	Efforts to Contain Inflation
	103	Conclusion
5		Sustainable Development and Climate Change
	104	Introduction
	105	Achieving the SDGs
	108	Ganga-The Lifeline of India
	112	Resource Efficiency
	118	Air Pollution

	119	Climate Change
	124	Developments in the Sustainable Finance Arena
	125	International Solar Alliance (ISA)
	126	Way Forward
6		External Sector
	129	Global Economic Environment
	131	India's Balance of Payments Developments
	145	Nominal and Real Exchange Rate and Terms of Trade
	152	Composition of Trade
	154	Trade Policy
	155	Trade Facilitation
	156	Trade Related Logistics
	157	Anti-Dumping and Safeguard Measures
	157	Outlook
7		Agriculture and Food Management
	172	Introduction
	173	Overview of Agriculture and Allied Sectors
	174	Gross Capital Formation in Agriculture and Allied Sectors
	175	Pattern of Agricultural Landholdings in India
	177	Bringing Resource Efficiency in Smallholder Agriculture
	183	Role of Extension Services
	185	Agricultural Credit
	186	Allied Sectors: Animal Husbandry, Dairying and Fisheries
	189	Food Security and Food Management in India
8		Industry and Infrastructure
	197	Indian Industry: An Overview
	198	Index of Industrial Production (IIP)
	201	Central Public Sector Enterprises (CPSES)
	202	Corporate Sector Performance
	202	Gross Capital Formation in Industrial Sector
	203	Credit Flow to the Industrial Sector
	203	Key Initiatives Taken To Boost Industrial Sector In India
	206	Sector Wise Issues and Performance
	209	Infrastructure
	210	Road Sector
	212	Railways
	215	Civil Aviation
	217	Shipping
	218	Telecom Sector
	220	Petroleum & Natural Gas
	222	Power Sector

255	Gender Issues
257	Trends in Social Sector Expenditure
260	Education for All
263	Skill Development
265	Employment Scenario
266	Health for All
273	Rural Development
277	The Way Forward

Acknowledgements

The Economic Survey is a result of teamwork and collaboration. Contributions to the Survey from the Economic Division include: Sanjeev Sanyal, Sushmita Dasgupta, Arun Kumar Jha, Arun Kumar, Rajiv Mishra, Rajasree Ray, A Srija, Surbhi Jain, A. Prathibha, S. Arputhaswamy, Nikhila Menon, Ashwini Lal, Abhishek Acharya, Rajani Ranjan, Sindhumannickal Thankappan, Purna Joshi, Dharmendra Kumar, Aakanksha Arora, M. Rahul, Rabi Ranjan, Tulsipriya Rajkumari, Shamim Ara, J.D. Vaishampayan, Arya B.K., Abhishek Anand, Sonal Ramesh, Sanjana Kadyan, Amit Sheoran, Shreya Bajaj, Subhash Chand, Riyaz Ahmad Khan, Md. Aftab Alam, Pradyut Kumar Pyne, Narendra Jena, Sribatsa Kumar Parida, Mritunjay Kumar, Rajesh Sharma and Amit Kumar Kesarwani, Arpitha Bykere, Naveen Bali, Mahima, Ankur Gupta, Lipi Budhreja, Sonum Gayatri Malhotra and Lavisha Arora.

The Survey has benefitted from the valuable comments and insights of the Hon'ble Finance Minister Smt Nirmala Sitharaman and the Hon'ble Minister of State for Finance Shri Anurag Singh Thakur.

The Survey benefitted from the comments and inputs from officials spread across various Ministries/ Departments and organisations, specifically Shri Pranab Kumar Mukhopadhyay, DG, DGC&S, Kolkata; Shri Ajay Srivastava, Economic Adviser, Department of Commerce; Ms. Shruti Shukla, Joint Director, DGC&S, Kolkata; Dr. M. D. Patra, Executive Director, Reserve Bank of India (RBI); Shri Rajan Goyal, Adviser, Reserve Bank of India (RBI); Prof. K. S. James and Prof. Chander Shekhar, International Institute for Population Sciences; Prof. Suresh Sharma and Vandana Sharma, Institute of Economic Growth; Mr. Surya Prakash B. S., Fellow and Programme Director; Shri Rajiv Jain, Director, RBI; Shri Dharendra Gajbhiye, Assistant Adviser, Reserve Bank of India (RBI); Siddharth Mandrekar Rao, Research Associate, Daksh; Ms. Soumasree Tewari, Research Officer, RBI; Shri Sukhbir Singh, CAAA, Department of Economic Affairs, Ministry of Finance; Shri Abhay Bakre, Director General, Bureau of Energy Efficiency; Dr. Ashok Kumar, Director, Bureau of Energy Efficiency; Dr. Surya P Sethi and Shri Sameer Kumar- Joint Secretary, Ministry of Drinking Water and Sanitation.

Apart from the above, various ministries, departments and organisations of the Government of India made contributions in their respective sectors. Several ministries directly interacted with the CEA via presentations to provide their inputs. The Economic Survey is gratified for their valuable time, engagement and contributions. Able administrative support was given by K. Rajaraman, Rajkumar Tiwari, Jasbir Singh, Suresh Kumar, Anupam Shukla, Sadhna Sharma, Arun Gulati, Sushil Sharma, Manish Panwar, Muna Sah, Suresh Kumar, Jodh Singh, Ombir Singh, R R Meena, Subash Chand, Raj Kumar, Ram Niwas, Kesar Singh, Bal Kishan, Satish Kumar, Gajender Singh and other staff and members of the Economic Division and the Office of CEA. The cover page for the Survey was designed by India Brand Equity Foundation. Viba Press Pvt. Ltd. undertook the printing of the English and Hindi version of the Survey.

Finally, the Economic Survey owes deep gratitude to the families of all those involved in its preparation for being ever so patient, understanding and encouraging and for extending their unflinching emotional and physical support throughout the preparation. The families, indeed, are the silent pillars of strength for the dedicated contributors to the Economic Survey.

Krishnamurthy V. Subramanian
(Chief Economic Adviser)

State of the Economy in 2018-19: A Macro View

For the global economy, the year 2018 was difficult, with the world output growth falling from 3.8 per cent in 2017 to 3.6 per cent in 2018. Growth rate of world output is projected to fall further to 3.3 per cent in 2019 as growth of both advanced economies and emerging & developing economies are expected to decline. Growth of the Indian economy moderated in 2018-19 with a growth of 6.8 per cent, slightly lower than 7.2 per cent in 2017-18. Yet, India continued to be the fastest growing major economy in the world. India maintained its macroeconomic stability by containing inflation within 4 per cent and by maintaining a manageable current account deficit to GDP ratio. The current account deficit to GDP was higher in 2018-19 as compared to 2017-18, primarily due to higher oil prices, which were about 14 \$/bbl higher in 2018-19 vis-à-vis the previous year. However, the current account deficit started to narrow in the third quarter of the year. The manufacturing sector was characterised by higher growth in 2018-19 while the growth in agriculture sector witnessed tapering. Growth in investment, which had slowed down for many years, has bottomed out and has started to recover since 2017-18. In fact, growth in fixed investment picked up from 8.3 per cent in 2016-17 to 9.3 per cent in 2017-18 and further to 10.0 per cent in 2018-19. Net FDI inflows grew by 14.2 per cent in 2018-19. Capital expenditure of Central Government grew by 15.1 per cent in 2018-19 leading to increase in share of capital expenditure in total expenditure. Given the macroeconomic situation and the structural reforms being undertaken by the government, the economy is projected to grow at 7 per cent in 2019-20.

OVERVIEW: GLOBAL ECONOMIC SCENARIO

1.1 India continues to remain the fastest growing major economy in the world in 2018-19, despite a slight moderation in its GDP growth from 7.2 per cent in 2017-18 to 6.8 per cent in 2018-19. On the other hand, the world output growth declined from 3.8 per cent in 2017 to 3.6 per cent in 2018. The slowdown in the world economy and Emerging Market and Developing Economies (EMDEs) in

Figure 1: Growth rate of real GDP (per cent)

Data source: WEO, April 2019 database, CSO for India, 2019 projection for India is survey's projection.

Notes:

NA: Not Available,

a: Provisional estimates,
c: (April-December) 2018,b: Third advance estimate,
d: Provisional Actual

2018 followed the escalation of US China trade tensions, tighter credit policies in China, and financial tightening alongside the normalization of monetary policy in the larger advanced economies. In 2019, when the world economy and EMDEs are projected to slow down by 0.3 and 0.1 percentage points respectively, growth of Indian economy is forecast to increase (Figure 1). Crucially, India forms part of 30 per cent of the global economy, whose growth is not projected to decline in 2019 (World Economic Outlook (WEO), April 2019 of IMF).

1.2 India is the seventh largest economy in terms of Gross Domestic Product (GDP) in current US\$ and has emerged as the fastest growing major economy (Figure 2). The average growth rate of India was not only higher than China's during 2014-15 to 2017-18 but much higher than that of other top major economies (measured in terms of GDP at current US\$ terms) as well. With Purchasing Power Parity (PPP) adjustments, India's GDP at current international dollar, ranks third in the world (as shown by the size of circles in Figure 2).

Figure 2: Global comparison among top ten economies

Data source: WEO, April 2019 database

Note: For France and Italy GDP of the year 2018 is the estimated figure of International Monetary Fund. Size of circle represents GDP (PPP) at current international dollar terms.

1.3 The contribution of the Indian economy to the GDP of EMDEs and world economy has increased consistently over the years (Figure 3). In a span of less than a decade, India's contribution to EMDEs GDP has increased by around 1.3 percentage points and to the world economy by around 0.7 percentage points. India's share in GDP of EMDEs stood at 8 per cent in 2018. As per the WEO, April 2019 of IMF, going

forward, the growth of world economy will be bolstered mainly by growth in China and India and their increasing weights in world income. In EMDEs group, India and China are the major drivers of growth. The global economy—in particular the global growth powerhouse, China—is rebalancing, leading to an increasing role for India. Hence, India's contribution has become much more valuable to the global economy.

Figure 3: India's share in GDP of EMDEs and World (per cent)

Data source: WEO, April 2019 database

OVERVIEW: INDIAN ECONOMY

1.4 India's growth of real GDP has been high with average growth of 7.5 per cent in the last 5 years (2014-15 onwards). The Indian economy grew at 6.8 per cent in 2018-19, thereby experiencing some moderation in growth when compared to the previous year. This moderation in growth momentum is mainly on account of lower growth in 'Agriculture & allied', 'Trade, hotel, transport, storage, communication and services related to broadcasting' and 'Public administration & defence' sectors. Acreage in 2018-19 for the rabi crop was marginally lower than last year, which affected agricultural performance. The contraction in

food prices may have contributed to inducing farmers to produce less. On the demand side, lower growth of GDP in 2018-19 was accounted for, by a decline in growth of government final consumption, change in stocks and contraction in valuables.

1.5 When we examine the growth pattern within the various quarters of 2018-19, we note that the moderation in real GDP growth has been experienced in all quarters of 2018-19 (Figure 4) with the fourth quarter (Q4) registering a growth of 5.8 per cent. The base effect arising from a high growth of 8.1 per cent in the Q4 of 2017-18 also led to this lower growth in Q4 of 2018-19. In this quarter, election related uncertainty may have also contributed to growth moderation.

Figure 4: Quarterly real GDP growth (per cent)

Data source: Central Statistics Office

Table 1: Quarter-wise growth in Gross Value Added (per cent)

	2017-18				2018-19			
	Q1	Q2	Q3	Q4	Q1	Q2	Q3	Q4
Agriculture and allied	4.2	4.5	4.6	6.5	5.1	4.9	2.8	-0.1
Industry	0.8	6.9	8.0	8.1	9.8	6.7	7.0	4.2
(of which) Manufacturing	-1.7	7.1	8.6	9.5	12.1	6.9	6.4	3.1
Services	9.4	6.8	8.0	8.2	7.1	7.3	7.2	8.4
GVA at basic prices	5.9	6.6	7.3	7.9	7.7	6.9	6.3	5.7
GDP at market prices	6.0	6.8	7.7	8.1	8.0	7.0	6.6	5.8

Source: Central Statistics Office

1.6 There was contraction in 'Agriculture & allied' sector in the last quarter of 2018-19, though growth was reasonable in the previous

three quarters. Growth of industry sector also experienced tempering in successive quarters of 2018-19 mostly on account of

growth deceleration in the manufacturing sector (Table 1). This is also seen in Index of Industrial Production (IIP) of manufacturing sector, which grew at 0.3 per cent in Q4 of 2018-19, as compared to 7.5 per cent in the same quarter of previous year. Manufacturing sector was affected by the slowdown in the auto sector as well, where the production growth for all categories, apart from commercial vehicles declined in 2018-19, as compared to 2017-18. Sales growth

Figure 5: Change in cumulative auto sales (per cent)

Data source: Society of Indian Automobile Manufacturers
Note: Growth rates (Year on Year) are for cumulative sales from April to respective months of the year.

1.7 From the demand side, the decline in GDP growth during 2018-19 arose primarily from deceleration in private final consumption in the final two quarters. This could have been due to low farm incomes in rural areas arising from low food prices and also due to the stress in NBFCs, which affected its lending. The Q4 of 2018-19 also saw growth of exports declining.

1.8 Although growth rate of real GDP was high during the last few years, the coterminous decline in the nominal GDP growth from 2010-11 onwards, points towards a secular decline in inflation. As seen in Figure 7, the gap between nominal and real growth rate has

decelerated in many segments of the automobile sector, including passenger vehicles, tractor sales, three and two wheeler sales (Figure 5). Stress in Non-Banking Financial Companies (NBFC) sector also contributed to the slow down by adversely impacting consumption finance (Figure 6). Despite the moderation of manufacturing growth within 2018-19, overall growth in the year was higher than in 2017-18, due to a high growth of 12.1 per cent in first quarter of 2018-19.

Figure 6: Growth of loans and advances of NBFCs (per cent)

Data source: Reserve Bank of India
Note: Data on loans and advances pertains to deposit taking NBFCs and Non-Deposit taking systematic important NBFCs including Government companies; Data from March 2018 onwards are provisional.

reduced significantly. Thus, the GDP deflator, which is a weighted average of Consumer Prices Index (CPI) and Wholesale Price Index (WPI), became smaller.

1.9 This is reflected in a consistent decline in CPI inflation during the last few years (Figure 8). In 2013-14, CPI headline inflation was close to double digits, but gradually declined thereafter to be within the target of 4 (+/- 2) per cent. Headline CPI declined to 3.4 per cent in 2018-19 from 3.6 per cent in 2017-18.

1.10 Headline WPI inflation stood at 4.3 per cent in 2018-19, higher as compared to

3.0 per cent in 2017-18. The increase in WPI inflation was broad based, which saw increase in inflation of all the groups except food in

2018-19. Increase in WPI led to marginal pick-up in GDP deflator from 3.8 per cent in 2017-18 to 4.1 per cent in 2018-19.

Figure 7: Growth in GDP (per cent)

Data source: Central Statistics Office

Figure 8: Significant moderation in Inflation

Data source: Central Statistics Office
Note: CPI-C stands for CPI-Combined.

1.11 Core Gross Value Added (GVA) (measured as GVA except ‘Agriculture & allied’ activities, and ‘Public administration & defence’) shows higher growth than that of overall GVA in 2018-19. Core GVA growth picked up from 6.5 per cent in 2017-18 to 7.0 per cent in 2018-19, whereas GVA growth slowed down marginally from 6.9 per cent in 2017-18 to 6.6 per cent in 2018-19. For all quarters of 2018-19,

the core GVA growth was higher than overall GVA growth, as ‘Agriculture & allied’ and ‘Public administration & defence’ experienced the largest decline in growth rates relative to other sectors. But in Q4 of 2018-19, the growth of core GVA also decelerated by 1 percentage point over previous quarter, largely on account of lower growth in manufacturing sector (Figure 9).

Figure 9: Real GVA and real core GVA growth (per cent)

Data source: Central Statistics Office

1.12 On the external front, current account deficit (CAD) increased from 1.9 per cent of GDP in 2017-18 to 2.6 per cent in April-December 2018 (refer Figure 11). The widening of the CAD was largely on account of a higher trade deficit driven by rise in international crude oil prices (Indian basket). The trade deficit increased from US\$ 162.1 billion in 2017-18 to US\$ 184 billion in 2018-19.

1.13 Nominal growth of both merchandise exports and imports declined in US dollar terms in 2018-19, as compared to 2017-18. However, the decline was much sharper in

merchandise imports, which reduced from 21.1 per cent to 10.4 per cent. Growth of merchandise imports declined as oil price driven increase in growth of oil imports was more than offset by contraction in value of gold imports and lower growth in the value of non-oil non-gold imports. The crude oil prices, however, showed movements in both the directions within the year. As the year commenced, crude prices increased and reached above 80 US\$/bbl. in October 2018. Thereafter, it started to decline before increasing again after December 2018 (Figure 10). Overall the oil prices were substantially higher in 2018-19, as compared to previous year.

Figure 10: Crude oil price (Indian basket in US\$ per barrel)

Data source: Petroleum Planning & Analysis Cell

1.14 Growth in service exports and imports in US dollar terms declined to 5.5 per cent and 6.7 per cent respectively in 2018-19, from 18.8 per cent and 22.6 per cent respectively in 2017-18.

1.15 Rupee depreciated by 7.8 per cent vis-à-vis US dollar, 7.7 per cent against Yen, and 6.8 per cent against Euro and Pound Sterling in 2018-19. During 2018-19, Indian rupee traded with a depreciating trend against US dollar and touched ₹74.4 per US dollar in October 2018 before recovering

to ₹69.2 per US dollar at end March 2019. Rupee depreciated in the first half of the year due to concerns related to widening of CAD owing to rising crude oil prices coupled with tighter financial conditions in US caused by increase in Federal Funds rate by the US Federal Reserve. However, rupee performed better than some of the other major emerging market currencies, such as, Argentine Peso, Turkish Lira, Brazilian Real, and Russian Ruble, which depreciated more than 10 per cent vis-à-vis US dollar. Not only in terms

of bilateral exchange rate with US dollar, rupee also depreciated when measured as trade based weighted exchange rates in 2018-19. Nominal Effective Exchange Rate (NEER) (36 currency trade based bilateral weights) of rupee depreciated by 5.6 per cent in 2018-19. Correspondingly, Real Effective Exchange Rate (REER) also depreciated by 4.8 per cent in 2018-19 (Figure 12).

1.16 The foreign exchange reserves in nominal terms (including the valuation effects) decreased by US\$ 11.6 billion at end-March 2019 over end-March 2018. Within the year, foreign exchange reserves were declining until October 2018

due to RBI's intervention to modulate exchange rate volatility. India's foreign exchange reserves continue to be comfortably placed at US\$ 422.2 billion, as on 14th June 2019 (Figure 13).

1.17 Net Foreign Direct Investment (FDI) inflows grew by 14.2 per cent in 2018-19. Among the top sectors attracting FDI equity inflows, services, automobiles and chemicals were the major categories. By and large, FDI inflows have been growing at a high rate since 2015-16 (Figure 14). This pick-up indicates the improvement in confidence of the foreign investors in the Indian economy.

Figure 11: Current Account Balance (per cent of GDP)

Figure 12: Index of REER and ₹/US\$ exchange rate

Figure 13: Foreign Exchange Reserve (US\$ billion)

Figure 14: Net FDI inflows (US\$ billion)

Data source: Reserve Bank of India (from figure 11 to 14)

Note: FDI inflow for the fourth quarter of 2018-19 (in Figure 14) is calculated on the basis of information published in the RBI Bulletin – May 2019.

1.18 As per Provisional Actuals (PA) for 2018-19, fiscal deficit stood at 3.4 per cent of GDP. In 2018-19, direct taxes grew by 13.4 per cent (PA) owing to improved performance of corporate tax. However, indirect taxes fell short of budget estimates by about 16 per cent, following a shortfall in GST revenues (including CGST, IGST and compensation cess) as compared to the budget estimates. GST was implemented in July 2017. After the initial transitional issues following the roll-out of GST, revenue collection picked up from annual average of ₹89.8 thousand crore in 2017-18 to ₹98.1 thousand crore in 2018-19 (Figure 15). Accordingly, Gross Tax Revenue as a proportion of GDP declined to 10.9 per cent of GDP in 2018-19 (PA), lower by 0.3 percentage points as compared to 2017-18.

1.19 Total expenditure of central government grew by 7.9 per cent in 2018-19 (PA), with the growth of 15.1 per cent in capital expenditure leading to increase in share of capital expenditure in total expenditure (Figure 16). The corresponding growth in total expenditure was 8.4 per cent and capital expenditure, (-)7.5 per cent in 2017-18.

1.20 Government stood by its path of fiscal consolidation in 2018-19. The new targeting framework was adopted in 2018-19 which

rests on the twin pillars of reducing debt and fiscal deficit. There has been consolidation of revenue expenditure while expenditure quality has improved with gradual tilt towards capital spending of the Central Government in 2018-19. There has been a progressive reduction in primary and fiscal deficits. Primary deficit (amount by which a government's total expenditure exceeds its total revenue, excluding interest payments on its debt) of the central government has been consistently declining and now stands at 0.3 per cent of GDP in 2018-19 (PA) from 0.7 per cent in 2015-16. Total liabilities of the Central Government, as a ratio of GDP, have declined, as an outcome of both fiscal consolidation efforts as well as relatively high GDP growth.

1.21 State's Gross Fiscal deficit reduced from 3.5 per cent of GDP in 2016-17 to 3.0 per cent in 2017-18 (RE), and is budgeted to decline to 2.6 per cent in 2018-19 (as per data available from RBI). The combined liabilities of General Government (Centre and States) has declined to 67 per cent of GDP as on end-March 2018. Fiscal deficit of general government is further expected to decline to 5.8 per cent of GDP in 2018-19 (BE) from 6.4 per cent of GDP in 2017-18 (RE).

Figure 15: GST revenue collections (₹ crore)

Data source: Press Information Bureau

Figure 16: Expenditure of Central Government (in ₹ crore)

Data source: Controller General of Accounts

1.22 Indian banking sector has been dealing with twin balance sheet problem, which refers to stressed corporate and bank balance sheets. The increase in Non-Performing Assets (NPA) of banks led to stress on balance sheets of banks, with the Public Sector Banks (PSBs) taking in more stress. However, the performance of the banking

sector (domestic operations), and PSBs in particular, improved in 2018-19. NPAs as a percentage of Gross Advances of Scheduled Commercial Banks (SCBs) decreased from 11.5 per cent to 10.1 per cent between March 2018 and December 2018 (Figure 17). The decline was sharper for PSBs from 15.5 per cent to 13.9 per cent during the same period.

Figure 17: Non performing assets as a percentage of Gross Advances

Data source: Reserve Bank of India

1.23 During 2018-19, the 10-year benchmark Government Security (G-Sec) yields was volatile (Figure 18) and closely tracked the movement in oil prices, domestic liquidity and rupee exchange rate. It hardened in the first quarter but witnessed intermittent softening in the second and third quarters. The hardening of yields in the first quarter may be attributed to rising crude oil prices, the firming up of US treasury yields, concerns regarding the pace of rate hikes by the US Fed, and upside risks to domestic inflation. Later, with the decline in crude oil prices in July 2018, and with the announcement of Open Market Operations (OMO) purchases, the yields softened in July. However, the currency depreciation in August 2018 due to rising crude oil prices and rising US interest rates, caused the yields

to harden in August again which continued into September as well, increasing the yields from end-July to mid-September, by 40 bps. Yields started softening towards the end of September reflecting the measures taken for containing rupee volatility along with expectations of lower market borrowings by the central government in H2 of 2018-19. In the third quarter of 2018-19, the OMO purchase of ₹1.36 lakh crore along with the decline in crude oil prices and CPI inflation rate, caused the yields to soften once again. Consequent upon the policy rate cut announced by the Monetary Policy Committee in February, April and June 2019, the yields have further softened. The 10-year G-Sec yield dropped to 6.97 per cent as on 10 June 2019.

Figure 18: Yield on 10 year and 91 day T Bill

Data source: Reserve Bank of India

DRIVERS OF GROWTH

1.24 Consumption has always been a strong and major driver of growth in the economy. Within total final consumption, it is the private final consumption expenditure that has a major share (close to 60 per cent) in the economy's GDP, with its growth rate mostly being higher than the overall GDP growth rate (Table 2). The huge size of the economy serves

as a big market for businesses. Growth in private final consumption expenditure (PFCE) increased to 8.1 per cent in 2018-19, although within the year, the growth momentum slowed in the last two quarters. Although the share of private consumption in GDP remains high, the pattern of consumption has undergone some change over time – from essentials to luxuries and from goods to services (Box 1).

Table 2: Components of aggregate demand

Components	Real growth (per cent)			Share at current prices (per cent)		
	2016-17	2017-18	2018-19	2016-17	2017-18	2018-19
Total consumption	7.8	8.6	8.3	69.6	70.0	70.6
Government consumption	5.8	15.0	9.2	10.3	11.0	11.2
Private consumption	8.2	7.4	8.1	59.3	59.0	59.4
Fixed investment	8.3	9.3	10.0	28.2	28.6	29.3

Valuables	-18.9	27.4	-9.0	1.1	1.3	1.0
Exports of goods and services	5.1	4.7	12.5	19.2	18.8	19.7
Imports of goods and services	4.4	17.6	15.4	21.0	22.0	23.6
GDP at market prices	8.2	7.2	6.8	100	100	100

Source: Central Statistics Office

Note: For 2018-19, figures are as per provisional estimate.

Box 1: India's high income elasticity of consumption and its changing pattern over time

The relationship between per capita consumption and per capita national income shows a very high elasticity of consumption, implying that the growth rate of consumption per capita is almost the same as that of per capita income. The elasticity of consumption may have reduced a bit over time, but still remains very high. Growth of real per capita PFCE is slightly higher than that of per capita GDP or per capita net national income (NNI) (Table A).

Figure a: Income elasticity of consumption
(Old GDP series)

Figure b: Income elasticity of consumption
(New GDP series)

Data source: Central Statistics Office

Note: Old GDP series means series at 2004-05 base and new GDP series means series at 2011-12 base.

Table A: Level and growth of per capita income and consumption

	Level in Rupees				Real growth (in per cent)	
	Nominal		Real		2017-18	2018-19
	2017-18	2018-19	2017-18	2018-19		
Per-capita GDP	129901	142719	100151	105688	5.8	5.5
Per-capita NNI	114958	126406	87623	92565	5.7	5.6
Per-capita PFCE	76619	84760	56364	60185	6.0	6.8

Source: Central Statistics Office

Even though the elasticity of consumption has remained very high, its composition has changed in the past few years. From food & beverages, transport & communication, which are more of necessities, the spending has been shifting towards clothing & footwear, health & education, housing & maintenance (Figure c). This shows an increase in discretionary spending by the households as compared to the necessities. This shift is also visible in the change in pattern of spending from consumption of goods to services. There has been a decline in share of goods in total final consumption, which has correspondingly increased the share of services by more than 1 percentage point (Figure d).

Figure c: Share of consumption expenditure among major purposes (per cent)**Figure d: Changes in consumption share (per cent)**

Data Source: Central Statistics Office

The data from NSSO Household Consumption survey also shows the increase in share of non-food expenditure in total consumption over time. First interesting point to note is that the share of food in total consumption is more than 10 percentage points lower in urban areas (in 1999-00, 2004-05 and 2011-12 as well) as compared to rural areas. Secondly, share of food in total consumption has gone down by around 6.5 percentage points in rural areas and 5.5 percentage points in urban areas from 1999-00 to 2011-12. Within food, cereals have accounted for almost the entire decline. The share of cereals has reduced to half between 1999-00 to 2011-12 in both urban and rural areas. Overall, the share of non-food expenditure has increased with the expenditure share increasing for education, medical, conveyance and durable goods (Table B). This shows that the shift towards discretionary spending has been increasing while with the spending on necessities has been gradually decreasing. In 2011-12 as well, the share of non-food expenditure was higher by almost 10 percentage points in urban area as compared to rural areas, same as that in 1999-00. The share of spending on education was almost double in urban areas as compared to rural areas in 2011-12 (Table B).

Table B: Share of monthly per capita consumption expenditure in total (per cent)

	Rural			Urban		
	1999-00	2004-05	2011-12	1999-00	2004-05	2011-12
Food	59.4	55.1	52.9	48.1	42.5	42.6
(of which)						
Cereals	22.2	18.1	10.8	12.3	10.1	6.7
Milk & Milk products	8.8	8.4	8.0	8.7	7.9	7.0
Vegetables	6.2	6.1	6.6	5.1	4.5	4.6
Non food	40.6	44.9	47.1	51.9	57.5	57.4
(of which)						
Clothing & footwear	8.0	5.4	7.0	7.2	4.7	6.3
Education	1.9	2.7	3.5	4.3	5.0	6.9
Medical	6.1	6.6	6.6	5.1	5.2	5.6
Conveyance	2.9	3.8	4.2	5.5	6.6	6.5
Durable goods	2.6	3.4	4.5	3.6	4.1	5.3

Source: NSSO Reports on Household consumption expenditure

1.25 The second component of consumption is the government final consumption expenditure (GFCE). Growth of GFCE decelerated from 15.0 per cent in 2017-18 to 9.2 per cent in 2018-19. GFCE is calculated using growth of revenue expenditure net of interest payments and subsidies. GFCE comprises government’s (revenue) expenditure on compensation of employees, net purchase of goods and services and consumption of fixed capital. This lower growth in GFCE is consistent with lower revenue expenditure growth of the government in 2018-19. On average, annual growth of GFCE in the last 5 years has been 9.0 per cent.

1.26 The third major component of demand is investment. Investment (Gross Capital Formation) accounts for nearly 32 per cent of GDP, within which fixed investment (Gross fixed capital formation) accounts for about 29 per cent of GDP. The other two components of investment are change in stocks and valuables, each having a share of around 1 per cent in GDP. Fixed investment mainly refers to the value of new machinery and equipment and the value of new construction activity of dwellings and other structures. Cultivated

biological resources and intellectual property products are the other two components of fixed investment, although they constitute a very small share.

1.27 Decline in investment rate and fixed investment rate since 2011-12, seems to have bottomed out with some early signs of recovery since 2017-18 (Figure 19). Fixed investment growth picked up from 8.3 per cent in 2016-17 to 9.3 per cent in 2017-18 and further to 10.0 per cent in 2018-19. The decline in fixed investment until 2016-17 was mainly by the household sector, with fixed investment by public sector and private corporate sector remaining almost at same levels (Figure 20). The ‘household’ sector here includes ‘quasi-corporates’ as well. Unincorporated enterprises belonging to households, which have complete sets of accounts, are called quasi-corporates. Household sector mostly invests in dwellings and other structures and the quasi-corporates invest in machinery & equipment. This decline in household sector fixed investment is due to decline in investment in dwellings. This is borne out by a decline in physical savings of household sector as well.

Figure 19: Investment rate (measured as percentage of GDP)

Data source: Central Statistics Office

Note: Investment data and sectoral break up of fixed investment is available only upto 2017-18.

Figure 20: Sector-wise fixed investment rate (percentage share in GDP)

1.28 Green shoots in the investment activity appear to be taking hold as also seen in the pickup in credit growth to industry. Credit to, both, large and micro, small & medium enterprises has seen pickup in growth. The growth of bank credit to micro, small & medium enterprises was contracting in

2016 and 2017, but has started picking up in 2018. Credit growth to large industry started declining since March 2016 and entered negative territory by October 2016. It has recovered since early 2017-18 and the momentum has picked up in the second half of 2018 (Figure 21).

Figure 21: Deployment of Bank Credit in industry sector: month wise growth (per cent)

Data source: Reserve Bank of India

1.29 At the sectoral level, investment rates have been declining since 2011-12, though the investment rate in services is displaying signs of bottoming out (Figure 22). In year 2011-12, industry sector had the highest investment rate, followed by services, whereas the agriculture sector had investment rate much less than half of that of services. In 2017-18, investment rate in services sector became the highest. Investment rate in agriculture still continues to lag behind and now is half the investment rate in the industry sector.

physical savings comprises gold and silver and physical assets including construction and machinery and equipment, with physical assets forming the major share. The decline in physical savings is reflected in decline in gold imports or low growth of gold imports since 2011-12 (Figure 23).

Figure 22: Ratio of GCF to GVA across sectors

Data source: Central Statistics Office

1.30 Simultaneously, there has been a decline in savings rate as well, with the household sector entirely contributing to the decline. Household savings declined from 23.6 per cent in 2011-12 to 17.2 per cent in 2017-18. Almost this entire decline is in physical savings of the households, with only marginal decline in financial savings in 2016-17 and 2017-18 (Table 3). Household

Table 3: Gross Savings as percentage of GDP

	2011-12	2014-15	2015-16	2016-17	2017-18
Gross Savings	34.6	32.2	31.1	30.3	30.5
Public	1.5	1.0	1.2	1.7	1.7
Private corporates	9.5	11.7	11.9	11.5	11.6
Household sector	23.6	19.6	18.0	17.1	17.2
Net financial savings	7.4	7.1	8.1	6.3	6.6
Physical savings	16.3	12.5	9.9	10.8	10.6

Source: Central Statistics Office

Figure 23: Gold imports (in US\$ billion)

Data source: Directorate General of Commercial Intelligence and Statistics, Kolkata

1.31 As the saving rate has declined, so has the investment rate. However, the decline in investment rate has been greater than the decline in the saving rate leading to continuous narrowing of the saving-investment gap. The saving investment gap narrowed from (-)4.8 per cent of GDP in 2012-13 to (-)1.8 per cent in 2017-18. This is also reflected in the narrowing

Figure 24: Nominal Growth in exports and imports in USD terms (per cent)

Data source: Reserve Bank of India

of current account deficit to GDP ratio.

1.32 The fourth component of demand is net exports. Exports are the external component of demand of domestic goods, and imports are a leakage of income of the country for demand of products from other countries. The contribution of exports and imports to GDP would matter in rupee terms for national accounting purposes rather than US dollar. Hence, the discussion in this section is based on growth in rupee terms. Interestingly, the trend of growth of exports and imports was different in 2018-19 in rupee and US dollar terms (Figure 24 & 25). While the growth of both export and import declined in US\$ terms, it increased in rupee terms (at current prices) in 2018-19. This happened due to the depreciation of rupee vis-à-vis US dollar in 2018-19 (Figure 12).

Figure 25: Nominal Growth in exports and imports in Rupee terms (per cent)

Data source: Central Statistics Office

1.33 After contraction in exports in 2015-16, the performance of exports growth started to improve from 2016-17. Exports of both service and merchandise (in rupee terms) picked up in 2018-19 in nominal terms. Nominal growth of imports also picked up in 2018-19 but the pickup in nominal export growth was much higher. So although growth of export in dollar terms declined, the positive growth in rupee terms, because of depreciation has insured a steady growth in the export earnings.

1.34 Import prices as compared to export prices in rupee terms increased sharply in 2018-19, vis-à-vis 2017-18. Growth in Unit Value Index of merchandise exports and imports was 1.1 per cent and (-)1.9 per cent respectively in 2017-18, but increased to 6.9 per cent and 17 per cent respectively in April-December 2018-19. Due to increase in price of imports, real growth of imports in rupee terms fell in 2018-19 possibly reflecting the softening of GDP growth in the year. On the other hand, real growth of exports picked up in 2018-19.

1.35 As India is a net importer, net exports are always negative. However, the growth contribution of net exports is positive in many years. In 2018-19, there was improvement in contribution of net exports to GDP growth, owing to higher growth of exports and lower growth of imports at constant prices as compared to previous year. Going forward, the prospects of export growth are dependent on the impact of rising trade protectionism and effectiveness of export promotion measures of Government.

Supply side of the economy

1.36 Gross Value Added (GVA), reflects the supply or production side of the economy to which net indirect taxes on products are added to get GDP at market prices. Growth

of GVA reflected a decline in economic activity, registering a growth of 6.6 per cent in 2018-19, lower than 6.9 per cent in 2017-18 (Table 4). Growth of net indirect taxes was 8.8 per cent in 2018-19, lower than that of 2017-18, on account of loss of momentum of economic activity.

1.37 Real growth in 'Agriculture & allied' sector was lower in 2018-19 at 2.9 per cent, after two years of good agriculture growth (Table 4). As per the 3rd Advance Estimates released by Ministry of Agriculture & Farmers Welfare, the total production of food grains during 2018-19 is estimated at 283.4 million tonnes, as compared to 285 million tonnes in 2017-18 (final estimate). There was a significant decline in food prices in 2018-19 as indicated by nearly zero per cent consumer food price inflation in 2018-19 with prices contracting straight for five months in the year (Figure 26). This is reflected in the decline of the nominal growth rate of GVA in agriculture from 7.0 per cent in 2017-18 to 4.0 per cent in 2018-19. Share of agriculture sector in total GVA has been consistently falling and now stands at 16.1 per cent in 2018-19.

1.38 Agriculture sector in India typically goes through cyclical movement in terms of growth and production. As per the latest data series, crop sector's growth rate remains volatile largely because of vagaries of nature, although the growth in livestock and fishing has remained stable during the past four years. There has been a modest compositional shift within the 'Agriculture and allied' sectors i.e., from crop to livestock sectors and within crop sector from cereals to horticultural produce. The share of crops in GVA has reduced from 12.1 per cent in 2013-14 to 10.0 per cent in 2017-18, and that of livestock increased from 4.1 per cent to 4.9 per cent (at current prices) during the same period.

Table 4: Gross Value Added at Basic Prices by Economic Activity

	Real growth (per cent)			Share at current prices (per cent)		
	2016-17	2017-18	2018-19	2016-17	2017-18	2018-19
Agriculture, forestry & fishing	6.3	5.0	2.9	17.9	17.2	16.1
Industry	7.7	5.9	6.9	29.4	29.3	29.6
Mining & quarrying	9.5	5.1	1.3	2.3	2.3	2.4
Manufacturing	7.9	5.9	6.9	16.8	16.4	16.4
Electricity, gas, water supply & other utility services	10.0	8.6	7.0	2.5	2.7	2.8
Construction	6.1	5.6	8.7	7.8	7.8	8.0
Services	8.4	8.1	7.5	52.7	53.5	54.3
Trade, hotel, transport, storage, communication & services related to broadcasting	7.7	7.8	6.9	18.2	18.2	18.3
Financial, real estate & professional services	8.7	6.2	7.4	20.9	21.0	21.3
Public administration, defence and other services	9.2	11.9	8.6	13.6	14.3	14.7
GVA at basic prices	7.9	6.9	6.6	100.0	100.0	100.0

Source: Central Statistics Office

Note: Data for 2018-19 are as per the Provisional Estimates.

Figure 26: Decline in Food Inflation (per cent)

Data source: Central Statistics Office

1.39 Growth in industry accelerated during 2018-19 on the strength of improving manufacturing and construction activity (Table 4), which have more than offset the deceleration in the other two sub sectors, 'Mining & quarrying' and 'Electricity, gas, water supply & other utility services'. Manufacturing accounted for 16.4 per cent in total GVA in 2018-19, marginally higher than that of 'Agriculture & allied' sector.

1.40 The GVA of the private corporate sector, with around 70 per cent share of the manufacturing sector (estimated from available data of listed companies with BSE and NSE) grew by 8.4 per cent at constant prices in 2018-19. On the other hand, production in manufacturing sector as measured by IIP slowed down to 3.5 per cent in 2018-19 from 4.6 per cent in 2017-18 (Figure 27). Growth in IIP is used to estimate the GVA growth of 'quasi-corporate' and 'unorganized' segment of manufacturing sector. Hence, contribution of unorganised sector to growth of manufacturing sector declined in 2018-19. Another positive development in the manufacturing sector has been the gradual improvement in capacity utilisation since Q4 of 2016-17 (Figure 28) along with the pick-up in bank credit to large industry since June 2018.

1.41 The growth in manufacturing sector picked up in 2018-19, although the momentum slowed down towards the end of

Figure 27: Index of Industrial Production growth (per cent) and PMI index

Data source: Central Statistics Office

the financial year with a growth of 3.1 per cent in fourth quarter of the year, as compared to 12.1 per cent, 6.9 per cent and 6.4 per cent in first, second and third quarter respectively. The growth rate in Q4 of 2018-19 moderated considerably, on account of lower NBFC lending, which in part led to low sales in the auto sector. The moderation is also evident in IIP manufacturing growth that decelerated considerably in the Q4 of 2018-19, with contraction in automobile (manufacture of motor vehicle and other transport equipment) sector and low growth in basic metals sector. PMI manufacturing, despite weakening in Q4 of 2018-19, remained above 50, reflecting the non-cessation of the accelerating phase in manufacturing, although at a lower rate (Figure 27).

1.42 Construction sector growth is estimated using growth of production of cement and consumption of finished steel. Production of cement and consumption of finished steel grew at 13.3 per cent and 7.5 per cent respectively in 2018-19, higher than their growth rates in 2017-18 and this reflects in higher growth of construction sector in 2018-19.

1.43 Service sector is the most dynamic sector in the economy and has remained

Figure 28: Capacity utilization for selected manufacturing companies (per cent) (3 quarter moving average)

Data source: Reserve Bank of India

the key driver of economic growth along with being a major contributor to GVA and export basket of the Indian economy. Service exports has become one of the mainstay of India's total exports increasing manifold, from ₹0.746 lakh crore in 2000-01 to ₹14.389 lakh crore in 2018-19, raising its share in total exports from 26.8 per cent to 38.4 per cent. Share of India in world service exports has also increased from 2 per cent in 2005 to 3.5 per cent in 2017. This share is much higher than that of manufacturing exports, which stands at 1.8 per cent in 2017.

1.44 Service sector growth declined from 8.1 per cent in 2017-18 to 7.5 per cent in 2018-19, due to decline in the growth in 'Public administration, defence & other services' and 'Trade, hotel & transport' sector. Yet, the sector continues to be the main contributor to growth of the Indian economy. The share of services sector in overall economy has been increasing and now stands at a little over 54 per cent. Within the services sector, 'Financial, real estate & professional services' is the largest component, followed by 'Trade, hotel & transport' sector. PMI services continued to remain above the 50 mark in 2018-19, reflecting the non-cessation of its expansionary phase.

1.45 The ‘Trade, hotel, transport, storage, communication & services related to broadcasting’ sector growth decreased by 0.9 percentage point to 6.9 per cent in 2018-19. A proxy for growth in transport sector is the amount of cargo and passengers carried by air,

rail and water, growth of which also declined in the second half of 2018-19 (Figure 29). Further, growth in number of passengers travelling by air and railways, which are indicators of growth of this sector, also declined in 2018-19 as well, as compared to previous year.

Figure 29: Growth in Cargo carried by various means of transport (per cent)

Data source: Directorate General of Civil Aviation, Ministry of Railway, and Ministry of Shipping

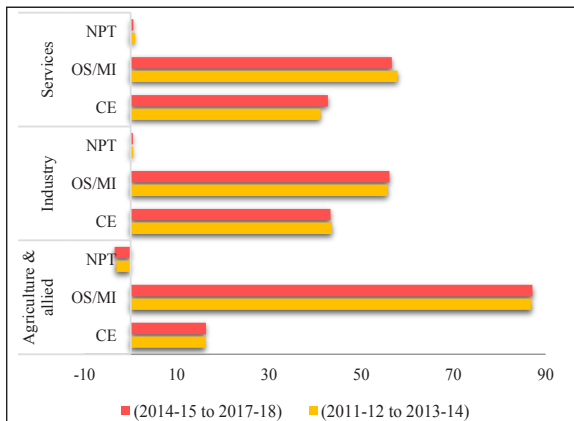

1.46 The ‘Financial, real estate and professional services’ sector grew at 7.4 per cent in 2018-19, higher as compared to 6.2 per cent in 2017-18. This sector accounts for more than 20 per cent of overall GVA of the economy. Major component of this sector is the ‘Real estate and professional services’, which has a share of more than 70 per cent (refer to GDP compilation methodology table in annex). Financial services component of the sector is estimated using growth rate of bank credit and bank deposit, which grew at 14.5 per cent and 10.0 per cent respectively in 2018-19, as compared to 10.0 per cent and 6.2 per cent respectively last year, reflecting a growth in GVA in financial services.

1.47 Union government revenue expenditure net of interest payments grew by 5.6 per cent in 2018-19, as compared to 11.3 per cent in the previous year. This is reflected in the growth rate of ‘Public administration, defence and other services’ (which is calculated using growth rate of revenue expenditure net of interest payments), declining from 11.9 per cent in 2017-18 to 8.6 per cent in 2018-19.

1.48 Each sector has a different composition of income going to labour, capital and entrepreneurship. Agriculture has a very small share of income going to labour as paid labour in this sector has only a marginal presence which is reflected in a very small share of Compensation of Employees (CE). Since most people work on their own farms,

Operating Surplus (OS) / Mixed income (MI) has a very large share in the GVA of agriculture. On the other hand, industry and services sector continue to show a high share of employee compensation in their GVA, which has not changed much over the last few years (Figure 30).

Figure 30: Net Value Added share in different income categories (per cent)

Data source: Central Statistics Office

Note: CE : Compensation of Employees, CFC: Consumption of Fixed Capital, OS: Operating Surplus; MI: Mixed Income of the self-employed, NPT: Net Production tax

Outlook of the economy

1.49 The year 2019-20 has delivered a huge political mandate for the government, which augurs well for the prospects of high economic growth. Real GDP growth for the year 2019-20 is projected at 7 per cent, reflecting a recovery in the economy after a deceleration in the growth momentum throughout 2018-19. The growth in the economy is expected to pick up in 2019-20 as macroeconomic conditions continue to be stable while structural reforms initiated in the previous few years are continuing on course. However, both downside risks and upside prospects persist in 2019-20.

1.50 Investment rate, which was declining from 2011-12 seems to have bottomed out. It is expected to pick up further in the year 2019-20 on the back of higher credit growth

and improved demand. The political stability in the country should push the animal spirits of the economy, while the higher capacity utilization and uptick in business expectations should increase investment activity in 2019-20. Accommodative monetary policy in the beginning of the year should help in decreasing real lending rates, more so, if the transmission mechanism improves. There are signs of continuing resolution of stressed assets in the banking sector as reflected in decline in NPA to gross advances ratio as on December 2018, which should push the capex cycle.

1.51 The performance of consumption will be crucial in deciding the growth path of economy. Rural wages growth which was declining seems to have bottomed out and has started to increase since mid-2018. Further growth in rural wages should help spur rural demand. Pick up in food prices should help in increasing rural incomes and spending capacity and hence rural consumption demand. PM-Kisan scheme was announced by the government to provide an income support of ₹6000/- per year to small and marginal farmer families having combined land holding/ownership of upto 2 hectares. The condition of minimum land holding has been subsequently removed to benefit all farmers. This cash transfer scheme will also increase the rural incomes.

1.52 The oil prices increased in 2018-19 by around 14 \$/bbl. However, oil prices are expected to decline in 2019-20 from the current level (based on the oil futures price for 2019-20). This should provide a positive push to consumption.

1.53 However, downside risks to consumption remain. The extent of recovery in farm sector and farm prices will decide the push to rural consumption, which is also dependent on the situation of monsoon. The

meteorological department has predicted that the rainfall over the country as a whole is likely to be near normal this year. This should lead to improvement in agriculture sector growth. However, according to IMD, some regions are expected to receive less than normal rains. This could prove to be detrimental for crop production in certain affected areas. If the impact of stress in the NBFC sector spills over to this year as well, it may lead to lower credit offtake from NBFCs, which may dampen growth in consumption spending.

1.54 Prospects of export growth remain weak for 2019-20 if status quo is maintained. However, reorientation of export policies to target countries/markets based on our own relative comparative advantage and the

importing country's exposure to Indian goods can foster export performance. Under status quo, the outlook for the global economy is bleak in 2019, with most of the countries projected to slow down. The major threat facing the world economy is the increase in trade tensions between U.S. and China, which could lead to large disruptions in global value chains, outcome of Brexit and downside risk to China's growth. The lower global growth and the increased uncertainty about trade tensions may negatively affect export demand, including that of India's, which in turn will further lower GDP growth rates of several countries.

1.55 On balance, the prospects of the economy should improve with growth of the economy expected to be 7 per cent in 2019-20.

CHAPTER AT A GLANCE

- Growth of GDP moderated to 6.8 per cent in 2018-19 from 7.2 per cent in 2017-18. However, India was still the fastest growing major economy.
- This moderation in growth momentum is mainly on account of lower growth in 'Agriculture & allied', 'Trade, hotel, transport, storage, communication and services related to broadcasting' and 'Public administration & defence' sectors.
- Growth in investment, which had slowed down for many years, has bottomed out and has started to recover since 2017-18. Growth in fixed investment picked up from 8.3 per cent in 2016-17 to 9.3 per cent in 2017-18 and further to 10.0 per cent in 2018-19.
- India maintained its macroeconomic stability by containing inflation within 4 per cent and by maintaining a manageable current account deficit to GDP ratio.
- Fiscal deficit of Central Government stood at a 3.4 per cent of GDP in 2018-19. Current account deficit was 2.6 per cent in April-December 2018.
- Non-Performing Assets as percentage of Gross Advances reduced to 10.1 per cent at end December 2018 from 11.5 per cent at end March 2018.
- Outlook of Indian economy appears bright with prospects of pickup in growth in 2019-20 on back of pick up in private investment and robust consumption growth.

ANNEX

Table: Key data sources and indicators used for each sector during different stages of estimation¹ of GDP

Sector	1 st Revised Estimates	2 nd Revised Estimates	3 rd Revised Estimates
Agriculture	<p>Current price:</p> <p><i>Crops:</i></p> <p><u>Production:</u> Fourth advance estimate for food grain production and third advance estimate/final estimate (as available by January) for area and production of horticulture crops, both published by Ministry of Agriculture and Farmer Welfare (MoAgFW).</p> <p><u>Prices:</u> Wholesale Price Indices (WPI) of crops (category specific) are applied on previous year price supplied by corresponding State Directorate of Economics and Statistics (DES).</p> <p><i>Livestock:</i></p> <p><u>Production:</u> Latest data on major livestock products by MoAgFW</p> <p><u>Prices:</u> Prices are supplied by corresponding State DES. If some State DES has not finalized the prices, item-wise WPI is applied on previous year's price supplied by corresponding State DES.</p> <p><i>Irrigation system:</i></p> <p>GVA at current prices are estimated by analyzing budget documents of Central and State Governments and annual reports of public sector irrigation companies.</p>	<p>Final estimate of crops and horticulture crops by MoAgFW. For some State specific crops, updated production data is supplied by the corresponding State DES. Price data is updated after comparable discussion from States.</p>	<p>Specific crop and revised prices made available during comparable discussion by some States or UTs. Latest cost of cultivation rates of by-products are used for compilation.</p>

¹ For the methodology of Advanced and Provisional Estimates, please refer to Economic Survey Volume II of 2017-18. In First Advance Estimate, Second Advance Estimate and Provisional Estimate, indicator-based methodology is followed. The estimates are based on seven to nine months data. First Revised Estimates (RE) are released in January of the subsequent year and then second and third revised estimates are released in January of following years. For example, for the year 2015-16, First RE was released in January 2017, Second RE was released in January 2018 and Third RE in January 2019.

Sector	1 st Revised Estimates	2 nd Revised Estimates	3 rd Revised Estimates
	<p><u>Constant prices:</u></p> <p><i>Crops and livestock:</i></p> <p>Current year production is multiplied with base year price.</p> <p><i>Irrigation system:</i></p> <p>Base year GVA estimates are moved with the index of area irrigated through government canals.</p>		
Forestry	<p>Current prices:</p> <p>Latest production and prices data from State forestry departments and category-specific WPI (used in case when prices are not available from some states). Recorded production is multiplied by 1.1 to estimate actual production.</p> <p>Constant prices:</p> <p>Latest production and base year prices are used.</p>	<p>Updated production and price estimate of Industrial Wood (IW) and minor forest product provided by concerned States or UTs.</p>	<p>Revision of production and price data of IW and minor forest product after comparable discussion.</p>
Fishing	<p>Current prices:</p> <p><u>Production:</u> Current data of inland fish, marine fish and curing activities from Department of Fisheries and Animal Husbandry Statistics (AHS) Division of MoAgFW and State Fisheries departments.</p> <p><u>Price:</u> Prices are supplied by corresponding State DES. If some State DES has not finalized the prices, WPI of fish is applied on previous year price supplied by corresponding State DES.</p> <p>Constant prices:</p> <p>Latest production and base year prices are used.</p>	<p>Updated production and price estimate on curing activities as per latest data provided by concerned States or UTs.</p>	<p>Revision of production, information on curing activities and revision of prices after comparable discussion.</p>
Mining & Quarrying	<p>Current price:</p> <p>Annual reports of the public sector mining companies, MCA-21 for private corporate sector, Salt commissioner for production of salt, State geological department for minor minerals.</p>		

Sector	1 st Revised Estimates	2 nd Revised Estimates	3 rd Revised Estimates
	<p>Constant price:</p> <p>Implicit Price Deflator (IPD) for major minerals from Indian Bureau of Mines and category specific WPI is used for the constant price estimation for coal and petroleum.</p>		
Manufacturing	<p>Current price:</p> <p>Annual reports of public sector manufacturing companies, Budget documents of Departmental Enterprises, MCA-21² for private corporate sector, Annual Survey of Industries (ASI), and NSS employment unemployment survey and Unincorporated survey data used for the base year and then carried forward by IIP and WPI (in absence of ASI data).</p> <p>Constant price:</p> <p>WPI manufacturing (sector-specific) is used as the deflator.</p>		
Electricity	<p>Current price:</p> <p>Budget documents of Departmental Enterprises (DE), Annual reports of electricity companies, MCA-21 for private corporate sector.</p> <p>Constant price:</p> <p>Quantum Index (created using amount of transmission and distribution of electricity companies) is used.</p>		
Gas and Water Supply	<p>Current price:</p> <p>MCA-21 and annual reports, NSS results taken forward by corporate growth and KVIC.</p> <p>Constant price:</p> <p>Base year estimates are moved with Quantum Index (created using volume of production) of gas and CPI for water supply.</p>		
Construction	<p>Current price:</p> <p><u>Pucca Construction:</u> For compiling the estimates of pucca construction in Dwellings, other buildings and structures (DOBS), commodity flow approach is used. On site value of construction materials, i.e., cement, iron & steel, bricks & tiles, timber & roundwood, bitumen & bitumen mixtures and glass & glass products, fixture & fittings, etc. used in construction activity was compiled for the base year 2011-12 using ASI results. Further, trade and transport margins were also added. The base year estimates are further moved by growth of gross value of output of manufacturing of particular compilation categories for future years. Rates and ratios based on study on construction conducted by Central Building Research Institute are used to arrive at the GVA of pucca construction.</p>		

² In the 1st RE, only common companies' growth in MCA 21 data is used, whereas for 2nd RE all companies that have filed return until the date are included.

Sector	1 st Revised Estimates	2 nd Revised Estimates	3 rd Revised Estimates
	<p>Kutchra Construction: For compiling the estimates of kutchra construction, expenditure approach is used. Construction activities on kutchra DOBS, land improvement, irrigation, mineral exploration, plantations, etc, are treated as kutchra construction. 75 percent of expenditure made by different institutional sectors on said activities constitutes the GVA of kutchra construction.</p> <p>Constant prices:</p> <p>Estimates are compiled using appropriate WPI and CPI based deflators.</p>		
Trade & Repair services	<p>Current prices:</p> <p>Budget documents of DE, annual reports of Non Departmental Enterprises (NDE), MCA-21 data for private corporate sector, NSS results for quasi-corporations sector taken forward by unorganised index of sales tax turnover* (for trade sector), service tax growth rate (for repair services), sale growth of motor vehicles (for maintenance and repair of motor vehicles and motor cycles).</p> <p>Constant prices:</p> <p>Weighted WPI and sales growth of vehicles</p>		
Hotels & Restaurants	<p>Current prices:</p> <p>Annual reports of DE, MCA-21 data for private corporate sector, NSS results for unorganised sector in the base year taken forward using corporate sector growth.</p> <p>Constant prices:</p> <p>Weighted WPI is used as a deflator.</p>		
Rail Transport	<p>Current Prices:</p> <p>Estimates from Central Government budget documents for Departmental Commercial Undertakings, MCA-21 data for the private Corporate Sector and latest available annual report for Non Departmental Commercial Undertakings.</p> <p>Constant Prices:</p> <p>Volume extrapolation using weighted volume index of passenger earning, goods earning etc. combined with their earnings in the base year as weights.</p>		
Other (Land, water, air) transport	<p>Current price:</p> <p>Budget documents of DE, Annual reports of NDE, MCA-21 data for private corporate sector, NSS results for unorganised sector carried forward using vehicles growth (for current price inflated using CPI -transport and communication)</p> <p>Constant price:</p> <p>Volume index of transport (for land transport), air volume index (for air transport), index of cargo handled (water transport), combined growth of road, water and air (for service incidental to transport).</p>		

Sector	1 st Revised Estimates	2 nd Revised Estimates	3 rd Revised Estimates
Communi- cation & Broadcasting	<p>Current prices: Budget document of Department of Post, annual reports of NDE (BSNL, MTNL), MCA-21 data for private corporate, unorganised sector by NSS results moved forward using Service tax growth (for courier, cable and telecommunication) and corporate growth (for recording, publishing and broadcasting services).</p> <p>Constant price: Minutes of usage growth and CPI-transport and communication</p>		
Banking including NBFI and financial auxiliaries	<p>Current price: Annual accounts data of nationalised banks, RBI data for private banks, foreign banks and urban cooperative banks, NABARD data for Regional Rural Banks and rural cooperative banks, SEBI data for financial auxiliaries, MCA data for Non-Banking Financial Institutions and financial auxiliaries, All-India Debt and Investment Survey data, RBI report on private moneylenders and NSS 67th round data of enterprise surveys and RBI data on loans and advances to households for unorganised sector. Budget documents are used to estimate the GVA of Post Office Savings Bank.</p> <p>Constant price: Estimates are prepared separately for each of the sub-sectors. In general, the base year estimates are carried forward using indicators measuring the volume of activity in the corresponding sub-sector (e.g., for banks, aggregate deposit and credit growth rates are derived using data from Reserve Bank of India). In cases where the volume of activity is measured in value terms i.e., at current prices, these are deflated by implicit price deflator of non-financial sectors to obtain the corresponding quantum index.</p>	<p>Current price: Data is updated based on latest data from the MCA, NABARD, National Federation of State Cooperative Banks Limited and receipts of annual reports from State Financial Corporations, Central and State level public sector financial companies and corporations and budget documents for Post Office Bank.</p> <p>Constant price: The implicit price deflator also is updated based on revised estimates in current and constant prices for the non-financial sector.</p>	

Sector	1 st Revised Estimates	2 nd Revised Estimates	3 rd Revised Estimates
Insurance and pension	<p>Current price:</p> <p>Data from annual accounts of public sector life and non-life insurance companies, IRDAI data for private insurance companies, PFRDA data for pension funds, and budget documents for postal life insurance are used.</p> <p>Constant price:</p> <p>Estimates of GVA at constant prices are prepared separately for each of the sub-sectors. In general, the base year estimates are carried forward using indicators measuring the volume of activity (for instance, using premium less reinsurance and claims paid for public non-life insurance) in the corresponding sub-sector. In cases where the volume of activity is measured in value terms i.e., at current prices, these are deflated by implicit price deflator of non-financial sectors to obtain the corresponding quantum index. For postal life insurance, current price GVA is deflated using all-India overall CPI.</p>	<p>In both current price and constant price, data is updated based on latest data from the IRDAI, PFRDA and analysis of budget documents. In constant price estimates, the implicit price deflator also is updated based on revised estimates in current and constant prices for the non-financial sector.</p>	
Real Estate	<p>Current price:</p> <p>Annual reports of NDE, MCA-21 data, NSS results for unorganised sector carried forward with corporate sector growth.</p> <p>Constant price:</p> <p>CPI and WPI are used for constant price estimation.</p>		
Ownership of Dwellings	<p>Current price:</p> <p>Gross rental is the number of census houses (urban) times rent per household as obtained from Consumer Expenditure Survey (CES) for the base year. For years subsequent to the base year, rent per household is extrapolated using the index of house rent (urban areas) and the number of dwellings is extrapolated using the inter-censal growth rate of urban dwellings. For rural dwellings, capital stock of rural residential buildings is used.</p> <p>Constant price:</p> <p>Base year estimate with inter-censal growth rate of dwellings for urban areas and deflated by CPI (Rural) for rural dwellings.</p>		

Sector	1 st Revised Estimates	2 nd Revised Estimates	3 rd Revised Estimates
Professional services	<p>Current Prices: Annual reports of NDE, MCA-21 data, NSS results taken forward using private corporate sector growth).</p> <p>Constant Prices: WPI and CPI are used.</p>		
Public Administration and Defence	<p>Current Prices: Revised estimates from Centre and State budget documents along with Local Bodies (LB) and autonomous institutes' data.</p>	<p>Actual estimates from Centre and State budget documents along with LB and autonomous institutes' data.</p>	<p>Actual estimates from Centre and State budget documents along with LB and autonomous institutes' data (revision, if any, based on comparable discussion).</p>
<p>Constant Prices: Current price estimates of Net Value Added are deflated using CPI and Consumption of Fixed Capital at constant prices are added to arrive at GVA.</p>			
Product Taxes	<p>Current Prices: Revised estimates from Centre and State budget documents along with LB and autonomous institutes data.</p>	<p>Actual estimates from Centre and State budget documents along with LB and autonomous institutes' data.</p>	<p>Actual estimates from Centre and State budget documents along with LB and autonomous institutes' data (revision, if any, based on comparable discussion).</p>
<p>Constant Prices: Constant price estimates of taxes on products are compiled by volume extrapolation. Volume extrapolation is done separately for different product taxes. Indicators used for extrapolation are growth in volume of output of manufacturing , services, etc.</p>			

Sector	1 st Revised Estimates	2 nd Revised Estimates	3 rd Revised Estimates
Product Subsidies	<p>Current Prices:</p> <p>Revised estimates from Centre and State budget documents along with LB and autonomous institutes' data.</p>	<p>Actual estimates from Centre and State budget documents along with LB and autonomous institutes' data.</p>	<p>Actual estimates from Centre and State Budget documents along with LB and autonomous institutes' data (revision, if any, based on comparable discussion).</p>

Imports of goods and services	<p>Current prices: Data of import of goods and services is taken from RBI.</p> <p>Constant prices: Import of goods is deflated by unit value of import index and import of services is deflated by implicit price index of service sector.</p>		
Net Factor Income from Abroad	<p>Current prices: Data on receipt of compensation of employees and property & entrepreneurial incomes is taken from RBI.</p> <p>Constant prices: Deflated by implicit price of service sector.</p>		
<p>Note:</p> <p>^ : Inputs are assumed to be 16.2 per cent of total value of output at current price in Forestry sector.</p> <p># : Commodity flow approach refers to consumption of cement and cement products, iron and steel, Bricks and tiles, timber, bitumen, glass products.</p> <p>* : After the implementation of GST, sales tax is now subsumed under GST and now a comparable estimate of turnover is estimated.</p>			

Fiscal Developments

“In the happiness of his subjects lies his happiness; in their welfare his welfare; whatever pleases himself he shall not consider as good, but whatever pleases his subjects he shall consider as good. Hence the king shall ever be active and discharge his duties; the root of wealth is activity, and of evil its reverse.”

-Kautilya’s Arthashastra, Chapter XIX, ‘The Duties of a King’ in Book I, ‘Concerning Discipline’.

Tabled in the backdrop of an optimistic global scenario of the investment and trade cycle, Budget 2018-19 reiterated the objective of fiscal consolidation with introduction of a new fiscal targeting framework. Revenue augmentation and expenditure reprioritisation and rationalisation continue to be integral to fiscal reforms. Broadening and deepening the direct tax base and stabilisation of Goods and Services tax are the other priorities. Over the last six years, budgetary expenditure of the Central Government, as per cent of GDP, has seen considerable moderation with most of the reduction in the revenue expenditure. Total expenditure fell by 0.3 percentage points in 2018-19 PA (Provisional Actuals) over 2017-18, with 0.4 percentage points reduction in revenue expenditure and 0.1 percentage points increase in capital expenditure. Within revenue expenditure, major subsidies comprising food, fertiliser and petroleum continued their downward trend and have further declined by 0.1 percentage point of GDP in 2018-19 PA over 2017-18. Improving the quality of expenditure remains the key priority. Meeting allocational requirements without diversion from the newly revised fiscal glide path remains the foremost challenge.

2.1 Budget 2018-19 was presented in the backdrop of upswing in global investment and trade in the second half of 2017. The global growth was expected to continue its momentum in 2018. Despite several headwinds, Indian economy is expected to grow at 6.8 per cent (as per provisional estimates released by Central Statistics Office) in 2018-19 while maintaining

macro-economic stability. The growth with macro-stability stems mainly from ongoing structural reform, fiscal discipline, efficient delivery of services and financial inclusion.

2.2 The Budget 2018-19 affirmed Government’s intent on fiscal consolidation. It aimed to revert to the path of fiscal rectitude after the temporary blip in 2018-19. The new

fiscal targeting framework was adopted, which rests on twin pillars of reducing debt and fiscal deficit. The revised fiscal glide path envisaged achieving fiscal deficit of 3 per cent of GDP by FY 2020-21 and Central Government debt to 40 per cent of GDP by 2024-25.

2.3 The Medium Term Fiscal Policy (MTFP) Statement presented alongwith the Union Budget 2018-19 revised the fiscal deficit target for 2017-18, as percent of GDP, by 0.3 percentage point from 3.2 per cent to 3.5 percent, owing to spill-over impact of the new indirect tax regime. It aimed to reach the fiscal deficit target of 3.3 per cent of GDP in 2018-19 BE, with projections for 2019-20 and 2020-21 at 3.1 per cent and 3.0 per cent, respectively. The debt-GDP ratio of Central Government was projected at 48.8 per cent at end-March 2019. It is targeted to decline to 46.7 per cent by end-March 2020 and 44.6 per cent by end-March 2021, restoring the long-term trend of decline in the debt to GDP ratio. The FY 2018-19 has ended with fiscal deficit at 3.4 per cent of GDP and debt to GDP ratio of 44.5 per cent (Provisional).

2.4 This chapter reviews the fiscal developments in India during the year 2018-19. It is organised in four sections: Central

Government finances, State finances, General Government, and outlook for 2019-20.

CENTRAL GOVERNMENT FINANCES

2.5 Fiscal consolidation entails revenue augmentation and expenditure rationalisation. In the post-Fiscal Responsibility and Budget Management Act (FRBMA) period from 2004-05 to 2007-08, significant fiscal consolidation could be achieved largely due to buoyant tax revenues with net tax revenue to the Centre increasing by 1.9 percentage points of GDP. As part of the strategy to revive growth post the Global financial crisis, fiscal consolidation was paused, which manifested in tax concessions and higher public expenditure. However, after 2011-12, there have been gradual, but consistent, efforts towards fiscal consolidation.

2.6 Major fiscal indicators of the Central Government are indicated in Table 1. The salient changes in the Central Government finances evident from Table 1 include improvement in the tax to GDP ratio, significant consolidation of revenue expenditure and gradual tilt towards capital spending over the years. These have led to progressive reduction in primary and fiscal deficits.

growth over 2017-18

Trends in Receipts

2.8 Central government receipts can broadly be divided into non-debt and debt receipts. The non-debt receipts comprise of tax revenue, non-tax revenue, recovery of loans, and disinvestment receipts. Debt receipts mostly consist of market borrowings and other liabilities, which the government is obliged to repay in the future. The Budget 2018-19 targeted significantly high growth in non-debt receipts of the Central Government, which was driven by robust growth in net tax revenue and non-tax revenue (refer to Table 2). The outcome as reflected in the Provisional Actual figures is lower than the budget estimate owing to reduction in the net tax revenue. This is also evident from the composition of non-debt receipts plotted in Figure 1.

Tax Revenue

2.9 Budget 2018-19 envisaged a growth of 16.7 per cent in gross tax revenue (GTR) over the revised estimates (RE) of 2017-18. GTR was estimated at ₹22.7 lakh crore for BE 2018-19, which was 12.1 per cent of the GDP. The growth in GTR was estimated to be led by 17.3 per cent growth in indirect taxes and 14.4 per cent growth in direct taxes over the revised estimates of 2017-18. Broadly, 51 per cent of GTR was estimated to accrue from direct taxes and the remaining 49 per cent from indirect taxes. The contribution of different taxes in GTR for 2018-19 BE and 2018-19 PA is shown in Figure 2.

2.10 As per Provisional Actual figures released by the Controller General of Accounts for FY 2018-19, the growth in GTR in 2018-19 has been lower than envisaged in

Figure 1: Composition of Non-Debt Receipts (in per cent)

Source: Union Budget Documents & CGA

BE: Budget Estimates, RE: Revised Estimates (as per Interim Budget), PA: Provisional Actuals

the budget (refer to Table 2). Direct taxes have grown by 13.4 per cent owing to improved performance of corporate tax. However, indirect taxes have fallen short of budget estimates by about 16 per cent. This is largely owing to the shortfall in GST revenues¹. The GST collections are yet to stabilise and several

changes have been carried out following decisions of the GST Council during the course of the year. These changes, *inter alia*, relate to rate rationalisation for goods and services, changes in the threshold limits and exemptions granted, which are detailed in Annex I.

Figure 2: Composition of Gross Tax Revenue

Source: Union Budget Documents & CGA
BE: Budget Estimates, PA: Provisional Actuals

2.11 Though there has been improvement in tax to GDP ratio over the last six years (Figure 3), GTR as a proportion of GDP has declined by 0.3 percentage points in 2018-19 PA over 2017-18. Indirect taxes have fallen by 0.4 percentage points of GDP primarily due to shortfall in GST collections. This has been partly offset by 0.1 percentage points increase in direct taxes. Trends in major taxes in relation to GDP displayed in Figure 4 show that receipts from corporate tax have considerably improved in 2018-19 PA. Better tax administration, widening of TDS carried over the years, anti-tax evasion measures and increase in effective tax payers base have contributed to direct tax buoyancy. Widening of tax base due to increase in the number of

indirect tax filers in the GST regime has also led to improved tax buoyancy. Going forward, sustaining improvement in tax collection will depend on the revenue buoyancy of GST.

Source: Union Budget Documents & CGA

BE: Budget Estimates, PA: Provisional Actuals

CIT=Corporate tax, TOI=Tax on Income other than Corp. Tax, UED=Union Excise duties, ST=Service Tax, GST=Goods & Service Tax

2.12 Analysis of direct tax receipts shows that a significant portion of tax collected are refunded every year (refer to Figure 5). As per cent of direct tax collections, refunds have

declined after 2016-17. Significant reduction in pendency of direct refund cases² as well as quality of assessment perhaps explain the trend in refunds over the last few years.

Figure 5: Direct Tax Refunds

Source: Union Budget Documents & CGA

PA: Provisional Actuals

² As per CAG Report No. 40 of 2017, pendency of direct refund cases has declined from 28.9 per cent in 2012-13 to 10.7 per cent in 2016-17.

2.13 Major measures announced for direct taxes in Budget 2018-19 and 2019-20 (Interim Budget) are presented in Annex II.

Non-Tax Revenue

2.14 Non-tax revenue consists mainly of interest receipts on loans to States and Union Territories, dividends and profits from Public Sector Enterprises including surplus of Reserve Bank of India transferred to GOI, and external grants and receipts for services provided by the Central Government. These services include fiscal services like currency, coinage and mint, general services such as Public Service Commission and police, social services like education and health, and economic services like irrigation, transportation and communication. The Budget for 2018-19 envisaged generation of ₹2.45 lakh crore of non-tax revenue, 27.2 per cent higher than 2017-18, of which roughly one-third of the increase is attributable to dividends and profits (refer to Table 3). Non-tax revenue constitutes about 1.3 per cent of GDP in 2018-19.

2.15 As per the Provisional Actual figures for 2018-19, receipts from non-tax revenue have exceeded the budget estimate. Table 3 shows that increased realisation from dividends and profits has offset slight declines in its other components.

Non-Debt Capital Receipts

2.16 Non-debt capital receipts mainly consist of recovery of loans and advances, and disinvestment receipts. The share of recovery of loans has declined over the years following disintermediation of loan portion of Central assistance to States consequent to the recommendation of the Twelfth Finance Commission, and States allowed to borrow directly from the market. The Budget for 2018-19 has envisaged generation of ₹0.92 lakh crore of non-debt capital receipts, comprising ₹0.12 lakh crore of recovery of loans and advances, and ₹0.80 lakh crore of disinvestment receipts. As against this, ₹1.03 lakh crore of non-debt capital receipts including ₹0.85 lakh crore from disinvestment, as per provisional actual

figures, have been realised during 2018-19. The details of disinvestment during 2018-19 and new initiatives being undertaken

by the Department of Investment and Public Asset Management (DIPAM) are given in Box 1.

Box 1: Disinvestment

The B.E. for disinvestment for the year 2018-19 was fixed at ₹0.80 lakh crore. Against this, ₹0.85 lakh crore was collected using a variety of instruments like Initial Public Offers (IPOs), Offer for Sale (OFS), Buyback, Exchange Traded Funds (ETF), etc. Details are as under:

IPOs:

Proceeds from listing of five companies (MIDHANI, RITES, IRCON, GRSE and MSTC) in the stock exchanges: ₹1,914 crore.

OFS:

Proceeds from the Coal India Offer for Sale (OFS) including Employee OFS: ₹5,236 crore.

Buybacks:

Buyback of shares of eleven companies (KIOCL, NALCO, NLC, CSL, BHEL, NHPC, IOCL, ONGC, NMDC, OIL and CIL): ₹10,669 crore.

ETFs:

Exchange Traded Funds (ETFs) consisting of (i) CPSE-ETF and (ii) Bharat-22 ETF yielded ₹45,080 crore during 2018-19.

Strategic Disinvestment:

Progress was made in respect of the 28 cases of Strategic Disinvestment approved by the Government, which are at different stages, with three companies strategically sold off during FY 2018-19, namely, (i) Hospital Services Consultancy Corporation Ltd. (HSCC Ltd.), (ii) Dredging Corporation of India Ltd. (DCIL) and (iii) National Projects Construction Corporation Ltd. (NPCC Ltd.).

HSCC was acquired by NBCC India at a consideration of ₹285 crore while Dredging Corporation was acquired by a Consortium of four ports at ₹1,049 crore. NPCC was acquired by WAPCOS at a consideration of ₹79.80 crore.

A major transaction for strategic acquisition of Government of India's equity holding in Rural Electrification Corporation Ltd. (REC) was completed by Power Finance Corporation Ltd. (PFC) in an off-market deal at a consideration of ₹14,500 crore.

Listing of unlisted CPSEs:

CCEA has given 'in-principle' approval for Initial Public Offer/ Further Public Offer (FPO) of seven CPSEs, namely, Telecommunication Consultants (India) Ltd. (IPO), RailTel Corporation India Ltd. (IPO), National Seed Corporation India Ltd. (IPO), Tehri Hydro Development Corporation Ltd. (IPO), Water & Power Consultancy Services (India) Ltd. (IPO), FCI Aravali Gypsum and Mineral (India) Ltd. (IPO) and Kudremukh Iron Ore Company Ltd. (FPO). Necessary action for listing of these companies has been initiated. Listing of IRCTC, IRFC and NEEPCO earlier approved is also being taken up.

New Initiatives undertaken by DIPAM:

1. Focus on Asset Monetisation – Policy & Process:

(i) The Institutional framework was notified on 8 March, 2019 covering:

- (a) Identified non-core assets of CPSEs under Strategic Disinvestment.
- (b) Immovable Enemy Property under the custody of CEPI, MHA.
- (c) Assets of other CPSEs/PSUs/other Government Organization including sick/loss making CPSEs.
- (ii) Process has been set in motion:
 - (a) Alternative Mechanism (AM), Inter-ministerial Group (IMG) and Consultative Groups have been notified;
 - (b) Hiring of intermediaries for Asset Monetisation Cell started.
 - (c) Process of identification of potential assets to be monetized has been started.

2. Debt- ETF:

Following an announcement in the Budget Speech of Finance Minister in February 2018, DIPAM is in the process of creating a Debt-ETF to enable CPSEs to access the debt/ bond market to partially meet the capital expenditure needs by leveraging their aggregate strength. Adviser, Legal Adviser, and AMC have been appointed.

Trends in Expenditure

2.17 Rationalisation and reprioritisation of government expenditure is integral to fiscal reforms. As India's tax to GDP ratio is low, Government faces the challenge of providing sufficient funds for investment and infrastructure expansion while maintaining fiscal discipline. Therefore, improving the composition and quality of expenditure towards capital spending becomes significant.

2.18 The composition of government expenditure (refer to Figure 7) reveals that expenditure on defence, salaries, pensions, interest payments and subsidies account for more than sixty per cent of total expenditure. Several initiatives have been undertaken by the Ministry of Defence to improve

efficiency and utilisation of defence expenditure, promote self-reliance, and encourage private sector participation in the defence sector. These are detailed in Box 2. Expenditures on salaries, pensions and interest payments are, by and large, committed in nature and have limited headroom for creation of additional fiscal space. Subsidies have seen significant moderation through improved targeting (refer to Figure 8). There has been considerable restructuring and reclassification of Central sector and Centrally Sponsored Schemes in the recent past. Even capital expenditure³ was rationalised in 2017-18, wherein support provided to Railways and the mechanism for transferring Externally Aided Project loans to States were rationalised.

³ There was a reduction to the tune of approximately ₹15,000 crore in Government of India's support to Railways as it was decided that the Railways would access the market directly to transition towards greater financial autonomy. With respect to Externally Aided Projects (EAP) loans to States, the BE was ₹18,500 crore. This expenditure, under a loan Major Head (7601), was actually in the nature of pass through as the states could only borrow externally against the guarantee of the Consolidated Fund of India. Therefore, this arrangement was impacting the fiscal deficit of the Government of India, when the loans were the liabilities of the state governments. This arrangement was changed to reflect the fact that only final repayments to the international organisations amounting to ₹4,500 crore would form part of the expenditure of the Government of India. This accounting arrangement would reflect as a reduced capital expenditure for Central Government.

Box 2: Defence Initiatives

Budget

- The allocation for Defence Budget, including Civil estimates and Pensions for 2018-19 is ₹4,04,364.71 crore, which is ₹44,510.50 crore over BE 2017-18.
- Capital Expenditure in absolute terms has gone up in the past few years. The allocated Capital Budget has been fully utilized since 2016-17, reversing the previous trends of surrender of funds.
- The trend of underutilization of Defence Budget has also been reversed in FY 2016-17 and 2017-18.
- Delegation of enhanced financial powers to Vice-Chiefs of the three Services has been done primarily to expedite the decision-making process involved in revenue procurements of the Armed Forces. With the latest delegation, the Vice-Chiefs now have powers up to ₹500 crore for revenue procurement. On the capital side also, the ceiling has been enhanced to ₹300 crore from ₹150 crore.
- Ministry of Defence has comprehensively reviewed the Defence Procurement Procedure 2016. Several measures as part of “Business Process Re-engineering” have been undertaken to make the acquisition process industry friendly, provide a level playing field for various stakeholders and reduce the complexities and time lines in provisioning of defence platforms, equipment and systems for modernization of the Indian Armed Forces.

Self-Reliance

- To achieve self-reliance in the defence sector and make India a global hub in defence manufacturing, the Ordnance Factories (OFs), Defence Public Sector Undertakings (DPSUs) and the private industry ecosystem have enhanced their capabilities and widened the product range. A large number of major products have been developed through Research and Development initiatives. In addition, a number of products and equipment are being produced through transfer of technology.
- As a policy, DPSUs and OFs have been outsourcing many of their requirements and have over the years, developed a wide vendor base that includes a large number of medium and small scale enterprises and large scale industries. In addition, the DPSUs and OFs are also striving to increase the indigenous content in the equipments and products manufactured by them.

Policy Initiative

- In order to encourage participation of Indian industry in design and development of defence items, a ‘**Make-II**’ procedure was notified in February 2018 wherein a number of industry friendly provisions have been introduced, such as relaxation of eligibility criteria, minimal documentation, and provision for consideration of suo-moto proposals suggested by industry/individual. The framework for implementation of Make-II at OFs and DPSUs level has been issued in February 2019. The framework will enable OFs & DPSUs to undertake indigenization of the items, particularly of the import substitution nature, through Indian private industry.

- An innovation ecosystem for Defence, titled “Innovation for Defence Excellence” (iDEX) was launched in April 2018 by the Hon’ble PM. iDEX is aimed at creating an ecosystem to foster innovation and technology development in Defence and Aerospace. iDEX intends to engage industries including MSMEs, Start-ups, Individual Innovators, R&D institutes and Academia and provide them grants/funding and other support to carry out R&D, which has potential for future adoption for Indian defence and aerospace needs. The iDEX programme has been operationalized through launch of the ‘Defence India Startup Challenges (DISC)’ in two legs, wherein innovators, organizations as well as individuals have been presented with ‘Problem Statements’ for resolution.
- A Defence Investor Cell has been made functional in the Department of Defence Production (DDP) since January 2018. It has played an important role as one-stop solution for all types of defence production related queries.

Private Sector Participation

- To achieve the goal of self-reliance in the Defence sector, continuous efforts are being made to increase indigenization wherever technologically feasible and economically viable. To facilitate private sector participation, several measures have been undertaken:
 - In May 2001, the Defence Industry sector, which was hitherto reserved for the public sector, was opened upto 100 per cent for Indian private sector participation, with Foreign Direct Investment (FDI) upto 26 per cent, both subject to licensing. FDI policy was further liberalized and has been allowed under automatic route upto 49 per cent, and above 49 per cent wherever it is likely to result in access to modern technology or for other reasons to be recorded.
 - After opening of the Defence Industry Sector for Indian private sector participation, so far 42 FDI proposals/Joint Ventures have been approved in defence sector for manufacture of various defence equipment, both in public and private sectors. DPIIT has issued 439 Industrial Licenses (ILs) to private companies till March 2019 for manufacture of a wide range of defence items, which were 214 till the end of March 2014.

Export Promotion

- Exports from Ordinance Factory Board (OFB), DPSUs and the private sector (based on authorization issued by DDP) in the Financial Year 2017-18 had increased to ₹4,682 crore from ₹1,522 crore in the financial year 2016-17. Further, exports have more than doubled in 2018-19 to ₹10,746 crore over the previous year.

Source: Ministry of Defence

2.19 Comparison of Provisional Actuals with budget estimates for the year 2018-19 reveals that Government has been able to contain fiscal deficit at 3.4 per cent of GDP through compression of Government expenditure. The entire reduction is in revenue expenditure (refer to Table 1). As per cent of GDP, total expenditure fell by 0.3

percentage points in 2018-19 PA over 2017-18, with 0.4 percentage points reduction in revenue expenditure and 0.1 percentage point increase in capital expenditure. Over 2017-18, total expenditure has grown by 7.9 per cent in 2018-19 PA with its capital component growing at more than twice the rate of growth in revenue (refer to Table 2).

2.20 The quality of expenditure reflected in the share of capital expenditure in total expenditure has improved in 2018-19 PA over 2017-18 (refer to Figure 6). As a proportion of GDP, both capital expenditure and non-defence capital expenditure register a rise of 0.1 percentage point in 2018-19 PA (refer to Figure 6A). Expansion in capital expenditure

on roads, railways and others has been met without compromising defence capital expenditure. In fact, capital expenditure of Ministry of Road Transport and Highways and Ministry of Railways has recorded impressive growth of 33 per cent and 22 per cent, respectively, in 2018-19 PA over 2017-18.

RE: Revised Estimates (as per Interim Budget)

2.21 The growth in revenue expenditure in 2018-19 PA though moderate, has been led by salaries, pensions and interest payments (refer to Tables 4 & 5). Major subsidies comprising

food, fertiliser and petroleum have continued their downward trend and have further declined by 0.1 percentage point of GDP in 2018-19 PA over 2017-18 (refer to Figures 8 & 9).

Source: Union Budget Documents & CGA

PA: Provisional Actuals, #2018-19 RE number (as per Interim Budget)

2.22 During 2013-14 to 2018-19 PA, the total budgetary expenditure of the Central Government has declined by 1.7 percentage points of GDP (refer to Table 1). Revenue expenditure declined by 1.6 percentage points and capital expenditure by 0.1 percentage point. Figure 10 shows that more than two-thirds of the fiscal space created by compression of revenue expenditure is on account of reduction in food, fertiliser and petroleum subsidies. This is an outcome of decline in global crude prices, decontrol of prices and better targeting through direct benefit transfer of subsidies. The recent expenditure trends show improved expenditure quality, with capital expenditure as a proportion of GDP, rising by nearly 0.1 percentage point in 2018-19 PA over 2017-18 (refer to Table 1). Apart from budgetary spending, Extra Budgetary Resources (EBR) have also been mobilised to finance infrastructure investment since 2016-17. Government has raised EBRs of ₹88,452 crore during three years from 2016-17 to 2018-19.

Transfers to States

2.23 Transfer of funds to States comprises

essentially of three components: share of States in Central taxes devolved to the States, Finance Commission Grants, and Centrally Sponsored Schemes (CSS), and other transfers. Till 2013-14, funds for CSS were routed through two channels, the Consolidated Funds of the States and directly to the State implementing agencies. In 2014-15, direct transfers to State implementing agencies were discontinued and all transfers to States including for the CSS were routed through the Consolidated Funds of the States. Another significant development has been award of the Fourteenth Finance Commission to devolve 42 per cent of the divisible pool of taxes to the States, up from 32 per cent earlier.

2.24 Both in absolute terms, and as a percentage of GDP, total transfers to States have risen between 2014-15 and 2018-19 RE (refer to Table 6 and Figure 11). Total transfers to States have risen by 1.2 percentage points of GDP over this period.

Central Government Debt

2.25 Total liabilities of the Central Government include debt contracted against

the Consolidated Fund of India, technically defined as Public Debt, as well as liabilities in the Public Account. These liabilities include external debt (end-of-the financial year) at current exchange rate but exclude part of NSSF liabilities to the extent of States' borrowings from the NSSF

and investments in public agencies out of the NSSF, which do not finance Central Government deficit. Total liabilities of the Central Government at end-March 2019 stood at ₹84.7 lakh crore and 90 per cent of which was public debt (refer to Table 7).

Table 7: Debt Position of the Central Government (in ₹ lakh crore)

C. Total Liabilities (A+B)	47.07	53.39	58.66	65.27	70.07	77.99	84.68

Source: Various issues of Status Paper on Government Debt and Quarterly Report on Public Debt for December 2018, P: Provisional, * The external debt at current exchange rates from Aid, Account and Audit Division, Ministry of Finance. Data for 2017-18 and 2018-19 include net cumulative SDR allocations by the IMF.

2.26 Figure 12 shows that total liabilities of the Central Government as a ratio of GDP, has been consistently declining, particularly after the enactment of the

FRBM Act, 2003. This is an outcome of both fiscal consolidation efforts as well as relatively high GDP growth (Figure 13).

Figure 12: Trend in Centre’s Debt-GDP ratio (in per cent)

Source: Various Issues of Status Paper on Government Debt, P: Provisional

Figure 13: GDP growth and growth in Outstanding Liabilities

Source: Various Issues of Status Paper on Government Debt, P: Provisional

2.27 Central government debt is characterised by low currency and interest rate risks. This is owing to low share of external debt in the debt portfolio and almost entire external borrowings being from official sources. Further, most of the public debt has been contracted at fixed interest rate making

India’s debt stock virtually insulated from interest rate volatility. This lends certainty and stability to budget in terms of interest payments.

2.28 The other salient feature is the gradual elongation of the maturity profile of the Central Government’s debt (refer to

Figure 14) leading to reduced rollover risks. The proportion of dated securities maturing in less than five years has seen consistent decline in recent years. The weighted average maturity

of outstanding stock of dated securities of the GOI has increased from 9.7 years at end-March 2010 to 10.4 years at end-March 2019.

Figure 14: Maturity Profile of Outstanding Dated Central Government Securities (as per cent of total)

STATE FINANCES

2.29 The State budgets expanded considerably in 2017-18 RE over 2016-17 on account of increase in revenue expenditure (refer to Table 8 and Figure 15A). Capital expenditure consists of capital outlay and loans and advances by the State Governments. The loans and

advances by the State Governments declined sharply in 2017-18 RE owing to reduction in loans and advances by States for power projects and food storage and warehousing. On the revenue front, States own tax and non-tax revenue display robust growth in 2017-18 RE which is envisaged to be maintained in 2018-19 BE (Table 8 & Figure 15B).

Table 8: Fiscal Indicators of States (combined)

Items	2011-12	2012-13	2013-14	2014-15	2015-16	2016-17	2017-18 RE	2018-19 BE

Figure 15A : States' Expenditure in ₹ lakh crore

Figure 15B : Own Tax & Non-tax Revenue of States (combined) in ₹ lakh crore

Source: RBI State Finances: A Study of Budgets, RE : Revised Estimates, BE : Budget Estimates

2.30 The RBI study on State Finances points to the deterioration in fiscal deficit to GDP ratio in 2017-18 RE when compared to the budget estimate. This deterioration occurred due to the overshooting of revenue expenditure mainly due to farm loan waiver and pay revisions. However, over 2016-17, there is consolidation in fiscal deficit by about

0.4 percentage points (refer to Figure 16 A).

2.31 States have budgeted for fiscal deficit of 2.6 per cent of GDP in 2018-19 BE. Consolidation is mainly due to posting of surplus of about 0.2 percentage points of GDP on the revenue account (refer to Figure 16 B).

Figure 16A: Gross Fiscal Deficit of States (as per cent of GDP)

Figure 16B: Revenue Deficit of States (as per cent of GDP)

Source: RBI State Finances: A Study of Budgets, RE : Revised Estimates, BE : Budget Estimates

2.32 Figure 17 shows that outstanding liabilities of states, as per cent of GDP, has increased after 2014-15. The issuance of UDAY bonds in 2015-16 and 2016-17, farm loan waivers, and the implementation of pay commission awards have led to higher debt to GDP ratio. Economic Survey

Figure 17: Total Outstanding liabilities of the State Governments (as per cent of GDP)

Source: RBI State Finances: A Study of Budgets, Union Budget Documents, RE : Revised Estimates, BE : Budget Estimates

GENERAL GOVERNMENT FINANCES

2.33 The General Government (Centre plus States) has been on the path of fiscal consolidation and fiscal discipline. The combined liabilities of Centre and States

2016-17 had estimated impact of UDAY bonds on fiscal deficit to be 0.7 percentage points of GDP. However, despite rising States' debt to GDP ratio, interest payment as proportion of revenue receipts has not deteriorated (refer to Figure 18).

Figure 18: Interest Payments/Revenue Receipts (in per cent)

have declined to 67 per cent of GDP as on end-March 2018 from 68.5 per cent of GDP as on end-March 2016 (refer to Table 9). The fiscal deficit of General Government is further expected to decline from 6.4 per cent of GDP in 2017-18 RE to 5.8 per cent of GDP in 2018-19 BE (Figure 19).

Table 9: Total outstanding liabilities of Centre and States (as per cent of GDP)

Year	Liabilities of Centre	Liabilities of States	Combined Liabilities of the Centre & States
2011-12	47.5	22.8	67.4
2012-13	47.3	22.2	66.7
2013-14	47.5	22.0	67.1
2014-15	47.1	21.7	66.6
2015-16	47.4	23.4	68.5

OUTLOOK

2.34 The coming year will pose several challenges on the fiscal front. Firstly, there are apprehensions of slowing of growth, which will have implications for revenue collections. Secondly, the financial year 2018-19 has ended with shortfall in GST collections. Therefore, revenue buoyancy of GST will be key to improved resource position of both Central and State Governments. Thirdly, resources for now expanded Pradhan Mantri Kisan Samman Nidhi (PM-KISAN)

and Ayushman Bharat, as well as new initiatives of the new Government, will have to be found without compromising the fiscal deficit target as per the revised glide path. Fourthly, US sanctions on oil import from Iran is likely to have impact on oil prices and thereby on the petroleum subsidy, apart from implications for current account balances. Finally, Fifteenth Finance Commission will submit its report for next five years beginning April 2020. Its recommendation especially on tax devolution will have implications for Central Government finances.

CHAPTER AT A GLANCE

- The revised fiscal glide path envisages achieving fiscal deficit of 3 per cent of GDP by FY 2020-21 and Central Government debt to 40 per cent of GDP by 2024-25. The FY 2018-19 has ended with fiscal deficit at 3.4 per cent of GDP and debt to GDP ratio of 44.5 per cent (Provisional).
- As per cent of GDP, total Central Government expenditure fell by 0.3 percentage points in 2018-19 PA over 2017-18, with 0.4 percentage points reduction in revenue expenditure and 0.1 percentage point increase in capital expenditure.
- With respect to States finances, their own tax and non-tax revenue display robust growth in 2017-18 RE which is envisaged to be maintained in 2018-19 BE.
- The General Government (Centre plus States) has been on the path of fiscal consolidation and fiscal discipline.
- Several challenges on the fiscal front in 2019-20 include revenue implications on account of apprehensions of slowing of growth, revenue buoyancy of GST and provisioning for schemes such as PM-KISAN without compromising the fiscal deficit target.

Annex I*: Status of implementation of GST and Recent Initiatives in Customs Duty**A. Implementation Status of GST****Facilitation measures in GST**

- (i) Threshold limit of aggregate turnover for exemption from registration and payment of GST for the suppliers of goods has been enhanced from ₹10 lakhs to ₹20 lakhs (in the States of Arunachal Pradesh, Manipur, Meghalaya, Mizoram, Nagaland, Puducherry, Sikkim, Telangana, Tripura and Uttarakhand) and from ₹20 lakhs to ₹40 lakhs for other States, with effect from 01.04.2019.
- (ii) Composition scheme has been formulated for small businessman - supplier of goods and restaurant services. Under the scheme, persons with turnover up to ₹1.5 crore (₹75 lakhs in States of Arunachal Pradesh, Manipur, Meghalaya, Mizoram, Nagaland, Sikkim, Tripura and Uttarakhand) need to pay tax equal to 1 per cent to 5 per cent on his turnover and to file returns annually, with quarterly payment from FY 2019-20.
- (iii) Composition scheme has been formulated for suppliers of services. Under the scheme, persons with turnover up to ₹50 lakhs need to pay tax equal to 6 per cent on their turnover and need to file their returns annually with quarterly payment from financial year 2019-20.
- (iv) GST Council once again allowed the migration process for taxpayers from erstwhile tax regimes. Due dates for furnishing return in Form GSTR-3B & Form GSTR-1 (for taxpayers with turnover more than ₹1.5 crore) for such newly migrated taxpayers for the months from July, 2017 to December, 2018 was extended till 31.03.2019. Similarly, Form GSTR-1 (for taxpayers with turnover upto ₹1.5 crore) for the quarters from July, 2017 to December, 2018 was extended till 31.03.2019.
- (v) As per the new return filing system, there would be only one return form to be filed monthly. Frequency for filing of return for small taxpayers having turnover upto ₹5 crore in previous FY will be quarterly [Sahaj (only B2C), Sugam (B2B and B2C) and normal quarterly]. In the new system, supplier will be allowed to upload the invoices continuously anytime during the month and the recipient would also be able to continuously view the uploaded invoice. Misuse of ITC due to default in payment of tax by the supplier shall be controlled primarily by recovery of tax from the supplier. However, reversal of credit from buyer shall also be an option available with the revenue authorities in certain exceptional circumstances. The new return system will be implemented on a trial basis from 01.04.2019 and will be mandatory from 01.07.2019.
- (vi) Government has been very pro-active in ensuring that GST gets implemented smoothly. GST Law / Rules / procedures have been adapted to the needs of the trade and industry. To this effect, since the date of introduction, Centre has issued 495 notifications, 101 circulars, 18 orders, 12 removal of difficulties orders & more than 125 press releases (as on 28.02.2019).
- (vii) Exemption from TDS has been granted in case of supply made by any Government authority / PSU to another Government authority / PSU.

* The tax measures and rate changes given in this Annex are only meant for general readers and will not serve as reference points for tax payers.

Measures under GST to boost exports

- (i) Relief has been given to exporters by giving them an option to export without payment of tax, by submitting a simple letter of undertaking on their letter heads. This is in line with the philosophy of charging no tax on exports.
- (ii) Glitches in the refund process were overcome by devising a manual process for the same. Requisite circulars were issued in order to bring clarity and make the procedure certain. A concerted drive was undertaken to make refund to the taxpayers.
- (iii) Total amount of RFD-01A claims disposed by Centre and States is ₹65,567 crore (approximately). Further, IGST refund claims to the tune of ₹68,014 crore (approximately) have also been disposed. Thus, refund claims totalling to ₹1,33,581 crore have been disposed of till 31.03.2019.
- (iv) Merchant exporters have to pay nominal GST of 0.1 per cent for procuring goods from domestic suppliers for export. This was done in order to provide a big thrust to the growth of the export sector and resolve their working capital issues. The permanent solution to cash blockage is “e-Wallet” scheme, which is proposed to be launched with effect from 01.04.2020.

GST rate rationalization

Goods

- (i) With the expansion of tax base and the stabilization of revenues under GST, a continuous rationalization of GST rate structure has been done. Today, only about 32 items are remaining in the 28 per cent slab. Bulk of the items remaining in this category are either luxury or sin goods.
- (ii) The major rate reductions during the financial year 2018-19 are as follows:
 - a. **28 per cent to 18 per cent/12 per cent/5 per cent:** The GST rates were reduced to lower the cost to the consumers, thereby increasing purchasing power of consumers, this has added to the increased consumption in the economy. Some of the items on which the rates were brought down from 28 per cent were consumer goods such as televisions upto the size of 68 cm, refrigerators, freezers and other refrigerating equipment including water coolers, milk coolers, washing machines, vacuum cleaners, domestic electrical appliances such as food grinders and mixers etc., storage water heaters, immersion heaters, hair dryers, digital cameras and video camera recorders, etc. Certain other industrial use items were also removed from the 28 per cent list such as pulleys, transmission shafts and cranks, gear boxes etc., lithium ion batteries, refrigerating equipment for the leather industry, ice cream freezers, special purpose motor vehicles, works trucks [self-propelled, not fitted with lifting or handling equipment] of the type used in factories, warehouses, dock areas or airports, fuel cell vehicle, re-treaded or used pneumatic tyres of rubber etc.
 - b. **18 per cent to 12 per cent/5 per cent/nil:** GST rates were rationalized to avoid classification disputes on cork (roughly squared or debagged), articles of natural cork, agglomerated cork and marble rubble. Similarly, for the benefit of masses, the GST rates have been

rationalized for stone/marble/wooden deities, bamboo flooring, brass kerosene pressure stove, hand operated rubber roller, zip and slide fasteners etc.

- c. **12 per cent to 5 per cent:** GST rates on natural cork, walking stick, fly-ash blocks, handloom dari, fertilizer grade phosphoric acid, knitted cap/topi having retail sale value less than ₹1000 have been rationalised.

d. **Other significant rationalization measures under GST:**

- Considering the difficulty faced by the Fabric sector on account of the blocking of input tax credit on fabrics arising out of the inverted duty structure, the GST Council in its 28th meeting held on 21st July, 2018 recommended allowing refund to fabrics on account of inverted duty structure. The refund of accumulated ITC was allowed only with the prospective effect on the purchases made after the notification is issued.
- GST rates have been rationalized on specified handicraft items.
- IGST @5per cent on Pool Issue Price (PIP) of Urea imported on Govt. account for direct agriculture use, instead of assessable value plus custom duty.

(iii) **Exemption from the levy of GST on goods**

- The GST Council recommended granting exemption to the following goods used by the common man, namely, sanitary napkins, coir pith compost, sal leaves, siali leaves and their products and sabai rope, phool bhari jhadoo, khalidona, music books, vegetables (uncooked or cooked by steaming or boiling in water, frozen, branded and put in a unit container), vegetable provisionally preserved (for example by sulphur dioxide gas, in brine, in sulphur water or in other preservative solutions), but unsuitable in that state for immediate consumption etc.
- Clarifications/ amendments as regards the applicability of GST rate in respect of certain goods such as sprinkler system consisting of nozzles, lateral and other components, movement of rigs, tools & spares and all goods on wheels on own account, LPG supplied in bulk to an OMC by refiners/fractioners for bottling for further supply, etc.

Services

- (i) After implementation of GST regime, rates have been rationalized significantly to address the concerns of trade and consumers. The major rate reductions during the financial year 2018-19 are as follows:
- The GST rate on services provided by restaurants (except by restaurants in hotels having tariff of ₹7500 per unit per day or more) have been reduced from 18 per cent to 5 per cent.
 - With effect from 1st April, 2019, effective GST rate on construction of affordable houses has been reduced from 8per cent to 1 per cent and on other houses i.e. not in the affordable category, from 12 per cent to 5 per cent. Affordable houses have been defined as houses having carpet area of 60 sqm in metropolitan areas and upto 90 sqm in non-metro areas and having cost of upto ₹45 lakhs.

- GST rate on cinema theatres having entry ticket of upto ₹100 has been prescribed at reduced rate of 18 per cent.
- GST rate on services provided by amusement parks including theme parks, water parks, joy rides, merry go rounds, go carting and ballet has been reduced from 28 per cent to 18 per cent.

(ii) Exemption from the levy of GST on Services:

Two major services consumed by the common man, namely, health care services provided by clinical establishments and educational services provided by educational institutions are exempted from GST.

In addition, following services consumed by the common man have been completely exempted from GST:

- Services received from a provider of service located by way of supply of online educational journals or periodicals to a higher educational institution (i.e., other than an institution providing pre-school education and education up to higher secondary school or equivalent).
- Services provided by an educational institution by way of conduct of entrance examination against consideration in the form of entrance fee.
- Services provided to an educational institution, by way of supply of services relating to admission to, or conduct of examination by all educational institutions.
- Services provided by Fair Price Shops to Central Government, State Government or Union Territory by way of sale of food grains, kerosene, sugar, edible oil, etc. under Public Distribution System against consideration in the form of commission or margin.
- Services by way of giving on hire motor vehicle for transport of students, faculty and staff, to a person providing services of transportation of students, faculty and staff to an educational institution providing services by way of pre-school education and education upto higher secondary school or equivalent (sub-contractor will also be exempt from GST).
- Services by way of admission to a protected monument so declared under the Ancient Monuments and Archaeological Sites and Remains Act 1958 or any of the State Acts, for the time being in force.
- Services by way of right to admission to circus, dance, or theatrical performance including drama or ballet; award function, concert, pageant, musical performance or any sporting event other than a recognised sporting event; recognised sporting event; planetarium, where the consideration for right to admission to the events or places is not more than ₹500 per person.
- Services of life insurance business provided by way of annuity under National Pension System regulated by PFRDA is exempt.
- Services of a Resident Welfare Associations (RWA) to its members against contribution of an amount upto ₹7500 per month.

(iii) Multiple reliefs from GST taxation have been provided to following categories of services:

- (i) Agriculture, farming and food processing industry,
- (ii) Education, training and skill development,
- (iii) Pension, social security and old age support.
- (iv) Banking/ Finance/ Insurance services,
- (v) Government Services,
- (vi) Tourism and hospitality services,
- (vii) Construction and works contract services,
- (viii) Transportation services.

B. Customs Duty

- There has been concerted effort from the Government to avoid inverted duty structure on goods imported into India. The Basic Customs Duty (BCD) rates have been rationalized to the rate of 2.5 per cent/5 per cent/7.5 per cent on most of the inputs and intermediate products like industrial chemicals, ores and concentrates, fuels for industrial use, textile fibres and yarns etc. used in industries for manufacturing.
- Government has followed a conscious policy to promote the “Make in India” initiative. Therefore, several end use-based exemptions and lower rates of customs duty have been prescribed on goods imported for further processing in India and higher import duties on finished products. The customs duty was increased on finished products like footwear, processed foods, cellular mobile phones, perfumes, cosmetics and other toilet preparations, watches, furniture, toys, light fittings etc., in Union Budget 2018-19. In October, 2018, duties were increased on plastic articles, washing machine, refrigerator, air conditioners, speakers, telecom equipment and certain other items that are largely imported from China.
- The customs duty rates on most of the electronic and IT products imported from China have been increased several times over the last two years. There has been an increase in customs duty on finished electronics goods and consumer durables like cellular mobile phones, LED TVs, microwave ovens, refrigerators, air conditioners etc. to promote domestic value addition.
- Further the customs duty on 298 tariff lines of man-made fibre fabrics was increased from 10 per cent to 20 per cent for protecting domestic industry from imports. Further BCD was increased on 504 tariff lines of textile articles including garments.

Annex II*: Recent Initiatives in Direct Taxes in Budget 2018-19 and 2019-20 (Interim Budget)

A. Summary of important measures announced in the Union Budget 2018-19:

- The rate of income-tax for companies with a turnover up to ₹250 crores in FY 2016-17 was reduced to 25 per cent.
- To allow a standard deduction upto ₹40,000/- or the amount of salary received, whichever is less and rationalised exemption in respect of transport allowance and reimbursement of miscellaneous medical expenses.
- The following incentives have been provided for senior citizens:
 - The limit of deduction for health insurance premium and/or medical expenditure has been increased from ₹30,000/- to ₹50,000.
 - The limit of deduction for medical expenditure in respect of certain critical illnesses has been increased up to ₹1,00,000/- in the case of all senior citizens (of the age of 60 years or more).
 - A deduction of ₹50,000/- has been provided to senior citizens on interest income from deposits with banks, co-operative societies and post offices.
 - The threshold limit for deduction of tax at source on interest income for senior citizens has been increased from ₹10,000/- to ₹50,000/-.
 - A senior citizen having pension income shall be eligible to claim standard deduction of upto ₹40,000/- or the amount of pension received, whichever is less.
- It is provided that every person, not being an individual, which enters into a financial transaction of an amount aggregating to ₹2.5 lakh or more in a financial year, and the managing director, director, partner, trustee, author, founder, karta, chief executive officer, principal officer or office bearer or any person competent to act on behalf of such person shall be required to apply for allotment of PAN.
- It is provided that in the case of an amalgamated company, accumulated profits, whether capitalised or not, or losses as the case may be, shall be increased by the accumulated profits of the amalgamating company, whether capitalized or not, on the date of amalgamation.
- It is provided to bring deemed dividends also under the scope of dividend distribution tax and to tax such deemed dividend at the rate of 30 per cent (without grossing up) in order to prevent camouflaging dividend in various ways such as loans and advances.
- The exemption under section 10(38) of the Act has been withdrawn and a new section 112A has been inserted in the Act to provide that long term capital gains arising from transfer of a long term capital asset being an equity share in a company or a unit of an equity oriented fund or a unit of a business trust shall be taxed at 10 per cent of such capital

* The tax measures and rate changes given in this Annex are only meant for general readers and will not serve as reference points for tax payers.

gains exceeding one lakh rupees. Foreign Institutional Investors (FIIs) will also be liable to tax on such long term capital gains only in respect of amount of such gains exceeding one lakh rupees. Further, it is also provided that where any income is distributed by an equity-oriented Mutual Fund, the mutual fund shall be liable to pay additional income tax at the rate of 10 per cent on income so distributed.

- To tackle the direct tax challenges arising in digital businesses, the scope of the definition of business connection was enlarged to provide that a non-resident is taxable in India if it has a 'Significant Economic Presence' in India.
- The conditions for availing the deduction of 30 per cent under section 80JJAA of the Act have been relaxed by allowing the benefit for a new employee who is employed for less than the minimum period during the first year but continues to remain employed for the minimum period in subsequent year. The minimum period of employment of 150 days has been extended to footwear and leather industry.
- Following changes in the taxation regime for the start-ups under section 80IAC have been made:
 - The benefits would also be available to start ups incorporated on or after 1st April 2019 but before 1st April, 2021;
 - The requirement of the turnover not exceeding ₹25 Crore would apply to the previous year relevant to the assessment year to which deduction under this section is claimed;
 - The definition of eligible business has been expanded to provide that the benefit would be available if the start-up is engaged in innovation, development or improvement of products or processes or services, or a scalable business model with a high potential of employment generation or wealth creation.

B. Summary of important measures announced in the Interim Budget 2019-20:

- Enhanced the amount of tax rebate for an individual taxpayer from ₹2,500 to ₹12,500.
- Increased the limit of standard deduction from ₹40,000 to ₹50,000.
- There will be no tax on notional rent of two self-occupied houses instead of currently available one self-occupied house. However, the existing limit for deduction of interest of ₹2 lakhs shall continue.
- One-time option provided for investment of the entire capital gain in purchase or construction of two residential houses under section 54 of the Act where capital gains from the sale of residential property do not exceed ₹2 crore.
- Threshold limit for application of TDS on bank interest, etc., increased from ₹10,000 to ₹40,000 and
- Threshold limit increased for application of TDS on rental income from ₹1.8 lakh to ₹2.4 lakh.

C. Other measures taken during the year 2018 and 2019.

- The Centralised Verification Scheme, 2019 has been notified for setting up of a centre for centralised issuance of notice and for processing of information or documents and making available the outcome of the processing to the Assessing Officer.
- The process of PAN allotment has been relaxed so that an applicant, having mother as 'single parent', may apply for PAN by furnishing mother's name only. Before this, furnishing of father's name was mandatory for all applicants.
- The process of issuance of certificate for no deduction of tax or deduction/collection of tax at lower rate has been rationalised. Now, the entire process of filing of an application to the generation of appropriate certificate has been made electronic. This shall minimise the human interface and reduce the compliance burden on the applicant.
- Form for application filed for the registration of a charitable trust or institution under section 12A of the Act has been rationalised and electronic filing thereof has been enabled as well.
- Forms for filing appeal to the Appellate Tribunal have been rationalised to make them more informative.
- In order to facilitate the conversion of Indian branch of foreign bank, the Notification S.O. 6053(E) dated 06.12.2018 has been issued specifying the conditions to be fulfilled by the conversion and also specifying modifications, exceptions, etc., in applicability of certain provisions of the Act to such conversion.
- Part B of Form No 16 and Annexure-II of Form No 24Q were amended for enabling e-issuance of salary TDS certificate in Form No 16 and for enabling the pre-filing of Income-tax returns on the basis of information furnished in Form No 24Q.

Monetary Management and Financial Intermediation

03 CHAPTER

Monetary policy witnessed a u-turn over the last year. The benchmark policy rate was first hiked by 50 bps and later reduced by 75 bps due to weaker-than-anticipated inflation, growth slowdown and softer international monetary conditions. Liquidity conditions, however, have remained systematically tight since September 2018. The performance of the banking system has improved as NPA ratios declined and credit growth accelerated. However, financial flows to the economy remained constrained because of decline in the amount of equity finance raised from capital markets and stress in the NBFC sector. The ecosystem for insolvency and bankruptcy is getting systematically built out. It has already led to recovery and resolution of significant amount of distressed assets as well as palpably improved business culture.

MONETARY DEVELOPMENTS DURING 2018-19

3.1 The Monetary Policy Committee (MPC) of the Reserve Bank of India (RBI), at the time of writing, had met six times in 2018-19 and twice in 2019-20. In its First Bi-monthly Monetary Policy Statement for 2018-19 in April 2018, the MPC decided to keep the policy repo rate unchanged at 6.0 per cent and continue with neutral policy stance.

3.2 With the perceived risk to inflation from increase in crude oil prices as well as expectation of tightening of monetary policy by the Federal Reserve, the MPC in the Second and Third Bi-monthly Monetary Policy Statement, decided to increase the policy repo rate by

25 basis points (bps) each while keeping the policy stance as neutral.

3.3 The policy rates remained unchanged in the Fourth and Fifth Bi-monthly Monetary Policy Statement due to the persistence of unusually soft food price readings and its impact on the evolving headline inflation trajectory. However, the policy stance was changed from “neutral” to “calibrated tightening” in the Fourth Bi-monthly Monetary Policy Statement of October 2018.

3.4 In its Sixth Bi-monthly Monetary policy Statement, the MPC noted the pause in the rate hiking cycle by the Fed, expectations of a positive outcome from US-China trade negotiations and downward risks to domestic inflation. Consequently, the MPC decided to

change the stance of monetary policy from “calibrated tightening” to “neutral” and reduced the policy repo rate by 25 bps to 6.25 per cent in February 2019. The policy rate was further cut by 25 bps each in the First

and the Second Bi-monthly Monetary Policy Statement for 2019-20 in April and June 2019 (Table 1). Moreover, the monetary policy stance was changed to “accommodative” in June 2019.

Table 1: Revision in Policy Rates

Effective date	Bank rate/ MSF rate* (per cent)	Repo rate (per cent)	Reverse repo rate (per cent)	Cash reserve ratio (per cent of NDTL)	Statutory liquidity ratio (per cent of NDTL)
05-04-18	6.25	6.00	5.75	4.00	19.50
06-06-18	6.50	6.25	6.00	4.00	19.50
01-08-18	6.75	6.50	6.25	4.00	19.50
05-10-18	6.75	6.50	6.25	4.00	19.50
05-12-18	6.75	6.50	6.25	4.00	19.50
05-01-19	6.75	6.50	6.25	4.00	19.25
07-02-19	6.50	6.25	6.00	4.00	19.25
04-04-19	6.25	6.00	5.75	4.00	19.25
13-04-19	6.25	6.00	5.75	4.00	19.00
06-06-19	6.00	5.75	5.50	4.00	19.00

Source: RBI.

Notes: *: Bank Rate was aligned to MSF rate with effect from February 13, 2012.

NDTL is Net Demand and Time Liabilities and MSF is Marginal Standing Facility.

3.5 During 2018-19, the growth rate of monetary aggregates reverted to their long-term trend after experiencing unusual behaviour in 2016-17 due to demonetisation and again in 2017-18 due to the process of remonetisation

(Table 2). Reserve Money (M0) as on March 31, 2019, recorded a growth of 14.5 per cent over the previous year (Figure 1). On the component side, the expansion in M0 was mainly driven by Currency in Circulation (CiC).

Table 2: Year-on-Year Growth in Monetary Aggregates (per cent)

Items	2010-11	2011-12	2012-13	2013-14	2014-15	2015-16	2016-17	2017-18	2018-19
Currency in Circulation	19.2	14.1	12.2	9.9	10.6	11.9	-4.0	9.8	22.6
Cash with Banks	18.8	18.7	16.7	6.8	14.4	13.3	45.8	-20.1	3.5
Currency with the Public	19.2	13.9	12.0	10.0	10.4	11.8	-6.2	11.9	23.5
Bankers' Deposits with the RBI	29.1	14.8	-10.9	4.6	7.6	11.0	8.6	7.9	7.9
Demand Deposits	14.2	-3.8	5.9	8.6	10.5	9.7	20.0	13.8	7.9
Time Deposits	16.0	19.3	14.7	14.7	12.3	10.6	10.8	6.4	8.5
Reserve Money (M0)	21.5	13.9	6.2	8.8	10.1	12.1	-1.3	9.6	19.5
Narrow Money (M1)	16.8	5.8	9.5	9.6	10.6	11.3	3.9	12.9	16.5
Broad Money (M3)	16.2	15.9	13.5	13.6	11.9	10.7	9.3	7.8	10.2

Source: RBI.

Note: Growth rates have been calculated for financial year averages of the monetary aggregates.

Figure 1: Reserve Money Growth (Y-o-Y)

Source: RBI.

3.6 From the sources side, expansion in M0 during 2018-19 was contributed mainly by net RBI credit to the government as against driven by net foreign assets in the previous year. Increase in net RBI credit to government was mainly from the recourse to open market operations (OMOs) undertaken

during the year. Among other sources, RBI's claims on banks increased, indicating tight liquidity conditions (this issue is further discussed in next section). Net foreign assets also contributed to M0 expansion albeit at a lower magnitude vis-à-vis previous year.

Figure 2: M3 Growth (Y-o-Y, per cent)

Source: RBI.

Note: Growth rates have been calculated for Financial Year averages of the monetary aggregates.

3.7 Broad money growth (M3) has been on declining trend since 2009. However, in 2018-19, M3 improved marginally driven mainly by aggregate deposits (Figure 2). From the component side, the expansion in M3 during the year was broad-based, contributed by both currency and deposits. Deposits with the banking system, both demand and time, recorded acceleration in their growth leading

to an increase in aggregate deposits by 9.6 per cent in 2018-19 vis-à-vis the 5.8 per cent during 2017-18 (Figure 3). Amongst sources, credit from scheduled commercial banks (SCBs) to the commercial sector primarily contributed to an increase in M3 during the year. Bank credit to government, mainly from RBI, also supplemented M3 expansion.

Figure 3: Y-o-Y Variation in Deposits

Source: RBI.

Note: AD–Aggregate Deposits, DD–Demand Deposits, TD–Time Deposits.

3.8 The money multiplier (M3/M0) expanded sharply between 1996 and 2003 and stabilizing thereafter till 2008. It started rising again till 2017 but declined for two successive years in 2017-18 and 2018-19, reflecting expansion in M0 at faster pace than M3. As on March 31, 2019, it stood lower at

5.7 per cent, converging broadly to its average level recorded during 2013-16 (Figure 4). Trends in money multiplier is an area of further investigation but the tightening of bank capital and regulatory norms may have contributed to it.

Figure 4: Money Multiplier

Source: RBI.

LIQUIDITY CONDITIONS AND ITS MANAGEMENT

3.9 In 2018-19, liquidity conditions were comfortable till August 2018 but has been systematically tight since September 2018. Liquidity situation, on average, moved in the deficit zone in the last two quarters of 2018-19 as well as in first quarter of 2019-20.

3.10 The banking system faced huge shortage of liquidity for the first time in the fiscal between September 15 and 26 and the deficit was nearly ₹1.18 lakh crore. The RBI, consequently, announced OMOs of ₹30,000 crore. This move did ease liquidity temporarily but the liquidity shortage has been persistent (Figure 5).

3.11 The monetary policy statement of December 2018 highlighted the issue of liquidity crunch being faced by the banking system. The statement noted that the tight liquidity conditions had led to overnight call money rate breaching the policy corridor on several occasions. Consequently, the RBI decided to scale up OMOs in December and January. It further added that liquidity conditions will continue to be monitored and depending on the assessment, RBI will consider similar quantum of OMO purchases until the end of March 2019.

3.12 Remember that the RBI had changed its liquidity management objective in June 2016. Prior to this period, the RBI used to maintain ex-ante liquidity deficit in the system at around 1% of net time and demand liabilities (NDTL) of banks. However, since June 2016, the stated objective of the RBI is to keep the ex-ante liquidity closer to neutral position.

3.13 The tight liquidity has shown up in interest rates as well. The weighted average call rate (WACR) breached the policy repo rate 33 times since mid-September 2018. There were three key factors which have led

to this situation of liquidity tightening. First, the growth in bank credit has improved in last two quarters of 2018-19, however growth in bank deposits remained tepid. Second, growth in currency in circulation also accelerated during this period. Third, and the most significant, the RBI had to draw down its foreign exchange reserves in excess of \$32 billion in 2018-19 to smoothen exchange rate volatility. Consequently, liquidity in excess of ₹2 lakh crore was sucked out of the system.

3.14 The RBI responded to solve this issue by infusing liquidity through OMOs. The frequency of OMOs have increased considerably since September 2018. In view of the need to inject durable liquidity given the prevailing liquidity conditions, the RBI conducted twenty-seven OMOs aggregating ₹2.98 lakh crore billion during the year. Moreover, based on an assessment of financial market conditions, the RBI increased the Facility to Avail Liquidity for Liquidity Coverage Ratio (FALLCR) effective October 1, 2018, which supplemented the ability of individual banks to avail liquidity from the repo market against high-quality collateral. Furthermore, it was decided to reduce the statutory liquidity ratio (SLR) by 25 bps every calendar quarter until it reaches 18 per cent of NDTL to align the SLR with the liquidity coverage ratio (LCR) requirement. Accordingly, effective from the quarter commencing January 2019, the SLR was reduced to 19.25 per cent of NDTL and further to 19.00 per cent of NDTL in April 2019.

3.15 Moreover, the RBI decided to augment its liquidity management toolkit and injected rupee liquidity for longer duration through long-term foreign exchange buy/sell swaps. Accordingly, it conducted a US\$/₹ buy/sell swap auction of US\$5 billion for a tenor of 3 years on March 26, 2019 to inject durable liquidity of ₹345.6 billion into the system.

Source: RBI.

Note: LAF stands for liquidity adjustment facility.

Figure 6: Policy Corridor and Call Rate (Per cent)

Source: RBI.

Note: MSF – Marginal Standing Facility, WACR – Weighted Average Call Money Rate

3.16 Tightness in liquidity has a significant impact on short-term as well as long term interest rates. Figures 7(a) and 7(b) show the impact of liquidity condition on interest rates. As can be seen, tight liquidity in the

recent past has led to increase in spread of treasury bills (t-bill) and Government security (g-sec) rates over the repo rate. Availability of durable liquidity has a big impact on the market borrowing cost of the government.

Figure 7(a): Liquidity and 91 Day T-bill Spread over Repo

Source: RBI.

Figure 7(b): Liquidity and 10-yr G-Sec Spread over Repo

Source: RBI.

DEVELOPMENTS IN THE G-SEC MARKET

3.17 During 2018-19, the 10-year benchmark g-sec yields were volatile and closely tracked the movement in oil prices, domestic liquidity and rupee exchange rate (Figure 8). It hardened in the first quarter but witnessed intermittent softening in the second and third quarters. The hardening of yields in the first quarter may be attributed to rising crude oil prices, the firming up of US treasury yields, concerns regarding the pace of rate hikes by the US Fed, upside risks to

domestic inflation. Later, with the decline in crude oil prices in July 2018, and with the announcement of OMO purchases, the yields softened in July. However, the currency depreciation in August 2018 due to rising crude oil prices and rising US interest rates, caused the yields to harden, taking the rise in yields from end-July to mid-September to 40 bps. Yields softened towards the end of September reflecting the measures taken for containing rupee volatility along with expectations of lower market borrowings by the central government in second half of 2018-19.

Figure 8: 10 Year G-Sec Yield (per cent)

Source: RBI.

3.18 The benchmark yield continued to trade with a softening bias in October 2018 as the RBI announced OMO purchases of higher amount. In the third quarter of 2018-19, the OMO purchase of ₹1.36 lakh crore along with the decline in crude oil prices and CPI inflation rates caused the yields to soften in general. During January 2019, however, the yields traded with a hardening bias amidst fiscal concerns, tightening liquidity and rise in crude oil prices. Later in the quarter, consequent upon the policy rate cut announced by the MPC in February, April and June 2019, the yields softened. The 10-year g-sec yield dropped to 6.97 per cent as on 10 June, 2019.

BANKING SECTOR

3.19 The performance of the banking sector (domestic operations), Public Sector Banks (PSBs) in particular, improved in 2018-19. The Gross Non-Performing Advances (GNPA) ratio of SCBs decreased from 11.5 per cent to 10.1 per cent between March 2018 and December 2018. Their Restructured Standard Advances (RSA) ratio declined from 0.7 per cent to 0.4 per cent. The Stressed Advances (SA) ratio decreased from 12.1 per cent to 10.5 per cent during the same period. GNPA ratio of PSBs decreased from 15.5 per cent to 13.9 per cent between March 2018 and December 2018. SA ratio of PSBs decreased

from 16.3 per cent to 14.4 per cent during the same period.

3.20 Capital to risk-weighted asset ratio (CRAR) of SCBs increased from 13.8 per cent to 14.0 per cent between March 2018 and December 2018 largely due to improvement of CRAR of Public sector banks (PSBs). SCBs' return on assets (RoA) decreased from 0.21 per cent in 2017-18 to 0.03 per cent in 2018-19 while their return on equity (RoE) decreased from 2.41 per cent to 0.4 per cent during the same period.

CREDIT GROWTH

3.21 Growth in non-food bank credit (NFC), which remained sluggish in last few years,

showed improvement in 2018-19. The average NFC growth in 2018-19 improved to 11.2 per cent *vis-à-vis* 7.7 per cent in 2017-18. Bank credit to large industry and services segments were the main drivers of overall NFC growth in 2018-19 (Figure 9). However, the pace of credit growth has moderated in last few months. Credit growth has come down from 13.8 per cent in November 2018 to 11.9 per cent in April 2019. The main contributor to this moderation has been the services sector which has decelerated from 28.1 per cent to 16.8 per cent between November 2018 and April 2019. The growth in bank credit to large industries have improved in recent months (Table 4).

Figure 9: Bank Credit Growth (Y-o-Y)

Note: Data are provisional and relate to select banks which cover about 90 per cent of total non-food credit extended by all scheduled commercial banks.

NON-BANKING FINANCIAL SECTOR

3.22 Non-Banking Financial Companies (NBFCs) bring in diversity and efficiency to the financial sector and makes it more responsive to the needs of the customers. In the recent past, the NBFCs have played increasingly important role in resource mobilization and credit intermediation, thereby helping commercial sector to make up for low bank credit growth (Figure 10).

Figure 10: Share in Net Credit Flow to Commercial Sector

Source: RBI.

3.23 However, the NBFCs experienced difficult times in 2018-19 in the aftermath of the ratings downgrades and default of IL&FS Group. NBFCs depend largely on public funds which account for 70 per cent of total liabilities of the sector. Bank borrowings, debentures and commercial paper are the major sources of funding for NBFCs. Immediately after the IL&FS crisis, NBFCs faced severe liquidity crunch as mutual funds (MFs) stopped refinancing the loans of NBFCs. However, the government moved in quickly and took immediate measures to ringfence the problem and limit contagion. Consequently, the flow of resources from the banking sector to NBFCs improved for some time. However, the flow of resources from the banking side has contracted since November 2018. In fact, deployment of funds by MFs has turned negative and stood at -12 per cent in April 2019 (Figures 11(a) & 11(b)). This squeeze in flow of resources to NBFCs has impacted the lending capability of the sector in recent quarters (see Figure 12).

Figure 11(a): Growth in Bank Credit to NBFCs

Source: RBI.

Figure 11(b): Growth in Deployment of funds by MFs to NBFCs

Source: Estimated from SEBI data.

Figure 12: Growth in Loans and Advances of NBFCs

Source: RBI.

Note: Data pertains to Deposit taking NBFCs and Non-Deposit Taking Systematic Important NBFCs including Government Companies. Data from June 2018 to March 2019 are provisional.

3.24 Other performance indicators of the NBFCs have also been affected adversely. At the end of December 2018, CRAR of NBFC sector worsened to 22.2 per cent from 22.8 per cent at end-March 2018. The GNPA ratio of NBFC sector deteriorated to 6.5 per cent as in December 2018 from 6.1 per cent in March 2018. The net NPA also increased marginally to 3.6 per cent in December 2018 from 3.2 per cent in March 2018. The RoA of the sector stood at 1.4 per cent in December 2018 compared with 1.6 per cent in March 2018. The RoE decreased to 6.1 per cent in December 2018 from 7.0 per cent in March 2018.

DEVELOPMENTS IN CAPITAL MARKET

Primary Market

A. Public Issue

3.25 The year 2018-19 witnessed a significant decrease in resource mobilization

through public issue and rights issue of equity compared to the previous year. During 2018-19, 123 companies mobilized ₹16,087 crore through public equity issuance compared to 202 companies amounting ₹83,696 crore in the previous year, indicating a decrease of 81 per cent over the period. Further, during 2018-19, there were 21 rights issues which raised ₹2,149 crore compared to 21 rights issues which raised ₹21,400 crore in 2017-18.

3.26 Resource mobilization through issuance of debt public issue rose quite significantly during 2018-19 as compared to previous year. There were 25 debt public issues which raised ₹36,679 crore in 2018-19 compared to eight issues which raised ₹5,173 crore in 2017-18.

3.27 Overall, total public issue declined by 50 per cent from ₹1,10,269 crore in 2017-18 to ₹54,915 crore in 2018-19.

Table 5: Primary Market Resource Mobilisation through Public and Rights Issue

Issue Type	2017-18		2018-19	
	No of issues	Amount (₹crore)	No of issues	Amount (₹crore)
Public Issue (Equity)	202	83,696	123	16,087
Rights Issue (Equity)	21	21,400	21	2,149
Public Issue (Debt)	8	5,173	25	36,679
Total Public Issue	231	110,269	158	54,915

Source: SEBI.

B. Private Placement

3.28 During 2018-19, Indian corporates preferred private placement route to gear up the capital requirement. There were 416 issues which raised ₹2,17,632 crore in 2018-19 compared to 460 issues which raised ₹1,26,711 crore during 2017-18. Out of the 416 issues, there were 12 qualified institutional placement (QIP) allotments and 404 preferential allotments which raised ₹7,469

crore and ₹2,10,163 crore, respectively during 2018-19 compared to 53 QIPs allotments and 407 preferential allotments which raised ₹67,238 crore and ₹59,473 crore, respectively during 2017-18.

3.29 Further, the resource mobilization through issuance of corporate bonds private placement stood at ₹5,79,425 crore in 2018-19 compared to ₹5,99,147 crore in 2017-18.

Table 6: Primary Market Resource Mobilisation through Private Placements

Issue Type	2017-18		2018-19	
	No of issues	Amount (₹crore)	No of issues	Amount (₹crore)
QIPs Allotment (Equity)	53	67,238	12	7,469
Preferential Allotment (Equity)	407	59,473	404	2,10,163
Private Placement of Bonds	2706	5,99,147	2358	5,79,425
Total Private Placement	3166	7,25,858	2774	797,056

Sources: BSE, NSE, MSEI and SEBI.

Mutual Fund Activities

3.30 During 2018-19, there was a net inflow of ₹1,09,701 crore in the MF industry as compared to a net inflow of ₹2,71,797 crore

during 2017-18. The cumulative net assets under management of all MF increased by 11.4 per cent to ₹23,79,584 crore in March 2019 from ₹21,36,036 crore in March 2018.

Table 7: Mobilisation Funds by Mutual Funds (in ₹crore)

Financial Year	No of Folios	Gross Mobilisation	Redemption	Net Inflow	Assets at the end of the period
2017-18	7,13,47,301	2,09,98,652	2,07,26,855	2,71,797	21,36,036
2018-19	8,24,56,411	2,43,94,362	2,42,84,661	1,09,701	23,79,584

Source: SEBI.

Investment by Foreign Portfolio Investors (FPIs)

3.31 There was a net outflow of ₹5,499 crore by FPIs in 2018-19 compared to an inflow of ₹22,466 crore in 2017-18. Total cumulative investment by FPIs decreased to ₹2,48,154 crore as on March 31 2019 as against ₹2,53,653 crore as on March 31 2018.

The assets of the FPIs in India, as reported by the custodians, increased to ₹33,42,680 crore as on March 31 2019 from ₹31,48,349 crore as on March 31 2018. However, the notional value of offshore derivative instruments (including ODIs on derivatives) decreased to ₹77,287 crore from ₹1,02,726 crore during the same period.

Table 8: Investment by FPIs

Year/Month	Gross Purchase (₹crore)	Gross Sales (₹crores)	Net Investment (₹crores)	Net Investment (USD Million)
2017-18	17,28,360	15,83,679	1,44,681	22,466
2018-19	16,40,810	16,79,741	-38,931	-5,499

Movement of Indian Benchmark Indices

3.32 S&P BSE Sensex, the benchmark index of Bombay Stock Exchange (BSE), closed at 38,673 on March 31, 2019, witnessing an increase of 17.3 per cent from its closing value of 32,969 as on March 31, 2018 (see Figure 13). During this period, S&P BSE Sensex closed its highest level of 38,897 on August 28, 2018 and its lowest of 33,019 on April 04, 2018. In addition, Nifty 50, the benchmark index of National Stock

Exchange (NSE) closed at 11,624 on March 31, 2019, witnessing a gain of 14.9 per cent from its closing value of 10,114 as on March 31, 2018. During the period Nifty 50 closed at its highest value of 11,739 on August 28, 2018 and its lowest level of 10,030 on October 26, 2018.

3.33 In 2019-20, the Sensex crossed 40,000 for the first time on 3rd June and closed at 40,268. As on 10 June, 2019, the Sensex closed at 39,785 whereas Nifty closed at 11,923.

INSURANCE SECTOR

3.34 Insurance has evolved as a tool of safeguarding the interest of people from loss and uncertainty. Apart from protecting against mortality; property; and casualty risks; it provides a safety net for individuals and enterprises in urban and rural areas. The insurance sector encourages savings and provides long-term funds to individuals. It also provides funds for infrastructure development and other long gestation projects of the nation.

3.35 The potential and performance of the insurance sector are generally assessed on the basis of two parameters, viz., insurance penetration and insurance density. The measure of insurance penetration and density reflects the level of development of insurance sector in a country. While insurance penetration is measured as the

percentage of insurance premium to GDP, insurance density is calculated as the ratio of premium to population (measured in US\$ for convenience of international comparison).

3.36 Insurance penetration which was 2.71 per cent in 2001, has steadily increased to 3.69 per cent in 2017 (Life 2.76 per cent and Non-Life 0.93 per cent). Insurance penetration in some of the emerging economies in Asia, i.e., Malaysia, Thailand and China during the same year were 4.77, 5.29 and 4.57 per cent respectively. The insurance density in India which was US\$11.5 in 2001, reached to US\$73 in 2017 (Life-55\$ and Non-Life -18\$). The comparative figures for Malaysia, Thailand and China during the same period were US\$486, US\$348 and US\$384 respectively. Globally insurance penetration and density were 3.33 per cent and US\$353 for the life segment and 2.80 per cent and US\$297 for the non-life segment respectively.

Table 10: Penetration in Life Insurance

Particulars	2011-12	2012-13	2013-14	2014-15	2015-16	2016-17	2017-18
Insurance Penetration (per cent)	3.4	3.17	3.1	2.6	2.7	2.72	2.76
Insurance Density (US \$)	49.0	42.7	41.0	44.0	43.0	46.5	55

Source: IRDA.

Table 11: Penetration in General Insurance

Particulars	2011-12	2012-13	2013-14	2014-15	2015-16	2016-17	2017-18
Insurance Penetration (per cent)	0.70	0.78	0.80	0.7	0.7	0.77	0.93
Insurance Density (US\$)	10.0	10.5	11.0	11.0	12.0	13.2	18

Source: IRDA.

3.37 During the fiscal 2017-18, the gross direct premium of general insurers (within India) was ₹1,50,660 crores as against ₹1,28,130 crores, in 2016-17 registering 17.6 per cent growth. Motor, health and others segments of insurance helped the industry report this growth. Life insurance industry recorded a premium income of ₹4,58,810 crores as against ₹4,18,480 crores in the previous financial year, registering a growth of 9.64 per cent. While renewal premium accounted for 57.68 per cent of the total premium received by the life insurers, new business contributed the remaining 42.32 per cent.

INSOLVENCY AND BANKRUPTCY CODE 2016: RESOLVING CORPORATE STRESS IN A CHANGED PARADIGM

Introduction

3.38 The Indian banking sector has been at the forefront of driving the economic growth

of the country. In the last several years, however, the sector has been plagued by growing NPAs on account of various reasons. The total stressed assets pool reached about ₹10.6 lakh crore for PSBs and ₹12-13 lakh crore for the overall banking system as on March 31, 2018.¹

3.39 Resolving stressed assets requires significant and concerted efforts. Since 2014, many steps have been taken by the government, the RBI and individual banks to enable rescue and revival. A robust, modern and sophisticated insolvency framework was established with the enactment of the Insolvency and Bankruptcy Code, 2016 (IBC). The IBC seeks to achieve resolution of corporate debtors (CDs) in distress and failing that, its liquidation in a time-bound manner under the non-intrusive oversight of the National Company Law Tribunal (NCLT). The Financial Creditors (FC) have been provided with greater role and powers through the committee of creditors. The management and control of assets of the

¹ Committee Report on Resolution of Stressed Assets, Project Sashakt, 2018

debtor are handed over to an Insolvency Professional (IP) who is responsible for operating the debtor's enterprise as a going concern and managing the corporate insolvency resolution process (CIRP) besides performing other crucial functions. Although based on global principles, the IBC has been customized for Indian conditions to make it compatible with local conditions. It is one of the most important economic reforms of recent times designed to effectively deal with non-performing CDs and the resultant logjam in the availability of credit.

3.40 An effective bilateral work-out restructuring mechanism can complement the robust insolvency framework. In June 2017, the RBI substituted harmonized and simplified generic framework for resolution of stressed assets. Sashakt - the resolution scheme to resolve the problem of NPAs through a market-led approach, was introduced in July 2018. Sashakt entails participating banks to work together under an Inter-Creditor Agreement (ICA). As of March 31, 2019, 35 banks had signed the ICA. Further, the notification on "Prudential Framework for Resolution of Stressed Assets" was released by RBI dated June 7, 2019².

Implementation of IBC

3.41 The success of any law depends on its implementation. The IBC was enacted on May 28, 2016. The Government moved quickly to operationalize the IBC. On June 1, 2016, the National Company Law Appellate Tribunal (NCLAT), the Principal Bench of NCLT at New Delhi, and 11 benches of NCLT – two at New Delhi and one each at Ahmedabad, Allahabad, Bengaluru, Chandigarh, Chennai, Guwahati, Hyderabad, Kolkata, and Mumbai were constituted.

3.42 The Insolvency and Bankruptcy Board of India (IBBI) – the regulator, was established on October 1, 2016. It registered three Insolvency Professional Agencies (IPAs), namely, the Indian Institute of Insolvency Professionals of Institute of Chartered Accountants of India (IIIP of ICAI), the Institute of Company Secretaries of India's Institute of Insolvency Professionals (ICSI IIP), and the Insolvency Professional Agency of Institute of Cost Accountants of India (IPA of ICMAI), were registered in November, 2016. With a view to make available a cadre of IPs, 977 individuals with professional qualifications and 15 years of experience were granted temporary registration. The IBBI commenced the Limited Insolvency Examination (LIE) on December 31, 2016. The professionals with ten years of experience and has passed the Limited Insolvency Examination were granted regular registration as IPs from January 2017. The subordinate legislation relating to eco-system as well as the corporate insolvency processes under the Code was put in place by the IBBI and the corporate processes commenced on December 1, 2016.

3.43 An important concern of many observers was the ability of the new framework to withstand the legal challenges. However, the Hon'ble Supreme Court upheld the Constitutional validity of the IBC in entirety in the matter of *Swiss Ribbons Pvt. Ltd. & Anr. Vs. UoI & Ors.*

Progress Made

3.44 The first case under the IBC was admitted by NCLT³ on January 17, 2017, in just over a month from the operationalization of the IBC, and the first insolvency resolution plan was approved on August 2, 2017.⁴ The Banking Regulations Act, 1949 was amended

² The Supreme Court *vide* its judgment dated April 8, 2019 held that the RBI circular dated February 12, 2018 was *ultra vires*.

³ *ICICI Bank Limited vs. Innoventive Industries Limited*.

⁴ *Synergies-Dooray Automotive Ltd.*

on May 4, 2017, to enable the RBI to direct banks to take defaulting borrowers into insolvency. The RBI constituted an Internal Advisory Committee which recommended the filing of cases under the IBC in all accounts with fund and non-fund based outstanding amounts greater than ₹5,000 crore, with 60 per cent or more classified as non-performing by banks as of March 31, 2016. Under the recommended criterion, 12 large accounts aggregating about 25 per cent of the current GNPA of the banking system qualified for immediate reference under IBC. Later, during 2017, another list of 28 larger accounts with a total outstanding loan amount of ₹2.3 lakh crore was released by the RBI.

3.45 As on February 2019⁵, that is, within 27 months of operationalization of the IBC, as many as 14,000 applications had been filed for initiation of CIRPs under the IBC. As on March 31, 2019⁶, NCLT had ordered the commencement of CIRP of 1,858 CDs. The quarterly trend of the CDs admitted into CIRP under the IBC is presented below.

Figure 14: Quarterly trend of cases admitted

Source: IBBI.

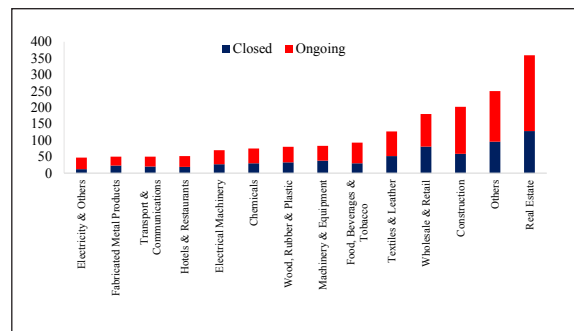

3.46 These cases have been filed across various sectors. 42 per cent of cases filed are from the manufacturing sector covering industries like steel, fast moving consumer goods (FMCG), chemical products, electrical machinery, basic metals, etc.; 20 per cent in real estate; 10 per cent in engineering, procurement,

⁵ Source: IBBI.

⁶ IBBI newsletter, March 2019.

and construction (EPC) sector and 10 per cent in trading companies. Other sectors under stress are textiles, power & utilities, FMCG, and hospitality. These are mostly late-stage cases where the overall sector has already been under stress due to internal and external issues. The sector-wise distribution of cases admitted is presented in Figure 15.

Figure 15: Sector-wise distribution of cases admitted

Source: IBBI.

3.47 Out of the total cases admitted, 152 cases were closed on appeal, review or settlement, 91 were withdrawn on account of settlement under section 12A of the IBC, 94 yielded resolutions and 378 resulted in liquidation. 1,143 cases are presently undergoing resolution process. Further, 383 cases of voluntary liquidation were admitted against which dissolution orders were passed in 41 cases.

3.48 Further, 920 (50 per cent) cases were filed by Operational Creditors (OCs), 738 (40 per cent) were filed by FCs and 200 (10 per cent) were filed by Corporate Debtor. In the quarter ending March 2019, 172 cases have been filed by FCs in comparison to average 90 cases in the initial 3 quarters. The growing number of cases by the FCs indicate that the IBC has already struck a chord with the banks and financial institutions, who view the IBC as a preferred mode to resolve distressed assets and maximize returns. Similarly, the OCs, which include vendors and suppliers from small and medium enterprises, are using the IBC as a feasible recourse to enforce payment discipline by corporate debtors.

3.49 An analysis of stakeholders who triggered CIRP is shown in Figure 16. The IBC has enabled the creation of a new cadre of professionals capable of managing stressed businesses as a going concern while

facilitating an effective resolution. As on March 31, 2019, 2,456 IPs were registered with the IBBI from different parts of the country. An analysis of registered IPs by region is provided in Figure 17.

Figure 16: Category-wise CIRP initiated

Source: IBBI.

Figure 17: Region-wise IP registered as on March 2019

Source: IBBI.

3.50 Figure 17 reveals the concentration of IPs in New Delhi (22 per cent) and Mumbai (16 per cent). Opportunities have also proliferated for a number of

support service providers like valuers, process advisors, turnaround specialists, lawyers, security services providers, and others.

3.51 The IBC provides for the establishment of Information Utilities (IU) to collect financial information from creditors, get it authenticated by debtors, store and provide access to the resolution professional, creditors, liquidator and other stakeholders so that they can make informed decisions.

3.52 The National e-Governance Services Limited (NeSL) was registered as the first IU by the IBBI. The details of information filed with NeSL show a growing trend of use of IU by creditors. Increased use of IUs is expected to eliminate information asymmetry and improve implementation timelines under the IBC. In the quarter ending March 2019, 173 FCs entered into an agreement with NeSL and 15,085 registered as users, and 13,762 loan records have been authenticated by the debtors, involving ₹41,14,988 crore⁷.

3.53 A key objective of the IBC is the maximization of the value of assets of the CDs and consequently value for its stakeholders. A critical element towards achieving this objective is the transparent and credible determination of the value of the assets of CD to facilitate comparison and informed decision making. The Code and the regulations framed thereunder assign this responsibility to the ‘Registered Valuer’ (RV). The Central Government designated the IBBI as the ‘Authority’ under section 247 of the Companies Act vide notification dated October 18, 2017.

Institutional Response

3.54 The Government and the regulator keenly observed the developments and experience in the insolvency process of

cases filed and rapidly brought in necessary changes to make the process and outcomes more efficient. Two sets of amendments were introduced in the IBC, one in November 2017⁸ and the second in June 2018⁹. The former introduced Section 29A, prohibiting persons with certain disabilities from submitting a resolution plan. The latter introduced changes to make the IBC easier to operate by reducing the threshold for decision making by the committee of creditors from 75 per cent to 66 per cent in specified matters and to 51 per cent for routine decisions. This amendment also entailed the recognition of home buyers as FCs. The 2018 amendment was based on recommendations of the Insolvency Law Committee (ILC)¹⁰ set up by the Government in November 2017. The ILC has since been reconstituted as a Standing Committee.

3.55 The IBBI has been at the vanguard of creating the regulatory architecture underpinning the insolvency law. Since December 2016¹¹, the IBBI has introduced 25 amendments in various regulations to streamline the resolution and liquidation processes responding real-time to the market situation. All such amendments have been done after detailed stakeholder consultations and crowdsourcing of ideas by putting out proposed amendments in public domain for comments and suggestions, thus ensuring the robustness of outcomes.

3.56 The NCLTs and NCLAT continue to play an important role as adjudicating and appellate authorities respectively for IBC. The geographical distribution of the NCLT benches are presented in Table 12.

⁷ IBBI newsletter, March 2019.

⁸ IBBI (Amendment) Ordinance, 2017 which was later passed by the Parliament as The Insolvency and Bankruptcy Code (Amendment) Act, 2018 on 18th January 2018.

⁹ IBBI (Second Amendment) Ordinance, 2018 which was later passed by the Parliament as The Insolvency and Bankruptcy Code (Second Amendment) Act, 2018.

¹⁰ The mandate of the committee is, inter-alia, to analyse the functioning and implementation of the Code, identify issues impacting the efficiency and effectiveness of corporate insolvency resolution and liquidation framework and make suitable recommendations to address them.

¹¹ IBBI website (under legal framework).

Table 12: Geographical location of NCLT Benches

7	Chandigarh	2
8	Bengaluru	1
9	Jaipur	2
10	Hyderabad	2
	Total	20

Source: NCLT website.

3.57 Keeping in view the rising caseload under the IBC, the government has notified additional benches in Amravati and Indore in March 2019 and Cuttack and Kochi in July 2018.

3.58 At present, there are 32 Judicial Members and 17 Technical Members of the NCLT. In August 2018, e-filing of applications, petitions, appeals, replies, etc. commenced at the Delhi NCLT. Digitization and e-filing at other NCLT Benches are expected to commence in due course. While the various Benches of NCLTs and NCLAT have facilitated in the recovery of ₹1,83,519 crore (approx.) under CIRP till April 2019 (MCA), the NCLT infrastructure requires to be scaled. Time-sensitive resolution is a cornerstone of the IBC. Delays affect the value of the asset causing loss to stakeholders and deter the resolution applicant from participating in the process. The Government is actively considering measures to address delays and has created six additional posts of the judicial and technical members for NCLAT. Setting up Circuit Benches of NCLAT is under consideration.

3.59 As the implementation of the IBC progressed, other regulators and agencies carried out various amendments in their

respective rules and regulations for effective implementation of the IBC. The Securities and Exchange Board of India amended its regulations with respect to minimum public shareholding, preferential issue of shares, delisting of companies, open offer requirements, etc. to enable smooth implementation of the resolution plan. Various requirements like audit committee, nomination and remuneration committee and stakeholder's relationship committee, etc. for listed companies, were relaxed. The Securities Contracts (Regulation) Rules, 1957 was amended to protect the interest of minority shareholders. It was provided that if the public shareholding falls below 25 per cent as a result of the approval of the resolution plan under the IBC, it shall be brought back to 25 per cent within three years. If public shareholding falls below 10 per cent, the same should be brought back to 10 per cent within 18 months. The RBI allowed the resolution applicants submitting resolution plans to raise external commercial borrowings from recognized lenders, for repayment of rupee term loans of the target company, under an approval route.

Impact of IBC

3.60 It is often difficult to tangibly measure the contribution of an efficient insolvency system in national prosperity. Direct measures of the impact tend to underestimate its importance as they may fail to account for the 'enabling' and 'preventive' role played by the insolvency system. While the sustainable impact of the IBC will be known in due course, green shoots have already emerged and some significant benefits of the IBC are visible.

A. Behavioural change

3.61 An effective exit law promotes responsible corporate behaviour by encouraging higher standards of corporate governance, including cash and financial

discipline, to avoid consequences of insolvency. The IBC has made a significant impact on the way the default of debts is viewed and treated by promoters and management. It has initiated a cultural shift in the dynamics between lender and borrower, promoter and creditor. The IBC has paved the way for Operational Creditors, mostly SMEs and small vendors to use the IBC as a recovery tool. The threat of promoters losing control of the company or protracted legal proceedings is forcing many corporate defaulters to pay off their debt even before the insolvency can be started. As on February 28, 2019, 6079 cases involving a total amount of ₹2.84 lakh crores have been withdrawn before admission under provisions of IBC (MCA). Further, as per RBI reports, ₹50,000 crore has been received by banks from previously non-performing accounts. RBI also reports that additional ₹50,000 crore has been "upgraded" from non-standard to standard assets. All these shows behavioural change for the wider lending ecosystem even before entering the IBC process.

3.62 Section 12A, inserted in the IBC in 2018 allows companies to withdraw CIRP proceedings with the consent of 90 per cent of FCs. In less than a year's time, nearly 5 per cent of admitted cases (91 cases) have been withdrawn under Section 12A indicating an acceptable resolution being proposed by the corporate borrower. Out of the above, about 65 per cent cases were withdrawn on account of full/partial settlement with creditors and/or applicant¹².

B. Increase in the resolution of stressed assets

3.63 Before enactment of the IBC, the recovery mechanisms available to the lenders were through Lok Adalat, Debt Recovery Tribunal, and SARFAESI Act. These mechanisms are recovery focused as compared to the IBC which aims at the turnaround of the debtor while maximizing returns for the creditors. Predictably, these earlier mechanisms have resulted in an average recovery of 23 per cent to lenders as against nearly 43 per cent under the IBC. A comparison of the realization under the IBC with previous regimes is provided in Figure 18.

Figure 18: Average recovery under various recovery regimes (in per cent)

Sources: IBBI and RBI.

¹² IBBI Newsletter – March 2019.

3.64 Till March 31, 2019, the CIRP yielded a resolution of 94 cases which has resulted in the settlement of claims of FCs of ₹1,73,359 crore¹³. These cases include 6 out of 12 large accounts - insolvency resolution in respect of which was initiated by banks, as per directions of the RBI in 2017.

3.65 The overall recovery in case of resolved cases is nearly 43 per cent (₹74,497 crores) to FCs. This is 194 per cent of the liquidation

value (₹38,443 crore). This realisation of 43 per cent of claims and 194 per cent of liquidation value is in addition to rescue of the defaulting CDs and preventing defaults. The realisation by FCs is presented in Figure 19. Out of the 94 CIRPs which ended with a resolution plan, the resolution plan for 65 cases was approved after 270 days. Figure 20 shows break up for resolution of the cases by duration.

Figure 19: Overall recovery by FCs in resolved cases (in ₹lakh crore)

Source: IBBI.

Figure 20: Number of days taken to approve resolution plan

Source: IBBI.

¹³ IBBI Newsletter – March 2019.

3.66 As of March 2019, the CIRP for 378 companies ended in liquidation. The total claims on these liquidation cases are ₹2,57,634 crore. Of these, 283 companies were with BIFR or already defunct. The economic value of most of these companies had already eroded before they were admitted into CIRP. One of the key objectives of the IBC is to allow companies to be liquidated swiftly to maximize value if resolutions cannot be reached.

Achievements and Recognitions

3.67 As a concerted effort made in the enactment and implementation of the IBC, India improved its 'Resolving Insolvency' ranking from 134 in 2014 to 108 in 2019. This is a significant jump given that the country was stagnating in earlier position for many years. India won the Global Restructuring Review (GRR) award for the most improved jurisdiction in 2018. Financial Sector Assessment Program of IMF- World Bank in January 2018 observed: "India is moving towards a new state of the art bankruptcy regime. Making use of the recently enacted IBC, the RBI has identified several accounts that are non-performing and asked banks to follow up with NCLT for resolution/ insolvency in accordance with the time-bound process laid down in the Code. The move is expected to make a significant dent to the quantum of NPAs starting next year."

Research and Training

3.68 The future of the IBC lies greatly in the hands of young entrepreneurs, professionals, and scholars who will contribute to building a robust economic order through a dynamic insolvency framework. The government is in the process of creating a suitable architecture comprising programmes and institutions that will help in advancing this goal.

3.69 The IBBI has announced the launch of Graduate Insolvency Programme (GIP), the first of its kind, for those aspiring to take up the discipline of IPs as a career or other roles in the value chain. A student who completes the GIP will be eligible for registration as an IP, without having to wait to acquire the 10-year experience as required presently, thus opening job opportunities for the youth.

3.70 Research and constant review can identify how the framework will need to adapt to meet future challenges and help in robust policymaking. The Insolvency Research Foundation (IRF) has been established by the Indian Institute of Corporate Affairs (IICA), an autonomous body under the Ministry of Corporate Affairs, in partnership with SIPI-an industry think-tank-as an independent research centre. The Centre for Insolvency and Bankruptcy (CIB) has been set up at IICA to serve as an apex institute of learning, training, and development in the area of insolvency and its spheres of influence. Multiple Practice Chairs and Research Desks are being set up in CIB by the key stakeholders to help in deep thinking and future looking insolvency policy building for India.

Reforms in Pipeline

A. Cross Border Insolvency

3.71 In today's world, business and trade are increasingly international. Investors and companies frequently transact business in more than one sovereign jurisdiction. For investors, banks and companies alike, it is important to know what is going to happen when things go wrong from a financial perspective in a particular country. The UNCITRAL Model Law on Cross-Border Insolvency (Model Law) is the most widely accepted blueprint to effectively deal with cross-border insolvency issues while ensuring the least intrusion into each country's internal insolvency and bankruptcy laws. Most sophisticated economies have well-developed cross border

insolvency laws. India has initiated the steps to adopt the Model Law. A draft Bill has been placed in the public domain for discussion. Once enacted, the law will address the key tenets of cross border insolvency – access, recognition, relief, and cooperation by way of a comprehensive legislative and regulatory framework, and provide a fair, efficient, transparent and predictable mechanism to deal with cross border issues. Once enacted, the Model Law will help in increased foreign investment.

B. Group Insolvency

3.72 It is a common practice for commercial ventures to operate through groups of entities and for each entity in the group to have a separate legal personality. As long as a group of companies remains solvent, the fact the business is formally divided into several corporations is a non-issue. However, if one or more of the companies in the group become insolvent, treatment of such company or companies as separate legal personality or personalities raises a number of complex issues. Presently, the insolvency of different companies belonging to the same group is dealt with through separate insolvency proceedings for each company. A coherent approach can address information asymmetry, provide coordination and prevent delay and clogging up of insolvency infrastructure.

3.73 Recognising the need for a legal framework to deal with insolvency of group companies, the IBBI has recently set up a working group under former SEBI Chairman Mr. U. K. Sinha to recommend a complete regulatory framework to facilitate insolvency resolution and liquidation of debtors in a corporate group.

C. Insolvency and bankruptcy of individuals

3.74 Implementing insolvency law for individuals and partnership firms poses

distinct challenges. The dynamics, conditions, and factors involved in the insolvency and bankruptcy of individuals without business interest and individuals who have extended the personal guarantee to corporate debtors or carry out business activities through partnership firms or proprietorship firm are likely different. Individuals with business are likely to behave in a way consistent with the classical economic ideals on which business insolvency systems are founded. On the other hand, the behaviour of individuals without business interest is expected to be somewhat informal.

3.75 Recognising the complexities involved, a Working Group under the chairmanship of Mr. P. K. Malhotra, former law secretary, has been set up by the IBBI to recommend the strategy and approach for implementation of the provisions of IBC dealing with insolvency and bankruptcy of individuals. The IBC was amended to provide three classes of individuals -individuals who have executed personal guarantees for corporate debtors; individuals who are engaged in economic activities through proprietorship and partnership firms; and other individuals.

3.76 While insolvent individuals face a shared core of key issues, the majority of insolvency and bankruptcy proceedings involving individuals may not involve contentious issues, voluminous stakeholders, and high amount of debt or disputes which might well be more efficiently resolved with the intervention and assistance of a trained cadre of mediators. Mediation and counselling are known practices prevalent in most sophisticated jurisdictions. Similarly, counselling is a critical component of individual bankruptcy. The Working Group is presently considering measures to provide easier access and reduce the time and cost of insolvency proceedings relating to individuals.

D. Improving NCLT capacity

3.77 While 32 Members have been appointed to the NCLT recently and 6 additional posts have been sanctioned for NCLAT, the capacity of the NCLT and NCLAT will have to review from time to time and necessary infrastructure support provided. A centralized research wing can assist NCLT to stay abreast with the international best practices. This will be more crucial with the enactment of the Model

Law. Although technology is being used to an extent by the NCLT and the IBBI, it is crucial to advance the application of technology to enhance case management by the NCLT for strict timekeeping of insolvency cases. Technology can also be used for data mining and analysis for constant review of the IBC impact on the ground. IPs should be encouraged to use technology to speed up data collection and access for the purpose of efficient CIRP.

CHAPTER AT A GLANCE

- Monetary policy witnessed a u-turn over the last year as the benchmark policy rate was first hiked by 50 bps and later reduced by 75 bps due to weaker-than-anticipated inflation, growth slowdown and softer international monetary conditions.
- Liquidity conditions, however, have remained systematically tight since September 2018 (as illustrated by the LAF data) thereby impacting the yields on government papers.
- The performance of the banking system has improved as NPA ratios declined and credit growth accelerated.
- However, financial flows to the economy remained constrained because of decline in the amount of equity finance raised from capital markets and stress in the NBFC sector. Capital mobilized through public equity issuance declined by 81 per cent in 2018-19. Credit growth rate y-o-y of the NBFCs have declined from 30 per cent in March 2018 to 9 per cent in March 2019.
- The ecosystem for insolvency and bankruptcy is getting systematically built out with recovery and resolution of significant amount of distressed assets as well as palpably improved business culture. Till March 31, 2019, the CIRP yielded a resolution of 94 cases which has resulted in the settlement of claims of FCs of ₹1,73,359 crore.
- Moreover, as on February 28, 2019, 6079 cases involving a total amount of ₹2.84 lakh crores have been withdrawn before admission under provisions of IBC. Further, as per RBI reports, ₹50,000 crore has been received by banks from previously non-performing accounts. RBI also reports that additional ₹50,000 crore has been "upgraded" from non-standard to standard assets. All these shows behavioural change for the wider lending ecosystem even before entering the IBC process.

Prices and Inflation

“The Superintendent of Commerce shall ascertain demand or absence of demand for, and rise or fall in the price of, various kinds of merchandise which may be the products either of land or of water and which may have been brought in either by land or by water path. He shall also ascertain the time suitable for their distribution, centralisation, purchase, and sale.”

- Kautilya’s Arthasāstra, Chapter XVI, ‘the Superintendent of Commerce,’ in Book II, ‘The Duties of Government Superintendents.’

During FY 19 headline (CPI-C) inflation continued its downward trajectory on the back of low food inflation. Core inflation which was above 6 per cent in the six out of first seven months of FY 19 started moderating November onwards. Services and goods are trending differently. Rural inflation moderated but urban inflation rose in 2018-19 over the previous year. States too witnessed decline in inflation during the year.

INTRODUCTION

4.1 The economy witnessed a gradual transition from a period of high and variable inflation to more stable and low level of inflation in the last five years. Headline inflation based on the Consumer Price Index – Combined (CPI-C) has been declining continuously for the last five years. Headline CPI inflation declined to 3.4 per cent in 2018-19 from 3.6 per cent in 2017-18, 4.5 per cent in 2016-17, 4.9 per cent in 2015-16 and 5.9 per cent in 2014-15. It stood at 2.9 per cent in April 2019 as compared to 4.6 per cent in April 2018. Food inflation based on

Consumer Food Price Index (CFPI) declined to a low of 0.1 per cent during the financial year (FY) 2018-19.

4.2 Inflation based on Wholesale Price Index (WPI) remained moderate at 3.0 per cent in 2017-18 compared to 1.7 per cent in 2016-17, (-)3.7 per cent in 2015-16 and 1.2 per cent in 2014-15. During the FY 2018-19, WPI inflation stood at 4.3 per cent. Inflation based on the major series of the price indices for the last seven years are given in Table 1 and the movement of WPI and CPI inflation since April 2014 is displayed in Figure 1.

Table 1: General inflation based on different price indices (in per cent)

	2012-13	2013-14	2014-15	2015-16	2016-17	2017-18	2018-19
WPI	6.9	5.2	1.2	-3.7	1.7	3.0	4.3 (P)
CPI - C	9.9	9.4	5.9	4.9	4.5	3.6	3.4
CPI - IW	10.4	9.7	6.3	5.6	4.1	3.1	5.4
CPI - AL	10.0	11.6	6.6	4.4	4.2	2.2	2.1
CPI - RL	10.2	11.5	6.9	4.6	4.2	2.3	2.2

Source: Office of the Economic Adviser, Department for Promotion of Industry and Internal Trade (DPIIT) for WPI, Central Statistics Office (CSO) for CPI-C and Labour Bureau for CPI-IW, CPI-AL and CPI-RL.

Note: CPI-C inflation for 2012-13 and 2013-14 is based on old series 2010=100; (P) - Provisional; C stands for Combined, IW stands for Industrial Workers, AL stands for Agricultural Labourers and RL stands for Rural Labourers.

CURRENT TRENDS IN INFLATION

4.3 The average CPI-C headline inflation declined to 3.4 per cent in 2018-19, which is the lowest average since the new series of CPI-C began. Headline CPI-C inflation has remained below 4.0 per cent for two consecutive years. The decline in the inflation in the FY 2018-19 was mainly due to low food inflation which ranged between

(-)2.6 to 3.1 per cent. The moderate inflation rate of less than 4 per cent was maintained for straight 8 months during the FY 2018-19 (Figure 1). The CPI-C inflation for the month of April 2019 stood at 2.9 per cent same as in March 2019 as compared to 4.6 per cent in April 2018.

4.4 **Food Inflation** in the country has been extremely benign. Even globally, food inflation has been moderate. Food inflation

based on Consumer Food Price Index (CFPI) declined to 1.8 per cent in 2017-18 from 4.2 per cent in 2016-17, 4.9 per cent in 2015-16 and 6.4 per cent in 2014-15. Average food inflation for the financial year 2018-19 declined to a low of 0.1 per cent. Food inflation stood at 1.1 per cent in April 2019 compared to 0.3 per cent in March 2019 and 2.8 per cent in April 2018. The food deflation in the second half of FY 2018-19 is mainly due to deflation in vegetables, fruits, pulses and products, sugar & confectionery and eggs, which together account for 13.1 per cent weight in overall CPI-C. Vegetables, which account for 6.04 per cent weightage in overall CPI-C, recorded deflation of 5.2 per cent during 2018-19. Pulses and products,

which account for 2.4 per cent weightage, too recorded deflation during FY 2018-19 at 8.3 per cent. Volatility in prices of pulses has been low. Amongst pulses, Moong has seen the least price fluctuation (Figure 2).

4.5 Food inflation based on Wholesale Price Index too declined over the last two financial years. It was over 0.6 per cent in 2018-19. The decline in WPI food inflation during 2018-19 is mainly due to deflation in pulses, vegetables, fruits and sugar, which together account for 5.2 per cent weight in the overall WPI basket. WPI food inflation was at 4.9 per cent in April 2019 as compared to 3.9 per cent in March, 2019 and 0.8 per cent in April 2018.

Table 2: Inflation in selected groups of CPI-Base 2012 (in per cent)

Description	Weights	2017-18	2018-19	Apr-18	Mar-19	Apr-19 (P)

4.6 **Core Inflation** corresponds to the component of inflation that is likely to continue for a long period. Thus, core inflation captures the underlying trend of inflation and is, therefore, more stable. Unlike the non-core component of inflation, core inflation is not affected by temporary shocks. In India, core inflation is generally measured by excluding highly volatile components from the headline inflation. By their very nature, food and fuel have been highly volatile. Therefore, we arrive at core inflation by removing food and fuel components from the headline inflation. As headline inflation exhibits volatility due to short run shocks, Central banks in many

countries focus on core inflation.

4.7 CPI-C based core inflation, which equals CPI excluding the food and fuel group, has remained above 4 per cent since the start of new series of CPI-C. Core inflation based on CPI-C increased to 5.8 per cent in 2018-19 from 4.6 per cent in 2017-18. However, it has declined from 5.7 per cent in November 2018 to 4.5 per cent in April 2019 (Figure 3). Refined core inflation, which equals CPI excluding food and fuel group, petrol & diesel, too has moved closely with core inflation; it was 5.7 per cent in 2018-19 as compared to 4.6 per cent in 2017-18 and stood at 4.8 per cent in April 2019.

Figure 3: CPI-C based Core Inflation (in per cent)

Source: Computed from CSO data

DRIVERS OF INFLATION

4.8 At the all India level, CPI-C inflation during FY 2018-19 was driven mainly by miscellaneous group followed by housing as well as fuel and light group (Figure 4). As can be seen in Figure 5, goods inflation,

which accounts for a weight of 76.6 per cent in CPI-C, was 2.6 per cent during FY 2018-19 as compared to 3.2 per cent during FY 2017-18. In contrast, services inflation, which accounts for a weight of 23.4 per cent, was 6.3 per cent during FY 2018-19 when compared to 5.0 per cent during 2017-18.

Figure 4: Contribution to CPI - Combined inflation 2017-18 and 2018-19 (Share in per cent)

Source: Computed from CSO data

4.9 Services inflation has been higher than goods inflation and the gap between the two is growing (Figure 5). In recent times, services inflation has influenced headline inflation as it has contributed more than its weight (Figure 6). 40 items of services account for 23.37 per cent weight in CPI-C. Housing has the highest weight amongst services which is (10.07 per cent), followed by transport and communication (4.59 per cent), education

(3.51 per cent) and health (1.82 per cent) (Table 4). Contribution of health, education, transport and communication in driving services inflation has gained prominence across rural and urban areas (refer to Figures 7 to 11). Inflation in health is more prominent in rural than urban areas probably owing to supply side constraints. Box 1 presents the inflation dynamics of education, health and transport components of services.

RURAL – URBAN INFLATION

4.10 The current phase of low inflation is also marked by reduction in both urban and rural inflation. However, the trend of lower urban inflation when compared to rural inflation seems to be getting moderated/reversed in the financial year 2018-19. The decline in rural inflation is steeper than that of urban inflation since July 2018, resulting in decline in headline inflation. Fall in rural inflation is due to moderation in food inflation, which has been negative for the last six months (October

2018 to March 2019). The importance of food in determining rural inflation has been declining over the years. In contrast, the role of miscellaneous category i.e. services in determining rural inflation has increased (Figure 10).

4.11 Miscellaneous group was the main driver of CPI (Rural) inflation in 2018-19, contributing more than 70 per cent to the overall rural inflation. In urban areas, miscellaneous group and housing have contributed to inflation in equal measure during FY 2018-19 (Figure 11).

Box 1: Analysis of Components of Services Inflation

I. Education

Education with weight of 4.46 per cent in the Combined CPI is spread over 5 items. Of these five items, two items i.e. ‘books, journals: first hand’ and ‘stationery, photocopying charges’ are goods with weight of 0.95 per cent. The remaining three items i.e. ‘tuition and other fees (school, college, etc.)’, ‘private tutor/ coaching centre’ and ‘other educational expenses (incl. fees for enrollment in web-based training)’ with weight of 3.51 per cent belong to services. Analysis of monthly Combined CPI data since January 2015 shows that goods components are witnessing lower inflation than the services (Figure 1). Inflation of ‘private tutor/ coaching centers’ and ‘tuition and other fees (school, college, etc.)’ has risen during 2018-19.

To analyze the inflation dynamics of ‘education’ sub-group over a longer period, we have used the CPI for Industrial Workers. Figure 2 below depicts the services component of education sub-group under CPI-IW. Inflation of ‘primary school-fee’ started declining from 2010-11 and bottomed out at (-)21.5 per cent in 2012-13. Secondary school-fee also shows decline in inflation during the period from 2009-10 to 2012-13. As opposed to ‘school fee’ which declined or rose marginally during 2009-10 to 2014-15, ‘college fee’ and ‘private tuition fee’ rose during this period. In recent years, these components of education have seen moderate inflation. The sharp decline in ‘primary school-fee’ inflation may be possibly due to the enactment of Right to Education Act (RTE) in 2010.

Figure 1: Inflation based on CPI-C for Education Sub-group by goods & services (in per cent)

Source: Computed from CSO data

Figure 2: Inflation based on CPI-IW for items under Education, Recreation & Amusement Sub-group (in per cent)

Source: Computed from Labour Bureau data

II. Health

Health with weight of 5.89 per cent in the Combined CPI is spread over seven items. Of these seven items, three items i.e. ‘medicine (non-institutional)’, ‘family planning devices’ and ‘spectacles’ are goods with weight of 4.07 per cent. The remaining four items i.e. ‘hospital & nursing home charges’, ‘other medical expenses (non-institutional)’, ‘doctor’s/ surgeon’s fee-first consultation (non-institutional)’ and ‘X-ray, ECG, pathological test, etc. (non-institutional)’ with weight of 1.82 per cent belong to services.

Services components of health are witnessing higher inflation than the goods embedded into it. However, in the last few months, trend seems to have reversed (Figure 3).

Figure 3: Inflation based on CPI-C for Health Sub-group by goods & services (in per cent)

Source: Computed from CSO data

Figure 4: Inflation based on CPI-IW for items under Medical Care Sub-group (in per cent)

Source: Computed from Labour Bureau data

III. Transport and Communication

Transport and Communication, with a weight of 8.59 per cent in the Combined CPI, is spread over twenty-one items. Of these twenty-one items, eight items i.e. ‘motor car, jeep’, ‘motor cycle, scooter’, ‘bicycle (without accessories)’, ‘tyres & tubes’, ‘petrol for vehicle’, ‘diesel for vehicle’, ‘lubricants & other fuels for vehicle’ and ‘mobile handset’ are goods with weight of 4.0 per cent. The remaining thirteen items i.e. ‘other conveyance expenses’, ‘railway fare’, ‘bus/tram fare’, ‘taxi, auto-rickshaw fare’, ‘rickshaw (hand drawn & cycle) fare’, ‘horse cart fare’, ‘school bus, van, etc.’, ‘air fare (normal): economy class (adult)’, ‘steamer, boat fare’, ‘porter charges’, ‘telephone charges: landline’, ‘telephone charges: mobile’ and ‘internet expenses’ with weight of 4.59 per cent belong to services.

Within ‘transport & communication’, on an average, services components are witnessing higher inflation than goods. However, volatility is more for goods than for services (Figure 5). Analysis of CPI-IW data indicates that inflation of ‘telephone charges’ has remained quite stable over the years (Figure 6). Inflation for ‘bus fare’ and ‘auto rickshaw fare’ remained above 6 per cent between FY 2009-10 to 2014-15 mainly due to high oil prices. The fall in inflation of ‘bus fare’ and ‘auto rickshaw fare’ since 2014-15 onwards can be attributed to moderation in crude oil prices and deregulation of diesel prices in October 2014. The sudden rise in inflation of ‘rail fare’ in 2013-14 is due to a steep rise in rail fare.

Box 2: Housing Price Index

I. NHB RESIDEX

The Housing Price Indices (HPIs) are a broad measure of movement of residential property prices observed within a geographical boundary. The first official housing price index for the country named ‘NHB RESIDEX’ was launched in July 2007 by the National Housing Bank. Over time, the base year has been revised to FY 2017-18 to capture the latest information and to accurately reflect the current economic situation in the country.

Currently, National Housing Bank publishes NHB RESIDEX for 50 cities on a quarterly basis with FY 2017-18 as the base year. Among the 50 cities covered are 18 State/UT capitals and 33 are part of the smart city list released by Government of India. The indices are computed using the Laspeyres methodology and a four quarter weighted moving average.

HPI at Assessment Prices is computed using lenders’ valuation data received from Banks/ Housing Finance Companies (HFCs), while HPI at Market Prices for under construction properties is based on primary market data for under construction properties collected from developers, builders and brokers. NHB also publishes Composite HPI at Assessment and Market Prices based on 50 cities indices. The composite indices are derived by applying population weights to city level indices.

The rate of growth in housing prices for Composite HPI at Assessment Prices is shown in Figure 1. Figure 2 shows the trend in housing prices for under construction properties at market prices.

Figure 1: Growth rate based on Composite HPI at Assessment Prices (in per cent)

Figure 2: Growth rate based on Composite HPI at Market Prices for Under Construction Properties (in per cent)

II. HPI (RBI)

The Reserve Bank of India (RBI) began compiling a House Price Index (HPI) in 2007 with a quarterly HPI for Mumbai city (Base 2002-03=100). Since then, it has extended its coverage to nine more cities, revised its base to 2010-11=100, and started publishing a composite All India HPI. RBI’s quarterly HPI is based on transactions data received from housing registration authorities in ten major cities. Growth (YoY) in housing prices shows a downward trend (refer to Figure 3).

Figure 3: HPI Growth rate based on RBI’s All-India HPI (in per cent)

STATE-WISE INFLATION

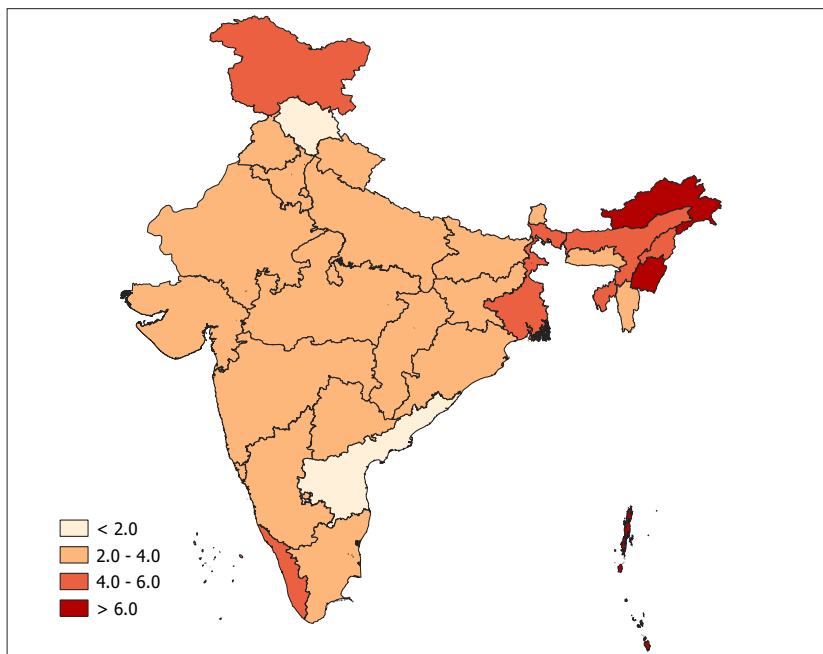

4.12 Many States have witnessed fall in CPI inflation during 2018-19. Inflation in twenty-three States/Union Territories (UTs) was below 4 per cent in FY 2018-19 (Figure 12). Inflation ranged between (-)1.9 per cent to 8.9 per cent across States in FY

2018-19 compared to 1.5 per cent to 12.4 per cent in FY 2017-18 (Figure 13). Sixteen States/UTs had inflation rate lower than All India average for FY 2018-19 with Daman & Diu having the lowest inflation followed by Himachal Pradesh and Andhra Pradesh.

4.13 In rural areas, among major States/UTs, sixteen States had recorded inflation of less than 4 per cent in FY 2018-19 as compared to thirteen in FY 2017-18 (Figure

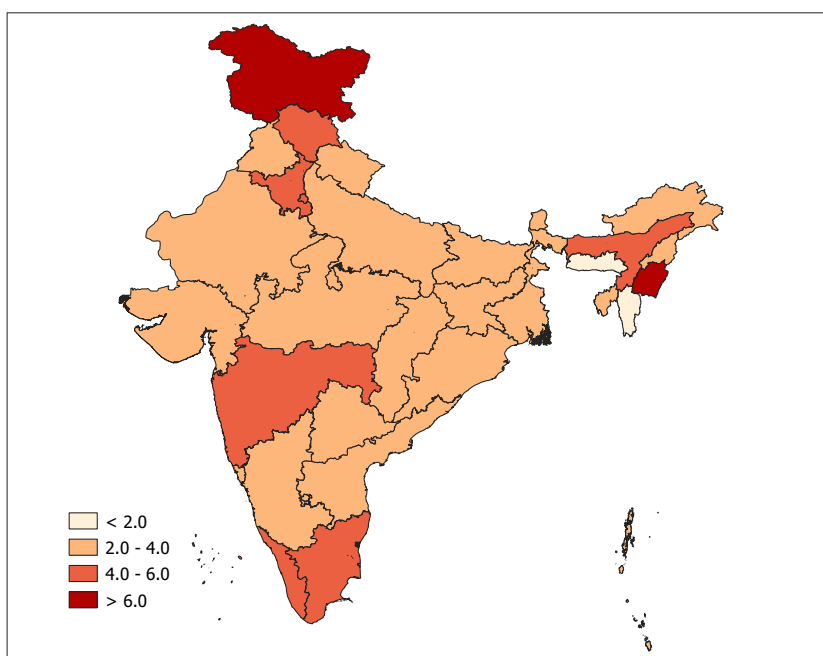

14). However, in the case of urban areas, nine States recorded inflation of less than 4 per cent in FY 2018-19 as against fifteen in 2017-18 (Figure 15).

TRENDS IN GLOBAL COMMODITY PRICES

4.14 As per the commodity prices published by the World Bank, energy commodity prices have continued their increasing trend in FY 2018-19. These recorded average inflation of 22.1 per cent in 2018-19 as compared to 16.8 per cent in 2017-18 (Figure 16). Movement

of ‘Fuel & Power’ inflation based on All India WPI tracks World Bank Energy price index; it increased at an average of 11.5 per cent in FY 2018-19 when compared to 8.1 per cent in FY 2017-18. Both World Bank food prices as well as Food and Agriculture Organization (FAO) food prices recorded deflation during FY 2018-19. WPI based food inflation too declined during 2018-19 (Figure 17).

Figure 16: Inflation based on World Bank Price Indices and FAO Food Price Index (FFPI) (in per cent)

EFFORTS TO CONTAIN INFLATION

4.15 Central Government monitors the price situation on a regular basis as controlling inflation remains a key area of policy focus. Government has taken a number of measures to control inflation especially food inflation. *Inter alia*, the measures taken include both general measures and specific measures.

4.16 The following general measures are being taken to control inflation. First, advisories are being issued, as and when required, to State Governments to take strict action against hoarding & black marketing, especially for commodities in short supply. These measures are taken to effectively enforce the Essential Commodities Act, 1955 & the Prevention of Black-marketing and Maintenance of Supplies of Essential

Commodities Act, 1980. Second, regular review meetings on prices and availability of key commodities are held at the highest level, including at the level of Ministers, Committee of Secretaries, Inter Ministerial Committee, Price Stabilization Fund Management Committee (PSFMC), and other Departmental level review meetings to take stock of the prevailing price and availability situation and recommend appropriate policy intervention. Third, higher Minimum Support Price (MSP) for pulses and other crops has been announced so as to incentivize production and thereby enhance availability of food items, which may help moderate prices. And finally, Government has set up Price Stabilization Fund (PSF) for procurement of agri-horticultural commodities including potatoes, onions and pulses for its release during lean period to improve availability and moderate their prices.

4.17 The specific measures taken by the Government include the following. First, during lean periods of 2017-18 and 2018-19, to control the rise in onion prices, onions were released at reasonable prices from the stock procured under PSF. Second, pulses from the buffer are utilized for strategic

market intervention for price management, meeting institutional requirements like supplies to State Governments/UTs for Mid-Day Meal Scheme (MDM), Integrated Child Development Services (ICDS) Scheme, and Public Distribution System (PDS), and through Open Market Sale, etc. In addition, pulses from the buffer are being utilized to meet the requirement of Army and Central Para-Military Forces. Third, prohibition on export has been withdrawn in April 2018 on all varieties of edible oils, except mustard oil. Export of mustard oil in branded consumer packs of up to 5 kgs is permitted with a Minimum Export Price (MEP) of United States Dollar (USD) 900 per million ton (MT). Finally, the order empowering States/UTs to impose controls including Stock Limits on Edible Oils and Edible Oilseeds has been withdrawn vide Notification dated June 13, 2018.

CONCLUSION

4.18 FY 2018-19 saw low headline as well as food inflation. The year witnessed deflation in prices of pulses, vegetables and sugar. Core inflation averaged higher than the previous year.

CHAPTER AT A GLANCE

- Headline inflation based on CPI-C continued its declining trend for fifth straight financial year. It has remained below 4.0 per cent in the last two years.
- Food inflation based on Consumer Food Price Index (CFPI) too declined over the last five years, and has remained below 2.0 per cent for the last two consecutive years.
- CPI-C based core inflation (CPI excluding the food and fuel group) increased during FY 2018-19 as compared to FY 2017-18. However, it has started declining since March 2019.
- Main contributors of headline inflation based on CPI-C during FY 2018-19 are miscellaneous, housing, and fuel and light groups. Relative importance of services in shaping up headline inflation has increased.
- CPI rural inflation declined during FY 2018-19 over FY 2017-18. However, CPI urban inflation increased marginally during FY 2018-19. Many States witnessed fall in CPI inflation during FY 2018-19.

Sustainable Development and Climate Change

“You know that India is one sixth of the global community. Our development needs are enormous. Our poverty or prosperity will have direct impact on the global poverty or prosperity. People in India have waited too long for access to modern amenities and means of development. We have committed to complete this task sooner than anticipated. However, we have also said that we will do all this in a cleaner and greener way”

- Prime Minister Narendra Modi (2018)

In adoption of 2030 global agenda, the countries are moving forward for achieving a world free from poverty, gender inequality and economic inequality and thereby ensuring a healthy planet for future generations. These goals are multi-dimensional and integrate various social, economic and environmental dimensions. India continues to target and maintain its economic growth by introducing and implementing various policies and measures relating to sustainable development, climate change, resource efficiency and air pollution. India has been progressing rapidly towards achieving the Sustainable Development Goals (SDGs). With increasing demand for resources to cater to the different developmental needs, policies need to nudge economic agents towards achieving the maximum output from the available resources. Developing countries like India need to endeavor to do the best possible within their own domestic resources, keeping in mind the sustainable development imperatives. It is time for the global community to exhibit the requisite momentum to act upon their responsibilities on establishing the enabling environment for sustainable development and climate actions.

INTRODUCTION

5.1 The 2030 Agenda for Sustainable Development and its 17 SDGs adopted by World leaders in 2015 presents a roadmap for future development trajectory to all nations with focus on poverty eradication, environmental sustainability, peace and prosperity. The achievement of these goals is an imperative for, not just, any particular country but the global community as a whole. The need for global cooperation in helping the developing countries in achieving the

climate targets cannot be overstated. India's development agenda has for long been based on principles that are closely related to those that have been propounded in the 2030 Development Agenda. Climate change requires concerted global efforts and India has been preserving to address the climate challenges along with other developmental imperatives. The country has been making substantial additions to its installation of renewable power capacity. Increasing growth rate and rapid urbanization in India have

spurred the demand for natural resources, exerting pressures on the environment and raising sustainability concerns. Resource efficiency can be a major tool to meet the resource needs of the country at the least possible cost to the environment. Air pollution has emerged as a serious issue in India. National Clean Air Program (NCAP) has been launched by the Government as a pan-India, time bound, national level initiative to address the country-wide issues of air pollution in a comprehensive manner.

ACHIEVING THE SDGs

5.2 The SDGs are global goals, built upon the erstwhile Millennium Development Goals. They are exhaustive, universal and integrated and emphasize on core areas of poverty and inequality, economic growth, innovation, sustainable consumption and production, climate change, peace and justice and partnerships.

5.3 Estimates suggest that US\$5 to US\$7 trillion per year is required for financing these goals worldwide and US\$3.9 trillion per year in developing countries. However, the current investment in developing countries is around US\$1.4 trillion leading to a shortfall of US\$2.5 trillion per year (UNCTAD, 2014). Global action of this scale requires strong coordination between different governments, development institutions, private sector and financial institutions for the effective financing and implementation across the globe.

India's Progress towards the SDGs

5.4 Sustainable development requires every nation to prioritize their targets and carefully implement various schemes/programmes in accordance with local challenges, capacities and available resources. India follows a holistic approach for achieving the SDGs

by implementing a comprehensive array of schemes. Current flagship policies and programmes of Government of India such as Swachh Bharat Mission (SBM), Beti Bachao Beti Padhao (BBBP), Pradhan Mantri Awas Yojana (PMAY), Pradhan Mantri Jan-Dhan Yojana (PMJDY), Deen Dayal Upadhyay Gram Jyoti Yojana (DDUGJY) and Pradhan Mantri Ujjwala Yojana (PMUY) have substantially contributed to India's progress in this regard.

5.5 In the federal context of India, programmes and schemes are basically implemented at the level of States and Union Territories. Tracking of progress on different SDGs, therefore, is important for appropriate policy actions and building up a competitive spirit among the States and UTs. NITI Aayog has come up with a single measurable index to track the progress of all the States and UTs across 13 out of 17 SDGs (excluding Goal 12, 13, 14 and 17 on account of unavailability of comparable data across States/UTs). This SDG index provides an aggregate assessment of India's progress. This index helps in informed policy formulations as it captures status of both national and state-level social, economic, and environmental parameters across a set of 62 select indicators. The score varies from 0 to 100. States with scores equal to/greater than 65 are considered as **Front-Runners (in Green)**; as **Performers (in Yellow)** in the range of 50-64 and as **Aspirants (in Red)** if the score is less than 50. States with an index score of 100 are classified as **Achievers (in Blue)** i.e. the states have achieved the national target set for 2030. A score of 0 denotes worst performance. The SDG Index Score ranges between 42 and 69 for States and between 57 and 68 for UTs and is presented in Table 1 below.

Table1: Performance of States/UTs on each SDG

States	SDG 1 (End Poverty)	SDG 2 (End Hunger)	SDG 3 Health	SDG 4 Education	SDG 5 Gender Equality	SDG 6 Water	SDG 7 Energy	SDG 8 Eco Growth	SDG 9 Infrastructure and Industrialization	SDG 10 Inequality	SDG 11 Resilient cities	SDG 15 Ecosystem and Biodiversity	SDG 16 Institutions
Andhra Pradesh	67	50	68	77	44	59	76	81	31	75	26	87	90
Arunachal Pradesh	52	58	38	44	32	64	44	72	16	47	44	73	77

India	54	48	52	58	36	63	51	65	44	71	39	90	71

Source: NITI Aayog's SDG India Index Baseline Report, 2018

5.6 India's growth trajectory for achieving SDG 10 (Reduced Inequality) and SDG 15 (Life on Land) is impressive as compared to the other SDGs as several states have achieved 100 in these SDGs. This may be due to performance in worthy initiatives such as PMJDY, Mahatma Gandhi National Rural Employment Guarantee Act (MGNREGA), the National Environment Policy, National Agro-forestry Policy and Green Highways Policy. India is struggling to achieve its targets of SDG 5 (Gender Equality) and SDG

11 (Sustainable Cities and Communities) as large number of states are in the 'Aspirants' category'. Goa, a front runner among all the States and UTs in SDG 11, has been doing exceptionally well in waste management.

5.7 NITI Aayog has also developed a composite index for each State/UT which aggregates progress towards each SDG. Kerala and Himachal Pradesh are the front runners amongst all the states with a score of 69. Tamil Nadu is also

Figure 1: Performance of States and UTs on SDG Composite India Index

Source: NITI Aayog's SDG India Index Baseline Report, 2018

progressing very fast. Among the UTs, Chandigarh and Puducherry are the front runners with a score of 68 and 65 respectively (Figure 1). Kerala's good performance is attributable to the provision of good health, reducing hunger, achieving gender equality and providing quality education. Himachal Pradesh has performed well on providing clean water and sanitation along with reducing inequalities and preserving mountain ecosystem. Chandigarh, among other UTs, has performed well in providing clean water and sanitation along with affordable clean energy and quality education.

5.8 A close collaboration between the national and sub-national governments as well as active participation of all other relevant stakeholders are required for meeting the challenges of financing, technical support and continuous monitoring of the progress of each state and UT to achieve the National Sustainable Development Agenda.

GANGA – THE LIFELINE OF INDIA

5.9 A key policy priority of the Government towards achieving the SDG 6 (Ensure availability and sustainable management of water and sanitation for all) has been the cleanliness of mighty River Ganga through Namami Gange Mission. The mission was launched as a priority programme with a budget outlay of ₹20,000 crore for the period 2015-2020. During the period 2014-15 to 2018-19, a total amount of ₹6,106.25 crore has been spent on the programme indicating a substantial jump over earlier similar programmes (Figure 2).

5.10 For effective implementation and proper synchronization with the State and Local Bodies, National Mission for Clean Ganga (NMCG) was empowered as an Authority under the Environment (Protection) Act, 1986 for fast track implementation and to

Figure 2: Financial Progress of National Mission for Clean Ganga (Actual Expenditure in ₹ crore)

Source: National Mission for Clean Ganga

Note: The figure for 2019-20 is projected expenditure based on current liabilities of sanctioned projects.

formulate policies for long term sustainability of the Ganga rejuvenation efforts.

Major Components of Namami Gange Mission

- i. **Sewerage Project Management:** For sewerage projects, the policy decision to use Public-Private Partnership (PPP) approach of Hybrid Annuity Mode (HAM) and 15 years long-term Operation & Maintenance (O&M) included in the project cost and improved governance through 'One City One Operator' approach ensured competitive and positive market participation along with synergy in implementation.
- ii. **Urban Sanitation:** A report prepared by the Consortium of 7 IITs identified 10 cities that contributed more than 60 per cent pollution load in Ganga. The Mission extended a comprehensive coverage of these cities with construction and rehabilitation of Sewage Treatment Plants (STPs) for a prospective year of 2035, inception and diversion of drains, solid waste management through cleanliness drives on *ghats* and deployment of skimmers for river surface cleaning.
- iii. **Sewerage Infrastructure:** 150 sewerage projects (111 on Ganga stem & 39 in

tributaries) at sanctioned cost of ₹23,130.95 crore has been approved for creation of new STP capacity of 3,729.92 Millions of Litres per day

(MLD), 1,114.39 MLD rehabilitated STP capacity and laying of around 4,972.35 km sewerage networks (Figure 3).

Figure 3: Number of Sewerage Projects before and after 2014 taken up in Namami Gange Program

Source: National Mission for Clean Ganga

As of May 2019, 43 of these projects have been completed, which has resulted in laying of 2,645.6 km sewer networks and of 575.84

MLD of STP capacities in Ganga basin (Figure 4).

Figure 4: Sewage Generation vs. Treatment Capacity in 97 Ganga Towns

Source: National Mission for Clean Ganga

iv. Industrial Pollution: To ensure proper inventorisation and inspection of point source pollution from industrial units, 1,109 Grossly Polluting Industries (GPIs) were identified and surveyed

independently by 12 Technical Institutions. The compliance of the operational GPIs in 2017 as against 2018 improved from 39 per cent to 76 per cent (Figure 5).

Figure 5: Percentage Compliance of GPIs (as of May 2019)

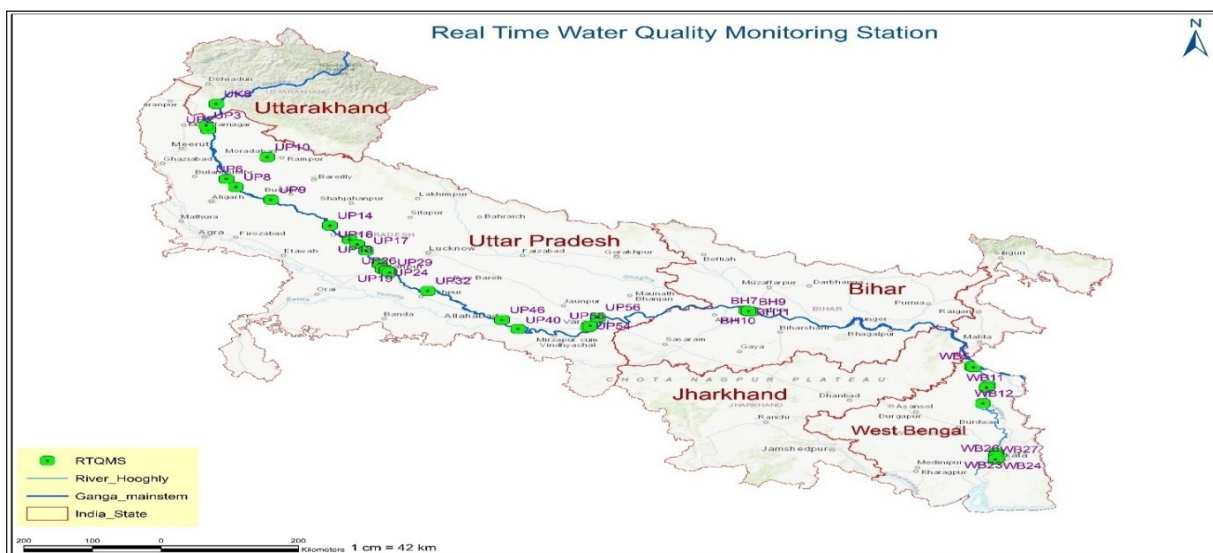

Source: National Mission for Clean Ganga

Online Continuous Effluent Monitoring Systems (OCEMS) of all operating GPIs have been connected with Central Pollution Control Board (CPCB) & State Pollution Control Board (SPCB) servers and a system of SMS alerts have been initiated to non-complying GPIs, district officials and State Project Management Groups (SPMGs).

Besides, zero black liquor discharge has been achieved in Paper and Pulp industry and in distillery.

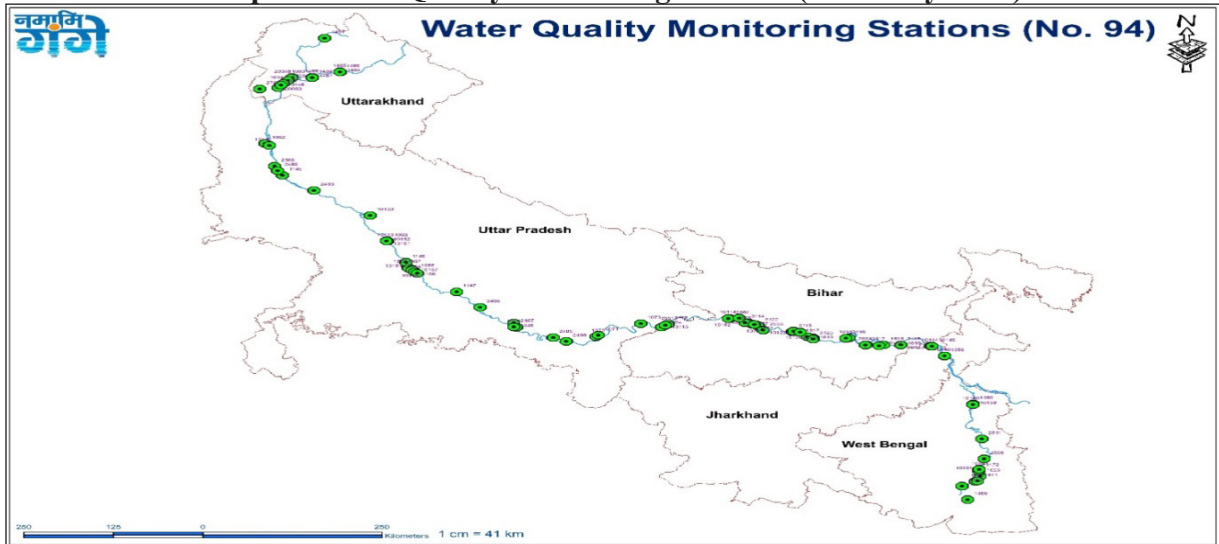

v. Water Quality: 36 Real Time Water Quality Monitoring Stations (RTWQMS) are operational under Namami Gange Programme (Map 1).

Map 1: Real Time Water Quality Monitoring Station (as of May 2019)

Manual water quality monitoring is carried out at 94 locations. Dissolved Oxygen levels being the indicator of the river health improved at 36 locations, Biological

Oxygen Demand (BOD) decreased at 42 locations and coliform bacteria count decreased at 47 locations (2017 vs 2018 data) (Map 2).

Map 2: Water Quality Monitoring Stations (as of May 2019)

The organic pollution load on the river has decreased from 263 kg/MLD in 2011-12 to 65.24 kg/MLD in 2018-19 due to the various constructive steps taken in this direction such as implementation of Charters for water recycling and pollution prevention in the respective sector, adoption of cleaner technologies

and practices and regular inspection of the compliance status. This can be seen in the data on the effluent generation and pollution load from the GPIs on the main stem of river Ganga and its major tributaries before and during the implementation of the Namami Gange Programme as given in Table 2.

Table 2: Data on the effluent generation and the pollution load before and during the implementation of the Namami Gange Programme

Sectors	No. of units			Effluent generation (MLD)			Organic Pollution Load (TPD)		
	2011-12	2016-17	2018-19	2011-12	2016-17	2018-19	2011-12	2016-17	2018-19
Pulp & Paper	67	90	85	201	173.5	87.88	76.5	8.9	5.78
Distillery	35	48	50	37	9.6	3.59	22.2	2.9	0.06

							(263 kg/MLD)	(100 kg/MLD)	(65.24 kg/MLD)

Source: Central Pollution Control Board

vi. River as Public Space: 143 ghats have been taken up under the Mission out of which 100 have been completed. Under the Mission, 54 crematories have also been taken up for ensuring safe crematory rituals. Supporting the sanitation initiative during Kumbh 2019, NMCG sanctioned financial assistance of ₹116.6 crore for the construction of 27,500 toilets, 20,000 urinals and 16,000 dustbins and lining bags. Innovative campaigns of ‘Paint My City’ and other exhibitions to connect people with the city and the river were also organized.

vii. Rural Sanitation: Under Namami Gange, 4,465 villages on the Ganga stem have been declared ODF with completion of construction of about 11 lakh independent toilets. Support is also being extended to 1,662 Gram Panchayats along Ganga for solid and liquid waste management.

viii. Ecosystem Conservation: Afforestation along banks of Ganga has been taken up scientifically with the help of Forest Research Institute, Dehradun. Local communities have been involved in massive afforestation drive undertaken in the five Ganga States with total plantation of 96,46,607 leading to increase in forested area of 8,631 hectares.

ix. Urban River Management: NMCG, in partnership with National Institute of Urban Affairs (NIUA), is preparing an Urban River Management Plan to protect and enhance the status of river health within the city, to prevent their deterioration and to ensure sustainable use of water resources. A comprehensive survey for generating high-resolution Light Detection and Ranging (LIDAR) maps of the entire Ganga stretch to create a baseline of its spatial status has also been initiated.

x. Water Use Efficiency: A market for reuse of treated wastewater is being developed and the re-use of 20 MLD of treated wastewater in Mathura Refinery is a

milestone in propagating this waste-to-wealth approach as well as saving the water-stressed Yamuna river.

xi. Clean Ganga Fund: Clean Ganga Fund has been set up for encouraging and facilitating corporates and individuals to join the efforts of rejuvenation of Ganga by contributing to this Fund and sponsoring certain projects. A total of ₹371 crore has been received in the Clean Ganga Fund as of April 2019 of which, ₹101.59 crore has been received in 2018-19.

RESOURCE EFFICIENCY

5.11 Resource Efficiency (RE) has emerged as one of the key strategies towards the 2030 Agenda of achieving the SDGs. SDG 12 aims to ‘Ensure Sustainable Consumption and Production Patterns’ along with the eight other SDG goals (2, 6, 7, 8, 9, 11, 14 and 15) have a bearing on resource efficiency. Sustainable consumption and production is also a priority for the Government of India and is reflected in various policies/programme announcements like Make in India, Zero Effect-Zero Defect Scheme, Smart Cities, Swachh Bharat, and Ganga Rejuvenation Mission. A resource efficient development approach essentially means a transition of the management of natural resources with a progressive minimization of waste in both consumption and production processes through various policies and measures.

5.12 Economic growth and urbanization in India have spurred the demand for natural resources. This growing demand has resulted in high imports, in particular, imports of fossil fuels and metals. Against this background, the availability and accessibility of primary raw materials have become major concerns. Integrated, concerted and collaborative policy of resource efficiency could be a suitable response strategy to address resource security and the growing demand with the limited

supply of the materials and at the same time ensures environmental sustainability.

5.13 The International Resource Panel estimated that efficient resource policies in G7 countries could reduce the global use of natural resource by 28 per cent, diminish greenhouse gas (GHG) emissions by an additional 15 to 20 per cent and deliver annual economic benefits of US\$2 trillion globally by 2050 relative to existing trends (UNEP, 2018). Around the world, several countries have introduced various policies specific to the different stages of material life cycle. Iceland and United Kingdom have focused on reducing the use of primary raw materials and impact of material extraction respectively in the stage of 'Extraction of Raw Materials'. France has introduced the strategy of integrating the environmental aspects into designing of the products whereas Ireland has tried to extend the lifespan of the products. Both the strategies were introduced with respect to the stage of designing. Waste prevention and recycling are the most common strategies adopted worldwide. For instance, Croatia has stressed on collection of metal and bio-waste to improve recycling rates and Poland has initiated the Transform waste into resources (UNEP, 2018).

Current and Future Projections for India

5.14 In 2010, India accounted for 7.2 per cent consumption of globally extracted raw materials. India's average share of material cost in the total production cost was estimated to be more than 70 per cent and rate of recycling is very low as compared to other developed economies which signifies an urgent need for improving productivity and efficiency (TERI, 2019). The consumption of key natural resources by the major countries in the year 2010 has been showcased in Figure 6. As per the NITI Aayog's Strategy Paper on Resource Efficiency 2017, India consumed 5 billion tonnes of biomass, fossil fuels, minerals and metals in 2010 and was the third largest consumer after China (21.5 billion tonnes) and USA (6.1 billion tonnes). It is projected that India's demand for total material will more than double by 2030 under the assumption of continued economic growth of 8 per cent till 2030 and possible slowing down to 5 per cent thereafter till 2050 and medium growth in population. India would be requiring around 6.5 billion tonnes of minerals in order to sustain the demand of growing population (Figure 7).

Figure 6: Consumption of key natural resources (in billion tonnes in 2010)

Figure 7: Projections for the consumption of key natural resources in India (in billion tonnes)

Source: TERI, 2019

Assessment of Priority Sectors for enhancing Resource Efficiency in India

5.15 For the formulation of effective RE strategy for the country, a detailed assessment for each of the sector contributing to the national income, its consumption of the raw materials as key inputs and its import dependence, volume of wastes/scrap generated and recycled and availability of relevant technologies must be undertaken. Various studies have analyzed the economic impact of effective RE strategy and identified that ₹6000 crore can be saved in the manufacturing sector with its implementation (IGEP, 2013). Estimates suggest that US\$1 billion worth of gold can be extracted with mining of urban e-waste. Effective waste management policies can generate 14 lakh jobs and nearly US\$2.7 billion opportunity can be created from the extraction of eight million tonnes of steel from the end of life vehicles (TERI, 2019). Table 3 highlights the contribution to the national income of different sectors in the economy, their consumption base of raw materials and import dependency.

5.16 Indian auto industry is fourth largest in the world (TERI, 2019) and India's transport sector is being dominated by internal

combustion engine (ICE) based vehicles. Studies estimate that Indian auto industry will consume around 70-80 million tonnes of iron and steel by 2030 which is around 70-80 per cent of the total steel production capacity in India. As India has a fragmented process of scrap collection, nearly 6-7 million tonnes per annum of steel scrap are being imported. Research suggest around 2,18,95,439 vehicles will reach End of Life by 2025 which would generate more than 10 million tonnes of steel scrap (TERI, 2019).

5.17 India consumed nearly 14.5 million tonnes of plastic in 2016 (TERI, 2019). Due to flexibility, low price and high durability, plastic polymers are widely used in the country. Collection and recycling of plastics is majorly being performed by unorganized sector (nearly 4,000 recycling units) and organized sector (around 3,500 recycling units) (FICCI, 2017).

5.18 Increased usage of Electronics in the recent times has given impetus to their demand. Estimates reveal that the demand of electronic products will reach US\$400 billion in 2020 and Compound Annual Growth Rate (CAGR) of 41 per cent from 2016 to 2020 from the CAGR of 9.6 per cent in 2010-2016 periods with the production facility to increase at the CAGR of 16 per cent from

2012 to 2020. Global E-waste Monitor, 2017 estimated that India was the fifth largest producer of e-waste by generating nearly 2 million metric tons of e-waste in 2016 and can earn the value of raw materials to the tune of 55 billion Euros if e-waste was properly mined. A great potential exists for RE in this sector by utilizing recycling opportunities that exist. It is estimated that the steel production in India will reach 128.6 Million Tonnes (MT) by 2021 and its consumption will increase to 140 MT by 2023. Thus, there is a

need to augment the steel production capacity to 300 Million Tonnes Per Annum (MTPA) from 125 MTPA by 2030-31 which will require ₹10 lakh crore of investment. It is estimated that 1.4 tonnes of iron ore, 0.6-0.7 tonnes of coking coal and around 0.2-0.3 tonnes of fluxes can be saved from recycling of one tonnes of steel scrap and thus indirectly will reduce the production which saves around 16-17 per cent of energy (TERI, 2019).

Table 3: Contribution of selected sectors to the national income, consumption base of raw materials and import dependency

Sl. No	Economic Sectors	Share in national income (in %)	Selected raw materials	Import dependency (in %)
1.	Automobile sector (incl. electric vehicles)	7.1	ICE: Steel, Copper, Aluminium, Zinc, nickel, lead, glass, rubber, various plastics/synthetics E-vehicles: Lithium, Cobalt, Nickel, Rare Earths, various plastics/synthetics, Steel, Copper, Aluminium	Copper (50-60) Lithium (100) Co (100) Aluminium scrap (90) Steel scrap (20-25) Lead (75) Rare Earths (100)
2.	Chemicals (plastics)	2 (0.5 - 0.8)	Crude oil	Oil (80)
3.	Construction & Demolition	9	Cement, Limestone, clay bricks, steel, aluminium, Copper	Aluminium scraps (90) Steel scrap (20-25), Copper (50-60)
4.	Electronics (including E-waste)	1.8	Gold, Silver, Rare Earths, Plastics, Platinum, Copper	Silver (75), Rare Earths (100), Gold (90), Platinum (95), Copper (50-60)
5.	Steel	2	Iron ore, Molybdenum, Nickel, Tugsten	Steel scrap (20-25), Molybdenum (100), Nickel (100), Tugsten (100)
6	Aluminium	0.8	Bauxite, Aluminium Scrap	Aluminium scraps (90)
7	Solar PV	2.1	Aluminium, Silver, Copper, Silicon	Aluminium scraps (90), Silver (75), and Copper (50-60)

Source: TERI, 2019

Note: Numbers in parenthesis indicates share of plastics in chemicals.

5.19 NITI Aayog's Status Paper "Circular Economy (CE) and Resource Efficiency (RE)- Current Status and Way Forward" (January, 2019) has reviewed the status, concerns and opportunities of four focus sectors/areas- steel, aluminium, e-waste and construction & demolition (C&D) waste in fulfilling the goals of RE. The paper suggests a way forward to achieve RE with sustainability of the growth process. While there are already provisions made to promote RE in some of the national policies (national mineral policy, national steel policy, national housing and

habitat policy, etc.), in many cases these policy elements are implicit and may need to be explicitly stated. The Paper argues in favour of a harmonized overarching national policy on RE, building upon the existing policies to address multiple sectors. Specific recommendations have been made by NITI Aayog for mainstreaming RE approach in the development pathway for achieving SDGs and also steering a new paradigm of economic development by generating wealth from waste and for promoting recycling industry (Box 1).

Box 1: Six Pillars for a Resource Efficiency Framework in India

Policies

- i. Formulate a national policy on RE for all types of resources (biotic, abiotic) addressing various lifecycle stages and key stakeholders
- ii. Formulate a national policy on Sustainable Public Procurement (SPP) to minimize consumption of resources, reduce waste generation and GHG emissions, as well as contribute to innovation in materials and technology in the space of RE.
- iii. Strengthen existing sectoral policies and programmes of Ministry of Mines by incorporating RE principles.
- iv. Formulate a national policy for End-of-Life Vehicles (ELVs).
- v. Formulate a Waste to Resource Management Directive based on existing waste and hazardous substance management rules/regulations following a lifecycle approach targeting relevant stakeholders and focusing on RE.

Programmes and Mainstreaming

- i. Mainstream RE initiatives by leveraging existing flagship programmes and schemes like Swachh Bharat Abhiyan, Smart Cities, Make in India, Start-up India, Digital India and others.
- ii. Industry may leverage Corporate Social Responsibility (CSR), Corporate Environmental Responsibility (CER) and Extended Producer Responsibility (EPR) for RE initiatives.
- iii. Build on the National Chemical Management Plan being drafted by Ministry of Environment, Forest and Climate Change (MoEF&CC) to develop a strategy, framework and guidelines for the safe and circular management of chemicals.
- iv. Leverage the national clean energy and environment fund to finance infrastructure, clean technologies and related RE initiatives.

Regulations

- i. Establish a national coordinating body- Bureau of Resource Efficiency (BRE) between various ministries to identify, implement and achieve national RE goals.
- ii. Establish State Level coordinating bodies to identify, implement and achieve State level RE goals.

- iii. Large and resource intensive industries and bulk waste generators may be mandated to file the Resource Use and Efficiency Statement.
- iv. Establish and mandate a 'Consent to Close' requirement for medium and large industries in the 'RED' category to ensure that waste streams are responsibly managed and recycled before closure.
- v. Rationalise tax regime on critical virgin raw materials to make secondary raw materials price competitive.

Setting up a Dynamic Recycling Industry

- i. Promote the establishment of Material Recovery Facilities (MRFs) with the allocation of land in urban areas and industrial estates.
- ii. Facilitate Urban Local Bodies (ULBs) to undertake urban mining and create secure landfills.
- iii. Facilitate the establishment of Producer Responsibility Organizations (PRO) for waste recycling and for engagement with the informal sector.
- iv. Facilitate innovation to enhance resource recovery and improve working conditions by integrating the informal sector into the waste value chain.
- v. Establish a remanufacturing council or association to catalyse the growth of the remanufacturing industry.
- vi. Establish and manage platforms for waste exchange by expanding the SBM portal.

R&D and Technology Development

- i. Support R&D to develop scalable technologies for RE.
- ii. Create and manage knowledge platforms that facilitate open innovation, provide access to experts, and engage academia to support the transition towards RE.
- iii. Leverage technologies like Artificial Intelligence (AI), robotics, block-chain etc. for the recycling industry.

Capacity Development, Outreach & Monitoring

- i. Facilitate creation of accredited laboratories that could conduct testing (especially for recycled products) as well as provide advisory services.
- ii. Provide capacity development support on RE for ministries/departments at the National and State levels.
- iii. Develop and promote programmes and certifications for informal sector skill development in RE.
- iv. Develop and launch citizen awareness programmes on RE.
- v. Foster inter-governmental collaboration and knowledge exchange with the G20, RE dialogue and other bodies like International Resource Panel and other national and international forums.
- vi. Develop monitoring and outcome indicators for tracking progress on RE.
- vii. Establish and mandate the certification for operators managing waste-to-resource recycling centres to ensure safe, efficient, and net positive operations.

AIR POLLUTION

5.20 Air pollution is one of the biggest global environmental challenges of today. Air pollution is a serious issue in India also. Government is executing National Air Quality Monitoring Programme (NAMP) covering 312 cities/towns in 29 states and 6 Union Territories of the country. Under NAMP, four major air pollutants viz. Sulphur Dioxide (SO₂), Oxides of Nitrogen as NO₂, Suspended Particulate Matter (PM₁₀) and

Figure 8: SO₂ Concentrations in Major Cities

Source: MoEF&CC

Figure 10: PM₁₀ Concentrations in Major Cities

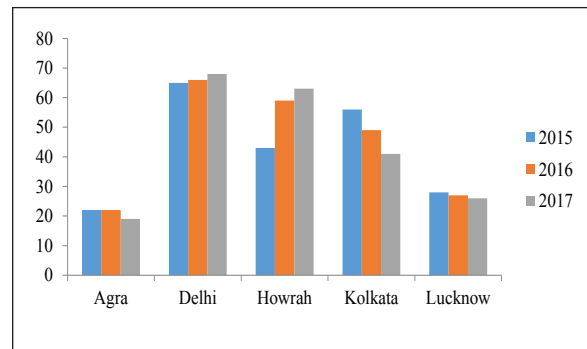

Source: MoEF&CC

Major Government Initiatives

5.21 To tackle the increasing air pollution problem across the country in a comprehensive manner, a number of initiatives have been launched. National Ambient Air Quality Standards (NAAQS) are the standards for ambient air quality with reference to various

Fine Particulate Matter (PM_{2.5}) have been identified for regular monitoring at all the locations. The smaller PM_{2.5} is particularly deadly as it can penetrate deeper into the lungs. For PM_{2.5}, as per the available statistics in year 2017, few cities have been selected to show the concentration of various pollutants from 2015-17. Figure 8, 9, 10, and 11 shows the concentration of SO₂, NO₂, PM₁₀ and PM_{2.5} for the selected cities from 2015 to 2017.

Figure 9: NO₂ Concentrations in Major Cities

Source: MoEF&CC

Figure 11: PM_{2.5} Concentrations in Major Cities

Source: MoEF&CC

identified pollutant notified by the CPCB under the Air (Prevention and Control of Pollution) Act, 1981. Major objectives of NAAQS are (i) to indicate necessary air quality levels and appropriate margins required to ensure the protection of vegetation, health and property (ii) to provide a uniform yardstick for

assessment of air quality at the national level.

5.22 Air Quality Index (AQI) is a tool for effective communication of air quality status to people in terms, which are easy to understand. It transforms complex air quality data of various pollutants into a single number (index value), nomenclature and colour. There are six AQI categories, namely - Good, Satisfactory, Moderately Polluted, Poor, Very Poor and Severe.

5.23 CPCB has issued a comprehensive set of directions under section 18 (1) (b) of Air (Prevention and Control of Pollution) Act, 1986 for implementation of forty-two measures to mitigate air pollution in major cities including Delhi and National Capital Region (NCR) comprising of action points to counter air pollution which include control and mitigation measures related to vehicular emissions, re-suspension of road dust and other fugitive emissions, bio-mass/municipal solid waste burning, industrial pollution, construction and demolition activities and other general steps.

5.24 The Government has notified a Graded Response Action Plan for Delhi and NCR, which comprises of the graded measures for each source framed according to the AQI categories. It also takes note of the broad health advisory for each level of AQI that was adopted by the Government of India along with the AQI. The proposal has been framed keeping in view the key pollution sources in Delhi and NCR.

5.25 In order to address the increasing air pollution across the country in a comprehensive manner, MoEF&CC has launched NCAP in 2019 as a pan India time bound national level strategy. A budgetary allocation of ₹150 crore has been made under NCAP during the financial year 2019-20. Overall objective of the NCAP is comprehensive management plan for prevention, control and abatement of air

pollution besides augmenting the air quality monitoring network across the country. The tentative national level target of 20-30 per cent reduction of PM_{2.5} and PM₁₀ concentration by 2024 is proposed under the NCAP with 2017 as the base year for comparison of concentration. This will be mid-term five (5) years action plan beginning from 2019.

CLIMATE CHANGE

5.26 Since the adoption of United Nations Framework Convention on Climate Change (UNFCCC) in 1992, the global community has strengthened the response mechanisms to the threat of climate change through various milestones. The journey since then witnessed the adoption of various related instruments to address climate change including the adoption of Kyoto Protocol in 1997 and the latest most ambitious one being the Paris Agreement. The ultimate objective of UNFCCC is to stabilize GHG concentration in the atmosphere at a level that will prevent dangerous human interference with the climate system, in a time frame which allows ecosystems to adapt naturally and enables sustainable development. The main aim of the Paris Agreement is to hold the increase in the global average temperature well below 2°C above pre-industrial levels and pursuing efforts to limit the temperature increase even further to 1.5°C above pre-industrial levels. The Paris Agreement sets a roadmap for all nations in the world to take actions against climate change in the post-2020 period.

5.27 Human anthropogenic activities have raised the global average temperature. As per the recent Intergovernmental Panel on Climate Change (IPCC) Special Report on Global warming of 1.5°C, human-induced warming reached approximately 1°C (likely between 0.8°C and 1.2°C) above pre-industrial levels in 2017, increasing at 0.2°C (likely between 0.1°C and 0.3°C)

per decade (high confidence). The report has warned of a warmer planet and has raised the demand for unprecedented efforts to reduce GHG emissions. In line with the global trends, during the year 2018, annual mean surface air temperature of India was +0.41°C, significantly above normal. The year 2018 was the sixth warmest year on record since the nation-wide records commenced in 1901.

India's Climate Actions

5.28 India has continuously demonstrated its responsibility towards acknowledging the emerging threats from climate change and implementing the climate actions on the basis of the principles of Equity and Common but Differentiated Responsibilities for improving efficiency of the economy and its engines of growth. India has been actively promoting clean energy and clean technology as well as continuing the flagship schemes on combating climate change in both adaptation and mitigation fronts. The major policies and plans include National Action Plan on Climate Change (NAPCC), launched in 2008, formulated in the backdrop of India's voluntary commitment to reduce emission intensity of its GDP by 20 to 25 per cent by 2020 over 2005 levels. It was also meant to focus on key adaptation requirements and creation of scientific knowledge and preparedness for dealing with climate change. States/Union Territories have also State Action Plans on Climate Change (SAPCC) in line with the NAPCC taking into account State's specific issues relating to climate change. So far, 33 States/UTs have prepared their SAPCCs. Central sector scheme called Climate Change Action Programme (CCAP) has been launched in 2014 with a total cost of ₹290 crore, with the objective to build and support capacity at central and state levels, strengthening scientific and analytical capacity for climate

change assessment, establishing appropriate institutional framework and implementing climate related actions in the context of sustainable development. The budget outlay of CCAP scheme for the period of three years from 2017-18 to 2019-20 is ₹132.40 crore. A National Adaptation Fund on Climate Change was established in 2015 to meet the cost of adaptation to climate change for the State and Union Territories that are particularly vulnerable to the adverse effects of climate change. The Scheme will continue till 31 March 2020 with a financial implication of ₹364 crore. Till date, 30 adaptation projects have been approved at a total cost of ₹847 crore covering vulnerable sectors such as Water, Agriculture and Animal Husbandry, Forestry Ecosystems and Biodiversity. Out of which, Government of India has released an amount of ₹437 crore. Renewable energy sources are strategic to India's national policies on effective climate action. A detailed analysis on this is elaborated in Economic Survey volume-1, Chapter 9.

5.29 The outcomes of these initiatives are reflected in India's Second Biennial Update Report (BUR) submitted to UNFCCC in December 2018 as per the reporting obligations under the Convention. The report shows that emission intensity of India's GDP came down by 21 per cent between 2005 & 2014 and its achievement of climate goal for pre-2020 period is on track. A total of 2.607 billion tons of CO₂ equivalent of GHGs were emitted from all activities (excluding Land use, Land-Use Change, and Forestry (LULUCF)) in India. Energy sector accounted for 73 per cent, Industrial Processes and Product Use (IPPU) 8 per cent, agriculture 16 per cent and waste sector 3 per cent. About 12 per cent of emissions were offset by the carbon sink action of forestland, cropland and settlements (Table 4).

Table 4: Total and net emissions in CO₂ equivalent (Gg) across various sectors

Category	CO ₂ equivalent (Gg)
Energy	19,09,765.74
Industrial Process and Product Use	2,02,277.69
Agriculture	4,17,217.54
Waste	78,227.15
LULUCF**	-3,01,192.69
TOTAL without LULUCF	26,07,488.12
TOTAL with LULUCF (Net emissions)	23,06,295.43

Source : MoEF&CC

**negative emission value implies sink action i.e. net carbon removal from the atmosphere

Gg- Gigagram

Katowice Climate Package

5.30 Parties to the Paris Agreement made concerted efforts to develop the modalities, procedures and guidelines for implementing the Agreement and the Paris Agreement Work Programme (PAWP) was adopted at the 24th session of the UNFCCC Climate Change Conference, held from 2 to 15 December in 2018 in Katowice, Poland. India engaged positively and constructively in the negotiations while protecting its key interests including recognition of different starting points of developed and developing countries; flexibilities for developing countries and consideration of principles including equity and Common but Differentiated Responsibilities and Respective Capabilities (CBDR–RC). India reiterated its promise to implement the Paris Agreement in its spirit and to act collectively to address climate change. The key takeaways of Katowice package are the guidance on Nationally Determined Contributions (NDCs) that preserves the nationally determined nature of NDCs and provides for Parties to submit different types of contributions including adaptation. The overall guidance reflects the principles of the Paris Agreement and

recognizes the leadership that developed countries have to display for achieving the objectives of the Paris Agreement; the guidance on adaptation recognizes the adaptation needs of developing countries; the differentiation has been operationalized by incorporating provisions on providing support for adaptation activities of developing country Parties; the Enhanced Transparency Framework builds upon the existing guidelines while providing flexibilities for developing countries; the guidance on finance provisions operationalizes the obligation of developed countries in providing means of implementation to developing countries and recognizes the need for climate finance to be new and additional and climate specific. Parties have also agreed to initiate the work on setting up the new collective finance goals post-2020 from the floor of US\$100 billion; the overarching framework for technology recognizes the need for enhanced support towards operationalization of the framework and comprehensively covers all stages of technology development and transfer.

5.31 Provision of financial support to developing countries is an important pillar of climate change response. UNFCCC mandates

that countries in Annex-II (industrialized countries) provide financial resources, including for the transfer of technology, needed by the developing country Parties to take climate actions. Paris Agreement also emphasizes the role of climate finance in strengthening the global response to climate change. Though the international community witnessed various claims by developed countries about climate finance flows, the actual amount of flows is far from these claims. In fact, without sufficient climate finance, the proposed NDCs would

not fructify. Yet there are calls for enhanced climate action by developing countries. However, the means to achieve the climate goals is not commensurate to the urgency shown, nor do we witness the seriousness required in the discourse on climate finance. Global action on climate change is contingent on the delivery of timely and adequate finance. The Scope, Scale and Speed of climate finance required to take climate actions effectively is lacking in the debate on climate actions (Box 2).

Box 2: Three Essential 'S's of Climate Finance

i) Scope

Climate finance should support both the adaptation and mitigation activities of the developing countries in accordance with the country needs and priorities. The Paris Agreement gives equal weightage to adaptation and mitigation. Under the UNFCCC, the intent and obligation of climate finance is unambiguous, that developed country Parties shall provide financial resources to developing countries; but what constitutes of financial resources and its key elements for climate finance itself are very broadly defined. The essential elements that need to be taken up as parameters for accounting climate finance are -public grants, unrequited equity and grant-equivalent values of loans. Also counting only such transfers of finance ex-post that are formalized in entry in a book of accounts as specifically climate finance and actual disbursements of such finance crossing borders in a particular year need to be ensured. Some more important parameters such as how to treat private climate finance flows that are 'mobilized' or 'leveraged', the clarity on "new and additional" also need to be understood in this context.

ii) Scale

Developing countries have myriad developmental challenges and climate change puts additional burden on the already scarce resources. The climate finance requirements of developing countries are likely to be enormous. Even preliminary estimates by simply summing the finance needs in NDCs with a conditional component, comes to around US\$4.4 trillion (Weischer et al., 2016). A recent report by Oxfam, 2018 indicated, "People in poorer countries are on average five times more likely than people in rich countries to be displaced by extreme weather events. Adaptation costs in developing countries are expected to be US\$140 - 300 billion a year by 2025/30. By mid-century, the costs of climate change to developing countries are estimated to exceed US\$1trillion per year, even if global average temperature remains below 2°C."

iii) Speed

To answer the question, whether the speed of climate finance in the multilateral climate regime is sufficient, we need to understand if the developed countries have fulfilled their commitments and the progress of delivery of finance is from developed to developing countries. As of February 2019, the pledge and approval of multilateral climate change funds shows lagged performance.

Figure: Status of the Funds (in US\$ million)

Source : Climate Funds update Feb 2019

Oxfam, 2018 provides an assessment of US\$100 billion goal. What it states is that, the aggregated climate finance, estimated as net climate-specific assistance is far lower than the reported climate finance; new climate-specific assistance may be just US\$16-21 billion. The value of loans is being over-reported. If the finance for development projects that only partially cover climate change were reported more accurately, annual bilateral flows of public climate finance could be between US\$10 billion and US\$15 billion lower than reported. Grant based assistance is too low and is rising too slowly; only an estimated US\$11-13 billion was given as grants per year, forming just 23-27 per cent of the total, public climate finance amounted to 21 per cent of total global official development assistance (ODA) budgets in 2015-16.

The message is loud and clear – we need to establish more credible, accurate and verifiable numbers on the exact size of the climate finance flows from developed to developing countries. Paris Agreement and the NDC implementation will commence post 2020 and International public finance flows from developed to developing countries remain the critical enabler in ramping up these actions.

India's Nationally Determined Contribution (NDC)

5.32 An important feature of Paris Agreement is that it seeks to elicit ambitious action by each country by basing it on a country-driven approach with the contribution by each country to the global fight against climate change determined at national level. Each Party's successive NDC will have to be a progression of Party's previous efforts. India's NDC outlines the post-2020 climate actions India intends to undertake under the Paris Agreement on climate change adopted

in December 2015. India ratified the Paris Agreement on October 2, 2016. At the national level, the roadmap for implementation of India's NDC is being prepared. An overall assessment and quantification of finance requirements for adaptation and mitigation for a country with so much diversity and demand is a difficult task given the rapid pace of changing technologies and innovation. India's NDC states, "Preliminary estimates indicate that India would need around US\$206 billion (at 2014-15 prices) between 2015 and 2030 for implementing adaptation actions in key areas like agriculture, forestry,

fisheries infrastructure, water resources and ecosystems.” Apart from this there will be additional investments needed for strengthening resilience and disaster management. NDC further provides the preliminary total estimates for meeting India’s climate change actions between now and 2030 which is at US\$2.5 trillion (at 2014-15 prices). Finding required financial resources is going to be a daunting challenge for the country.

Developments in the Sustainable Finance Arena

5.33 Implementing 2030 Sustainable Development Agenda and the Paris Agreement requires investments of scale and size which is unprecedented. This essentially means that along with domestic public budgets and international public finance, resources would have to be mobilized from a variety of sources, in particular, private sector. Currently, private sector financing has been mostly done by the banks and resides on their balance sheets. However, in future to increase the scale of sustainable investments there may be funding capacity problems for the banks if they are the primary provider of sustainable debt. Therefore, capital market products are required to free-up the banks’ balance sheet capacity and allow them to underwrite loans to meet the accelerating demands for new sustainable investments. Further, by doing so institutional investors and certain retail investors can get access to sustainable debt as institutional investors are well situated to hold long term sustainable debt and they look to match long term liability funding requirements with long term assets.

5.34 Globally, the green bond market has seen remarkable growth over the past 5 years as increasing number of investors have sought environmentally sustainable investments without having to sacrifice financial returns.

In the first quarter (Q1) of 2019, green bond issuance reached US\$47.9 billion, and surpassed Q1 2018 volume of US\$33.8 billion by 42 per cent, on a clear upward trend. 81 per cent of volume came from developed markets issuers. USA, France and Canada topped the country rankings, accounting for 48 per cent of Q1 2019 global issuance.

5.35 In markets in which regulators have provided a favorable environment for green bonds, supply has increased. green bonds makes way for investors to create environmentally aware portfolios without having to compromise on risk and return objectives that may fit nicely into a core bond allocation. Over the past few years regulators, stock exchanges and market associations have stepped in to provide some guidance to market participants for the green debt issuance process. In India, SEBI has provided a regulatory environment for issuance of green bonds in May 2017, the fruits of which are reflected in the cumulative issuance of green bonds in India. India stands at 11th position in global country ranking and accounts for 33 per cent of the Certified Climate bonds by number in emerging markets. Going forward, possible capital market structures for sustainable finance may include Real Estate Investment Trusts (REITs) and Infrastructure Investment Trusts (InvITs) which can be leveraged for transfer of green and sustainable assets such as energy efficient buildings, renewable power projects, mass transportation systems, etc. to the institutional investors. Another option is that banks and financial institutions may securitize the future cash flows emanating from their existing set of assets, thereby selling such securitized debt instruments to the investors including institutional investors. This provides investors with an opportunity to invest in regular yielding investment which is backed by sustainable assets.

INTERNATIONAL SOLAR ALLIANCE (ISA)

5.36 ISA is the first treaty-based International Intergovernmental Organization launched by India and France on 30 November, 2015 in Paris and entered into force on 6 December, 2017. As on June 2019, 75 countries have signed and out of which, 52 countries have ratified the ISA Framework Agreement. The first Assembly of the ISA was convened on October 3, 2018. ISA's motto is, "let us together make the sun brighter". ISA has launched five programmes so far: 1) Scaling Solar Applications for Agriculture Use; 2) Affordable Finance at Scale; 3) Scaling Solar Mini Grids; 4) Scaling Solar Rooftop, and 5) Scaling Solar in E-mobility and Storage.

Key Initiatives

- ISA has been working with various financial institutions for scaling up financing, lowering the cost of capital, and designing innovative financial instruments to accelerate the massive deployment of solar energy. ISA's engagement with Indian Diplomatic Missions in member countries, financing by the Export Import Bank of India, among others, resulted in development of a portfolio of 27 solar projects in 15 countries. These projects are being supported with India's concessional financing of US\$ 1.4 billion.
- In addition, "Action to Transaction" meets, an innovative platform where project developers and bankers were brought together, facilitated 238 projects in ISA countries. France has also committed 1.5 billion Euros for financing solar projects and thereby, 27 projects have been funded by the French Development Financing Agency for approximately 720 million Euros.
- A task force was constituted to design a

Common Risk Mitigation Mechanism to reduce risks and financial cost of solar projects. Also, the World Bank and Agence Française de Développement (AFD) are developing a joint Global Solar Risk Mitigation Initiative (SRMI), an integrated approach to tackle policy, technical and financial issues. As a first implementation phase of the SRMI, the World Bank has launched in April 2019, US\$337 million risk mitigation fund for 23 West African countries focusing on Regional Off-grid Electrification Project (ROGEP).

- The ISA is also working with the European Investment Bank and the EU Commission to launch an off-grid fund, initially for four Asian member countries of the ISA, to rapidly scale up to Africa and Latin America.
- A project pipeline of US\$5 billion in mini-grids and rooftops is created.
- ISA has forged financial partnerships with various MDBs, UN agencies, Climate Parliament, European Commission, Commonwealth Secretariat and other International and Intergovernmental organizations.
- ISA Solar Award has been instituted for Solar Scientists doing extraordinary work across ISA countries with a one-time corpus contribution of US\$1.5 million from the Government of Haryana.

5.37 Efforts for mobilizing financial resources for ISA activities resulted in augmenting initial corpus of US\$16 million (Government of India contribution) to US\$27 million, wherein US\$3 million came from Japanese and Chinese companies. True to its motto, ISA from scratch has now transformed into an action oriented international organization, scaling newer heights under the collective leadership and supervision of the member countries.

WAY FORWARD

5.38 India has been progressing rapidly towards achieving the SDGs. India's progress in achieving SDG 10 (Reduced Inequality) and SDG 15 (Life on Land) has been impressive. However, there has been a wide variation in the way different states have performed. It is important that in the race towards SDGs no State is left behind. At the global level, given the myriad developmental challenges faced by the developing economies, lack of adequate resources is a major challenge in achieving the SDGs and international cooperation is essential in achieving these goals.

5.39 Efficient utilization of resources also plays an important role. With increasing demand for resources to cater to the different developmental needs, policies need to

nudge economic agents towards achieving the maximum output from the available resources. India's policies have already taken the correct initiatives in this direction.

5.41 India's NDC has set clear targets for achieving its climate goals. However, a substantial scaling up of financial resources and technology are needed to implement this target by 2030. The fulfillment of pledges by developed countries through provision of 'new and additional' financial resources is an important contingent factor. The developing countries like India will endeavor to do the best possible within their own domestic resources, keeping in mind the sustainable development imperatives. It is time for the global community to exhibit the requisite momentum to act upon their responsibilities on establishing the enabling environment for climate action.

CHAPTER AT A GLANCE

- India follows a holistic approach towards its 2030 SDG targets by launching various schemes.
- India's SDG Index Score ranges between 42 and 69 for States and between 57 and 68 for UTs.
- Kerala and Himachal Pradesh are the front runners amongst all the states with a score of 69, Chandigarh and Puducherry are the front runners with a score of 68 and 65 respectively among the UT's.
- Namami Gange Mission- a key policy priority towards achieving the SDG 6 - was launched as a priority programme with a budget outlay of ₹20,000 crore for the period 2015-2020.
- A harmonized overarching national policy on Resource Efficiency, building upon the existing policies to address multiple sectors should be devised for mainstreaming Resource Efficiency approach in the development pathway for achieving SDGs.
- In order to address the increasing air pollution across the country in a comprehensive manner, the Government of India has launched NCAP in 2019 as a pan India time bound national level strategy for prevention, control and abatement of air pollution besides augmenting the air quality monitoring network across the country.
- India has continuously demonstrated its responsibility towards acknowledging the emerging threats from climate change and implementing climate actions, on the basis of the principles of Equity and Common but Differentiated Responsibilities.

- India's positive engagement at CoP 24 negotiations in Katowice, Poland in 2018 resulted in protection of key interests including recognition of different starting points for developed and developing countries; flexibilities for developing countries and consideration of principles including equity and Common but Differentiated Responsibilities and Respective Capabilities.
- Paris Agreement also emphasizes the role of climate finance in strengthening the global response to climate change. Though the international community witnessed various claims by developed countries about climate finance flows, the actual amount of flows is far from these claims. In fact, without sufficient climate finance, the proposed NDCs would not fructify.
- Implementing India's NDC requires investments of scale and size which is unprecedented. This essentially means that along with domestic public budgets, international public finance and private sector resources would have to be mobilized from a variety of sources.

External Sector

India's macroeconomic situation on the external side continues to be stable. Though the current account deficit is projected at 2.4 per cent of GDP in 2018-19, up from 1.8 per cent in 2017-18, this is within reasonable levels. The widening of the current account deficit has been driven by a deterioration of trade deficit from 6.0 per cent of GDP to 6.7 per cent across the two years. Rise in crude prices in Q4 of 2018-19 and a decline in the growth of merchandise exports have led to the deterioration of trade deficit. The acceleration in the growth of remittances has offset the deterioration of the current account deficit. In funding the current account deficit, the total liabilities-to-GDP ratio, inclusive of both debt and non-debt components, has declined from 43 per cent in 2015 to about 38 per cent at end of 2018. The share of foreign direct investment has risen and that of net portfolio investment has fallen in total liabilities, thereby reflecting a transition to more stable sources of funding the current account deficit. In sum, although the current account deficit to GDP ratio has started to increase lately, the external indebtedness continues to be on a declining path. India's foreign exchange reserves continue to be comfortably placed in excess of US\$400 billion. The Indian Rupee traded in the range of 65-68 per US\$ in 2017-18 but depreciated to a range of 70-74 in 2018-19. The Real Effective Exchange Rate also depreciated in 2018-19, making India's exports potentially more competitive. The income terms of trade, a metric that measures the purchasing power to import, has been on a rising trend, possibly because the growth of crude prices has still not exceeded the growth of India's export prices. The exchange rate in 2018-19 has been more volatile than in the previous year, mainly due to volatility in crude prices, but not much due to net portfolio flows. The composition of India's exports and import basket has almost remained unchanged in 2018-19 over 2017-18. Petroleum products, precious stones, drug formulations, gold and other precious metals continue to be top export items. Crude petroleum, pearl, precious, semi-precious stones and gold remain as top import items. India's main trading partners continue to be the US, China, Hong Kong, the UAE and Saudi Arabia.

GLOBAL ECONOMIC ENVIRONMENT

Increasing Trade Protectionism and Slowing down of Global Output

6.1 2018-19 has closed with growth in world output on a downward trajectory. The World Economic Outlook (WEO) in its April 2019 issue has projected growth in world output at 3.3 per cent in 2019, down from 3.6 per cent obtained in 2018. Heightened US-China trade tensions has been stated as one of

the reasons behind the global slowdown that has spilled into other economies including India through the channel of exports. Beginning 2019 global slowdown has made advanced countries persist with their accommodative monetary policy stance. This has escalated portfolio investment into emerging market economies making their currencies stronger and imports cheaper.

6.2 The WEO further states that growing trade protectionism in the world, of which US-China trade tensions is the most recent

manifestation, places at risk the low relative price of machinery and equipment that over the years has declined, partly due to increasing trade integration, and supported the rise in real investment rate in developing countries. The WEO also clarifies that trade-protectionism will only divert bi-lateral trade imbalances from one country to another as the root cause of trade deficits is the macroeconomic imbalance.

6.3 The WEO accordingly advises that at the multi-lateral level, the main priority is for countries to resolve trade disagreements cooperatively, without raising distortionary barriers that would further destabilize a slowing global economy. It seems countries are well advised to do so as beginning 2019, crude oil prices have begun to harden following production cuts by oil exporting countries with the US also cutting out oil supplies from Iran, while prices of other commodities have also risen due to supply distortions. These developments increase the vulnerability of external sector of emerging market economies like India, which are dependent on crude imports for fueling their economic growth.

6.4 In its April 2019 Press Release, WTO has also stated that world trade growth in 2018 at 3 per cent has been much below the growth

rate of 4.6 per cent in 2017 following the introduction of new and retaliatory measures around the world that by affecting widely-traded goods has caused weaker global economic growth and volatility in financial markets. The release has further stated that apart from trade tensions, trade and output were also influenced by temporary shocks, including the federal government shutdown in the United States and production problems in the automotive sector in Germany toward the end of the year. World commercial services on the other hand recorded a strong growth of 7.7 per cent in 2018 but was still lower than 8.4 per cent in 2017. However, goods related services growth shot up to 10.6 per cent in 2018, up from 8.3 per cent in the previous year.

6.5 Along with the slowing down of world trade seen in 2018 there has been a spatial shift in the nature of BoP balances as well in the last few years. Figure 1 shows that advanced economies had a current account deficit of US\$28.1 billion in 2011, which has been reducing consistently since then and turned into current account surplus of US\$444.7 billion in 2017. Emerging and developing economies on the other hand slipped from their current account surplus position of US\$379.0 billion in 2011 to US\$0.1

Figure 1: International Comparison of Current Account Balance

Source: International Monetary Fund (IMF)- Information is available till 2017 only.

billion in 2017. This reflects the shifting of the consumption hub of the world from the advanced to the less advanced countries.

6.6 It is in this context of global slowdown of output and trade, increase in trade protectionism across the world and shifting of the consumption hub to the emerging and developing economies that the developments on India's trade and BoP fronts have been discussed.

INDIA'S BALANCE OF PAYMENTS DEVELOPMENTS

Overview of Balance of Payments

Current Account Developments

6.7 India's balance of payment situation showed some signs of stress during H1 of 2018-19 as sharp rise in crude oil prices caused current account deficit (CAD) to deteriorate. However, CAD moderated somewhat in Q3-2018-19 as international crude oil prices eased. Until end of Q3 for which data is

available (April-December 2018-19), India's CAD stood at US\$51.9 billion (2.6 per cent of GDP) as compared to US\$35.7 billion (1.8 per cent of GDP) a year ago for the same period. The widening of the CAD was largely on account of a higher trade deficit driven by rise in international crude oil prices (Indian basket) making merchandise imports grow relatively faster than exports. The trade deficit increased to US\$145.3 billion during the same period from US\$118.4 billion in the corresponding period of previous year.

6.8 India's CAD has been increasing for some years now after attaining a high of 0.6 per cent of GDP in 2016-17. It increased to 1.8 per cent of GDP in 2017-18 and has been projected at 2.4 per cent for the full year of 2018-19. Expectedly the increase in CAD is driven by increasing merchandise trade deficit, which as proportion of GDP, increased from 4.9 per cent in 2016-17 to 6.0 per cent in 2017-18 and further enhanced to 6.7 per cent in 2018-19 (Figure 2).

Figure 2: Current Account Deficit and Trade Deficit as per cent of GDP

Source: Based on data of Reserve Bank of India.

Note: F: Forecasted figures have been used for Q4 of 2018-19.

6.9 The trend in merchandise trade deficit reflect the movement of merchandise exports net of merchandize imports. The broad trends in merchandise exports, merchandize

imports and trade balance in the last ten years are indicated in Annexure I. For the recent period, as shown in Figure 3, growth of both merchandize exports and merchandize

imports accelerated from 2016-17 to 2017-18. However, thereafter the annual growth rate of merchandise exports fell from 10 per cent in 2017-18, to 8.8 per cent in 2018-19. Annual growth rate of merchandise imports

also fell from 21.1 per cent in 2017-18 to 10.4 per cent in 2018-19. In Q4 of 2018-19, merchandise imports registered negative growth that has led to slight improvement in the trade and current account deficit.

Figure 3: Growth rate of Merchandise Exports and Imports (Per cent)

Source: Based on data of Department of Commerce.

6.10 Placing the trends of merchandise exports and imports in the global context (Figure 4), it appears that growth of India’s merchandise imports fell on the back of lower

GDP growth in 2018-19 among other factors while slower growth of merchandise exports may have resulted from slower growth of world output and trade.

Figure 4: Impact of global and domestic economy on India’s Exports and Imports

Source: Latest harmonised figures for India’s Exports/ Imports and World Imports from World Trade Organization (WTO). India and World GDP from International Monetary Fund (IMF), 2019.

6.11 The growth in merchandise exports from 5.2 per cent in 2016-17 to 8.8 per cent in 2018-19 mainly resulted from high growth in Petroleum, Oil & Lubricants (POL) exports, which increased from 3.1 per cent in 2016-17 to 24.2 per cent in 2018-19, while non-POL exports grew modestly from 5.4 per cent

to 7.0 per cent during the same period (Figure 5). However, from Q1 of 2018-19, the growth rate of POL exports has been declining continuously and turned negative in Q4. Be that as it may, petroleum products continue to have the largest share in India’s export basket at 14.1 per cent in 2018-19.

Figure 5: Growth in POL and Non-POL Exports (Per cent)

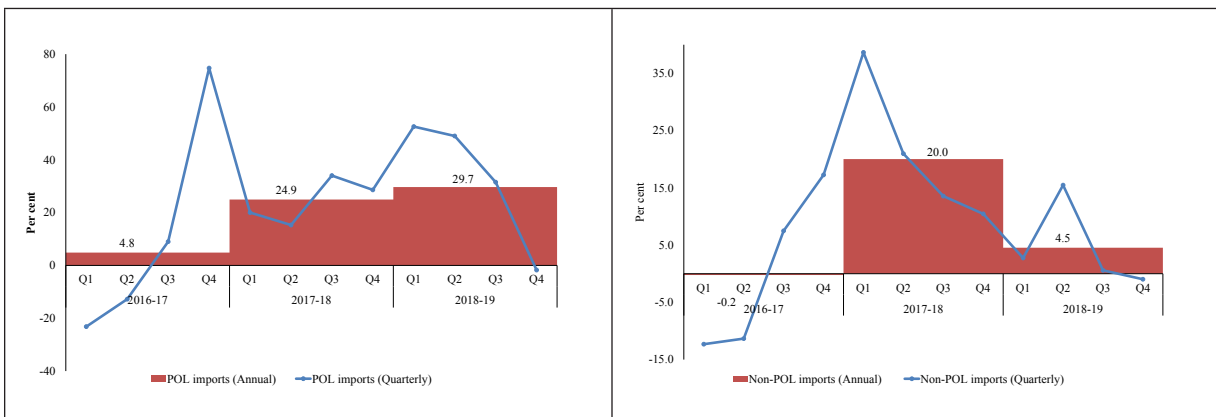

Source: Based on data of Department of Commerce.

6.12 The growth in merchandise imports from 0.9 per cent in 2016-17 to 10.4 per cent in 2018-19 can also be attributed to a sharp rise in growth rate of POL imports from 4.8 per cent in 2016-17 to 29.7 per cent in 2018-19. The non-POL imports also increased from -0.2 per cent in 2016-17 to 4.5 per cent in 2018-19 (Figure 6), possibly depicting a downturn in the economy. This appears to be all the more so as in

Q4 of 2018-19 both POL and Non-POL imports registered negative growth rate. Even then, Crude petroleum continues to be the largest imported commodity in 2018-19 with a share of 22.2 per cent, followed by Gold/Silver; Pearl, Precious, Semi-Precious Stones; and Petroleum Products; having share of 6.4 per cent, 5.3 per cent and 5.2 per cent respectively, in the import basket.

Figure 6: Growth in POL and Non-POL Imports (Per cent)

Source: Based on data of Department of Commerce.

6.13 Figure 7 reveals an interesting narrative of India’s POL trade during 2016-17 to 2018-19. The acceleration in growth of POL imports from 2016-17 to 2018-19 was on account of both price increase in the international market and volume consumed

by India. However, growth of POL exports was only driven by price rise as volume exported by India actually contracted from 2016-17 to 2018-19. This reflects that India is more dependent on POL imports than the world is on India’s POL exports.

Figure 7: Volume of POL Exports and Imports and Crude Oil Price (Indian basket)

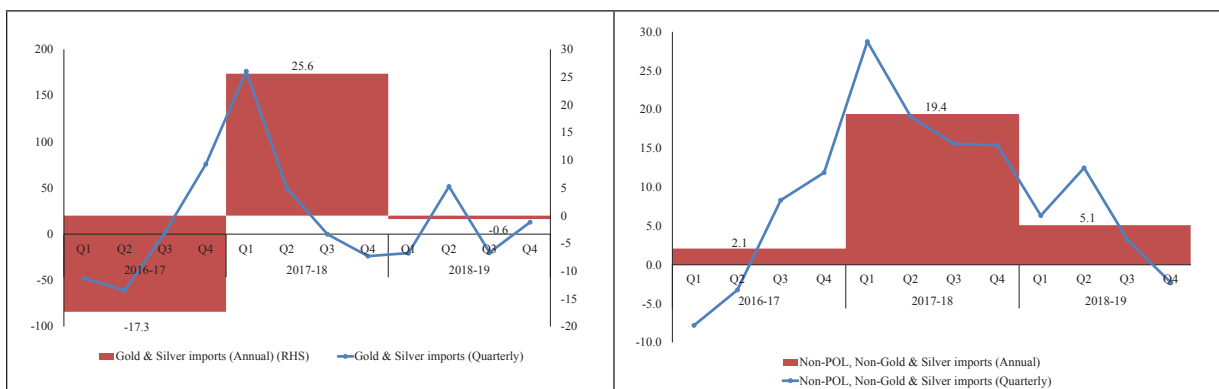

Source: Petroleum Planning and Analysis Cell.

6.14 Within Non-POL imports, sharp movements can be seen with respect to annual growth rates of gold and silver imports, which increased from -17.3 per cent in 2016-17 to 25.6 per cent in 2017-18, and then reduced to -0.6 per cent in 2018-19. Non-POL, Non-Gold and Silver Imports witnessed the same trend with increase in growth rate from 2.1 per cent in 2016-17 to 19.4 per cent in 2017-18, and then a deceleration to 5.1 per cent

in 2018-19, unlike Gold and Silver Imports (Figure 8), whose growth again turned negative in 2018-19, although not to the same extent as in 2016-17. A positive Q4 growth of gold and silver imports did not allow its growth to fall as much for the full year whereas the negative growth rate of Non-POL, Non-Gold & Silver Imports in Q4 significantly pulled down its full year growth rate.

Figure 8: Growth rate in Gold & Silver Imports and Non-POL Non-Gold & Silver Imports (Per cent)

Source: Based on data of Department of Commerce.

6.15 Of three main components of net invisibles, net services followed the same trend as merchandise receipts did from 2016-17 to 2018-19, accelerating initially in 2017-18 before decelerating in 2018-19 (Figure 9). The growth of net transfers however kept on accelerating while there was no growth in net factor income during this period. The contribution of net services to financing merchandise trade

deficit has fallen from 62.2 per cent in 2016-17 to 43.7 per cent in 2018-19, reflecting a muted performance of service exports in recent times. Software services, accounting for about 40 per cent of total services receipts, along with financial services, have been the main drivers in the service exports. The broad trend in India's Services trade in the last ten years is indicated in Annexure I.

Figure 9: Net Services, Net Transfers and Net Income (in US\$ billion)

Source: Based on data of Reserve Bank of India and Ministry's projections.

Note: P: Provisional.

6.16 Net Private transfer receipts, mainly representing remittances by Indians employed overseas, increased by 12.4 per cent in 2018-19 (P) as compared to 11.5 per cent in 2017-18 and 10.6 per cent in 2016-17 (Figure 9). Improved income conditions in the Gulf countries with rise in oil prices, might have led to this rise in remittances

as a significant portion of remittances are sourced from these countries. According to the World Bank (April 2019), India remained a top remittance recipient country in 2018, followed by China, Mexico, Philippines, and Egypt, with remittance inflows peaking at all-time high at US\$78.6 billion (Figure 10).

Figure 10: Top Remittance Receivers in 2018

Source: Latest available figures from World Bank.

Developments in Capital Account of BOP

6.17 During 2018-19, net foreign investment declined to US\$31.3 billion as compared to US\$52.4 billion in the corresponding period of 2017-18. Robust foreign direct investment (FDI) inflows, were more than outweighed

by withdrawals under portfolio investment reflecting an escalation of global risk aversion. As a proportion of GDP, net FDI fell from 1.6 per cent in 2016-17 to 1.1 per cent in 2017-18, before rising to 1.2 per cent in 2018-19 (Figure 11).

Figure 11: Foreign Direct Investment as a per cent of GDP

Source: Based on data of Reserve Bank of India.

6.18 Among other forms of capital flows, banking capital recorded a net inflow of US\$15.5 billion in 2018-19 (April-December), a 34 per cent increase over US\$11.6 billion in the corresponding period of the previous year. Among debt creating capital flows, net external assistance increased by 42.7 per cent to US\$2.2 billion in 2018-19 (April-December) as against US\$1.5 billion in the corresponding period of the previous year. Net External Commercial Borrowings (ECBs) also experienced a net inflow of US\$2.8 billion during 2018-19 (April-December) as against a net outflow of US\$1.2 billion in the corresponding period of the previous year, reflecting in part a possible credit crunch in the country. Net NRI deposit increased to US\$7.0 billion in 2018-19 (April-December) as against US\$5.0 billion in 2017-18 (April-December), while net short-term trade credit recorded a sharp decline during

April-December 2018 as import contraction started to set in. Overall, net capital flows fell short of financing CAD resulting in depletion of foreign exchange reserves by US\$17.5 billion during April-December 2018. The balance of payments table from 2013-14 to 2018-19 (April-December) is at Annexure II.

6.19 Over a longer period a change in the sources of funding the CAD is discernible. In 2009-14 net portfolio investment funded 45.6 per cent of current account deficit but declined to 17.1 per cent in 2014-19. The financing of the current account deficit in 2014-19 thus became less vulnerable to capital flight as compared to the previous period. The reduced dependency on FPIs to fund CAD in recent times is also reflected in the fact that growth of forex reserves in the country bears no correlation with movements in net FPI (Figure 12).

Figure 12: Monthly Movement in Net Foreign Portfolio Investment and Foreign Exchange Reserves

Source: Based on data of Reserve Bank of India.

6.20 India's foreign exchange reserves stood at US\$422.2 billion as on June 14, 2019. The level of foreign exchange reserves can change due to change in reserves on BoP basis as well as valuation changes in the assets held by the Reserve Bank of India. The foreign exchange reserves in nominal terms (including the valuation effects) decreased by US\$29.0 billion during April-December 2018 as against an increase of US\$39.1 billion during the same period of the preceding year. However, on a balance of payments basis (*i.e.*, excluding valuation effects), the foreign exchange reserves decreased by US\$17.5 billion during April-December 2018 as against an increase of US\$30.3 billion during the corresponding period of the same year. The valuation loss, mainly reflecting the appreciation of the US dollar against major currencies, of US\$11.5 billion during April-

December 2018 followed a valuation gain of US\$8.8 billion during the same period of the preceding year. The table depicting summary of changes in Foreign Exchange Reserves (US\$ billion) is given in Annexure-III. The decline in forex reserves reduced the import cover of India's foreign exchange reserves to 9.1 months at end-December 2018, from 10.9 months at end-March 2018. Subsequently however in Q4 of 2018-19, there was a net accretion to the foreign exchange in nominal terms to the tune of US\$17.3 billion partly reflecting the robust foreign portfolio investments.

6.21 Among the major economies running current account deficit, India is the largest foreign exchange reserve holder and eighth largest among all countries of the world (Figure 13).

Figure 13: Countries with highest Current Account Deficit and their Forex Reserves, 2018

Source: Based on International Financial Statistics (IFS), IMF.

External Debt

6.22 India's External Debt was US\$521.1 billion at end-December 2018, 1.6 per cent lower than its level at end-March 2018 (Figure 14). The long-term debt declined by 2.4 per cent to US\$417.3 billion at end-December 2018 over end-March 2018, though its share

was mostly same at 80.1 per cent compared to 80.7 per cent during the same period. This constancy of share has been in evidence since 2014. Short term debt grew by 1.7 per cent in end-December 2018 compared to end-March 2018, primarily due to increase in trade related credits.

Figure 14: India's Outstanding External Debt

Source: Reserve Bank of India and Quarterly Report of India's External Debt ending December 2018 (latest available), Department of Economic Affairs.

Note: P: Provisional.

6.23 Foreign Exchange cover to total external debt deteriorated to 75.5 per cent at end-December 2018 from 80.2 per cent at end-March 2018, with the ratio of short term debt by original maturity to foreign exchange reserves rising to 26.4 per cent in end-December 2018 from 24.1 per cent at end-March 2018 (Figure 15). The ratio of short-term debt by residual maturity to foreign exchange reserves also increased

to 57.3 per cent from 52.3 per cent during the same period (Figure 15). The share of short term debt by residual maturity in total external debt, which is useful in assessing liquidity requirements to service contractual obligations within a year, was 43.5 per cent at end-December 2018 as against 42.0 per cent at end-March 2018 reflecting increase in liquid conditions.

Figure 15: Foreign Exchange Reserves and Debt

Source: Reserve Bank of India and Quarterly Report of India’s External Debt ending December 2018 (latest available), DEA
 Note: P: Provisional. The foreign exchange reserves as on 14 June, 2019 is US\$422.2 billion.

6.24 International comparison of external debt based on World Bank data shows that among the top twenty developing debtor countries in 2017, India’s external debt to Gross National Income (GNI) ratio at 19.8 per cent was fourth lowest, while China continues to have the lowest ratio of 14 per cent (Figure 16). In terms of the foreign exchange reserves cover to external debt, India’s position is fifth highest at 75.9 per cent, whereas India has fifth lowest short-term

debt to foreign exchange reserves at 25.1 per cent among the top twenty developing debtor countries (Figure 16). Again as per the World Bank data, though India is the third largest debtor country (in absolute amounts) among developing countries (after China and Brazil), its average-age of debt is much higher given that its ratio of short-term debt to total debt is only about 19.0 while that of China is 69 per cent. Higher age of debt reduces the roll-over risk.

Figure 16: Cross- Country Comparison of External Debt Indicators in 2017

Source: International Debt Statistics, 2019, World Bank.

6.25 Figure 17 summarizes the key external debt indicators of India reflecting that India's external debt is not unsustainable.

Figure 17: External debt Key Indicators

Source: Reserve Bank of India and Quarterly Report of India's External Debt ending December 2018 (latest available), DEA.

Note: P: Provisional.

6.26 Debt Service ratio indicates the claim that servicing of external debt makes on current receipts and is, therefore, a measure of strain on BoP due to servicing of debt service obligations. Debt Service ratio increased till 2016 and then declined continuously since 2016 from 8.8 per cent to 8.3 per cent in 2017 to 7.5 per cent in 2018 (end-March) (Figure 18). The total external debt to exports ratio, another measure of debt sustainability, increased since 2014 till 2016 and then reduced to 107.1 per cent

in end-March 2017 and 106.2 per cent in end-March 2018 (Figure 18). Further, the ratio of debt service repayments (including principal and interest) to total exports of goods and services also depict the same trend of increase till 2016 and then a decline in 2017 (9.8 per cent) and 2018 (8.9 per cent) (Figure 18). The declining ratios of debt service, total external debt to exports and debt service to exports in 2016-17 and 2017-18 may be seen as favorable for India.

Figure 18: Indicators of Debt Sustainability

Source: Based on data of Reserve Bank of India.

Note: P: Provisional.

Net International Investment Position

6.27 The International Investment Position (IIP) is a statistical statement that shows at a point in time the value of financial assets of residents of an economy that are claims on non-residents or are gold bullion held as reserve assets; and the liabilities of residents of an economy to non-residents (International Monetary Fund (IMF)). The difference between the assets and liabilities is the net position in the IIP and represents either a net claim on or a net liability to the rest of the world. A positive NIIP value indicates a nation is a creditor nation, while a negative value

indicates it is a debtor nation.

6.28 Among the top ten economies having Net IIP deficit in 2018, United States is ranked first with net IIP deficit of US\$9.7 trillion, followed by Spain (US\$1.1 trillion) and Australia (US\$0.7 trillion) (Figure 19). India's net international investment deficit is the eighth highest in 2018, that however has been increasing consistently from US\$323.2 billion in 2013 to US\$438.4 billion in 2018, an increase of 35.6 per cent. In comparison to previous year 2017, India's net IIP deficit increased by 2.8 per cent from US\$426.6 billion in 2017 to US\$438.4 billion in 2018.

Figure 19: Net IIP Deficit of Top 10 Economies in 2018

Source: IMF.

6.29 Figure 20 shows that there is of consistent increase in IIP liabilities continuous deterioration in net IIP of over the corresponding period of India from 2011 till 2018, on account time.

Figure 20: India's International Investment Position (US\$ million)

Source: IMF.

6.30 However as per centage of GDP, IIP liabilities, which had earlier increased from

2011 to 2015, have been declining since then (Figure 21).

Figure 21: Total liabilities as per cent of GDP

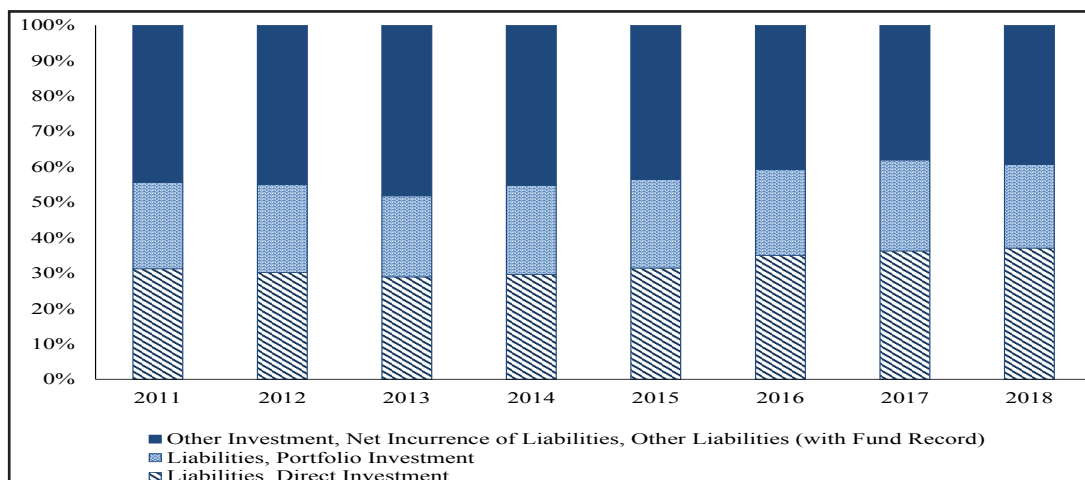

Source: Based on data of IMF.

6.31 The total liabilities in the IIP statement is a more comprehensive measure of external indebtedness than merely external debt as the former also includes net equity inflows, which is used for financing the CAD. The declining external indebtedness as evident from Figure 21 emerged in 2015 and can stabilize at its most recent level provided CAD

as a percentage of GDP stays in the range of 2.2 to 2.5 per cent of GDP.

6.32 The share of net FDI inflows in total liabilities has seen a secular increase since 2013 reflecting an increase in dependence on more stable sources of financing the CAD (Figure 22).

Figure 22: India's IIP Liabilities

Source: Based on data of IMF.

NOMINAL AND REAL EXCHANGE RATE AND TERMS OF TRADE

Exchange rate

6.33 The Indian rupee was one of the least volatile Emerging Market (EM) currencies during 2017-18 and traded in the range of 63.63 to 65.08 per US\$. During 2018-19, Indian rupee traded with a depreciating trend against US dollar and touched a historical low of 74.4 per US\$ (reference rate) on October 11, 2018 before recovering by 4.1 per cent to 69.2 per US\$ on March 29, 2019. During H1 of 2018-19, rupee remained weak due to concerns related to widening of CAD owing to rising crude oil prices coupled with the tightening of financial conditions caused by increase in Federal Funds rate by the US Federal Reserve. Thereafter, softer monetary

policy stance across major central banks and easing of crude oil prices coupled with return of risk-on sentiment triggered FPIs inflows and helped rupee to recover in Q4 of 2018-19. Notwithstanding the overall depreciation of rupee against US dollar in 2018-19, as against 2017-18, it performed better than some of other major EME currencies, such as, Argentine peso, Turkish lira, Brazilian real, and Russian ruble, which depreciated by more than 10 per cent *vis-à-vis* US dollar. Apart from rupee depreciating by 7.8 per cent *vis-à-vis* US dollar in 2018-19, it also depreciated against other major currencies. It depreciated by 7.7 per cent against Yen, and 6.8 per cent against Euro and Pound Sterling each (Figure 23). The exchange rate of rupee per unit of foreign currency and RBI's sale/purchase of US dollar in exchange market during 2018-19 is at Annexure IV.

Figure 23: Movement of Rupee against US Dollar, Euro, Pound Sterling and Japanese Yen

Source: RBI (Exchange Rate of the Indian Rupee vis-a-vis US Dollar, Pound Sterling, Euro and Japanese Yen - Monthly average)

Note: The exchange rate for Japanese yen is in rupees per 100 yen.

NEER and REER

6.34 In terms of the 6 and 36 currency Nominal Effective Exchange Rate (NEER) (trade based weights), rupee depreciated by 7.1 and 5.6 per cent respectively in the fiscal year 2018-19 over 2017-18. In terms of 6 and 36 currency Real Effective Exchange Rate (REER), rupee depreciated by 5.8 per cent and 4.8 per cent respectively in 2018-19 over 2017-18. The sharpest depreciation was seen in October 2018 as

shown in Figure 24 after which the rupee witnessed signs of trend reversal. This can be attributed to strong economic fundamentals, softening of crude oil prices, sustained selling of the dollar by exporters and banks, and improving investor confidence on account of recovery in the Indian equity markets. The indices of NEER and REER (CPI Based) of the Indian rupee (with base year 2004-05) may be seen at Annexure V.

Figure 24: Movement of Indices in REER, NEER (Trade based) (2017-18 =100)

Source: Reserve Bank of India.

Exchange Rate Volatility

6.35 Table 1 below uses the highest and lowest monthly exchange rate within a year to calculate variation between month

highs and lows. The standard deviation is calculated using monthly data as an indicator of exchange rate volatility. It indicates that the rupee witnessed a spike in volatility in 2018-19 after two years of relative stability.

Table 1: Exchange rate (₹/\$) volatility

Year	Month-high	Month-low	High-low % change	Standard deviation
2011-12	43.9	54.2	23.4	3.1
2012-13	50.58	57.22	13.1	1.1

2013-14	53.74	68.36	27.2	3.1
2014-15	58.43	63.75	9.1	1.1
2015-16	62.16	68.78	10.6	1.7
2016-17	64.84	68.72	6.0	0.6
2017-18	63.35	65.76	3.8	0.4
2018-19	64.93	74.39	14.6	2.3

Source: Based on data of Reserve Bank of India.

6.36 Figure 25 demonstrates the monthly highs, lows and average of the Indian rupee vis-à-vis the dollar from April 2017 to April

2019 from where also it is evident that the rupee has been relatively more volatile in 2018-19 as compared to the previous year.

Figure 25: Exchange rate highs and lows

Source: Based on data of Reserve Bank of India.

6.37 The degree of exchange rate volatility will depend on the extent to which exchange rate movements can be anticipated. In particular, crude oil prices and net portfolio flows have been major drivers of exchange rate movements in recent years. Movements in these variables can help foresee likely variance in exchange

rates which will enable hedging of the volatility and impact on trade to some extent.

6.38 Figure 26 indicates the movement in price of crude oil from April 2017 to May 2019. 2018-19 seems to be a year of mixed fortunes for the oil and gas industry with prices firming up before dipping down in November

against the backdrop of anticipation of global oversupply, amid slowdown in world economic growth. However, since December

2018, crude prices have shown an uptick following US announcement of cutting out Iran totally from the oil market.

Figure 26: Crude Oil Price (\$/bbl)

Source: Based on World Bank Pink Sheet data for Brent Crude oil price

6.39 As in Table 1, Table 2 also uses the highest and lowest monthly price to calculate variation between month highs and lows. The standard deviation is calculated using monthly data as an indicator of variance in

the price. Highest variance was recorded in 2014-15. Standard deviation figures indicate that crude oil price remained relatively volatile in 2017-18 and 2018-19 compared to 2016-17.

Table 2: Crude Oil Price (\$/bbl) volatility

Year	Month-high	Month-low	High-low % change	Standard deviation
2011-12	124.9	107.9	15.8	5.6
2012-13	120.5	95.6	26.0	6.3
2013-14	111.6	102.9	8.5	3.1
2014-15	111.9	48.1	132.7	23.9
2015-16	64.6	30.8	109.6	11.2
2016-17	55.5	42.3	31.3	4.3
2017-18	69.0	46.9	47.1	7.6
2018-19	80.5	56.5	42.5	7.7

Source: Based on World Bank Pink Sheet data for Brent Crude oil price

6.40 Figure 27 demonstrates the highs, lows and average of the crude oil price from 2011-12 to 2018-19, where the lows possibly

correspond with high real GDP growth in India and the highs with low real GDP growth rates.

Figure 27: Crude Oil price highs and lows

Source: Based on World Bank Pink Sheet data for Brent Crude oil price

6.41 Table 3 uses monthly net Foreign Portfolio Investment (FPI) data for the period 2011-12 to 2018-19 to calculate variation between highs and lows. The standard

deviation is calculated using monthly figures. It indicates that net FPI witnessed highest volatility in 2013-14 after which it has been relatively stable in 2018-19.

Table 3: Net Foreign Portfolio Investment (FPI) volatility

Year	Month-high	Month-low	High-low % change	Standard deviation
2011-12	9170	-1734	-628.84	3250.93
2012-13	6042	-1409	-528.81	2395.78
2013-14	6782	-8628	-178.60	3904.63
2014-15	7701	-361	-2233.24	2554.61
2015-16	5288	-2973	-277.87	2847.21
2016-17	3429	-6911	-149.62	2976.37
2017-18	8935	-120	-7545.83	2720.91
2018-19	4831	-3882	-224.45	2610.56

Source: Based on data of Reserve Bank of India.

Figure 28: Net Foreign Portfolio Investment highs and lows

Source: Based on data of Reserve Bank of India.

6.42 Figure 28 demonstrates the highs, lows and average of the net FPI flows from 2011-12 to 2018-19.

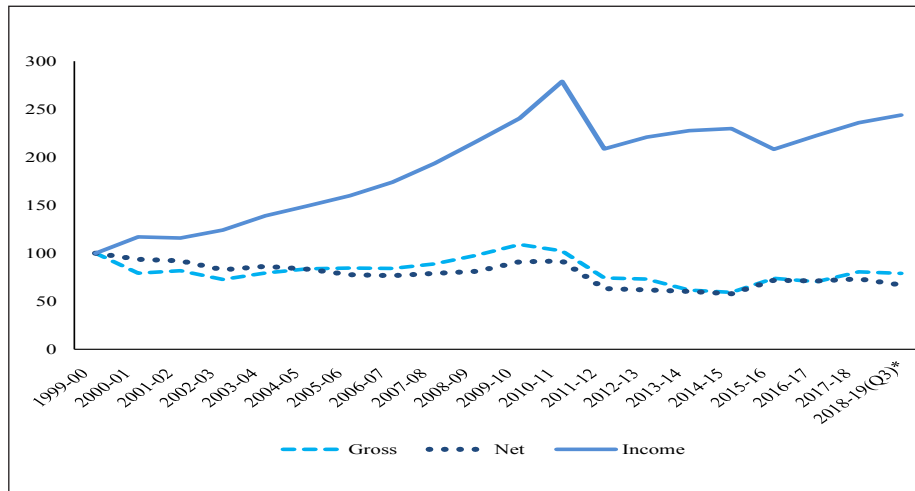

6.43 It is evident that movements in exchange rate are closely associated with movements in crude oil price and net FPI flows. The rupee remained volatile in 2018-19 on account of both global and domestic factors including rising crude oil prices, erratic trade balance, strengthening of dollar and continuous FPI outflows. Additional factors impacting the rupee include trade war between US and China and US sanctions on Iran and interest rate hikes by the US Federal Reserve.

Terms of Trade

6.44 While depreciation of REER indicates that India's exports must have become more competitive, appreciation of REER indicates less competitive exports. Price competitiveness of exports can however be better assessed by looking at how Terms of Trade (ToT) have fared across a time period. Commodity or net terms of trade (NTT) of a

country is the ratio of the unit value (price) of export to the corresponding unit value (price) of import measured relative to a base year. If this ratio increases, it implies that the country, for every unit of exports it exchanges for imports, is receiving relatively more; if the ratio decreases then the country is receiving relatively less. Two other commonly used terms of trade indices are gross terms of trade (GTT) and income terms of trade (ITT). The GTT is a ratio of total quantity of imports to that of exports of a given country. The ITT is the value of exports divided by the unit value (price) of imports to reflect how better or worse a country's purchasing power to imports has become. Figure 29 plots the movement in these three indices from 1999-2000 to 2018-19. Compared to 2017-18, India's NTT and GTT have declined by 8.9 per cent and 2.1 per cent during 2018-19 respectively while income terms of trade have increased by 3.4 per cent. However, all indices of terms of trade have been on an upward trend since 2015-16.

Figure 29: Terms of Trade (Base Year 1999-2000)

Source: DGCI&S, Kolkata

* Data available till Q3 of 2018-19

6.45 ITT comes out to be the most relevant ToT indicator for developing countries as they are more worried about changes in their capacity to import particularly when they are heavily dependent on commodity imports, such as India being dependent on crude imports. With a rising trend of ITT since the year 2000, India has been steadily increasing its purchasing power to import. In order to understand what drives the changes in ITT, Figure 30 decomposes change in ITT in terms of changes in NTT and export quantity index for April-January, 2018-19. The figure reflects that changes in ITT are more closely

tracked by changes in export volume than by changes in relative unit prices of export and imports. Since increase in export volumes is directly correlated with increase in growth of world output, a slow-down in world output has eroded the capacity to import during April-January of 2018-19 even when import prices of India have declined faster than the country’s export prices. Perhaps it would take a much larger drop in import prices to counter-balance the slow-down of world output to generate a positive ITT effect for the country.

Figure 30: Decomposition of change in Income Terms of Trade, 2018-19

Source: Based on data of DGCI&S, Kolkata.

Note : Data available till January 2019.

6.46 Figure 31 shows that the drop in import price index towards January 2019 is yet to reach the level of April 2018, which may

have allowed the fall in export volumes to decrease the capacity to import.

Figure 31: Decomposition of change in Net Terms of Trade, 2018-19

Source: Based on data of DGCI&S, Kolkata.

Note : Data available till January 2019.

COMPOSITION OF TRADE

Major Products Exchanged in 2018-19

6.47 In 2018-19, petroleum products continued to be the largest exported commodity, in value terms, with a share of 14.1 per cent in the country's export

basket. Other major exports included pearls, precious, semi-precious stones as also gold and other precious metal jewelry besides drug formulations, biologicals (Figure 32). However, it was exports of organic chemicals which grew the highest at 30.6 per cent in 2018-19.

Figure 32: Commodity-wise Composition of Exports in 2018-19 (Per cent)

Source: DGCI&S, Kolkata.

6.48 In the import basket of 2018-19, petroleum: crude, at 22.2 per cent had the largest share followed by gold and other precious metal Jewelry at 6.4 per cent and pearls precious/semi-precious stones at 5.3 per cent (Figure 33). Growth rates of gold and pearls (including precious and

semi-precious stones) however declined in 2018-19. Electronics components grew the fastest at 54.6 per cent in 2018-19, followed by petroleum: crude and iron and steel. The exports/imports of top ten commodities, their growth rates and per centage shares in 2017-18 and 2018-19 are indicated at Annexure VI.

Figure 33: Commodity-wise Composition of Imports in 2018-19 (Per cent)

Source: DGCI&S, Kolkata.

Major trading partners in 2018-19

6.49 India's largest export destination country continues to be the United States of America (USA), which accounted for 16 per cent of India's exports (in value terms) in 2018-19, followed by United

Arab Emirates (UAE), China and Hong Kong (Figure 34). However, in 2018-19, growth of India's exports to the Netherlands was the highest (40.7 per cent), followed by China (25.6 per cent) and Nepal (17.4 per cent).

Figure 34: Top 10 Export Destinations of India in 2018-19

Source: DGCI&S, Kolkata.

6.50 China continues to be the largest source of imports of India accounting for 13.7 per cent of the total imported value in 2018-19. The other important sources from which India imports are the USA, UAE and Saudi Arabia. (Figure 35). In terms of growth rates, imports from Singapore grew the highest at 118.1 per cent in 2018-19, followed by Hong-

Kong (68.5 per cent) and UAE (37.0 per cent). Further, though China continues to be the largest exporter to India, India's imports from China fell from US\$76.4 billion in 2017-18 to US\$70.3 billion in 2018-19, registering a negative growth. The top ten export destinations and import sources of India in 2017-18 and 2018-19 are indicated at Annexure VII.

Figure 35: Top 10 Import Sources of India in 2018-19

Source: DGCI&S, Kolkata.

TRADE POLICY

6.51 India has bilateral trade arrangements with all major regional groupings. In Europe, it is a part of European Free Trade Association (EFTA), consisting of Switzerland, Norway, Iceland and Liechtenstein. In 2018-19, India exports to and imports from EFTA stood at US\$1,534.00 million and US\$18,076.88 million respectively.

6.52 Among SAARC countries, India and Bangladesh have a bilateral trade agreement and both countries are exploring the possibility

of entering into a bilateral Comprehensive Economic Partnership Agreement (CEPA). In 2018-19, India's exports to and imports from Bangladesh stood at US\$8,933.47 million and US\$1,043.03 million respectively. Negotiations for India and Iran entering into a Preferential Trading Agreement (PTA) is under way. Review meetings for India-Nepal Treaty of Trade is going on. With Sri Lanka, India has India-Sri Lanka Free Trade Agreement (ISLFTA), under which duty-free access for almost all the products except a few is provided. India is also negotiating a

new Economic and Technology Cooperation Agreement (ETCA) with Sri Lanka. In 2018-19, India's exports to and imports from Sri Lanka stood at US\$4,707.14 million and US\$1,473.10 million respectively.

6.53 India and ASEAN have agreed to start examining the preliminary proposals related to the scope of the review of ASEAN India Trade in Goods Agreement (AITIGA). Within ASEAN, India has Comprehensive Economic Cooperation Agreement (CECA) with Singapore, Thailand and Malaysia. In 2018-19, India exports to and imports from the ASEAN block stood at US\$37,460.34 million and US\$59,293.36 million respectively.

6.54 Among Latin American countries, India has Preferential Trade Agreements (PTA) with MERCOSUR (Argentina, Brazil, Paraguay and Uruguay) and Chile. Possibilities are being explored for PTA with Colombia also. India is negotiating a Trade Agreement with Peru and Ecuador. Among Commonwealth of Independent States, negotiations are going on for Free Trade Agreement (FTA) with Georgia and PTA with Eurasian Economic Union (EaEU). In 2018-19, India exports to and imports from MERCOSUR block stood at US\$4,705.08 million and US\$6,425.35 million respectively.

6.55 Under North America Free Trade Agreement (NAFTA), negotiations are underway for India Canada Comprehensive Economic Policy Agreement (CEPA). India is also negotiating bilateral Comprehensive Economic Cooperation Agreement (CECA) with Australia and New Zealand. Negotiations are underway for Comprehensive Economic Cooperation and Partnership Agreement (CECPA) with Mauritius and FTA with Israel. The table depicting progress on Bilateral Trade Agreements may be seen at Annexure VIII.

6.56 India has signed 28 bilateral/multilateral trade agreements with various country/group of countries. In 2018-19, India's exports to countries with which it has a trade agreement stood at US\$121.7 billion accounting for 36.9 per cent of India's export to all the countries. Similarly, in the same year, India's imports from countries with which it has a trade agreement stood at US\$266.9 billion accounting for 52.0 per cent of India's imports from all the countries.

TRADE FACILITATION

6.57 India ratified the WTO Agreement on Trade Facilitation (TFA) in April 2016 and subsequently constituted a National Committee on Trade Facilitation (NCTF) with the Cabinet Secretary of India as the Chair. Further, to coordinate overall implementation of India's notified facilitation commitments, a Steering Committee co-chaired by the Commerce Secretary and the Revenue Secretary has been formed.

6.58 Since then, the NCTF has played an important role in reducing the high cost of imports and exports so as to integrate our cross-border trade with the global value chain. Some of the landmarks being -

- i. establishment of a National Single Window system to route all import related formalities viz., examination, sampling, clearance, etc., which involves plethora of agencies, through a single online national portal;
- ii. simplification of fees and charges for various clearance related activities at the borders;
- iii. paperless filing of import/ export documents through 'E-sanchit' project; and
- iv. publishing of resource information viz., procedures for import/ export, laws and regulations, etc., online for ease of access.

6.59 Consistent trade facilitation efforts have resulted in substantive improvement of India's performance in *Trading Across Borders* indicator from 146 in 2017 to 80 in the year 2018. Further, these initiatives have also contributed to overall improvement in 'Ease of Doing Business' environment in the country, as also recognized by the World Bank.

TRADE RELATED LOGISTICS

6.60 The Indian logistics sector is on a big growth tide. According to the domestic rating agency ICRA, Indian logistics sector is expected to grow at a rate of 8-10 per cent over the medium term. This is an improvement over the compound annual growth rate (CAGR) of 7.8 per cent at which the industry grew during the last five years. The logistics industry of India is currently estimated to be around US\$215 billion.

6.61 The last few years have seen significant development for this industry which is reflected in the global rankings. According to the Global Ranking of the World Bank's 2016 Logistics Performance Index, India jumped to 35th rank in 2016 from 54th rank in 2014 in terms of overall logistics performance. In 2018, India stood at 44th rank. Experts predict that the logistics sector can be the largest job creator by 2022. The sector currently provides employment to more than 72 crore people in the country.

6.62 Government of India has announced a draft National Logistics policy for which a national logistics action plan is being developed. The key objective is to drive economic growth and trade competitiveness of the country through a truly integrated, seamless, efficient, reliable and cost effective logistics network, leveraging best in class technology, processes and skilled manpower. Various logistics schemes have

been introduced, which are as under:

- i. The Government has launched many flagship programmes like the Bharatmala Yojana, the Sagarmala Yojana and the Dedicated Freight Corridors. The objective of these programmes is to develop infrastructure to meet the growing demand of logistics in the country and to make a modal shift on more cost effective modes of transport.
- ii. 111 waterways have been identified for development.
- iii. Infrastructure status has been given to select logistics activities like warehousing, cold chains, Multi modal logistics parks and slurry pipelines.
- iv. Subsidy is provided to develop cold chains and pack houses.

6.63 Indian logistics industry is a sunshine sector and there are multiple factors on both demand and supply side that are driving this sector. On the demand side, the reduction in truck turnaround time following GST is a major stimulus to logistics growth as also pick up in industrial production. On the supply side, the outsourcing of non-core activities like warehousing is allowing main players to focus on improving efficiency of transportation. Automation of large warehouses is also adding to the efficiency of the logistics sector.

6.64 According to Bowersox, Calantone and Rodrigues, India's logistics cost as a percentage of GDP was 15.4 in 1997 and 17 per cent in the year 2000. As per an international market research conducted by Armstrong & Associates (October 2017), India's logistics cost as a percentage of GDP is estimated to be 13 per cent. A comparison of India with the rest of the world, taking 2016 as reference year, is in Table 4.

Table 4: Logistics Cost of India and rest of the world (Reference Year= 2016)

2016 Comparative Analysis	Logistics Cost** (US\$Billions)	Logistics % GDP
India	293.1	12.80
Brazil	208.6	11.62
China	1626.7	14.50
USA	1522.7	8.14
World	8226.3	10.86

Source: **Armstrong & Associates, October 2017

6.65 Driving logistics cost down from estimated current levels of 13-14 per cent of GDP to 10 per cent in line with best-in-class global standards is essential for India to become globally competitive.

ANTI-DUMPING AND SAFEGUARD MEASURES

6.66 India conducts anti-dumping investigations on the basis of applications filed by the domestic industry with prima facie evidence of dumping of goods in the country, injury to the domestic industry and causal link between dumping and injury to the domestic industry. The countries involved in these investigations are China PR, Hong Kong, Korea, Germany, EU, USA, Malaysia, South Africa, Thailand, Brazil among others.

6.67 During the period from 01.04.2018 to 31.03.2019, DGTR initiated 24 anti-dumping (both fresh and review) investigations, and issued final findings in 50 anti-dumping investigations. During 2018-19, DGTR initiated 5 countervailing duty investigations and issued final findings in two CVD cases. One safeguard measure investigation was also finalized during 2018-19. DGTR is also in the process of developing a web application for online submission of petitions, information,

submissions, rejoinders etc. related to anti-dumping/ countervailing/ anti-circumvention investigations, for convenience of the industry and for enabling DGAD to provide trade remedies available under the WTO framework to the various stakeholders.

OUTLOOK

6.68 The WEO, April 2019 has forecast acceleration of world output in second half of 2019. The key assumptions in this regard are continued accommodative monetary policy stance in advanced countries and fiscal stimulus in China and de-escalation of trade tensions between the US and China. There could be pressure on crude prices to increase as world output grows yet that may not impact India since growth in world output will also favorably impact India's exports, which is not decoupled from growth of world trade. Government policies are expected to further lift restrictions on FDI inflows, which will continue to increase the stability of sources funding the current account deficit. From a macro-economic perspective the deterioration of CAD may be contained if consumption slows down in the economy while increase in investment and exports become the new drivers of the Indian economy.

CHAPTER AT A GLANCE

- As per WTO, World trade growth has slowed down to 3 per cent in 2018, much below the growth rate of 4.6 per cent in 2017, following the introduction of new and retaliatory tariff measures, heightened US-China trade tensions, weaker global economic growth and volatility in financial markets.
- India's balance of payment situation witnessed some signs of deterioration during H1 of 2018-19 due to the sharp rise in crude oil prices causing higher current account deficit (CAD). However, CAD moderated somewhat in Q3-2018-19 as international crude oil prices eased sequentially in November and December 2018. The widening of the CAD was largely on account of a higher trade deficit driven by rise in international crude oil prices (Indian basket).
- The growth rate of merchandise exports and imports fell in 2018-19 compared to previous year, attributable to the slower growth of world output and trade, accompanied with lower domestic GDP growth in 2018-19, among other factors.
- The contribution of net services to financing merchandise trade deficit has fallen from 62.2 per cent in 2016-17 to 43.7 per cent in 2018-19 reflecting a muted performance of service exports in recent times.
- Net capital flows moderated in April-December of 2018-19 despite robust foreign direct investment (FDI) inflows, outweighed by withdrawals under portfolio investment.
- The net remittances by Indians employed overseas increased in 2018-19 (P) compared to last year, possibly due to improved income conditions in the Gulf countries along with rise in oil prices. India remained a top remittance recipient country in 2018.
- Among the major economies running current account deficit, India is the largest foreign exchange reserve holder and eighth largest among all countries of the world.
- India's External Debt was US\$521.1 billion at end-December 2018, 1.6 per cent lower than its level at end-March 2018. The key external debt indicators reflect that India's external debt is not unsustainable.
- The total liabilities-to-GDP ratio, inclusive of both debt and non-debt components, has declined from 43 per cent in 2015 to about 38 per cent at end of 2018. The share of foreign direct investment has risen and that of net portfolio investment has fallen in total liabilities, thereby reflecting a transition to more stable sources of funding the current account deficit.
- The Indian Rupee traded in the range of 65-68 per US\$ in 2017-18 but depreciated to a range of 70-74 in 2018-19. During H1 of 2018-19, rupee remained weak due to concerns related to widening of CAD owing to rising crude oil prices coupled with the tightening of financial conditions caused by increase in Federal Funds rate by the US Federal Reserve.
- The income terms of trade, a metric that measures the purchasing power to import, has been on a rising trend, possibly because the growth of crude prices has still not exceeded the growth of India's export prices. The exchange rate in 2018-19 has been more volatile than in the previous year, mainly due to volatility in crude prices, but not much due to net portfolio flows.
- The composition of India's exports and import basket has almost remained unchanged in 2018-19 over 2017-18. Petroleum products, precious stones, drug formulations, gold and other precious metals continue to be top export items. Crude petroleum, pearl, precious, semi-precious stones and gold remain as top import items. India's main trading partners continue to be the US, China, Hong Kong, the UAE and Saudi Arabia.
- India has signed 28 bilateral/multilateral trade agreements with various country/group of countries. In 2018-19, India's exports to countries with which it has a trade agreement stood at US\$121.7 billion accounting for 36.9 per cent of India's export to all the countries. Similarly, in the same year, India's imports from countries with which it has a trade agreement stood at US\$266.9 billion accounting for 52.0 per cent of India's imports from all the countries.
- The logistics industry of India is currently estimated to be around US\$215 billion. The significant developments in this industry led to an increase in the ranking of India in overall logistics performance, according to the Global Ranking of the World Bank's 2016 Logistics Performance Index. In 2018, India stood at 44th rank.

Annexure I

I. Merchandise Trade

- The broad trends in Merchandise Exports, Imports and Trade Balance in the last ten years are indicated in the table below:

S. No.	Year	Exports	Growth (%)	Import	Growth (%)	Trade Balance
1	2009-10	178.75	-3.53	288.37	-5.05	-109.62
2	2010-11	249.82	39.76	369.77	28.23	-119.95
3	2011-12	305.96	22.48	489.32	32.33	-183.36
4	2012-13	300.40	-1.82	490.74	0.29	-190.34
5	2013-14	314.41	4.66	450.20	-8.26	-135.80
6	2014-15	310.34	-1.29	448.03	-0.48	-137.70

II. India's Services Trade

S. No	Year	Exports	Growth (%)	Imports	Growth (%)	Net of Services
1	2009-10	96.04	-9.36	60.03	15.34	36.02
2	2010-11	124.64	29.77	80.55	34.19	44.08
3	2011-12	142.32	14.19	78.23	-2.89	64.10
4	2012-13	145.68	2.36	80.76	3.24	64.91
5	2013-14	151.81	4.21	78.75	-2.50	73.07
6	2014-15	158.11	4.15	81.58	3.59	76.53
7	2015-16	154.31	-2.40	84.63	3.75	69.68
8	2016-17	164.20	6.41	95.85	13.25	68.34
9	2017-18	195.09	18.81	117.53	22.61	77.56
10	2018-19 (P)*	205.79	5.49	125.46	6.75	80.33

Source: RBI database and Press Releases, Note: P stands for provisional

*Note 2: Services data pertains to March 2019 as it is the latest data available as per RBI's Press Release dated 15th May 2019. 2018-19 is arrived at by adding quarterly data of RBI for Q1, Q2 & Q3 of 2018-19 with Month-wise QE data of RBI's press release for January, February & March 2018-19. This data is provisional and subject to revision by RBI

It may be mentioned here that Net of Services is financing 43.67 per cent of the merchandise trade deficit in 2018-19.

PROGRESS ON BILATERAL TRADE ARRANGEMENTS

S. No.	Regional Grouping	Country/ies	Agreement Name	Salient Features
1.	Europe	EU countries	INDIA-EU BTIA (Negotiation Stage)	Commenced in the year 2007. Sixteen rounds of negotiations till 2013
		Consists of Switzerland, Norway, Iceland and Liechtenstein.	European Free Trade Association (EFTA)	Total bilateral trade US\$19.9 billion during 2018-19.
		Consists of Switzerland, Norway, Iceland and Liechtenstein	INDIA – EFTA TEPA (Negotiation Stage)	Trade and Economic Partnership Agreement (TEPA) initiated in October, 2008. Seventeen rounds of negotiations have been held. Last round of negotiation was held from 18-21 September, 2017.
2.	South Asia & Middle East	Bangladesh	Bilateral trade agreement	Last renewed w.e.f. 1 st April 2015 for five years, with automatic renewal clause. No preferential tariffs for imports of products, only facilitative mechanism. Exploring possibility to enter into Comprehensive Economic Partnership Agreement (CEPA).
		Iran	Preferential Trading Agreement (PTA) (Negotiation Stage)	Commenced in 2013. Four rounds of negotiations have taken place. Next Round is tentatively scheduled in June 2019 in India.
		Nepal	India-Nepal Treaty of Trade	Last renewed on 27 th October 2016. Duty free access provided. Comprehensive Review of the Treaty has commenced and two meetings held in August 2018 and February 2019.
		Sri Lanka	India-Sri Lanka Free Trade Agreement (ISLFTA)	Came into force in 2000. Tariff-concessions provided. India provided duty-free access to almost all the lines, except few.
		Sri Lanka	Comprehensive Economic Partnership Agreement (CEPA)	Negotiations completed in 2008. But agreement could not be made effective.

S. No.	Regional Grouping	Country/ ies	Agreement Name	Salient Features
		Sri Lanka	Economic and Technology Cooperation Agreement (ETCA) (Negotiation Stage)	Bilateral meetings commenced in 2015. Eleven Rounds completed till October 2018.
3.	ASEAN	India, Malaysia, Singapore and Thailand.	ASEAN India Trade in Goods Agreement (AITIGA)	Came into force on 1 st January, 2010. All ASEAN members signatory to FTA. Review of AITIGA on hold until conclusion of RCEP negotiations.
		Singapore	India-Singapore Comprehensive Economic Cooperation Agreement (CECA)	Signed on 29 th June, 2005, covering goods, services and investment. First review in 2006. Second review in 2010.
		Singapore	Mutual Recognition Agreement (MRA) in Nursing with Singapore	Singapore agreed to expand coverage of Indian nursing institutions by recognizing seven nursing institutions.
		Thailand	India Thailand CECA	Came into force in 2004. Agreed to implement an Early Harvest Scheme covering 84 products for Tariff Reduction and Elimination in a phased manner. Thirty rounds of negotiations held for comprehensive FTA with Thailand.
		Malaysia	India-Malaysia CECA	Came into force w.e.f. 1 st July, 2011. First meeting of the Joint Committee for implementing IMCECA held in 2014.
4.	Latin American	Argentina, Brazil, Paraguay and Uruguay	India- MERCOSUR Preferential Trade Agreement (PTA)	Came into operation in 2009. Margin of Preference (MoP) is offered on tariff lines.
		Chile	India-Chile Preferential Trade Agreement (PTA)	Came into effect in 2007. Margin of Preference (MoP) is offered on tariff lines.

S. No.	Regional Grouping	Country/ ies	Agreement Name	Salient Features
		Peru	India Peru Trade Agreement (Negotiation stage)	Four rounds of negotiations held. Last negotiation held in March 2019. Next is proposed in August 2019.
		Ecuador	India-Ecuador Trade Agreement (Negotiation stage)	Exploring feasibility of Trade Agreement.
		Colombia	India-Colombia Trade Agreement (Negotiation stage)	Exploring feasibility of Trade Agreement.
5.	Common-wealth Independent States (CIS)		PTA with Eurasian Economic Union (EaEU) (Negotiation Stage)	Initiation of negotiations for PTA with Eurasian Economic Union (EaEU)
		Georgia	FTA with Georgia (Negotiation Stage)	Initiation of FTA with Georgia.
		Uzbekistan	JFSG with Uzbekistan (Negotiation Stage)	Signing of Joint Statement for initiation of JFSG with Uzbekistan
6.	Africa-WANA (West Asia North Africa)	Mauritius	India-Mauritius Comprehensive Economic Cooperation & Partnership Agreement (CECPA) (Negotiation stage)	Seven Rounds have been held
		Israel	India-Israel FTA (Negotiation stage)	
		Botswana, Lesotho, Namibia, South Africa and Eswatini	India-SACU PTA (Negotiation stage)	Southern African Custom Union (SACU). Sixth Round in 2010

S. No.	Regional Grouping	Country/ ies	Agreement Name	Salient Features
		Group of fifteen countries namely Benin, Burkina Faso, Cabo Verde, Cote D'Ivoire, Gambia, Guinea, Guinea Bissau, Liberia, Mali, Niger, Nigeria, Senegal, Sierra Leone and Togo	India-ECOWAS PTA (Negotiation stage)	
7.	North America		North America Free Trade Agreement (NAFTA)	India-US Commercial Dialogue signed in 2000
		USA		India-US Trade Policy Forum announced in 2005, instrumental in creating an institutional mechanism to resolve host of trade issues
		Canada		India-Canada Comprehensive Economic Policy Agreement (CEPA): Launched in 2010, ten rounds of negotiations held till date.
8.	Oceania	Australia and New Zealand	FTAs with Australia and New Zealand	Nine rounds of negotiations with Australia and ten rounds of negotiations with New Zealand taken place

Agriculture and Food Management

“Since nature has the most sustainable ecosystem and since ultimately agriculture comes out of nature, our standard for a sustainable world should be nature’s own ecosystem”

-Wes Jackson¹

Agriculture remains the pre-dominant occupation in India for vast sections of the population. Over the years, several new challenges have emerged before the sector. With fragmentation of agricultural holdings and depletion of water resources, the adoption of a resource-efficient, ICT based climate-smart agriculture can enhance agricultural productivity and sustainability. Smallholder farming can be a lucrative livelihood opportunity with the application of appropriate technologies and adoption of natural, organic and Zero Budget Natural Farming. To transform the rural economy, greater emphasis should be given to allied sectors with a major focus on dairy, poultry, fisheries and rearing of small ruminants. The rationalisation of food subsidy and greater use of technology in food management will ensure food security for all.

INTRODUCTION

7.1 Agriculture and allied sectors are critical in terms of employment and livelihoods for the small and marginal farmers, who dominate the agriculture ecosystem in India. To attain the Sustainable Development Goals (SDGs) of ending poverty and bringing in inclusive growth, activities related to agriculture need to be closely integrated with the SDG targets. With decline in the size of

landholdings in agriculture, India has to focus on resource efficiency in smallholder farming to meet the SDG targets and also to attain sustainability in agriculture. A combination of resource efficient methods, dynamic cropping patterns, farming that is responsive to climate change and intensive use of ICTs should be the backbone of smallholder farming in India. For a safe and food secure future, the agriculture landscape has to undergo tremendous transformation and shift

¹Co-founder of The Land Institute and a prominent leader of the international sustainable agriculture movement.

from the philosophy of ‘green revolution led’ productivity to ‘green methods’ led sustainability in agriculture.

OVERVIEW OF AGRICULTURE AND ALLIED SECTORS

Gross Value Added in Agriculture

7.2 Agriculture sector in India typically goes through cyclical movement in terms of its

growth. The Gross Value Added (GVA) in agriculture improved from a negative 0.2 per cent in 2014-15 to 6.3 per cent in 2016-17 only to decelerate to 2.9 per cent in 2018-19. While the crops, livestock and forestry sector showed fluctuating growth rates over the period from 2014-15 to 2017-18, the fisheries sector has shown a rapid growth from 4.9 per cent in 2012-13 to 11.9 per cent in 2017-18. (Table 1 and Figure 1).

Table 1 : Growth of GVA in Agriculture & Allied Sectors at 2011-12 prices

Item	2012-13	2013-14	2014-15	2015-16* (3RE)	2016-17 (2RE)#	2017-18 (1RE)@	2018-19 PE**
Total GVA at basic prices	5.4	6.1	7.2	8.0	7.9	6.9	6.6

Figure 1: Growth Rate of GVA in Agriculture & Allied Sectors (2011-12 prices)

Source: Central Statistics Office, Ministry of Statistics & Programme Implementation (MoSPI)

7.3 Average annual growth rate in real terms in agricultural & allied sectors has remained at around 2.88 per cent during 2014-15 to 2018-19. However, the volatility of output growth as measured by the coefficient of variation has declined from 2.7 in the period of 1961-1988 to 1.6 during 1989-2004 and further to 0.8 during 2005 to 2018².

Share of Agriculture Sector in GVA

7.4 The share of agriculture, forestry & fishing sector in GVA has seen a steady

decrease over the years from 15.4 per cent in 2015-16 to 14.4 per cent in 2018-19. The decline was mainly due to decline in the share of crops in GVA from 9.2 per cent in 2015-16 to 8.7 per cent in 2017-18. The share of the fisheries in GVA has increased by 0.1 per cent points during the three years from 0.8 per cent in 2014-15 to 0.9 per cent in 2017-18. The share of the livestock in GVA has remained around 4 per cent from 2012-13 to 2017-18. The share of forestry & logging was 1.2 per cent in 2017-18. (Table 2)

Table 2: Share of Agriculture, Forestry & Fishing at 2011-12 Prices (in per cent)

Item	2012-13	2013-14	2014-15	2015-16*	2016-17#	2017-18 @	2018-19**

Gross Capital Formation in Agriculture & Allied Sector

7.5 Gross Capital Formation (GCF) in agriculture and allied sectors as a percentage of GVA saw a rise to 17.7 per cent in 2013-

14 but declined thereafter to 15.2 per cent in 2017-18. The GCF in agriculture and allied sectors in absolute terms increased from ₹2,51,094 crore in 2012-13 to ₹2,73,755 crore in 2017-18 at 2011-12 prices.

²Dev, SM (2018), Transformation of Indian Agriculture? Growth, Inclusiveness and Sustainability.

Table 3: Gross Capital Formation in Agriculture & Allied Sectors

Period	Gross Capital formation in Agriculture and Allied sector (in ₹ crore) at 2011-12 prices			GVA in Agriculture & Allied Sector (at 2011-12 prices)	GCF in Agriculture & Allied Sector as percentage of GVA of Agriculture & Allied Sector		
	Public	Private	Total		Public	Private	Total
2012-13	36019	215075	251094	1524288	2.4	14.1	16.5
2013-14	33925	250499	284424	1609198	2.1	15.6	17.7

Note: * Third Revised Estimate, # second revised estimate, @ first revised estimate.

7.6 A comparison of the share of public and private investment in GCF in agriculture and allied sectors shows that while the share of public investment in agriculture and allied

sectors registers an increase from 2014-15 and maintains an upward trend till 2016-17, the share of private investment in GCF shows a decline during this period (Figure 2).

Figure 2: Share of Public and Private Sector in Total GCF in Agriculture & Allied Sector (in per cent)

Source: Central Statistics Office, Ministry of Statistics & Programme Implementation (MoSPI)

PATTERN OF AGRICULTURAL LAND HOLDINGS IN INDIA

7.7 As per Phase-I results of the Agriculture Census, 2015-16, the number of operational

holdings, i.e. land put to agricultural use, has increased to 14.6 crore in 2015-16 from 13.8 crore in 2010-11, thereby registering an increase of 5.3 per cent. The share of

marginal holdings (less than 1 ha) in total operational holdings increased from 62.9 per cent in 2000-01 to 68.5 per cent in 2015-16, while the share of small holdings (1 ha to 2 ha) decreased from 18.9 per cent to 17.7 per cent during this period. Large holdings (above 4 ha) decreased from 6.5 per cent to

4.3 percent. The area operated by the marginal and small holdings increased from 38.9 per cent in 2000-01 to 47.4 per cent in 2015-16, while that of the large holdings decreased from 37.2 per cent to 20 per cent during this period (Figure 3).

Figure 3: Operational Land Holdings (Number & Area Operated in Ha)

Source: Agriculture Census 2015-16.

Note: NLH: Number of Operational Land Holdings, AH: Area Operated by Operational Land Holdings.

Growing Number of Women Farmers

7.8 Women play a significant and crucial role in agriculture including crop production, livestock production, horticulture, post-harvest operations, agro/social forestry, fisheries, etc. The share of operational

holdings cultivated by women has increased from 11.7 per cent in 2005-06 to 13.9 per cent in 2015-16. The marginal and small holdings operated by women farmers together constitute 27.9 per cent of total operational holdings cultivated by women (Table 4).

Table 4: Operational Land Holdings Operated by Women (in percent)

Size Group	2005-06	2010-11	2015-16*
Marginal (below 1.00 ha.)	12.6	13.6	14.6
Small (1.00-2.00 ha.)	11.1	12.2	13.3
Semi-Medium (2.00-4.00 ha.)	9.6	10.5	11.5
Medium (4.00-10.00 ha.)	7.8	8.5	9.6
Large (10.00 ha. & above)	6.0	6.8	7.7
All Size Groups	11.7	12.8	13.9

Source: Agriculture Census 2015-16; * - provisional results

BRINGING RESOURCE EFFICIENCY IN SMALLHOLDER AGRICULTURE

7.9 The pattern of agricultural holdings reflects pre-dominance (85 per cent) of small and marginal farmers in agriculture sector. The development strategy for agriculture should prioritise smallholder agriculture in order to promote sustainable livelihoods and for reduction of poverty in India. The productivity of a farm depends on the use of inputs like fertiliser, access to irrigation, technology, crop intensity and choice of crops (crop pattern) grown at the farm. One of the key aspects which can improve productivity of small farm holdings is improving resource use efficiency (one of the sources of income growth identified by the Committee on Doubling Farmers' Income. See Annexure 1), be they, natural resources like water or other resources/inputs like fertilisers, pesticides etc.

7.10 The following section examines the key factors which will bring resource efficiency in smallholder agriculture in India and lays out the main policy changes that are required to bring about resource efficiency.

Increasing Irrigation Water Productivity (IWP) in Agriculture

7.11 In India, according to the Asian Water Development Outlook, 2016, almost 89 per cent of groundwater extracted is for irrigation. There is a major concern whether the present practice of groundwater use can be sustained as the depth of the groundwater level continues to drop. By 2050, India will be in the global hot spot for 'water insecurity'³. Agriculture remains the predominant occupation in terms of number of people employed. Also,

agriculture is dependent highly on water. So, appropriate mechanism needs to be framed for economical use of water among small and marginal farmers.

7.12 The cropping pattern in India is highly skewed towards crops that are water intensive. The incentive structures like MSP, heavily subsidized electricity, water and fertilizers have played a significant role in the misalignment of crop patterns in the country. 'The water guzzlers, paddy and sugarcane, consume more than 60 per cent of irrigation water available in the country, thereby reducing water availability for other crops'⁴.

7.13 Figure 4 highlights the divergence between land productivity and irrigation water productivity in the major sugarcane producing States in India reflecting the urgent need to focus on irrigation water productivity⁵ to raise agricultural productivity. The States like Tamil Nadu, Karnataka, Maharashtra and Andhra Pradesh which have high land productivity tend to have very low irrigation water productivity, reflecting inefficient use of water and the need to re-calibrate the cropping pattern.

Figure 4: Comparison of Land Productivity and Irrigation Water Productivity across the Major Sugarcane Growing States

Source: NABARD and ICRIER, 2018.

³ India's water insecurity index shows that the resilience score of India is also very low.

⁴ Water Productivity Mapping of Major Indian Crops, NABARD AND ICRIER Study, April 2018.

⁵ Irrigation water productivity is defined as ratio of the crop output to the irrigation water applied by the farmer/irrigation system either through surface canals, tank, pond or the well and tubewell during the crop growth. Thus irrigation is an economic activity and the farmer has to incur certain expenditure to apply the water (kg/m³). This is a practical indicator which helps in estimating the crop output obtained with respect to the actual irrigation water applied by the farmer.

7.14 Adopting improved methods of irrigation and irrigation technologies will have a critical role in increasing irrigation water productivity along with re-calibrating the cropping patterns. While adoption of micro-irrigation systems (MI) is one of the possible ways to improve water use efficiency, it can be seen that the States with penetration of MI systems and improved adoption of micro irrigation systems have almost 40 to 50 per cent savings in energy and fertiliser consumption (Figure 5). *Though, the costs of installation of MI systems can be a disincentive unless subsidies are given by the government to small and marginal farmers, it needs to be examined whether the procurement supported systems which are resource inefficient in terms of subsidies and*

water use, can be replaced with MI supported cropping patterns and systems which will maximise irrigation productivity and resource use efficiency. A study⁶ has found that there are ‘bright spots’ which can be models for sustainable water use in agriculture.

7.15 A combination of measures which suit the local agro-economic context need to be applied to improve irrigation productivity in agriculture which will reflect sustainable water use in agriculture. In this regard, focus in agriculture should shift from ‘land productivity’ to ‘irrigation water productivity’. Therefore, devising policies to incentivise farmers to adopt efficient ways of water use should become a national priority to avert the looming water crisis.

Figure 5. Energy Consumption and Fertilizer Consumption Savings from Micro Irrigation, 2015

Source: Indian Council of Food and Agriculture, Micro Irrigation: Market Update.

Economizing the Use of Fertilizers and Pesticides

7.16 For the small and marginal farmers, the costs of fertilizers are key determinants

of profitability of farming. Since 2002, the fertilizer consumption in India has continually increased till 2011. However, the fertiliser consumption has been declining since then.

⁶ Water Productivity Mapping of Major Indian Crops, NABARD and ICRIER, 2018

7.17 Further, the fertilizer response ratio is showing a declining trend (Figure 6). The declining fertilizer response ratio is an indicator of declining responsiveness of soil fertility to fertiliser application.

7.18 According to Department of Fertilisers, the declining fertilizer response ratio in Indian agriculture is due to inadequacy and imbalance in fertiliser use, increasing multi-nutrient deficiency, lack of farmers awareness about balanced plant nutrition and poor crop

management.

7.19 The improvement in fertilizer use efficiency⁷ requires farmers' knowledge regarding the right product, dosage, time and method of application. Some of the suggested measures are the use of optimal dose based on soil health status, promotion of neem-coated urea, promotion of micronutrients, promotion of organic fertilizers, and promotion of water-soluble fertilizers.

Figure 6: Declining Fertilizer Response Ratio

Source: Department of Fertilizers.

Increasing Sustainability in Agriculture - Turning to Organic and Natural Farming

7.20 The main objective of the National Mission for Sustainable Agriculture (NMSA) is to make agriculture more productive, sustainable, remunerative and climate resilient by promoting location specific integrated/composite farming systems and to conserve natural resources through

appropriate soil and moisture conservation measures.

7.21 The Government has been promoting organic farming in the country through the schemes such as Paramparagat Krishi Vikas Yojana (PKVY) and Rashtriya Krishi Vikas Yojana (RKVY). In the revised guidelines of PKVY scheme during the year 2018, various organic farming models like Natural Farming, Vedic Farming, Cow Farming, Homa Farming, Zero Budget Natural Farming

⁷ Yield per unit of fertilizer input

⁸ "Zero Budget" primarily means without using any credit, and without spending any money on purchased inputs. "Natural farming" means farming with nature and without chemicals.

(ZBNF)⁸ etc. have been included wherein flexibility lies with the States to adopt any model of Organic Farming depending on the farmer's choice. Under the RKVY scheme, organic farming/natural farming project components are considered by the respective State Level Sanctioning Committee (SLSC) according to their priority/choice.

7.22 The main aim of Zero Budget Natural Farming (ZBNF) is elimination of chemical pesticides and promotion of good agronomic practices. ZBNF also aims to sustain agriculture production with eco-friendly processes in tune with nature to produce agricultural produce free of chemicals. Soil fertility & soil organic matter is restored by pursuing ZBNF. Less water is required under ZBNF and it is a climate friendly agriculture system. The programme is being implemented in 131 clusters covering 704 villages under RKVY and 1300 clusters covering 268 villages under PKVY. So far, 1,63,034 farmers are practicing ZBNF. Organic farming is also being promoted through the scheme Mission Organic Value Chain Development for North Eastern Region (MOVCDNER) under National Mission for Sustainable Agriculture (NMSA).

7.23 Some of the States which are progressively practicing ZBNF are Karnataka, Himachal Pradesh and Andhra Pradesh. After ZBNF, Andhra Pradesh has witnessed a sharp decline in input costs and improvement in yields (Government of Telangana, 2017).

Adopting Appropriate Technologies for Smallholder Farms

7.24 In smallholder farms, resource efficiency can be brought about through adoption of appropriate technologies. However, use of technology, investment in costly farm machinery, or scaling up the existing technology may not be economically feasible for small and marginal farmers. Hence, there is need to promote use of environment-friendly automated farm machinery tools suited to small scale operations. The Custom Hiring Centers (CHCs) can be set up to promote use of high-tech machinery for the mechanization of small and marginal farm holdings, especially in difficult terrains. From 2014-15 to 2017-18, a total of 8162 CHCs were established under the Sub Mission on Agricultural Mechanization (SMAM) scheme.

7.25 To facilitate communication and reduce transaction costs, the ICT (Information and Communication Technology) applications are crucial in smallholder farming. The spread of mobile phones in rural areas has already impacted the way the small and marginal farmers get access to information about soil health, weather and prices. In the context of poor infrastructure, adoption of ICT in agriculture will promote market access, facilitate financial inclusion and contribute significantly to early warning signals that are critical for the development of smallholder community. Technology can play a critical role in bridging the information gaps that

Box 1: Coffee Board Activates Blockchain Based Marketplace in India

Coffee Board has launched blockchain based coffee e-marketplace. This is a pilot project which is likely to help integrate the farmers with markets in a transparent manner and lead to realization of fair price for the coffee producer. It will also reduce the number of layers between coffee growers and buyers and help farmers double their income.

India is the only country in the world where entire coffee is grown under shade, handpicked and sun dried. Coffee is produced in India by small coffee growers, tribal farmers adjacent to National Parks and Wildlife Sanctuaries in Western and Eastern Ghats, which are two of the major bio-

diversity hot spots in the world. Indian coffee is highly valued in the world market and sold as premium coffee. However, the share of farmers in the final returns from coffee is very meagre.

Blockchain based market place app for trading of Indian coffees is intended to bring in transparency in the trade of Indian coffee, maintain the traceability of Indian coffee from bean to cup so as consumer tastes real Indian coffee, the grower is paid fairly for his coffee produced. This initiative will reduce grower's dependency on intermediaries by providing direct access to buyers at a fair price for their produce. The initiative will also help coffee producers find exporters within the stipulated time to meet the growing demands and in building greater trust through increased transparency.

Coffee Board is in the process of developing Blockchain based marketplace application. This platform has already registered a group of 15-20 coffee farmers, exporters, importers and retailers are already registered on the platform from India and abroad. India is one of the few coffee blockchain processors for coffee in the world, after France and Ethiopia.

The stakeholders like coffee farmers, traders, exporters register on platform to make trade transactions. The coffee farmers register credentials like place where coffee is grown, details of crop, elevation etc. A block is created for each lot farmer sells. The credentials of the lot are stored on the blockchain throughout its journey and is immutable.

prevail in agricultural markets. The use of blockchain technology in the coffee market represents one such example (Box.1).

Improving Infrastructure and Access to Markets

7.26 The informal actors like local traders and input dealers are more prominent in the marketing channels of the smallholder farmers. However, if farmers' access to markets are improved through better

connectivity to nearby mandis, it will help farmers fetch better prices for their agricultural produce. A combination of enhancing rural infrastructure to improve connectivity, Information, Communication Technology (ICT) to provide timely information about prices, aggregation and storage facilities can help small and marginal farmers in overcoming the marketing bottlenecks.

Box 2. Agricultural Marketing and Farmer Friendly Reforms Index (AMFFRI)

NITI Aayog launched in 2016 an index to rank States and UTs based on implementation of seven provisions proposed under model APMC Act like joining e-NAM initiative, special treatment to fruits and vegetables for marketing and level of taxes in mandis. These indicators reveal ease of doing agribusiness as well as opportunities for farmers to benefit from modern trade and commerce and have wider option for sale of her/his produce. These indicators also represent competitiveness, efficiency and transparency in agri markets. The second area of reforms captured by the index include facilitation and liberalization of land lease. The third area included in the index represent freedom given to farmers for felling and transit of trees grown on private land. This represent opportunity to diversify farm business.

The Index is named as "Agricultural Marketing and Farmer Friendly Reforms Index (AMFFRI)" and it has a score that can have minimum value "0" implying no reforms and maximum value "100" implying complete reforms in the selected areas. States and UTs have been ranked using this index.

Ranking of States in terms of implementation of marketing and other farmer friendly reforms

Source: NITI Aayog Study Report on Agricultural Marketing and Farmer Friendly Reforms across Indian States and UTs, October, 2016.

Ranking of States based on AMFFRI

No state in the country has implemented the entire set of market reforms. Also, land leasing and harvest and marketing of some tree species on private farm land are subjected to various degrees of restrictions in almost all the States/UTs. The State of Maharashtra achieved first rank in implementation of various reforms. The State has implemented most of the marketing reforms and it offers best environment for doing agri-business among all the States/UTs. Gujarat ranks second with a score of 71.5 out of 100, closely followed by Rajasthan and Madhya Pradesh.

The State of Karnataka, which is considered progressive in implementing market reforms, did not figure among the top states for two reasons. It is lagging in liberalization of land lease and restrictions on felling of trees on private land. Two, it is not yet integrated with eNAM. However, the State has its own Unified Market Platform operated by ReMS, which has all the provisions as envisaged under eNAM. If this reform in the State is treated at par with eNAM, then Karnataka earns additional score of 7.4. This increases the score of the State in AMFFRI from 55.5 to 62.9 and raises its rank from 8th place to the 6th place.

Agriculturally developed State of Punjab ranks 14th with a score of 43.9. This is because of poor implementation of market reforms in the State.

Almost two third States/UTs could not reach even halfway mark of reforms score. Major States like U.P., Punjab, West Bengal, Assam, Jharkhand, Tamil Nadu and J&K are in this group. It is also pertinent to mention that some States/UTs do not have APMC Act. It is a challenge to provide ranking to these States in market reforms.

ROLE OF EXTENSION SERVICES

7.27 Agricultural extension plays a key role in boosting agricultural productivity, enhancing food security, improving rural livelihoods and changing farmers' preferences and farming practices positively (for example, adoption of better quality seeds and cutting down loss by getting their crops insured). A Report on Review of Agricultural Extension in India, 2010 by IFPRI had highlighted the increasing need to share knowledge and skills in order to provide locally relevant services that meet

the information needs of small and marginal farmers. Secondly, the report highlighted the need to bring small and marginal farmers within the framework of extension services.

7.28 As per the latest 'NSSO Report on Some Aspects of Farming in India, 2012-13' reflects results of the survey that collected information regarding the agricultural household's access to technical advices specific to the crops they harvested during the two halves of the agricultural year July 2012- June 2013.

Figure 7: Distribution of Agricultural Households by Source of Accessing Technical Advice

Source: NSS Report No. 573: Some Aspects of Farming in India, 2012-13.

7.29 The farmers tend to access technical advice more during the second half of the year i.e., during January-June (Figure 7). About 41 per cent of the agricultural households engaged in crop production

during the period July-December 2012 accessed technical advice on agriculture from some of the listed sources (Any agent). 'Progressive farmer' and 'radio/TV/newspaper/internet' were the two

most accessed sources for technical advice by the agricultural households during this period; 20 per cent of the agricultural households reported accessing technical advice from these two sources. There is thus greater scope to improve services by Krishi Vigyan Kendras (KVKs) and agricultural universities in agriculture advisory services.

Adoption of Accessed Advice and Its Usefulness

7.30 The adoption of technical advice was highest among the agricultural households that received advice from veterinary department and progressive farmers during both the halves of the agricultural year and was the least for the source radio/TV/newspaper/internet.

Table 5: Accessing Agricultural Households Who Adopted Technical Advice

Sources	Accessing households who adopted advice during the season Jan-June, 2013 (per cent)	Adopting households who reported the advice as useful during the season Jan-June, 2013 (per cent)
Extension Agent	86	94
Krishi Vigyan Kendra	79	98
Agricultural university /college	81	93
Private commercial agents (including drilling contractor)	87	96
Progressive farmer	92	97
Radio/t.v./newspaper/internet	64	95
Veterinary department	92	98
NGO	85	99
Any agent	85	NA

Source: NSS Report No. 573: Some Aspects of farming in India, 2012-13.

NA: Data not available.

7.31 Among the households that had adopted the received technical advice, majority of them found the advice to be beneficial which reflects the significance of extension services in agriculture.

Trend of Expenditure on Agriculture Research & Education

7.32 There has been an increasing trend in the expenditure on agricultural research and education as a percentage of total agricultural GVA with an exception of 2017-18.

Figure 8: Share of Expenditure on Agriculture Research & Education in Agricultural GVA (in per cent)

Source: Expenditure Budget

AGRICULTURAL CREDIT

7.33 The access to timely credit or finance is a critical determinant of profitability of agriculture. If credit is not available to purchase seeds at the time of sowing, or if lack of credit delays the administering of fertilizers, it can severely impact agricultural productivity. The regional

distribution of agricultural credit in India (Figure 9) shows that the distribution of credit is highly skewed. It is seen that the distribution of agricultural credit is low in North Eastern, Hilly and Eastern States. The share of North Eastern States has been less than one per cent in total agricultural credit disbursement.

Figure 9: Percentage of Agricultural Credit Disbursement

Source: Department of Agriculture Cooperation and Farmers Welfare.

*As on September 2018

7.34 The financial inclusion in the eastern and north eastern India is relatively less as compared to the South and West (Crisil, 2018)⁹. The small and marginal holdings constitute majority (more than 85 per cent) of total operational holdings in the eastern region, north-eastern region and central region, which warrants greater distribution of agricultural credit disbursement to this region.

ALLIED SECTORS: ANIMAL HUSBANDRY, DAIRYING AND FISHERIES

7.35 Livestock, poultry, dairying and fisheries is a sub-sector of agriculture that provides livelihood to agricultural households during phases of seasonal unemployment. According to the 19th Livestock Census, India has vast resource of livestock comprising about 300 million bovines, 65.1 million sheep, 135.2 million goats and 10.3 million pigs. Livestock farming in India is part of a composite farming system characterized by crop-livestock interactions. The by-products from several of

the crops (crop residues, hay and straw) are used as input for dairy production, in addition to other inputs for which they have to directly incur costs (cattle feed, veterinary medicines and artificial insemination). Animal dung and urine are used as inputs (bio-fertilizers and bio pesticides) by farmers to improve soil fertility.

Animal Husbandry and Dairying

7.36 India ranks first in milk production, accounting for 20 per cent of world production. Milk production in India has been increasing steadily over the years from 55.6 million tonnes in 1991-92 to 176.3 million tonnes in 2017-18, at an average annual growth rate of 4.5 percent. But there exists wide inter-state variability in milk production (Figure 10). The per capita availability of milk is determined by the production of milk in the State. While the All India per capita availability of milk is 375 grams per day, it varies between 71 grams per day in Assam to 1120 grams per day in Punjab.

Figure 10: Inter-State Variability in Milk Production & Per Capita Availability

Source: National Dairy Development Board.

⁹ Crisil Inclusix, February, 2018

Domestic Demand and Price of Milk

7.37 An analysis of the data on production of milk and its wholesale price index shows that though production of milk has been rising at an increasing rate, the change in its price shows a fluctuating trend. After rising 9 per

cent in 2014-15, it increased only by 2.91 per cent in 2016-17 (Table 6). There are three key drivers of increasing milk demand viz; (i) population growth (ii) urbanization and (iii) income growth which leads to an increase in the price of milk¹⁰.

Table 6: Milk Production and WPI of Milk

Year	Milk Production	Wholesale Price Index (WPI) of Milk	% Change in Production	% Change in Price
2012-13	132.4	107.6	-	-
2013-14	137.7	116	4.00	7.81
2014-15	146.3	126.6	6.25	9.14
2015-16	155.5	130.5	6.29	3.08
2016-17	165.4	134.3	6.37	2.91
2017-18	176.3	139.7	6.59	4.02

Source: National Dairy Development Board and Price Data from O/o Economic Adviser

7.38 Of the total milk produced in rural areas around 52 per cent is the marketable surplus. Of this surplus less than half of the milk sold is handled by the organized sector comprising of dairy cooperatives and private dairy companies and the rest by the unorganized sector.

Small Ruminant Sector

7.39 As per the 70th round of NSSO, livestock rearing was the principal source of income to about 3.7 per cent of the agricultural households. Sheep and goat are collectively known as small ruminants. India supports 16.1 per cent of the world's goat population and 6.4 per cent of its sheep (Food & Agriculture Organisation). Nationally, total livestock population is 512.1 million, of which goat and sheep population stands at 200 million (39 per cent of the country's total livestock population). Sheep/Goat rearing is practiced mainly by resource-poor families

and is a supplementary source of income for farmers during lean seasons especially for marginal, women and landless farmers.

7.40 Small ruminants have higher survival rates under drought conditions compared to large ruminants. Moreover, because of their higher reproductive rates and smaller reproductive cycle flock numbers can be restored more rapidly. With regard to goats, water economy is also an important biological feature. Due to their short reproductive cycles (short kidding interval) and high incidence of multiple births, there is potential for a higher annual off take of goats than seen with cattle & buffaloes. This allows farmers/producers a quick interval of selling part of their flock and generating cash income. Sheep/goats can also efficiently survive on available shrubs and trees in adverse harsh environment in low fertility lands where no other crop or animals can survive except some rare exceptions like camel.

¹⁰ Vision 2022, Dairy Development by Department of Animal Husbandry and Dairying.

Box 3: Schemes/Initiatives to Improve Productivity of Livestock and Dairy Sector

Rashtriya Gokul Mission (RGM): To undertake breed improvement programme for indigenous breeds so as to improve the genetic makeup and increase the stock. Indigenous cattle are well known for their quality of heat tolerance and ability to withstand extreme climatic conditions.

E Pashu Haat Portal: Under the scheme National Mission on Bovine Productivity, E Pashudhan Haat portal was developed for connecting breeders and farmers regarding availability of quality bovine germplasm. Through the portal, breeders/farmers can sell or purchase their breeding stock. Information on all forms of germplasm including semen embryos and live animals with all the agencies and stakeholders in the country has been uploaded on the portal.

National Livestock Mission: National Livestock Mission ensures intensive development of livestock, especially small livestock (sheep/goat, poultry rearing etc.) along with adequate availability of quality feed and fodder.

Livestock Health & Disease Control Scheme: Assistance provided under the Scheme for prevention and control of animal diseases like Foot and Mouth Disease (FMD), Peste des Petits Ruminants, (PPR), Brucellosis, Classical Swine Fever etc. In order to strengthen and expand the trained veterinary manpower, the number of recognized veterinary colleges has been increased.

Dairy Development: The Government is making efforts for strengthening infrastructure for production of quality milk, procurement, processing and marketing of milk and milk products through the following dairy development schemes viz; National Programme for Dairy Development, National Dairy Plan (Phase-I), Dairy Entrepreneurship Development Scheme, Dairy Processing and Infrastructure Development Fund (DIDF).

Fisheries Sector

7.41 Fisheries is a fast-growing sector in India, which provides nutrition and food security to a large population of the country besides providing income and employment to more than 14.5 million people. India is the second largest fish producer in the world with a total production of 13.7 million metric tonnes in 2018-19 of which 65 per cent was from inland sector. Almost 50 per cent of inland fish production is from culture fisheries, which constitutes 6.5 per cent of global fish production. The sector has been showing a steady growth in the total gross value added and accounts for 5.23 per cent share of agricultural GDP. Fish and fish product exports emerged as the largest group in agricultural exports and in value terms accounted for ₹47,620 crore in 2018-19.

7.42 Foreseeing the vast resource potential

and possibilities in the fisheries sector, a separate Department of Fisheries was created in February 2019. The Government has merged all the schemes of fisheries Sector into an umbrella scheme of 'Blue Revolution: Integrated Development and Management of Fisheries' focusing on increasing fish production and productivity from aquaculture and fisheries resources, both inland and marine. Towards realization of these objectives the creation of the Fisheries and Aquaculture Infrastructure Development Fund (FIDF) was approved with a total fund size of ₹7522.48 crore.

7.43 While enhancing incomes through livestock development and fisheries sector, it is significant to integrate the SDGs of ensuring incomes and livelihoods for the poor. This must be undertaken without compromising the needs of the future generation by over exploiting/depleting marine resources.

Box 4: Draft National Inland Fisheries and Aquaculture Policy (NIFAP), 2019

Although inland fisheries and aquaculture have grown in absolute terms, the development in terms of its potential is yet to be realized. The unutilized and underutilized vast and varied resources, in the form of 191,024 km of rivers and canals, 1.2 million hectares of floodplain lakes, 2.36 million hectares of ponds and tanks, 3.54 million hectares of reservoirs and 1.24 million hectares of brackish water resources offer great opportunities for livelihood development and ushering economic prosperity. As the sector is extremely diverse and dynamic, there is a need to streamline policies and programmes, infuse public and private investments, and take R&D benefits to the farmers and fishers. These will help to bring optimal resource utilization and development of the sector as an instrument of growth.

Major Policy Recommendations in the NIFAP, 2019

Inland fisheries: The policy measures recommended for inland fisheries include: (i) conserving indigenous resources, and restoring natural ecosystem of rivers, (ii) transferring management of fisheries in manmade reservoirs to the state fisheries departments for scientific enhancement and efficient governance, (iii) conserving and restoring ecosystem in natural wetlands, and (iv) bringing policies, law, and conservation programmes for development of fisheries in the Himalayan and north-eastern states.

Aquaculture: Measures recommended for development of aquaculture include: (i) developing state and area-specific action plans, (ii) redefining land use categories to include fisheries and aquaculture as components of agriculture, (iii) developing separate programmes for small farmers, (iv) simplifying requirements for registration and leasing of farms, (v) encouraging private sector in production of seed, feed and other aquaculture inputs, and (vi) developing the required regulatory frameworks.

Other policy measures include: (i) making registration of all aquaculture inputs compulsory, (ii) regulating exotic species, (iii) improving disease surveillance, (iv) diversifying species, (v) developing post-harvest and marketing infrastructure, (vi) strengthening fisheries cooperatives, (vii) strengthening of current welfare and social protection programmes in convergence with other similar schemes to enhance fishers and farmers' welfare, (viii) Strengthening of inland fisheries and aquaculture database through census at regular intervals covering inland fisheries and aquaculture and (ix) gender equity through empowerment of women and strengthening their organization and leadership capabilities.

FOOD SECURITY AND FOOD MANAGEMENT IN INDIA

7.44 Food security exists when all people, at all times, have physical and economic access to sufficient, safe and nutritious food that meets their dietary needs and food preferences to ensure an active and healthy life (FAO, 2018). The timely availability and affordability of food are critical for a developing country like India.

Food Security

7.45 The Global Food Security Index

(GFSI), 2018 considered four core issues of food security across 113 countries: (i) affordability, (ii) availability, (iii) quality & safety and (iv) natural resources and resilience. The GFSI ranks countries on a score of 0-100 based on the first three categories while natural resources and resilience is used as an adjustment factor. A rank of 100 is considered most favourable. GFSI's major goal is to assess in a timely manner which countries are most and least vulnerable to food insecurity (Table 7).

Table 7: India's Food Security Score, 2018

Category	India (Score)	Score of All Countries (average)	India's Rank out of 113 Countries
OVERALL	50.1	58.4	76
1) Affordability	46.4	56.3	73
2) Availability	54.1	60.3	70
3) Quality and Safety	48.2	58.2	79
1) AFFORDABILITY			
1.1) Food consumption as a share of household expenditure	53.5	55.6	61
1.2) Proportion of population under global poverty line	66.0	80.9	87
1.3) Gross domestic product per capita (US\$ PPP)	5.0	16.7	73
1.4) Agricultural import tariffs	46.4	75.4	108
1.5) Presence of food safety net programmes	50.0	65.5	66
1.6) Access to financing for farmers	75.0	62.6	43
2) AVAILABILITY			
2.1) Sufficiency of supply	27.4	56.8	100
2.2) Public expenditure on agricultural R&D*	0.0	15.6	62
2.3) Agricultural infrastructure	41.7	58.7	78
2.4) Volatility of agricultural production	93.5	86.4	39
2.5) Political stability risk	70.6	46.8	18
2.6) Corruption	25.0	37.6	49
2.7) Urban absorption capacity	94.8	76.9	3
2.8) Food loss	86.4	84.9	70
3) QUALITY AND SAFETY			
3.1) Diet diversification	39.7	56.0	81
3.2) Nutritional standards	100.0	80.1	1
3.3) Micronutrient availability	26.5	43.9	98
3.4) Protein quality**	18.5	47.2	98
3.5) Food safety	91.3	80.3	70

Source: Global Food Security Index, 2018, Economic Intelligence Unit, The Economist

Note: * It is a measure of govt spending on R&D taken as a per cent of GDP. Taken from OECD and Agricultural Science & Technology Indicators. ** measures the amount of high-quality protein in the average national diet.

7.46 India's food security challenges lie in the areas of low GDP per capita, sufficiency of supply, public expenditure on R&D and protein quality (Table 7). India ranks No.1 in Nutritional standards. India's overall Food Security Score is 50.1 out of 100 which ranks India 76 out of 113 countries. This reflects the need for India to further improve the management of food supply in various aspects.

7.47 The Central Government takes several steps to prudently manage foodgrain stock, to ensure adequate availability of wheat and rice in the Central pool, to keep a check on the open market prices, to augment the domestic availability of wheat and rice, and to ensure food security. The Government specifically undertakes the following measures:

(i) Announcing Minimum Support Prices and Central Issue Price

- (ii) Undertake procurement of food grains through FCI and decentralised procurement by State Agencies
- (iii) Maintain buffer stocks; and
- (iv) Open market sale of wheat and rice to check inflation.

MSP and Foodgrains Procurement

7.48 The Minimum Support Price (MSP) is announced for 22 crops before the sowing season. The objective is to give guaranteed prices and assured market to the farmers and protect them from price fluctuations. In 2018-19, the government raised the MSP of both kharif and rabi crops to ensure a return of at least 50 per cent above the cost of production to enhance farmers' income. An increase in MSP leads to increase in production, but only about one-third of the total production of foodgrains are procured. The rest of the foodgrains are sold in the open market (Table 8).

Table 8: Foodgrains Production, Procurement & Offtake (In million tonnes)

Years	Foodgrains Production minus pulses	Foodgrains Procurement	Procurement (% share in Production)	Offtake (TPDS + Welfare schemes)	Balance stock as of 1 st July
2015-16	235.22	64.91	27.6	53.73	54.72
2016-17	251.98	61.14	24.3	56.45	49.85
2017-18	259.60	69.10	26.6	57.85	53.48
2018-19	257.36	75.28	29.3	56.40	65.14

Source: Foodgrain Bulletin, DFPD.

7.49 In States like Punjab, Haryana, Chhattisgarh, Uttar Pradesh, Madhya Pradesh etc. where MSP procurement is well established, there arise problems in storage of foodgrains. The procurement from these States exceeds the buffer stock norms fixed by the Government in 2015 (Table 8). While the offtake of food grains from the Central Pool for TPDS and other welfare schemes varies between 53-58 million

tonnes, the stock of food grains in the Central Pool continues to be in excess of the prescribed buffer stock norms. As on 1st July, 2018, the Central stock was 65 million tonnes against the norm of 41 million tonnes. The government tries to liquidate excess stocks through open market sale to bulk buyers above the reserve price, which equals the MSP plus the procurement cost. Bulk buyers prefer wheat over rice

and in 2018-19 about nine million tonnes was sold in the open market of which 8.2 million tonnes was wheat. Exports of food grains by FCI at prices lower than the reserve price would effectively imply and

export subsidy. Moreover, this would expose India to disputes in the multilateral trade framework. Exports of food grains by FCI either as aid or commercial sale has been less than 1 million tonnes.

Table 9: Foodgrains Stocking Norms for Central Pool from January, 2015
(in million tonnes)

Date	Rice			Wheat			Total food grains
	Operational stocks	Strategic Reserve	Total	Operational stocks	Strategic Reserve	Total	
1st April	11.58	2.00	13.58	4.46	3.00	7.46	21.04
1st July	11.54	2.00	13.54	24.58	3.00	27.58	41.12
1st October	8.25	2.00	10.25	17.52	3.00	20.52	30.77
1st January	5.61	2.00	7.61	10.8	3.00	13.80	21.41

Source: Department of Food and Public Distribution.

7.50 According to an Evaluation Study on Minimum Support Price conducted by Development Monitoring & Evaluation Office (DMEO), NITI Aayog (January 2016), in majority of the sample states, farmers are unaware of the MSP announcement before the sowing season. In Eastern India, in States such as Assam, West Bengal, the poor impact of the scheme could be judged from the fact that none of the selected farmers were even aware of the existence of such a scheme. In certain cases, though aware of the MSP, the absence of procurement centres in the villages, transportation costs, reluctance of mill owners to buy small quantities from the farmers remain stumbling blocks.

Food Subsidy

7.51 Food subsidy comprises of two main components. The first component includes subsidy provided to the Food Corporation of India (FCI) for procurement and distribution of wheat and rice under the National Food Security Act (NFSA), 2013 and other welfare schemes and for maintaining the buffer stock of food grains as a measure of food security. The second component comprises subsidy

provided to States undertaking decentralized procurement. The acquisition and distribution costs of procuring food grains for the central pool constitute the economic cost. The difference between the per quintal economic cost and the per quintal Central Issue Price (CIP) gives the quantum of per quintal consumer subsidy.

7.52 The economic cost of wheat for FCI operations has increased from ₹1908.32 per quintal in 2013-14 to ₹2435.23 per quintal in 2018-19. Similarly, the economic cost of rice has increased from ₹2615.51 per quintal in 2013-14 to ₹3472.94 per quintal in 2018-19. However, the CIP of wheat and rice for NFSA beneficiaries has not been revised from ₹200 per quintal in case of wheat and ₹300 per quintal in case of rice. These rates were fixed under the National Food Security Act, 2013 initially for a period of three years from the date of commencement of the Act (July 13, 2013). Thereafter, they were to be fixed by the Central Government from time to time, while not exceeding the minimum support price.

7.53 In order to ensure food security to the vulnerable sections, Government continues with the subsidized pricing under NFSA. This has resulted in widening of the gap between the economic cost and CIP and the per quintal food subsidy incurred by the Government has risen substantially over the years. The subsidized CIPs of ₹3/2/1 per kg for rice, wheat and coarse grains respectively under NFSA were earlier applicable only to the Antyodaya Anna Yojana Families (*which constitute about 2.5 crore poorest of the poor households*) under the Targeted Public

Distribution System (TPDS). The BPL/APL categories were required to pay higher CIPs.

7.54 The NFSA provides a wider coverage than the erstwhile TPDS. It also made the Antyodaya CIPs uniformly applicable to all NFSA beneficiaries. APL/BPL categorization was done away with under NFSA. The wider coverage provided under the Act together with lower CIPs have obvious implications for the food subsidy bill. The trend in the amount of food subsidy released by the Government of India since 2012-13 may be seen in Figure 11.

Figure 11: Expenditure on Food Subsidy (₹ Crore) & Annual Growth Rate (%)

Source: Department of Food & Public Distribution.

*As on 05.03.2019

For sustainability of food security operations, the issue of burgeoning food subsidy bill needs to be addressed.

Computerization of Targeted Public Distribution System

7.55 The Targeted Public Distribution System (TPDS) is operated under the joint responsibility of the Central and State/UT Governments. The Central Government is responsible for procurement, allocation and transportation of food grains upto the

designated depots of the FCI. The State Governments are responsible for allocation and distribution of food grains involving identification of eligible beneficiaries/families, issuance of ration cards to them and supervision and monitoring of functioning of Fair Price Shops (FPSs).

7.56 Instructions have been issued to States/UTs and Food Corporation of India (FCI) to ensure supply of good quality food grains under PDS. Therefore, as and when complaints are received by the Government

from individuals and organizations as well as through press reports, they are sent to State/UT Governments concerned for inquiry and appropriate action. An offence committed in violation of the provisions of TPDS (Control)

Order, 2015 is liable for penal action under the Essential Commodities Act, 1955. Thus, the Order empowers State/UT Governments to take punitive action in case of contravention of relevant provisions of these Orders.

Table 10: Achievements of TPDS Computerisation

Scheme Components	Achievement
Digitization of ration cards/beneficiary's data	Completed in all States/UTs
Online allocation of food grains	Completed in all States/UTs except UTs of Chandigarh & Puducherry, which have adopted DBT/Cash transfer scheme
Computerization of supply chain management	Completed in 25 States/UTs and the work is in progress in the remaining States/UTs
Transparency portals	Set up in all States/UTs
Intra-State portability of ration cards to enable purchase from any FPS in the State	Operational in 11 States
Grievance redressal facilities	Toll-free helplines/online registration facility is available in all States/UTs

Source: Department of Food & Public Distribution.

7.57 To modernize and bring about transparency in the TPDS operations, the Central Government is implementing the Scheme 'End-to-end Computerisation of TPDS Operations'¹¹ on cost sharing basis with the States/UTs. The validity of the scheme was extended upto March 2019. The scheme provides for digitization of ration cards and beneficiary records, computerization of supply chain management, setting up of transparency portal and grievance redressal mechanisms. The outcomes of the scheme are given at Table 10.

7.58 Through technology and digital

intervention, the TPDS has become more transparent at the FPS. However, there needs to be holistic monitoring along the supply chain to completely prevent the diversions and leakages of foodgrains and also to maintain the quality of foodgrains distributed through the FPS.

7.59 There are 5.33 lakh Fair Price Shops (FPSs) and over 23 crore ration card holders in the country as on March 2019. About 3.95 lakh FPSs have been automated by installing the electronic point of sale device. However, the level of computerization of FPSs across States is not uniform (Figure 12).

¹¹ The Justice Wadhwa Committee Report for PDS (2011) divided computerization into two parts: a first one to prevent diversion, and a second one to enable secure identification at ration shops. The Committee has recognized Chhattisgarh as a model state for the first component, and Gujarat as a model for the second.

Figure 12: End-to end Computerization in Fair Price Shops

Source: Department of Food & Public Distribution.

CHAPTER AT A GLANCE

- Although, contribution of Agriculture's Gross Value Added (GVA) to overall GVA has been declining (14.4 per cent in 2018-19) it is still a crucial sector, as a large proportion of the population engage in agriculture. Furthermore, agriculture is critical for the country's food security. Gross Capital Formation (GCF) in agriculture as percentage of GVA declined to 15.2 per cent in 2017-18 and the role of public sector in GCF in agriculture has increased.
- The number of operational land holdings and area under operation have shifted towards small and marginal farmers. Women's participation in agriculture has increased and their concentration is highest (28 per cent) among small and marginal farmers.
- Around 89 per cent of groundwater extracted is used for irrigation and crops such as paddy and sugarcane consume more than 60 per cent of irrigation water. Focus should shift from land productivity to 'irrigation water productivity'. Therefore devising policies to incentivize farmers to improve water use should become a national priority. Thrust should be on micro-irrigation that can improve water use efficiency.
- Fertilizer response ratio has been declining over time. Organic and natural farming techniques including Zero Budget Natural Farming (ZBNF) can improve both water use efficiency and soil fertility.
- Adopting appropriate technologies through Custom Hiring Centers and implementation of ICT are critical to improve resource use efficiency among small and marginal farmers.
- Diversification of livelihoods is critical for inclusive and sustainable development in agriculture and allied sectors. Policies should focus on (i) dairying as India is the largest producer of milk;(ii) livestock rearing particularly of small ruminants; and (iii) fisheries sector, as India is the third largest producer.

ACTION PLAN FOR DOUBLING THE INCOME OF FARMERS

The Government has set a target of doubling of farmers' income by the year 2022. For the said purpose, the Government had constituted an Inter-Ministerial Committee to examine issues relating to Doubling of Farmers' Income (DFI) and recommend strategies. The Committee has identified seven sources of income growth viz, improvement in crop productivity; improvement in livestock productivity; resource use efficiency or savings in the cost of production; increase in the cropping intensity; diversification towards high value crops; improvement in real prices received by farmers; and shift from farm to non-farm occupations. Several initiatives have already been rolled out on the recommendations of DFI Committee which inter-alia include advocating progressive market reforms through the State Governments, Encouraging contract farming through the State Governments by promulgating of Model Contract Farming Act, Up-gradation of Gramin Haats to work as centers of aggregation and for direct purchase of agricultural commodities from the farmers, e-NAM to provide farmers an electronic online trading platform, Distribution of Soil health Cards to farmers so that the use of fertilizers can be rationalized, Increase water efficiency through Pradhan Mantri Krishi Sinchayee Yojana (PMKSY)-“ Per drop more crop”, Better insurance coverage to crops for risk mitigation under Pradhan Mantri Fasal Bima Yojana (PMFBY), providing total interest subvention up to 5 per cent (inclusive of 3 per cent prompt repayment incentive) on short-term crop loans up to ₹3 lakh, thus making loan available to farmers at a reduced rate of 4 per cent per annum and extended the facility of Kisan Credit Card (KCC) for animal husbandry and fisheries related activities as well as Interest Subvention facilities to such categories of farmers.

Giving a major boost for the farmers' income, the Government has approved the increase in the Minimum Support Price (MSPs) for all Kharif & Rabi crops for 2018-19 season at a level of at least one and half times of the cost of production.

Further, with a view to provide social security net for small and marginal farmers as they have minimal or no savings to provide for old age and to support them in the event of consequent loss of livelihood, the Government has decided to implement a new Central Sector Scheme for providing old age pension of ₹3000/- to the eligible small and marginal farmers, subject to certain exclusion clauses, on attaining the age of 60 years. The scheme aims to cover around 5 crore beneficiaries in the first three years. It would be a voluntary and contributory pension scheme, with entry age of 18 to 40 years. The Government has approved a budgetary provision of ₹10774.50 crore for the scheme till March 2022.

The Government has constituted an Empowered Body on 23.01.2019 for monitoring the implementation of the recommendations of the DFI Strategy.

Industry and Infrastructure

Sloth makes all things difficult, but industry, all things easy.

— Benjamin Franklin

The king shall promote trade and commerce by setting up trade routes by land and by water and market town/ports.

— The Arthashastra

The story of economic growth is half-documented without narrating the story of industry-infrastructure nexus. India, being home to more than 133 crore people, needs to build a robust industry with a buoyant and resilient infrastructure. The industrial growth rate in terms of Index of Industrial Production (IIP) during 2018-19 stood at 3.6 per cent as compared to 4.4 per cent growth rate in 2017-18. The moderation in 2018-19 has been mainly due to subdued manufacturing activities in Q3 and Q4 due to slower credit flow to medium and small industries, reduced lending by NBFCs owing to liquidity crunch, tapering of domestic demand for key sectors such as automotive sector, pharmaceuticals, and machinery and equipment, volatility in international crude oil prices etc. Meanwhile, the eight core infrastructure supportive industries have achieved the overall growth rate of 4.3 per cent during 2018-19 similar to the increase achieved in 2017-18. The Government has initiated a number of measures in crucial sectors to accelerate higher manufacturing growth such as Start-up India, Ease of doing Business, Make in India, Foreign Direct Investment Policy reforms. India has considerably improved its ranking to 77th position in 2018 among 190 countries assessed by the World Bank Doing Business Report, 2019 in which India has leapt 23 ranks over its rank of 100 in 2017.

A robust and resilient Infrastructure is fundamental and essential for budding industries. While India has invested in its infrastructure over the years, the challenge is to mobilize adequate investment in infrastructure sector which runs into several trillions of dollars. The investment gaps in the infrastructure would have to be addressed through various innovative approaches with the collaboration of both public and private sector.

INDIAN INDUSTRY: AN OVERVIEW

8.1 Industry plays a decisive role in determining the overall growth of an economy. The industrial sector performance during 2018-19 has improved as compared to 2017-18. As per the provisional estimates

of the Annual National Income 2018-19 released by Central Statistics Office (CSO), the growth of industry real Gross Value Added (GVA) was higher at 6.9 per cent in 2018-19 as compared to 5.9 per cent in 2017-18 (Table 1). Construction and manufacturing

sectors have experienced 8.7 per cent and 6.9 per cent growth rate respectively during 2018-19. The mining and quarrying sector has experienced sluggish growth in 2018-19 as compared to 2017-18.

Index of Industrial Production (IIP)

8.2 The IIP is a measure of industrial performance which sheds some light on where we stand in terms of industrial growth.

The IIP assigns a weight of 77.63 per cent to manufacturing sector, 14.37 per cent to mining sector and 7.99 per cent to electricity sector. The industrial growth rate in terms of IIP was 3.6 per cent in 2018-19 as compared to 4.4 per cent in 2017-18. The Mining, Manufacturing and Electricity sectors registered positive growth rates of 2.9 per cent, 3.6 per cent and 5.2 per cent respectively in 2018-19. (Table 2).

Table 1: Gross Value Added in Industry Sector

Sectors	Growth rate of GVA at constant prices (in per cent)			Share of GVA at current prices (in per cent)
	2016-17	2017-18	2018-19 (P)^	2018-19 (P)^
Mining & Quarrying	9.5	5.1	1.3	2.4
Manufacturing	7.9	5.9	6.9	16.4
Electricity, Gas, Water Supply & Other Utility Services	10.0	8.6	7.0	2.8
Construction	6.1	5.6	8.7	8.0
Industry	7.7	5.9	6.9	29.6

Source: Central Statistics Office (CSO). ^ P: Provisional estimates

Table 2: Growth Rates of IIP (Base: 2011-12) (in Per cent)

Sector/ UBC	Weight	2016-17	2017-18	2018-19 (P)
Sectoral classification				
Mining	14.3725	5.3	2.3	2.9
Manufacturing	77.6332	4.4	4.6	3.6
Electricity	7.9943	5.8	5.4	5.2
General Index	100.00	4.6	4.4	3.6
Use Based Classification (UBC)				
Primary goods	34.0486	4.9	3.7	3.5
Capital goods	8.2230	3.2	4.0	2.8
Intermediate goods	17.2215	3.3	2.3	-0.5
Infrastructure/ construction goods	12.3384	3.9	5.6	7.5
Consumer durables	12.8393	2.9	0.8	5.5
Consumer non-durables	15.3292	7.9	10.6	3.9

Source: CSO. P: Provisional

8.3 In terms of use-based classification of IIP, the index of infrastructure/construction goods remained higher at 7.5 per cent in 2018-19 driven by the robust performance of cement and steel sectors (Figure 1). Large scale public spending has boosted the demand for these sectors. Primary goods and consumer non-durables have registered a positive growth rate of 3.5 per cent and 3.9 per cent in 2018-19 respectively. On the other hand, the capital goods sectors registered a

moderate growth of 2.8 per cent in 2018-19 which is indicative of shortfall in investment activities. Overall investment as indicated by the real gross fixed capital formation has increased by 10 per cent in 2018-19. But its share in GDP at current prices is estimated to be only marginally higher at 29.3 per cent during 2018-19. Within consumer goods, consumer durables have shown improved performance with a growth of 5.5 per cent in 2018-19.

Figure 1: Monthly growth (in per cent) of IIP (Use based classification)

Source: CSO.

8.4 The Index of eight core industries measures the performance of Coal, Crude Oil, Natural Gas, Petroleum Refinery Products, Fertilizers, Steel, Cement and Electricity. The eight core industries comprise about 40.3 per cent weight in the IIP. The overall Index of eight core industries registered a growth rate of 4.3 per cent in 2018-19 similar to the increase achieved in 2017-18. The production of Coal, Steel, Cement, Electricity, Refinery Products, Natural Gas and

Fertilizers registered positive growth rate in 2018-19 with Cement and Coal registering a higher growth rate of 13.3 per cent and 7.4 per cent respectively (Table 3). The growth rate of 3 months moving average Month-on-Month (M-o-M) of IIP, eight core industries and manufacturing sector during 2017-18 and 2018-19 (in per cent) shows that the three indicators move simultaneously and started improving from February 2019 (Figure 2).

Table 3: Growth in production of Eight Core Industries (in Per cent)

Sector	Weight	2016-17	2017-18	2018-19 (P)
Coal	10.3335	3.2	2.6	7.4
Crude Oil	8.9833	-2.5	-0.9	-4.1
Natural Gas	6.8768	-1.0	2.9	0.8
Refinery Products	28.0376	4.9	4.6	3.1
Fertilizers	2.6276	0.2	0.03	0.3
Steel	17.9166	10.7	5.6	4.7
Cement	5.3720	-1.2	6.3	13.3
Electricity	19.8530	5.8	5.3	5.2
Overall Index	100.00	4.8	4.3	4.3

Central Public Sector Enterprises (CPSEs)

8.5 The CPSEs play a significant role in Indian economy. According to Department of Public Enterprises, there are 339 CPSEs as on 31 March, 2018. Out of these 339 CPSEs, 257 are in operation and 82 are non-operational during 2017-18. Out of the operating 257 CPSEs, 184 CPSEs were profit making, 71 loss making and 2 CPSEs at no profit no loss. The profit of profit making CPSEs (184) stood at ₹1,59,635 crore, while the loss of loss-making CPSEs (71) stood at ₹31,261 crore during 2017-18. The overall net profit of the 257 operating CPSEs went up by 2.29

per cent to ₹1,28,374 crore during 2017-18. Further, the CPSEs contribution to the total Central Exchequer decreased by 2.98 per cent in 2017-18 as against the previous year. A comparative analysis of the performance of a few CPSEs vis-a-vis private sector using 5 year average net profit margin (in per cent) in selected sectors show that there is a great scope for improvement for CPSEs in some sectors as the private sector firms have performed relatively better than the public sector firms (Figure 3). The return on assets and return on equity depicts a similar picture of the public and private firms in these selected industries.

Figure 3: Performance of a few CPSEs vis-a-vis Private sector in terms of 5 year average Net Profit Margin in selected sectors (in per cent).

Source: CMIE

Corporate sector Performance

8.6 Growth of sales (YoY) of over 1700 non-governmental non-financial (NGNF) listed manufacturing companies was 21.6 per cent in Q1, 19.3 per cent in Q2 and 13.2 per cent in Q3 during 2018-19. According to RBI, NGNF listed manufacturing companies posted double digit growth rate in nominal sales in Q4 of 2016-17 and continued its recovery path till Q2 of 2018-19 with minor moderations in between. In Q3 of 2018-19,

moderation was observed in nominal sales growth of manufacturing companies due to subdued demand conditions faced by textiles; iron and steel; motor vehicles and other transport equipments. On the positive side, the demand scenario improved for consumer driven sectors such as food products, beverages and pharmaceuticals. The capacity utilization of India's manufacturing sector increased to 75.9 per cent in Q3 of 2018-19 which is higher than Q3 of 2017-18 (Table 4).

Table 4: Growth of Sales, Net Profits and Capacity Utilisation for the Corporate Sector (in Per cent)

Item	2016-17				2017-18				2018-19		
	Q1	Q2	Q3	Q4	Q1	Q2	Q3	Q4	Q1	Q2	Q3
Sales	-1.0	3.7	4.9	10.2	8.9	9.5	14.0	13.4	21.6	19.3	13.2
Net Profit	28.8	27.5	57.5	22.2	-33.6	-4.0	-2.4	6.3	59.8	29.4	43.1
Capacity Utilisation	71.7	72.0	71.0	74.6	71.2	71.8	74.1	75.2	73.8	74.8	75.9

Note: The sales and net profits of over 1700 listed manufacturing companies and capacity utilisation on a sample of over 800 responding Companies.

Gross Capital Formation in Industrial Sector

8.7 As per the data on national income, consumption expenditure, saving and capital formation released by CSO on 31 January, 2019, the rate of growth of Gross Capital Formation (GCF) in industry has registered a sharp rise from (-) 0.7 per

cent in 2016-17 to 7.6 per cent in 2017-18, showing upward momentum of investment in industry. The Mining & Quarrying, Manufacturing, Electricity, Gas, Water Supply & Other Utility Services and Construction had registered a growth rate of 7.1 per cent, 8.0 per cent, 6.1 per cent and 8.4 per cent respectively in 2017-18 (Table 5).

Table 5: Growth rate of GCF by Industry (at 2011-12 constant prices) (in Per cent)

	2015-16*	2016-17#	2017-18@
Industry	11.1	-0.7	7.6
Mining & Quarrying	-19.6	16.4	7.1
Manufacturing	11.4	1.3	8.0

Note:*= Third Revised Estimates, #=Second Revised Estimates, @=First Revised Estimates

Credit Flow to the Industrial sector

8.8 According to RBI, the growth in gross bank credit flow to the industrial sector has increased by 6.9 per cent in March, 2019 compared to the increase of 0.7 per cent in March, 2018. Credit flow to industries like chemicals and chemical products, cement and cement products, all engineering industries,

construction, infrastructure, other industries increased in 2018-19 while a sharp decline was noticed in industries like textiles, petroleum, coal products and nuclear fuel, basic metal & metal products in 2018-19. Mining and quarrying, food processing, vehicles, vehicle parts and transport equipment registered lower growth rate in 2018-19 (Table 6).

Table 6: Growth of Industry-wise deployment of Gross Bank Credit (in Per cent)

	2017-18*	2018-19**
Industry	0.7	6.9
Mining and Quarrying (including Coal)	19.7	1.1
Food processing	6.8	1.1
Textiles	6.9	-3.0
Petroleum, coal products & nuclear fuel	9.4	-3.1
Wood and Wood Products	3.3	10.2
Chemicals and Chemical Products	-5.5	17.5
Glass and glassware products	6.5	17.0
All engineering	3.8	8.6
Cement & cement products	-3.1	5.9
Basic metal & metal products	-1.2	-10.7
Vehicles, Vehicle Parts and Transport equipment	7.0	1.4
Construction	9.5	10.4
Infrastructure	-1.7	18.5
Other industries	-4.2	6.8

Key Initiatives taken to boost Industrial Sector in India

8.9 The Government of India has taken several industry specific reform initiatives since 2014 that has significantly improved the overall business environment. To improve ease of doing business, the emphasis has been given to simplification and rationalization

of the existing rules and introduction of information technology to make governance more efficient and effective. As per the World Bank Doing Business (DB) Report released on 31 October 2018, India has considerably improved its ranking to 77th position among the 190 countries and has leapt 23 ranks over its previous rank of 100 (Figure 4).

Figure 4: India’s ranking in World Bank Ease of Doing Business Reports

8.10 The World Bank Doing Business Report 2019 covers 10 indicators which span the life-cycle of a business. India has improved

its rank in 6 out of 10 indicators and has moved closer to international best practices (Distance to Frontier score) (Figure 5).

Figure 5: India’s progress in Ease of Doing Business Report Rankings

Start-up India

8.11 Start-ups drive economic growth, create employment and foster a culture of innovation. In order to promote innovation and entrepreneurship among enterprising youth, the Hon’ble Prime Minister of India

had announced the “Start-up India, Stand-up India” initiative on August 15, 2015. The initiative aims to create an ecosystem that is conducive for the growth of Start-ups. A plan comprising 19 action points was unveiled on January 16, 2016. As on March 1, 2019, 16,578 new start-ups were recognized

across 499 districts, 47 per cent Start-ups from Tier II and III cities and 46 per cent of Recognized Start-ups have at least one woman director. Steps are taken for easing regulations such as exemption from Income tax on investments raised by Start-ups, 22 regulatory reforms implemented to improve Ease of Doing Business for Start-ups, Self-certification regime for six labour laws and three environmental laws, Start-up India Hub

as ‘One Stop Shop’ for the start-up ecosystem in which 2,37,902 users have availed free Start-up India Learning Program to build business plans, 647 Start-ups supported through dedicated facilitation services, 1,262 start-ups connected to mentors, etc. Maharashtra, followed by Karnataka and Delhi, are among the top ten performers in terms of State-wise distribution of recognized Start-ups in India (Table 7).

Table 7 : Major State-Wise Distribution of recognized Start-ups in India (in per cent)

Sl. No.	State / Union Territory	Percentage of Recognized Start-ups
1	Maharashtra	18.91
2	Karnataka	14.67
3	Delhi	13.38
4	Uttar Pradesh	8.23
5	Telangana	5.59
6	Haryana	5.33
7	Tamil Nadu	5.18
8	Gujarat	5.17
9	Kerala	4.00
10	West Bengal	3.03

Source: DPIIT

8.12 As per industry-wise distribution of recognized start-ups, IT Services accounted for around 15 per cent followed by

Healthcare and Life Sciences at around 9 per cent and education at 8 per cent (Table 8):

Table 8: Major Industry-Wise Distribution of Recognised Start-ups in India (in per cent)

Sl. No.	Industry	Per centage of Recognized Start-ups
1	IT Services	15.23
2	Healthcare & Life sciences	8.97
3	Education	8.07
4	Professional & Commercial Services	4.15
5	Food & Beverages	4.01

7	Finance, Technology	3.10
8	Renewable Energy	3.09
9	Internet of Things	3.05
10	Technology Hardware	3.04

Source: DPIIT

Foreign Direct Investment (FDI)

8.13 FDI is a major driver of economic growth as it enhances productivity by bringing capital, skills and technology to the host country. The Government is playing a proactive role in investment promotion through a liberal FDI policy. During 2018-19, total FDI equity inflows were US\$44.36 billion as compared to US\$44.85 billion during 2017-18. Out of FDI equity inflows of US\$44.36 billion during 2018-19, more than 70 per cent have come mainly from Singapore, Mauritius, Netherlands, Japan and United Kingdom.

SECTOR WISE ISSUES AND PERFORMANCES

Steel

8.14 The steel sector is one of the core industries in the economy that have strong forward and backward linkages in terms of material flows and income generation. As per estimates, the Steel industry directly contributes to about 1.4 to 2 per cent of India's GDP and its weightage in the official

IIP is 7.22 per cent and it accounts for 7.53 per cent of the Wholesale Price Index (WPI). Globally, India is the second largest producer of crude steel in the world surpassing Japan with a global share of 6 per cent. During 2018-19, crude steel's production stood at 106.56 million tonnes, witnessing a growth rate of 3.3 per cent over the corresponding period of 2017-18 at 103.13 million tonnes with utilisation capacity of 77.24 per cent.

8.15 India is the third largest consumer of the finished steel after China and USA, however, its per capita consumption is only 69 kg as against the global average of 214 kg (Figure 6). With huge investments in infrastructure, construction and automobile sector, steel demand and corresponding consumption is growing at an average of 7.4 per cent. This will lead steel production to go up to 255 million tonnes by 2030 and per capita steel consumption to 160 kg.

8.16 In the global scenario, the year 2018-19 witnessed weakening of steel market fundamentals, increase in trade friction,

Figure 6: Per capita consumption per kg of Indian steel sector from 2012 to 2018 (in Kg)

Source: Ministry of Steel & World Steel Association

imposition of protectionist measures and excess steel capacity. Pursuant to the imposition of trade restrictive measures by USA, European Union and Canada, India's exports have declined. The total export with highest volume of 9.62 million tonnes during 2017-18 fell to 6.36 million tonnes during 2018-19. On the other hand, imports have gone up particularly from Korea, Japan and ASEAN countries. India remained an importer of finished steel at 7.84 million tonnes during 2018-19 as against 7.48 million tonnes during 2017-18.

8.17 The National Steel Policy, 2017 gives broad policy directives to the industry for encouraging long-term growth for Indian steel on both supply and demand fronts. It envisages focus on domestic production especially of value added steel in order to meet the growing demand. Further, there is a need for investment in capacity addition and infusion of modern technology for production.

8.18 Some of the key challenges faced by the Indian steel Industry are capacity expansion as the demand for steel is bound to rise with economic growth. High grade and value-added steel are used in power, defence and automobile which is currently imported. Difficulties in acquiring mining lease and high dependency on import of coking coal add to cost of steel production. High logistics costs also act as a major constraint.

Leather and Footwear

8.19 Indian leather and footwear industry, a highly employment intensive sector, is the second largest producer of footwear, second largest exporter of leather garments and fifth largest exporter of leather goods. The global demand for footwear is moving towards non leather footwear, while Indian tax policies favour leather footwear production. India

faces high tariffs in partner country markets for leather goods and non-leather footwear. In order to address these challenges, a special package of ₹2600 crore under the scheme Indian Footwear and Accessories Development Programme is being implemented (2017-20). The special package for the leather industry has the potential to generate 3.24 lakh new jobs in three years and assist in formalization of 2 lakh jobs.

Gems and Jewellery

8.20 The gem and jewellery sector contributes to exports and employment generation of around 5 million. During the year 2017-18, the gem and jewellery exports were 13.69 per cent of total merchandise exports in the country. With a view to strengthen the sector, the Government has taken a number of steps, such as establishment of Special Notified Zone, setting up of Common Facility Centres for gems and jewellery sector, creation of separate ITC HS Code for lab grown diamond, reduction of GST rates for cut and polished diamonds and precious stones, exempting Integrated Goods and Service Tax on import of gold by specified agencies and banks, exemption from GST on supply of gold by nominated agencies to exporters and providing financial assistance for participation of international fairs. To strengthen the domestic manufacturing and to help organise the small scale based domestic jewellery industry, a Domestic Council for Gems & Jewellery has been envisaged and launched in January 2019.

MSME

8.21 The Micro, Small and Medium Enterprises (MSME) sector in India plays a crucial role by providing large employment opportunities, industrialization of rural

areas, reducing regional imbalances, etc. Government is committed to supporting this important sector with better credit flow, technology upgradation, ease of doing business and market access. In November 2018, Government made various key announcements for faster growth of this sector and for promoting ease of doing business that included ‘in-principle approval’ for loans up to ₹1 crore within 59 minutes through online portal. Interest subvention of 2 per cent for all GST registered MSMEs on incremental credit up to ₹1 crore is also being provided and will be in operation for a period of two financial years 2018-19 and 2019-20 with an allocation of ₹975 crore. Small Industries Development Bank of India acts as the Nodal Agency for implementation of the Scheme. The term loan or working capital extended by Scheduled Commercial Banks and RBI Registered Systemically Important Non-Banking Finance Companies and Regional Rural Banks will be covered under the Scheme.

8.22 The Government has undertaken a number of schemes/programmes like the Prime Minister’s Employment Generation Programme, Credit Guarantee Trust Fund for Micro and Small Enterprises, Credit Linked Capital Subsidy Scheme for Technology Up-gradation, Scheme of Fund for Regeneration of Traditional Industries, and Micro and Small Enterprises-Cluster Development Programme for the establishment of new enterprises and development of existing ones.

Textiles and Apparels

8.23 Indian textile industry, the second largest manufacturer and exporter in the world, contributes 12.65 per cent to

manufacturing and 2.3 per cent to GDP. India has a share of 5 per cent of the global trade in textiles and apparel. During 2018-19, the share of textile and clothing in India’s total exports stands at a significant 12 per cent. The sector is the biggest employer after agriculture employing 4.5 crore people directly and another 6 crore people in allied sectors. Apparel also plays a critical role in improving social dynamics as mostly women are employed in the sector. Above all, the backward linkages of the sector to the rural economy give huge opportunities to millions of farmers, artisans, handloom and handicraft manufacturers. The sector is perfectly aligned with Government’s key initiatives viz., Make in India, Skill India, Women Empowerment and Rural Youth Employment.

8.24 The textile supply chain is perhaps one of the most diverse in terms of the raw materials used, technologies deployed and products produced. However, the challenges lie in the absence of scale or fragmented and scattered manufacturing. Except for the spinning segment, all other sectors lack scale. While the ginning and spinning sectors are on par with international standards, marginal technological gap exists in weaving, processing and embroidery and larger gaps in knitting, technical textile and garmenting segments. In recent times, several developing countries, enjoying zero/preferential duty access to key markets, have become major competitors of India in the garments sector. Indian exports of apparel continue to face higher average tariffs in external markets as compared with competing nations which enjoy duty free access.

8.25 To address the issue of competitiveness and to boost textiles and apparel exports, Government announced a Special Package for garments and made-ups sectors. The

package offers Rebate of State Levies, labour law reforms, additional incentives under Amended Technology Up-gradation Fund Scheme and relaxation of Section 80JJAA of Income Tax Act. Further, the rates under Merchandise Exports from India Scheme have been enhanced from 2 to 4 per cent for apparel, 5 to 7 per cent for made-ups, handloom and handicrafts from 1 November 2017. Products such as fibre, yarn and fabric in the textile value chain are being strengthened and made competitive through various schemes. Assistance is also provided to exporters under Market Access Initiative Scheme. Further, Government has enhanced interest equalization rate for pre and post shipment credit for the textile sector from 3 to 5 per cent with effect from 02 November, 2018. The benefit which was limited to only manufacturers earlier has been extended to merchant exporters from 2019.

INFRASTRUCTURE

8.26 In Economic literature, infrastructure is popular by the name “Overhead Capital” or “Social Overhead Capital”. The famous economist A.O Hirschman stated that Social Overhead capital is the “basic services without which primary, secondary

and tertiary productive activities cannot function”. The very success of social and economic transformation of an economy lies in providing inclusive and sustainable infrastructure amenities to the people and the pace of economic growth depends on how competently and judiciously an economy is able to address its infrastructure bottlenecks. SDG goal number 9 aims to “Develop quality, reliable, sustainable and resilient infrastructure, including regional and trans-border infrastructure, to support economic development and human well-being, with a focus on affordable and equitable access for all”.

8.27 The role of infrastructure development in economic growth has been well recognized in the literature. The correlation between infrastructure investment and economic growth for India is very high (Figures 7 to 10). The correlation of investments in inland, road, rail and airport infrastructure to GDP are higher than 0.90 indicating that there exists a strong correlation between GDP and investment in infrastructure. This further reiterates the fact that massive investment is needed in infrastructure to achieve targeted economic growth in the country.

Figure 7: GDP & Inland transport infrastructure investment

Figure 8: GDP & Airport infrastructure investment

Figure 9: GDP & rail infrastructure investment**Figure 10: GDP & road transport investment**

Source: Indian Public Finance Statistics, MOSPI & ITF-OECD (Rail Investment Data)

Note: beta is regression coefficient/slope, r^2 is r squared, p is p-value

8.28 India needs to spend 7-8 per cent of its GDP on infrastructure annually, which translates into annual infrastructure investment of US\$200 billion currently. However, India has been able to spend only about US\$100-110 billion annually on infrastructure, leaving a deficit of around US\$90 Billion per annum. Given the fiscal constraints that leave less room for expanding public investment at the scale required, there is an urgent need to accelerate the flow of private capital into infrastructure. With the aim of boosting investment in infrastructure, National Investment and Infrastructure Fund has been created with a capital of approximately ₹400 billion to provide investment opportunities to commercially viable projects. In addition, a Credit Enhancement Fund for infrastructure projects for increasing the credit rating of bonds floated by infrastructure companies is going to be launched in the country. A new Credit Rating System for infrastructure projects, based on Expected Loss approach, has also been launched which seeks to provide additional risk assessment mechanism for informed decision making by long-term investors. Further, measures like infrastructure investment trusts and Real Estate Investment Trusts have been formulated to pool investment in infrastructure.

Road Sector

8.29 Roads are part of an integrated multi-modal system of transport which provides crucial links to airports, railway stations, ports and other logistical hubs and acts as a catalyst for economic growth by playing a critical role in the supply chain management. It is the dominant mode of transportation in comparison with rail, air traffic and inland water-ways and accounts for about 3.14 per cent of GVA and 69 per cent and 90 per cent of the country wide freight and passenger traffic respectively. India has a road network of about 58.98 lakh kms as on 31 March, 2017 with rural roads constituting 70.65 per cent and National highways constituting 1.94 per cent (Table 9). Ministry of Road Transport and Highways (MORTH) declared 2018-19 as the 'Year of Construction', and has been making constant efforts to expand and upgrade the network of National Highways in the country as a result of which road construction in kms grew @ 30 kms per day in 2018-19 as compared to 12 kms per day in 2014-15 (Table 10).

8.30 The major constraints faced are availability of funds for financing large projects, lengthy processes in acquisition of land and payment of compensation to the

Table 9 : Road Length Category wise

Category of Road	Length of Roads (km)	Share of Total Roads (per cent)
National Highways (NHs)	1,14,158	1.94
State Highways	1,75,036	2.97
District Roads	5,86,181	9.94
Rural Roads(including JRY Roads)	41,66,916	70.65
Urban Roads	5,26,483	8.93
Project Roads	3,28,897	5.58
Total	58,97,671	100

Source: MORTH, Government of India

Table: 10: Road Length Awarded & Constructed (Length in km)

Information regarding Road Length Awarded & Constructed during the period 2014 -15 to 2018-19					
	2014-15	2015-16	2016-17	2017-18	2018-19
Award of NHs/ Road projects	7,972	10,098	15,948	17055	5470
Construction of NHs/ Roads	4,410	6,061	8,231	9,829	10,824
Road construction per day	12	17	23	27	30

Source: MORTH, Government of India

beneficiaries, environmental concerns, time and cost overruns due to delays in project implementation, procedural delays, lesser traffic growth than expected increasing the riskiness of the projects resulting in stalled or languishing projects and shortfall in funds for maintenance.

8.31 The increase in the pace of construction was achieved by introducing a proactive sector policy to respond to the major challenges faced by the sector, including process streamlining indicating approval authorities with enhanced delegation of approval limits, putting in place mechanisms for inter-ministerial coordination, detailing steps to be taken for languishing projects, introducing innovative project financing

for leveraging both private and public funding, streamlining land acquisition processes, issue of explicit guidelines on standards of road construction in hill areas etc.

8.32 Huge investments have been made in the sector with total investment increasing more than three times from ₹51,914 crore in 2014-15 to ₹158,839 crore in 2018-19. In India, the investments in roads have been financed from budgetary support, internal and extra-budgetary resources (IEBR) and private sector investment. Budgetary Support accounted for 48 per cent of the investments in 2018-19 and IEBR accounted for 39 per cent with private investment accounting for 14 per cent (Figure 11).

Figure 11: Investment in Road Sector (in ₹ crore)

Source: MORTH

8.33 Private sector investment has been tardy as private investors are interested in short term investments while NHAI and NHIDCL were looking for long-term borrowing arrangements keeping in view long gestation period of road projects. There are also the associated risks from the projected revenue streams not materialising from tolls because of uncertainty of traffic.

8.34 Central Road Fund (CRF) which is a major source of budgetary support for the Highway sector was also amended by the Finance Act, 2018, and replaced by Central Road and Infrastructure Fund (CRIF) wherein the fund now is to be earmarked for various infrastructure sectors such as Transport, Energy, Water and Sanitation, Communication, Social and Commercial infrastructure.

8.35 Major outcomes in Road sector during the period 2014-15 to 2018-19 were construction of Eastern Peripheral Expressway, Delhi-Meerut expressway and Dhola-Sadiya Bridge. Eastern Peripheral Expressway constructed with the objective to decongest the national capital by providing an alternate route to the traffic not destined for Delhi. Delhi-Meerut Expressway is the first national highway in the country with 14 lanes, dedicated cycle tracks and pedestrian paths with several eco-friendly features. Dhola-Sadiya Bridge connects Assam to Arunachal Pradesh and ensures 24X7 connectivity.

Railways

8.36 The history of rail transport in India dates back to 1832. Being a cost-effective

long distant transport mode, Indian Railways (IR) has witnessed commendable progress. In order to provide safe, secure and comfortable journey to passengers, IR has taken numerous steps such as provision of lifts/escalators, plastic bottle crusher machines, mechanized cleaning and housekeeping etc. at major stations.

8.37 Freight and passenger performance: Revenue Earning Freight loading (excluding loading by Konkan Railways) by Indian Railways during 2017-18 was placed at 1159.55 million tonnes, as against 1106.15 million tonnes during 2016-17, registering an increase of 4.83 per cent, with incremental loading of 53.40 million tonnes over 2016-17. In 2018-19, IR carried 1221.39 million tonnes of revenue earning

freight showing an increase of 61.84 million tonnes over the freight traffic of 2017-18 and translating into an increase of 5.33 per cent. There is an increase of 2.09 per cent the number of passengers carried by IR during 2017-18 as compared to 2016-17 and 0.64 per cent increase in 2018-19 as compared to 2017-18.

8.38 Rail Safety: The category-wise break-up of consequential train accidents shows that the incident of train collisions has come down to zero in the year 2018-19 (Table 11). The incidents of derailment have decreased from 78 in 2016-17 to 46 in the year 2018-19. However, the occurrence of fire in trains has increased to six in the year 2018-19 as compared to one in 2016-17 (Table 11).

Table 11: Rate of occurrence of rail accidents

Type of Accidents	2016-17	2017-18	2018-19
Collisions	5	3	0
Derailments	78	54	46
Manned Level Crossing Accidents	0	3	3
Unmanned Level Crossing Accidents	20	10	3
Fire in Trains	1	3	6
Miscellaneous	0	0	1
Total	104	73	59

Source: Ministry of Railways

8.39 Mission Electrification: IR has initiated a major electrification program for electrifying 100 per cent of its Broad Gauge network. This would reduce the nation's dependence on imported diesel oil. As on 01 April, 2019, Indian Railways has 35,488 Route Kilometre (RKM) of network commissioned on electric traction

which constitutes 51.85 per cent of total network and carries 64.50 per cent of freight and 53.70 per cent of coaching traffic. The pace of electrification accelerated and a total of 38,000 RKM has been identified for electrification by 2021 (Figure 12).

Figure 12: Trends of Electrification works sanctioned (Route Kilometre)

Source: CORE Website <https://core.indianrailways.gov.in>

8.40 ‘Swachh Rail, Swachh Bharat’, mission focuses on cleanliness. As per the swachh rail portal, Beas station ranked first in India in the case of cleanliness among ‘A’ category stations and ‘Visakhapatnam’ tops the list among ‘A1’ category stations. IR has also made sincere efforts in the area of energy and water conservation and there is an increasing competition among stations to

obtain “Green Rating”. Similarly IR has also encouraged Green Certification of Workshop and Production Units through Green Industries Certification in collaboration with Confederation of Indian Industry. So far 10 Railway Stations, 34 workshops and 4 production units have been green certified by CII. The progress made in Swachh Rail, Swachh Bharat is given in Table 12.

Table 12: Progress of Swachh Rail; Swachh Bharat

Activity	Status as on 31.03.2015	Status as on 31.03.2019
Bio-toilets in passenger coaches	19746 Nos	195917 Nos
Mechanized cleaning contracts at stations	584 stations	890 stations
Plastic bottle crushing machines	Nil	128 stations
Rag picking contracts	877 stations	1280 stations
Dustbins	Provided at some stations only	Provided at all major stations
EMS (ISO: 14001) certification	Nil	8 stations
Funds allocated for Station sanitation (₹)	294 Crore	643 Crore
No. of persons penalized for littering activities	3.7 lakhs	4.4 lakhs

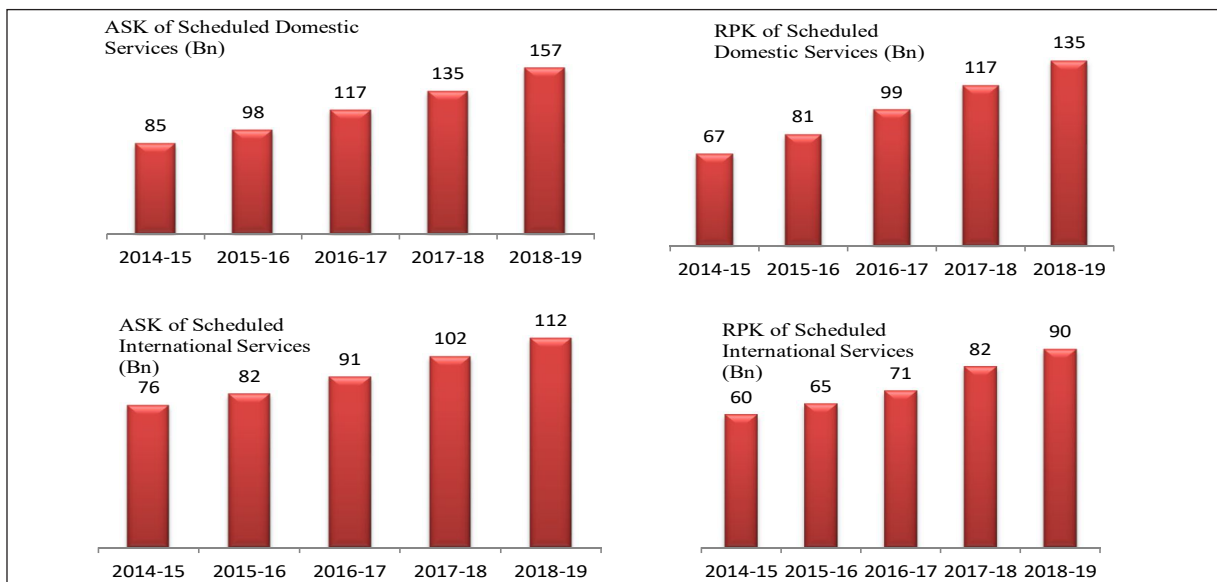

Source: Ministry of Railways

Civil Aviation

8.41 India’s scheduled domestic air transportation for passengers and goods has grown by 14 per cent and 12 per cent respectively in 2018-19. Domestic passenger traffic in revenue passenger kilometre (RPK) recorded the fastest growth in the world at about 20 per cent for over 50 consecutive months up to December 2018, which has positively impacted India’s economy. Total domestic and international passengers were 204 million in 2018-19. To meet the surging demand and providing air connectivity to remote regions, new Greenfield airports are being rapidly developed. At the end of

2018-19, a total of 107 airports provided scheduled airline operations. Based on the performance of joint ventures in the airport sector, Government has decided to lease out six brownfield airports of Airports Authority of India (AAI) in Public-Private Partnership on Operation, Maintenance and Development model (Guwahati, Lucknow, Jaipur, Ahmedabad, Mangalore and Thiruvananthapuram), which is expected to enhance service quality at these airports besides bringing enhanced revenue to AAI. The demand and supply trends in civil aviation shows that passenger demand is higher than the seat supply (Figure 13).

Figure 13: Indian Aviation Demand and Supply Trends

Source: DGCA data, 2019

ASK: Available Seat Kilometres; RPK: Revenue Passenger Kilometres

8.42 UDAN: Under “Ude Desh ka Aam Naagrik-UDAN”, a total of 719 routes have been awarded in three rounds of bidding for regional connectivity, 182 of which are operational (Table 13). The routes are widely spread geographically providing connectivity country-wide and ensuring balanced regional growth, while making air travel convenient and affordable. Currently, connectivity has

already been provided to more than 22 States/UTs. Once all routes are operationalized, more than 1 crore RCS-UDAN seats will be provided annually, and 21 States would have more than 3 operational airports each. Prior to UDAN, only 7 States had more than 3 operational airports each. Overall, the scheme has provided connectivity to 23 unserved airports out of the aim to operationalize 100

by the year 2026-27. UDAN (International) Scheme has been launched recently, under which Guwahati Airport will be connected

to Bangkok and Dhaka shortly. The benefit of international connectivity is open to other cities as well.

Table 13 : Snapshot of Regional Connectivity Scheme (RCS-UDAN)

Scheme	RCS Routes awarded	Number of RCS Airports + Heliports	RCS routes operationalized
UDAN-1	128	43	72
UDAN-2	312	30 Airports+31 Heliports	84
UDAN-3	279	42 Airports+10 Waterdromes	26
UDAN (Total)	719	115 Airports+ 31 Heliports + 10 Waterdromes	182

Source : Ministry of Civil Aviation

8.43 Air Cargo: Impressive double-digit domestic air cargo growth of 12.1 per cent in 2018-19 over 2017-18 was achieved and air cargo handled reached 3.6 MMT. General cargo tonnage handled increased by over 10 per cent per year in last four years with courier services increasing by 17 per cent. In conformance with the objectives of the holistic National Civil Aviation Policy, 2016, a number of initiatives and measures were taken up. The first National Air Cargo Policy's outline was released at the Global Aviation Summit in January 2019. It aims

to achieve fundamental re-engineering of the whole-of-the-value-chains for domestic and export-import air freight for reaching the target of handling 10 million tonnes by 2026-27. The objectives are to leverage the Indian air cargo network to provide cargo transportation by air at an affordable cost and connect every village to the national and global supply chains. It also aims to make air cargo and logistics in India among the most efficient, seamless, and cost and time effective in the world over a period of 10 years (Figure 14).

Figure 14: Indian Air Cargo growth

Source : Ministry of Civil Aviation

8.44 MRO: High airport tariffs, royalty and other charges, shortages of certain skilled manpower in civil aviation sector and recourse to overseas suppliers of Maintenance Repair & Overhaul (MRO) facilities, particularly for periodic engine, landing gears, propellers and airframes, besides the intensive and multiple checks at the end of lease tenor of aircraft, have contributed to engendering cut-throat

competition amongst domestic airlines. Currently annual import of MRO services by airlines in India is about ₹9,700 crore. With airlines' fleet growing annually by 100, the size of domestic and imported Indian airline MRO is set to grow annually to ₹21,600 crore in the next five years and to ₹36,000 crore once the fleet size reaches 2,000 aircraft (Figure 15).

Figure 15. India MRO as of May 2019

Source : Ministry of Civil Aviation

8.45 Aviation Turbine Fuel: High and unpredictable change in global crude oil prices during 2018-19 have been compounded by a high domestic tax regime on aviation turbine fuel. These have led to the demand from airline carriers and general aviation to bring the fuel within the ambit of GST with input tax credit in order to create a level playing field for them vis-à-vis international carriers.

Shipping

8.46 Shipping plays a pivotal role in India's trade dynamics. As per the Indian Shipping Statistics 2018, "India had a fleet strength of 1400 vessels with gross registered tonnage (GRT) of 12.68 million as compared to fleet strength of 1371 vessels with 12.35 million GRT at the end of December 2017". As on

January 31, 2019, India had a fleet strength of 1405 ships with dead weight tonnage (DWT) of 19.22 million (12.74 million GT) including Indian controlled tonnage, with Shipping Corporation of India (SCI) having the largest share of around 30.52 per cent. Of this, around 458 ships of 17.58 million DWT (11.26 million GT) cater to India's overseas trade and the rest to coastal trade.

8.47 Ports Sector: Port sector development is very crucial for the development of any economy. Ports handle around 90 per cent of EXIM Cargo by volume and 70 per cent by value. In order to meet the ever increasing trade requirements, expansion of Port Capacity has been accorded the highest priority with implementation of well-conceived infrastructure development projects like

sagarmala, project Unnati etc. As per the Port Performance Benchmarking & Performance Index published by Logistics Data Bank for February, 2019, Gateway Terminals India is in the top performing category and International Container Transshipment Terminal, Kochi in the low performing category.

8.48 Towards facilitating Ease of Doing Business, Ministry of Shipping had identified various parameters for reducing dwell time and transaction costs in the major ports. These include elimination of manual forms, accommodation for laboratories to Participating Government Agencies, Direct Port Delivery, Installation of Container Scanners, E-delivery orders, Radio Frequency Identification based Gate-automation System, etc. These initiatives have already been implemented at Jawaharlal Nehru Port Trust and are being taken up in other major ports.

8.49 Inland Water Transport: India's first inland waterway multimodal terminal (MMT) at Varanasi was inaugurated on 12 November 2018 by Hon'ble Prime Minister and the first container consignment on Ganga which had sailed from Kolkata was received at Varanasi MMT on the same day. The main focus of MMT is to promote inland waterways as it is cheap and environment friendly. To enhance the access and establish alternative connectivity to the North East through Indo-Bangladesh Protocol route, dredging works between Ashuganj and Zakiganj and Sirajganj and Daikhawa in Bangladesh through 80:20 sharing (80 per cent by India and 20 per cent by Bangladesh) have been awarded. In October 2018, a Standard Operating Procedure of MoU on Passenger and Cruise service on the Coastal and Protocol routes between India and Bangladesh has been signed to enhance bilateral movement of passengers/tourists. The cargo traffic on National Waterways was 55 million tonnes in 2017-18 and has increased by 31 per cent in 2018-19.

Telecom Sector

8.50 Telecommunication has been recognized world-over as a powerful tool of development and poverty reduction through empowerment of masses. Growth in the telecom sector in India remains strong over the last few years on the back of strong consumer demand and supportive policies of the Government.

8.51 From a low of 93.30 crore in 2013-2014, total telephone connections in India touched 118.34 crore in 2018-19, registering a growth of 26.84 per cent (Figure 16). As on March 2019, the total subscription stood at 118.34 crore out of which 51.42 crore connections were in the rural areas and 66.91 crore in the urban areas. The wireless telephony now constitutes 98.17 per cent of all subscriptions whereas share of landline telephones now stands at only 1.83 per cent. The overall tele-density in India stands at 90.10 per cent, the rural tele-density being 57.50 per cent and urban tele-density being 159.66 per cent at the end of March 2019. The private sector dominated overall connections with a share of 88.72 per cent (104.99 crore) at the end of March '19 while the share of public sector was 11.28 per cent (13.35 crore).

Figure 16: Total telephone connections (in crore)

Source: Ministry of Telecommunications

8.52 India's Mobile Economy: The mobile industry has witnessed exponential growth over the last few years driven by affordable tariffs, wider availability, roll out of Mobile Number Portability (MNP), expanding 3G and 4G coverage, evolving consumption patterns and a conducive policy and regulatory environment. As per a GSMA report, the mobile industry supports about 6.5 per cent of India's GDP. Telecom industry contribution to GDP is expected to reach 8.2 per cent by 2020. In 2018, mobile technologies and services generated 4.6 per cent of GDP globally, a contribution that amounted to US\$3.9 trillion of economic value added. By 2023, mobile's contribution will reach US\$4.8 trillion (4.8 per cent of GDP). The wider mobile ecosystem also supported a total of 32 million jobs (directly and indirectly) and made a substantial contribution to the funding of the public sector, with almost US\$500 billion raised through general taxation (before regulatory and spectrum fees). Further ahead, 5G technologies are expected to contribute US\$2.2 trillion to the global economy over the next 15 years, with key sectors such as manufacturing, utilities and professional/financial services benefiting the most from the new technology.

Policy Initiatives

8.53 Making India 5G ready by 2020: The world is at the cusp of a next generation of wireless technology-5G. The 5G has been conceived as a foundation for expanding the potential of the Networked Society. The landscape is expanding to include massive scale of "smart things" to be interconnected. For India, 5G provides an opportunity for industry to reach out to global markets, and consumers to gain with the economies of scale and citizens to reap the benefits

of doorstep governance and availability of services, medical support, benefits transfers, education, entertainment and build a digital payment, knowledge and services economy. The Government has constituted High Level 5G India 2020 Forum to articulate the Vision for 5G in India and submitted its report on "Making India 5G Ready" in August, 2018. Based on the recommendations of the forum, seven committees have been constituted for action on Spectrum Policy, Regulatory Policy, Education and Awareness Promotion Program, Application & Use Case Labs, Development of Application Layer Standards, Major Trials & Technology Demonstration and Participation in International Standards for 5G.

8.54 13-digit Machine to Machine (M2M) Numbering Plan for M2M communication: M2M Communications /Internet of Things (IoT) refers to technologies which involve machines or devices communicating among themselves through a network without human intervention. Sensors and communication modules are often embedded within M2M devices, enabling data to be transmitted from one device to another device through wired and wireless communications networks. The transformational impact of M2M/IoT for the common people will be realized through transformation of the way services are designed and how they utilize information to meet the needs of citizens more efficiently and effectively.

8.55 FDI in telecom sector: FDI has played a crucial role in shaping the progress of the telecom sector over the years by providing much needed finances for expansion of telecom infrastructure in the country. During 2018-19 FDI equity inflow touched US\$2.67 billion – more than double rise from the level of US\$1.3 billion witnessed in 2015-16. The substantial foreign inflows in the telecom sector is indicative of the faith of global

community in Government policy, reforms and measures taken towards ease of doing business, as well as the bright prospects of the telecom sector in the country.

8.56 Digital Communications Commission: until recently known as the Telecom Commission, was set up by the Government of India vide resolution dated 11 April, 1989 with administrative and financial powers of the Government of India to deal with various aspects of Telecommunications. Vide Resolution dated 22 October, 2018, the ‘Telecom Commission’ has been re-designated as the ‘Digital Communications Commission’ to ensure effective implementation and monitoring of the newly announced ‘National Digital Communications Policy- 2018’.

Petroleum & Natural Gas

8.57 The Government aims to “Reform, Perform and Transform” the energy sector of the country by achieving self-sufficiency. India’s primary energy demand is expected to grow at a CAGR of 4.2¹ per cent during 2017-2040, much faster than any major economy in the world. There is thus a need to augment refining capacity to meet growing demand for petroleum fuels and petrochemicals, which play significant role in sustaining GDP. Crude oil production during 2018-19 was 34.203 Million Metric Tonnes (MMT) which was 4.15 per cent lower as compared to production achieved during 2017-18. Crude oil production during March, 2019 was 2854.32 Thousand Metric Tonnes (TMT) which is 12.99 per cent lower than target and 6.16 per cent lower compared with March, 2018 (Figure 17). Natural gas production during 2018-19 was 32.873 BCM which was 0.69 per cent higher than the production achieved in 2017-18.

8.58 Refinery production (in terms of crude oil processed), during 2018-19 was 257.20 MMT which was 2.09 per cent higher than the production in year 2017-18. Refinery production during March, 2019 was 22495.43 TMT which is higher at 6.51 per cent compared to March, 2018 and 8.18 per cent higher than the target for the month. There are total 23 refineries in the country, 18 in the public sector, 2 in the joint venture sector and 3 in the private sector. Refinery capacity in India is projected to be 400 approximately MMTPA by the year 2030 through capacity revamps/ expansions at existing refineries and a number of grass-root refineries (Figure 18).

Policy Initiatives

8.59 Ministry of Petroleum & Natural Gas has undertaken a series of reforms and new initiatives. Some of these include Hydrocarbon Exploration Licensing Policy (HELP)/ Open Acreage Licensing Policy (OALP), Discovered Small Field (DSF) Policy, Policy to Promote and Incentivize Enhanced Recovery Methods for Oil and Gas, Policy framework for exploration and exploitation of Unconventional Hydrocarbons under existing Production Sharing Contracts (PSCs), Coal Bed Methane contracts and Nomination fields, Policy for Relaxations, Extensions and Clarifications under PSC regime for early monetization of hydrocarbon discoveries, Policy for early monetization of Coal Bed Methane, Setting up of National Data Repository, Appraisal of Unappraised areas in Sedimentary Basins, Re-assessment of Hydrocarbon Resources, Policy for Extension of PSCs, Policy framework to streamline the working of PSCs in Pre-NELP and NELP Blocks.

¹ BP Energy Outlook 2019

Figure 17: Monthly Crude Oil Production (Quantity in TMT)

Source: Monthly Report, MoP&NG

Figure 18: Monthly Refinery Production (Quantity in TMT)

Source: Monthly Report, MoP&NG

8.60 With a view to promote exploration, early monetization, incentivise production, streamline procedure and promote ease of doing business, a series of policy decisions have been taken by the Government on 19 February, 2019 in the hydrocarbon sector, the highlights of which are given below:

- (i) Weightage to Minimum Work Programme (MWP) has been enhanced.
- (ii) Revenue sharing ceiling at highest revenue point to be set at 50 per cent.
- (iii) The timeline for completion of committing Minimum Work

Programme reduced.

- (iv) No production and revenue sharing, only statutory levies except in case of windfall gain.
- (v) Full marketing and pricing freedom at Arm's Length basis based on competitive bidding.
- (vi) Grant of concessional royalty, if production commences within 4 years / 5 years.
- (vii) National Oil Companies (NOCs) have been given freedom to choose field specific implementation model

like Technical Services Model, Joint-Venture Model, Farming-out Model, etc., for enhancing production.

- (viii) New gas discoveries to get pricing and marketing freedom.
- (ix) NOCs have also been mandated to bid-out fields with complete marketing and pricing freedom on revenue sharing model under the supervision of DGH.

8.61 Pradhan Mantri Ujjwala Yojana (PMUY) was launched with the objective of providing LPG connections to five crore women belonging to the Below Poverty Line (BPL) families over a period of three years starting from 2016-17. The target was subsequently increased from 5 crore to 8 crore to be achieved by 2019-20. More than 7.189 crore LPG connections have been released under this scheme as of 31 March, 2019. The original target of issuing 5 crore LPG connections was achieved by 3 August, 2018, eight months in advance of the target.

Power Sector

8.62 Power sector in India has witnessed a paradigm shift over the years due to the

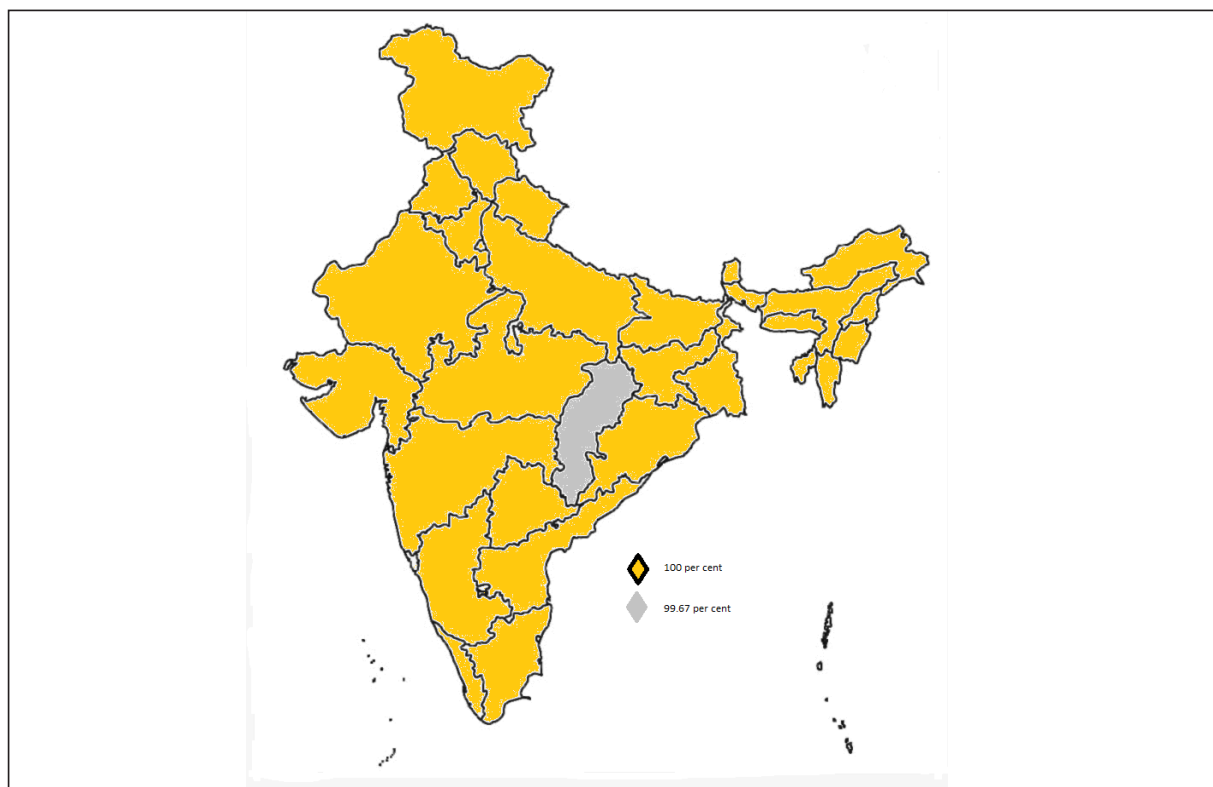

constant efforts of Government to foster investment in the sector. As a result, India improved its ranking in the Energy Transition Index published by World Economic Forum (76th position). Fostering Effective Energy Transition, 2019 report of WEF states that “India, Indonesia and Bangladesh have made fast progress towards universal electrification due to strong political commitment, a stable policy regime, use of grid expansion, and decentralized generation sources, and a supportive environment for investment in infrastructure.”

8.63 Along with universal electrification, commendable progress has been made in generation and transmission of electricity. The installed capacity has increased from 3,44,002 MW in 2018 to 3,56,100.19 MW in 2019. Total generation of energy during 2018-19 was 1376 BU (including imports and renewable sources of energy). The capacity of thermal power is 64 per cent followed by renewable energy (Figure 19). Further, more than 46 per cent of power generation comes from private sector. In addition, the peak deficit i.e. the percentage shortfall in peak power supply vis-à-vis peak hour demand has

Figure 19: Total Power Generation Capacity as on April, 2019 (Fuel-wise & Sector-wise)

Source: Ministry of Power

Figure 20: Electrification Status

Source: <https://saubhagya.gov.in>

declined from around 9 per cent in 2012-13 to 0.8 per cent during 2018-19 (March 2019).

8.64 The Pradhan Mantri Sahaj Bijli Har Ghar Yojana (SAUBHAGYA) was launched in October, 2017 with the aim of universal household electrification by providing last mile connectivity and electricity connections to all remaining un-electrified households in rural and all poor households in urban areas. As on March 2019, 2.62 crore households have been electrified since the launch of SAUBHAGYA scheme (Figure 20).

Housing

8.65 Housing is one of the fastest moving sectors in the country. According to Census 2011, 377.1 million Indians comprising 31.14 per cent of the country's population lived in urban areas, which are projected to grow more than 600 million by 2031. Urbanization

in India has become an important and irreversible process, and it is an important determinant of economic growth and poverty reduction. The process of urbanization has been characterized by increase in the number of large cities, although India may be said to be in the midst of transition from a predominantly rural to a quasi-urban society. Ministry of Housing and Urban Affairs (MoHUA) addresses various issues relevant to urban sector through appropriate policy guidelines, subordinate legislation and sectoral programmes.

Policy Initiatives

8.66 The Real Estate (Regulation and Development) Act, 2016 (RERA): One of the important concerns in the real estate sector is the legal battle being fought by home buyers against the builders for delaying the housing

Table 14: Four rounds of SCM

	Round 1	Round 2	Round 3	Round 4	Total
No. of selected cities	20	40	30	10*	100
Period of selection	Jan 2016	May to Sep 2016	Jun 2017	Jan 2018	
Total No. of projects	829	1,959	1,891	472	5,151
Investment (in Rs. crores)	48,064	83,698	57,393	15,863	2,05,018
Avr. SCP size (in Rs. Crores)	2,403	2,092	1,913	1,586	2,050

Note: *Shillong selected as 100th Smart City in June 2018

projects. The RERA is one of the significant reforms implemented in the real estate sector. The core objective of this transformative legislation is to ensure regulation and promote real estate sector in an efficient and transparent manner and to protect the interest of home buyers. Rules under RERA has been notified by 30 States/UTs and 28 States/UTs have set up the Regulatory Authorities. North Eastern States (Arunachal Pradesh, Meghalaya, Nagaland and Sikkim) are under process to notify the rules under RERA. Though RERA was not applicable in the state of Jammu & Kashmir, the State has notified its own legislation named as ‘The Jammu and Kashmir Real Estate (Regulation and Development) Act, 2018’ on 16 December, 2018.

8.67 Pradhan Mantri Awas Yojana (Urban): PMAY was launched on 25 June 2015 with the objective of providing housing facilities to all the eligible families/beneficiaries by 2022. So far 4,427 cities/towns have been included under PMAY (U). The duration of the Mission is seven years (2015-16 to 2021-22) and has four components: “In-situ” Slum Redevelopment, Credit Linked Subsidy Scheme, Affordable Housing in Partnership with public or private sector and Beneficiary-led individual house construction/ enhancements.

Smart Cities Mission

8.68 Smart Cities Mission (SCM) was launched in June 2015 for a 5-year period with the objective of promoting cities that provide core infrastructure and give a decent quality life to its citizens (Table 14). The strategic components of Smart Cities initiative are area-based development involving city improvement (retrofitting), city renewal (redevelopment) and city extension (Greenfield development) and a Pan-city development in which Smart Solutions are applied covering larger parts of the city. The 100 cities under the Mission have proposed to execute 5,151 projects worth ₹2,05,018 crore in 5 years from their respective dates of selection. Financial innovation is in-built in the design of the programme. The distribution of funding from Central and State Government is ₹93,552 crore (45 per cent) and funds from PPP is ₹41,022 crore (21 per cent) (Figure 21).

Current Implementation Status

8.69 Under the SCM, all 100 cities have incorporated Special Purpose Vehicles (SPVs), City Level Advisory Forums (CLAFs) and appointed Project Management Consultants (PMCs). Significant progress has been made with respect to implementation of projects pertaining to

Figure 21: Source of funding under the Smart Cities Mission

Source : Ministry of Housing and Urban Affairs

Integrated Command and Control Centres, Smart Roads, Smart Water, Solar Rooftops, and Vibrant Public Spaces (Table 15).

Other Smart Cities Mission Initiatives

8.70 The Mission has launched several new initiatives that will not only ensure integrated development across various aspects of urban development but also catapult the mission

to the next stage of development. The first framework on ‘Ease of Living’ Index for cities was launched in June 2017 with the objective of framing an index to enable a shift to data driven approach in urban planning and management and promote healthy competition among cities. As a part of improving the index, a new edition ‘The Ease of Living (EoL) Index 2019’ was introduced with more focus on outcomes and aims to assess the ease of living of citizens across three pillars such as quality of life, economic ability and sustainability which are further divided into 14 categories across 50 indicators. Another index, Municipal Performance Index (MPI), 2019, seeks to examine the sectoral performance of municipalities across a set of 5 verticals namely Service, Finance, Planning, Technology and Governance. The EoL 2019 focuses on outcome indicators, accompanied by MPI 2019 which would assess the performance of cities based on enablers. The Ease of Living indicators are strongly linked to Sustainable Development Goals (SDGs) and this exercise will help our Country to track and achieve SDGs.

Source : Ministry of Housing and Urban Affairs

8.71 To drive the new urban transformation agenda of the Government through innovation and delivery, there is a growing need to nurture a well-knit ecosystem of urban innovation to encourage innovation in technology, governance, financing, and citizen engagement. It is envisaged that NUIH with necessary physical and digital infrastructure will anchor the innovation efforts and build necessary capacity for urban transformation. NUIH will be the apex national level institution that will drive the MoHUA's whole-of-system innovation through a Hub-and-Spoke network across states and UTs and for delivering the capacity building and governance reforms in urban sector.

Infrastructure Financing: Public Private Partnerships (PPPs)

8.72 Private investment in infrastructure has come mainly in the form of PPPs. More than a third of the infrastructure investment in India in the past decade has come from the private sector. PPPs help in addressing the infrastructure gap as well as improving efficiency in infrastructure service delivery. As per the Private Participation in Infrastructure database of World Bank, India is ranked second among developing countries both by the number of PPP Projects as well as the associated investments. Indian private participation in infrastructure program supports a number of PPP models including management contracts, Build-Operate-Transfer (BOT) contracts, Design-Build-Finance-Operate-Transfer contracts, Rehabilitate - Operate - Transfer, Hybrid Annuity Model, and Toll-Operate-Transfer model. Under the BOT model, there are two variants – BOT (Toll) and BOT (Annuity) depending on who bears the traffic risk. In the case of BOT (Toll), the traffic risk is borne by the PPP concessionaire while in the case of BOT (Annuity), it is borne by the Government (Public Authority).

8.73 One of the challenges facing this sector is to devise a comprehensive resolution/ settlement option for projects which are either stuck-up mid-way or wherein the arbitral disputes/ claims have not been settled. The need is to establish an institutional mechanism to deal with time-bound resolution of disputes in infrastructure sectors. Further, private developers have faced issues of leveraged balance sheets and aggressive bidding making it difficult for them to mobilize resources for completion of projects. Accordingly, Government has adopted the Hybrid Annuity Mode of PPP to encourage private participation in infrastructure projects. Government contributes 40 per cent of the total project cost in the construction period, remaining 60 per cent is paid as biannual annuity after the completion of the project construction. The HAM model is considerably de-risked for the private concessionaires. In order to discourage aggressive bidding under HAM model, there is a provision of Additional Performance Security which will be applicable in case the Bid Project Cost of the Lowest Bidder is lower by more than 10 per cent with respect to the estimated project Cost.

WAY FORWARD

8.74 In a fast moving world to maintain growth momentum, India has to develop its industry and infrastructure. As an emerging economy, the scope for Industry 4.0 and Next generation infrastructure are enormous. To experience the potential of the perfect blend of Industry 4.0 and next generation infrastructure, it is necessary to clear the decks which are obstructing the way forward. Industry 4.0 encompasses automation in industrial sectors whereas next generation infrastructure brings physical infrastructure and technology like internet of things, automation together to maximize

the efficiency of physical infrastructure. For a smooth and fast travelling, India needs adequate and timely investment in quality infrastructure.

8.75 In order to create a ten trillion dollar economy by 2032, India needs a robust and resilient infrastructure. Public investment cannot fund the entire infrastructure investment requirements of the country. Further, private players are usually

eager to bring their capital into developed Indian states as compared to less developed states. Therefore, the real challenge lies in bringing adequate private investment across the country with the collaboration of public sector. Along with physical infrastructure; provision of social infrastructure is also equally important as these two would determine where India will be placed in the world by 2030.

CHAPTER AT A GLANCE

- The industrial growth in terms of Index of Industrial Production (IIP) registered 3.6 per cent in 2018-19 as compared to 4.4 per cent growth rate in 2017-18. The moderation in IIP growth is mainly due to subdued manufacturing activities in Q3 and Q4 of 2018-19.
- The overall Index of Eight Core Industries registered a growth rate of 4.3 per cent in 2018-19 similar to the increase achieved in 2017-18.
- India has considerably improved its ranking to 77th position in 2018 among 190 countries assessed by the World Bank Doing Business (DB) Report, 2019 in which India has leapt 23 ranks over its rank of 100 in 2017.
- Building sustainable and resilient infrastructure has been given due importance with the formulation of sector specific programmes such as SAUBHAGYA scheme, PMAY etc.
- Road construction in kms grew @ 30 kms per day in 2018-19 as compared to 12 kms per day in 2014-15.
- Rail freight and passenger traffic grew by 5.33 per cent and 0.64 per cent respectively in 2018-19 as compared to 2017-18.
- Total telephone connections in India touched 118.34 crore in 2018-19.
- The installed capacity of electricity has increased from 3,44,002 MW in 2018 to 3,56,100 MW in 2019.
- Public Private Partnerships are quintessential for addressing infrastructure gaps in the country.
- There is a need for establishing an institutional mechanism to deal with time-bound resolution of disputes in infrastructure sectors.

Services Sector

The services sector accounts for 54 per cent of India's Gross Value Added (GVA). Its growth rate moderated to 7.5 per cent in 2018-19 from 8.1 per cent in 2017-18. The segments that saw deceleration are tourism, trade, hotels, transport, communication and services related to broadcasting, public administration and defence. Financial, real estate and professional services category accelerated. An important finding is that India's services sector does not generate jobs in proportion to its share in GVA. This contrasts with the international experience. India received 10.6 million foreign tourists in 2018-19 compared to 10.4 million in 2017-18. Foreign exchange earnings from tourism in India stood at US\$27.7 billion in 2018-19 compared to US\$28.7 billion in 2017-18. Many of the high frequency indicators, such as bank credit to services sector, decelerated in 2018-19. However, the IT-BPM industry grew by 8.4 per cent in 2017-18 to US\$167 billion and is estimated to have reached US\$181 billion in 2018-19.

SERVICES SECTOR PERFORMANCE IN INDIA: AN OVERVIEW

India's Gross Value Added in the Services Sector

9.1 As per the provisional estimates for gross value added (GVA), services sector growth moderated in 2018-19 to 7.5 per cent rate from 8.1 per cent in 2017-18 (Table 1). This was due to a deceleration in the sub-sectors 'trade, hotels, transport, communication & broadcasting services' to 6.9 per cent and 'public administration and defence & others services' to 8.6 per cent in 2018-19. On the bright side, growth

in the sub-sector 'financial services, real estate & professional services' picked up to 7.4 per cent in 2018-19 from 6.2 per cent in 2017-18. Despite the recent growth moderation, services sector growth continues to outperform agriculture and manufacturing sector growth, contributing more than 60 per cent to total GVA growth.

9.2 This moderation in the growth of the services sector was also reflected in some of the key high frequency indicators (Figure 1). Bank credit growth y-o-y to services sector moderated significantly between September 2018 and February 2019 although it has partly recovered. The Nikkei

Table 1: Services Sector Performance in India's GVA

Sector	Share in GVA (per cent)		Growth (per cent YoY)					
	2018-19 (P)	2016-17	2017-18	2018-19 (P)				
				2018-19 (P)	2018-19 (P) Q1	2018-19 (P) Q2	2018-19 (P) Q3	2018-19 (P) Q4

Figure 1(c): CPI Services Inflation (in per cent)

Figure 1(d): Growth in Airport Traffic (y-o-y) (in per cent)

Source: RBI, IHS Markit Economics, Labour Bureau, Ministry of Civil Aviation

India Services Purchasing Managers' Index, which has been on a declining trend since November 2018, fell to a one-year low of 50.2 in May 2019. CPI Services inflation also started to cool down since December 2018.

9.3 Performance of the states shows that the share of services in total gross state value added (GSVA) was more than 50 per cent in 14 out of the 33 states and UTs (Table 2). The share of services is particularly high in Chandigarh and Delhi with over 80 per cent share while Sikkim was at the bottom with 30.2 per cent share. In contrast, services sector accounts for less than 40 per cent of share of services in GSVA in states such as Gujarat, Uttarakhand, Madhya Pradesh and Chhattisgarh. Even states with relatively low share of services, such as Haryana, Jharkhand, Odisha, Andhra Pradesh and Uttarakhand, have witnessed strong services sector growth in the recent years. (Note: In some States and UTs such as Kerala, J&K, Haryana, Assam, Nagaland, Goa, Gujarat, Andaman and Nicobar Islands, Chandigarh, data is available only up to 2016-17).

Table 2: State-Level Services Sector Performance

State	Services Sector Share in GSVA in 2017-18 (per cent)	Services Sector Growth (per cent YoY, 2013-17 average)

Trade in Services Sector

9.4 Services exports have slowed somewhat during April-December 2018 after witnessing strong performance in 2017-18 (April-December) (Table 3). By sub-sector, exports of transport services have maintained strong momentum during 2017-18 (April-December) and April-December, 2018, supported by strengthening merchandise trade activity, while exports of Computer & ICT services have continued to recover steadily. On the other hand, travel receipts have slowed somewhat during April-December, 2018 after posting strong growth in 2017-18 (April-December), which is in line with the moderation in foreign tourist arrivals during this period. Exports of business services have witnessed a similar trend. Meanwhile, services imports have slowed during April-December, 2018 from the previous year led by a deceleration in imports across all sectors. The rising services trade surplus has helped

finance nearly 50 per cent of India's trade deficit as of 2017-18 (April-December). However, the service trade surplus is largely driven by Computer & ICT services, and to some extent, travel services. Meanwhile, India runs a very small trade surplus in business services and insurance & pensions and a small trade deficit in financial services.

9.5 Computer & ICT services, business services and travel services account for about 75 per cent of the total services exports. Trends in the shares of sub-sectors in total services exports, however, have been mixed in the recent years. While the share of traditional services such as transport has fallen, the share of value-added services, such as Computer & ICT services, financial services and insurance & pensions has also experienced a decline. Meanwhile, the share of travel services has risen somewhat during this period.

Table 3: Services Trade Performance by Sub-Sector

By Sub-Sector	Share in per cent		Value (in US\$ billion)			YoY Growth (in per cent)

9.6 Monthly data on services trade suggests that exports and imports of services started recovering from second quarter of 2017-18 (Figure 2). The trend continued till first

quarter of 2018-19. However, both exports and imports of services, started slowing down since the beginning of second quarter of 2018-19.

Figure 2: Growth in Services Trade (3mma*)

Note - 3mma = 3 months moving average, Data is provisional.

Box 1: India in World Commercial Services Exports and Imports

India's trade in commercial services, both in exports and imports, moderated in 2018 (Figure 1). India experienced a recovery in growth of exports and imports of commercial services during 2015-17, in line with global recovery in commercial services trade. However, in 2018, world trade in commercial services stagnated. India's growth rate decelerated but remains above world growth rate

Figure 1(a): Growth in Commercial Services Exports

Source: World Trade Organization (WTO).

Figure 1(b): Growth in Commercial Services Imports

Source: World Trade Organization (WTO).

According to the WTO data, India is among the world's top 10 exporters and importers of commercial services¹, ranking eighth in exports and tenth in imports in 2017, with the ranking staying unchanged from 2016 (Table 1). India's share in world's commercial services exports has risen steadily over the past decade to reach 3.5 per cent in 2017.

Table 1: Performance of World's Top 10 Exporters and Importers of Commercial Services

Country	Rank in Commercial Services Exports		Share in World's Commercial Services Exports (per cent)		Rank in Commercial Services Imports		Share in World's Commercial Services Imports (per cent)

¹ Commercial services refer to all services excluding government services.

World commercial services export growth eased marginally to 7.7 per cent in 2018. Commercial services export growth in India also moderated slightly to 10.7 per cent in 2018 following the strong growth witnessed in 2017 (Table 2). Nonetheless, India remains one of the strongest performers among the major service-exporting countries.

Government has taken many initiatives that included measures such as Start-up India, Insolvency and Bankruptcy Code, National Intellectual Property Rights (IPR) policy, implementing GST regime and improving the ease of doing business, which have helped increase India's ranking in the World Bank's Ease of Doing Business Index from 100 in 2017 to 77 in 2018, Digital India, e-visas, infrastructure status to Logistics, schemes for the housing sector etc., which could give a further fillip to the growth of services sector. The Government has implemented FDI reforms in a number of sectors, including defence, construction development, insurance/pension/other financial services, asset reconstruction companies, broadcasting, civil aviation, pharmaceuticals and trading etc. An investor-friendly FDI policy has been put in place under which up to 100 per cent FDI is permitted via automatic route in most sectors, including single-brand retail trading, construction development and regulated financial sector activity.

Table 2: Commercial Services Export Growth in Major Exporting Countries

Commercial Services Export Growth (per cent)			
Country	2017	2018	CAGR (2010-18)
World	8.0	7.7	5.2

Japan	6.4	3.1	4.5
Singapore	10.0	6.6	7.8

Source: World Trade Organization (WTO). Note: Data is on calendar year basis.

Further, in order to boost services exports, the Service Exports from India Scheme (SEIS) covers business services, education services, health services, tourism and travel related services, transport services etc. Government has also created a dedicated fund of ₹5,000 crore for financing sectoral initiatives under the Champion Services Sector Scheme. The Screening Committee has so far recommended the proposals of seven nodal Ministries/departments totalling ₹4,344.75 crore, including the Ministry of Corporate Affairs, Ministry of Human Resource Development, Department of Telecommunication, Ministry of AYUSH, Ministry of Housing and Urban Affairs, Ministry of Tourism, and Ministry of Electronics and Information Technology. Under this scheme, various domestic policy reforms critical to enhance the competitiveness of services exports, including on data privacy/security and e-commerce, would be pursued through the Ministries concerned.

FDI into Services Sector

9.7 FDI equity inflows into the services sector¹ accounted for more than 60 per cent of the total FDI equity inflows into India (Table 4). During 2018-19, FDI equity inflows into services sector fell by US\$696 million or 1.3 per cent from the previous year to about

US\$28.26 billion, which is in line with the small decline witnessed in overall FDI inflows into India. This was driven by weaker FDI inflows into sub-sectors such as telecom, consultancy services, air and sea transport, which offset the strong inflows witnessed in education, retail trading and information & broadcasting.

Table 4: FDI Equity Inflows into Services Sector (US\$ million)

Services Sectors	2016-17	2017-18	2018-19
Financial, Business, Outsourcing, R&D, Courier, Tech. Testing & Analysis	8,684	6,709	9,158

SERVICES SECTOR GROSS VALUE ADDED VERSUS EMPLOYMENT

9.8 As per the UN National Accounts Statistics data, India ranked 7th in terms of

GDP size and 9th in terms of services sector size in 2017. Note that India's rank has since risen to 6th in terms of GDP but the 2017 numbers have been used here for purposes of comparison (Table 5). Notably, among these 15 countries, India has the second

² Estimated as FDI equity inflows into financial services, business services, outsourcing, R&D, technology testing & analysis, courier, telecommunications, trading, computer hardware & software, hotels & tourism, hospital & diagnostic centres, consultancy services, sea transport, information & broadcasting, retail trading, agriculture services, education, ports and air transport.

fastest growing services sector after China, registering a growth of 7.9 per cent both in 2017 and during 2007-17 in CAGR terms. India also ranks second after the UK in terms of services share in exports, with the shares as high as seen in developed countries, such as U.S.A, France and Spain.

9.9 In contrast, among top 15 economies in terms of GDP and Services GVA in 2017, India ranks the second lowest after China in terms of services share in Gross Value Added (GVA) and ranks the lowest in terms of services share in employment. In addition, compared to the experience of other countries, services share in India's employment at 34 per cent is significantly lower than services share in GVA at 54 per cent.

9.10 This divergence in the performance of the services sector in India has been witnessed as the sector has not been able to generate jobs in proportion to its size. The share of services in employment is roughly the share of services GVA for other countries such as USA (79 per cent), China (56 per cent), Japan (71 per cent), Germany (72 per cent), UK (81 per cent), Brazil (69 per cent), Mexico (61 per cent) in 2017 implying that the services sector expansion in the recent decades has been unable to generate proportionate employment, especially in the formal sector. This also suggests that there lies immense potential for employment generation in the services sector in the coming years in line with other countries.

Table 5: Services Sector Performance among Top 15 Countries

Country	Rank in GDP	GDP (US\$ trillion)	Services GVA (US\$ trillion)	Services Sector Growth (per cent)			Share of Services Sector (per cent)					
				2016	2017	CAGR (2007-17)	GVA 2007	GVA 2017	Employment 2007	Employment 2017	Exports 2007	Exports 2017

MAJOR SERVICES: SECTOR-WISE PERFORMANCE AND SOME RECENT POLICIES

9.11 While sub-sectors within the services sector slowed down in 2018-19, some others accelerated (Table 6). IT-BPM and cargo traffic continued to recover in terms of absolute numbers but the growth rate declined. Growth of aviation sector declined mainly on account of slowdown in international airline passenger traffic.

The tourism sector also experienced a sharp slowdown in 2018. The Telecom Sector, however, continued to grow at a rapid pace led by wireless internet subscriptions.

9.12 This section covers some of the important services for India based on their significance in terms of GDP/GVA, exports and future prospects. Some important services covered in other chapters have been excluded to avoid duplication.

Table 6: Performance of Key Sub-Sectors in India's Services Sector

Sub-Sector	Indicator	Unit	Year				
			2014-15	2015-16	2016-17	2017-18	2018-19

Tourism

9.13 Tourism sector is a major engine of economic growth that contributes significantly in terms of GDP, foreign exchange earnings and employment. As per the World Tourism Barometer of the United Nation's World Tourism Organization (June, 2018 edition) International Tourist Arrivals (ITA) reached a total of 1.3 billion in 2017, 84 million more than in the previous year, with a growth rate of 6.7 per cent higher than the growth rate of 3.7 per cent in 2016.

9.14 In India, the Tourism sector had been performing well with Foreign Tourist Arrivals

Figure 3(a): Growth in Foreign Tourist Arrival in India (in per cent)

Source: Ministry of Tourism

9.15 Outbound tourism increased in recent years, with the number of departures of Indian nationals from India, that stood at 23.94 million in 2017 from 21.87 million in 2016, with a growth rate of 9.5 per cent in 2017. This was more than double the foreign tourist arrivals in India.

9.16 Growth in domestic tourist visits slowed down from 12.7 per cent in 2016 to 2.4 per cent in 2017. In absolute numbers, there were 1,652.5 million domestic tourists in 2017 compared to 1,615.4 million in 2016. Tamil Nadu (345.1 million), Uttar Pradesh (234 million), Karnataka (180 million), Andhra Pradesh (165.4 million)

(FTAs) growing at 14 per cent to 10.4 million and Foreign Exchange Earnings (FEEs) at 20.6 per cent to US\$28.7 billion in 2017-18. However, the sector witnessed a slowdown in 2018-19. The Foreign Tourist Arrivals (FTAs) in 2018-19 stood at 10.6 million compared to 10.4 million in 2017-18. In terms of growth, the growth rate of FTAs declined from 14.2 per cent in 2017-18 to 2.1 per cent in 2018-19. Foreign exchange earnings (FEEs) from tourism stood at US\$27.7 billion in 2018-19 as compared to US\$28.7 billion in 2017-18. In terms of growth, the FEEs declined from 20.6 per cent in 2017-18 to -3.3 per cent in 2018-19.

Figure 3(b): Growth in Foreign Exchange Earnings from Tourism (in per cent)

Source: Ministry of Tourism

and Maharashtra (119.2 million) were the top 5 destination States, accounting for 63.2 per cent of total number of domestic tourist visits in 2017. Amongst centrally protected ticketed monuments, Taj Mahal, Agra (5.66 million) was the most visited monument in 2017-18 for domestic visitors followed by Sun Temple, Konark (3.22 million) and Red Fort, Delhi (3.04 million).

9.17 The Ministry of Tourism launched the 'National Mission on Pilgrimage Rejuvenation and Spiritual, Heritage Augmentation Drive' (PRASHAD) in January 2015 with the objective of pilgrimage infrastructure at selected

important pilgrimage destinations. The total number of sites identified for development under the scheme at present is 41 in 25 states. Till date 28 projects in 17 states have been approved under the scheme since January 2015.

9.18 Under the Swadesh Darshan Scheme, the Ministry of Tourism has identified 15 thematic circuits for development namely: Himalayan Circuit, North East Circuit, Krishna Circuit, Buddhist Circuit, Coastal Circuit, Desert Circuit, Tribal Circuit, Eco Circuit,

Wildlife Circuit, Rural Circuit, Spiritual Circuit, Ramayana Circuit, Heritage Circuit, Tirthankar Circuit and Sufi Circuit. These circuits cover religious, spiritual, cultural, natural, tribal sites in the country. Under the scheme the Ministry is developing these thematic circuits on the principles of high tourist value, competitiveness and sustainability in an integrated manner with an objective of enriching tourist experience and enhance employment opportunities.

Box 2: HEALTH AND MEDICAL TOURISM IN INDIA

Government has taken various Policy initiatives and measures to promote Health and Medical Tourism in India along with the Public Private Initiatives in the Tourism sector. India has emerged as a major Medical Tourism destination. The Ministry of Tourism has recognized Medical and Wellness Tourism including Ayurveda as a Niche product in order to overcome the aspect of 'seasonality' and to promote India as a 365 days' destination and attract tourists with specific interests.

INDIAN HEALTHCARE INDUSTRY: The market size of medical tourism in India is estimated at ₹195 billion (US\$ 3 billion) in 2017. The value of medical tourism is forecasted to reach US\$ 9 billion by 2020. India currently has around 18 per cent of the global medical tourism market. In an estimate, it can be a US\$ 9 billion-worth medical tourism destination by having 20 per cent global market share by 2020. (Source: Services Export Promotion Council, Ministry of Commerce). Share of Medical Tourists to India is 4.9 per cent out of total FTAs in 2017. The arrival in India on Medical visa during 2014 to 2017 are given in (Table 1)

Table 1: ARRIVALS IN INDIA ON MEDICAL VISA

2014	2015	2016	2017
1,39,447	2,33,918	4,27,014	4,95,056

Source: Ministry of Tourism.

Government offers financial support as Marketing Development Assistance, for Publicity and for organising Wellness and Medical Tourism Promotion shows. Medical Tourism is regularly highlighted for promotion as part of the Incredible India Campaign in the print, electronic, online and outdoor media in India and abroad as well as at the various travel trade exhibitions overseas. 'Medical Visa' has been introduced, which can be given for specific purpose to foreign travellers coming to India for medical treatment. 'E- Medical Visa' has also been introduced for 166 countries.

Hospitality Services

9.19 As per the Ministry of Tourism statistics, there has been a growth rate of 75.71 per cent in number of approved Hotels to 1961 as on

December 2018 from 1116 as on December 2014. Similarly there was a growth rate of 43.85 per cent in number of approved Hotel Rooms in India to 102490 as on December 2018 from 71244 as on December 2014

(Table 7). Of course, this is only a subset of the hotel market which has grown sharply due to entry of online-based service

providers (data for this is being collected and will be a subject of a future Economic Survey).

Table 7: Number of Approved Hotels and Hotel Rooms for Major categories, 2014 to 2018

S. No.	Category of Hotels	as on 31.12.2014		as on 31.12.2015		as on 31.12.2016		as on 31.12.2017		as on 31.12.2018

Source: Ministry of Tourism

9.20 Some of the issues relating to tourism sector are briefly stated below:

- The co-ordination mechanism of various like-minded Ministries and Stakeholders to resolve issues for promotion of tourism in the country needs to be strengthened.
- State/UT Government need sensitization about tourism as a major driver of employment and poverty alleviation.
- Budgetary allocation for development of tourism infrastructure should be increased.
- Land should be made available for

hotels and reserve land for hotels in all new townships under planning.

- Fast-track clearances for hotel projects.
- Increase skill development efforts to train more persons.
- Make the Taxation regime on Hospitality Industry globally competitive.

IT –BPM Services

9.21 The Indian IT-BPM industry grew by 8.4 per cent in 2017-18 to US\$167 billion (excluding e-commerce but including hardware) from US\$154 billion in 2016-17, as per NASSCOM data (Table 8). It is estimated to have reached US\$181 billion in 2018-

19. IT-BPM exports grew by 7.7 per cent to US\$126 billion in 2017-18 and is estimated at US\$136 billion for 2018-19. E-commerce market is estimated at US\$43 billion for FY 2018-19, at the growth rate of 12 per cent. The IT services constitute the largest segment

with a share of around 52 per cent, followed by BPM with share of around 20 per cent. Software products and engineering services together accounted for around 19 per cent share whereas hardware accounts for 10 per cent (Figure 4).

(#): Expected with Current Pace.

9.22 The Indian Information Technology / Information Technology enabled Services (IT/ITeS) industry has contributed immensely in positioning the country as a preferred investment destination amongst global investors and creating huge job opportunities in India, as well as in the USA, Europe and other parts of the world. USA, UK and EU account for ~ 90 per cent of the total IT-ITeS exports. However, there are new challenges surfacing in these traditional geographies. Demand from APAC, Latin America and Middle East Asia is growing and new opportunities are emerging for expanding in continental Europe, Japan, China and Africa. Efforts are being made to further strengthen existing markets, and simultaneously diversify and increase presence in the new and emerging markets in Europe (besides UK which is a mature market), Africa, South America, Israel, Australia, China and Japan through market development and industry repositioning initiative.

9.23 India's digital economy has received a tremendous boost through various Government initiatives such as Digital India covering e-Government services, common service centres, BPO promotion schemes, digital payments, electronic manufacturing, Digital Saksharta Abhiyaan, e-commerce, GST network, Make in India, Start-up India, e-health, Smart Cities, and e-agriculture market place/ digital mandis. These initiatives coupled with new and emerging technologies are enhancing the digital economy of the country and are creating IT and electronics led new opportunities for revenue and job creation in both traditional as well as new sectors of the economy such as transport, health, power, agriculture, and tourism.

9.24 The National Policy on Electronics 2019 (NPE 2019) has been notified on February 2019 by the Ministry of Electronics and Information Technology (MeitY) inter-

alia include creating eco-system for globally competitive ESDM sector; promotion of electronic components manufacturing ecosystem; special package of incentives for mega projects; encouraging industry-led R&D and innovation and promoting start-up eco-system in all sub-sectors of electronics, including emerging technology areas such as 5G, IoT/ Sensors, artificial intelligence (AI), machine learning, augmented reality (AR) and virtual reality (VR), drones, robotics, additive manufacturing, gaming and entertainment, photonics, nano-based devices, medical electronics, defence and strategic electronics, automotive electronics, cyber security, power electronics and automation; providing incentives and support for skill development including re-skilling, in the ESDM sector; promoting research, innovation and support to industry for green processes and sustainable e-waste management, emphasis on cyber security and promoting trusted electronics value chain initiatives to improve India's national cyber security profile etc.

Media & Entertainment Services

9.25 The Media and Entertainment sector comprises mainly of television, print, radio, films, music, digital advertising, over the top (OTT-film and television content delivered over internet), visual effects (VFX) and gaming. Technology has rapidly changed the profile of this sector especially in the area of content and carriage. As per the FICCI-EY Media and Entertainment Report 2019, the size of the Industry has increased from ₹91,810 crore in 2013 to ₹1,67,500 crore in 2018, a growth of 82.44 per cent in the last 5 years. The size composition of the various components of the Industry can be seen in the Figure 5. Audio-visual services have been identified by the Government (2018) as one among the 12 Champion Service sectors for focused development so as to reap its full potential.

Figure 5: Composition of Media and Entertainment Industry in India 2018 (percentage of Revenue)

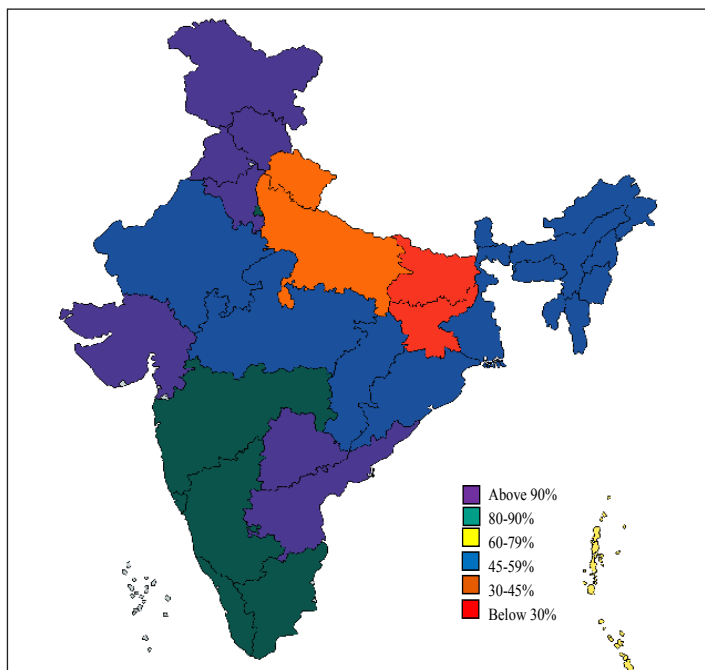

Source: FICCI-EY Media and Entertainment Report 2019

Private Television Sector

9.26 India is the second largest pay-TV market in the world after China. As per Broadcasting Audience Research Council of India (BARC)/EY estimates, out of the estimated 29.8 crore households in India, TV penetration reached 66 per cent in the country with 19.7 crore TV households in

2018, which is 7.7 per cent increase over the previous Broadcast India Survey 2016 (Figure 6). Of the 19.7 crore TV households, 10.3 crore households were covered by Cable services, 5.6 crore households by Direct to Home (DTH) services and 3.6 crore households were covered by Doordarshan Free Dish in 2018.

Figure 6: TV Penetration in India (2018)

Source: BARC, 2018

9.27 As per FICCI-EY Media & Entertainment Report (2019), TV sector grew at 12.1 per cent to reach ₹74,000 crore in 2018 with advertising comprising 41 per cent of the revenue while distribution accounted for the balance. India has at present a large broadcasting and distribution sector in the world comprising 906 satellite TV channels, 1469 Multi System Operators (MSO), 60,000 Local Cable Operators (LCO), 6 DTH operators and several IBTV service providers. 43 per cent of all private satellite channels are news channels (April 2019). The growth drivers for TV sector include digitisation of cable services, higher uptake of High Definition channels, growth of OTT platform aided by rising smart phone penetration and high speed data adoption.

9.28 In the distribution sector, Cable TV still dominates the distribution of TV channels in the country through MSOs and LCOs. DTH sector is rapidly becoming a key player in the distribution sector. Apart from Doordarshan's DD Free Dish, DTH services are provided by six other private players.

Public Service TV Broadcasting

9.29 Prasar Bharati is the country's public service broadcaster with All India Radio and Doordarshan as its two constituents. It came into existence in 1997 with a mandate to organise and conduct public broadcasting services to inform, educate and entertain the public and to ensure a balanced development of broadcasting in the country.

9.30 Doordarshan has the world's largest terrestrial broadcast facility with over 1400 terrestrial TV transmitters and also provides free to air DTH services. The terrestrial network of Doordarshan reaches out to every nook and corner with transmitters set up throughout the country. Currently, Doordarshan has 24 Satellite channels,

including a channel for farmers, News and Current Affairs, Art and Culture and Sports etc. 67 Studio Centres of Doordarshan spread across the country provide extensive coverage of News and Current Affairs to DD network channels.

9.31 Doordarshan also operates its own Direct to Home platform viz., DD Free Dish. DD Free Dish has a bouquet of 104 television channels including 24 Satellite channels of DD which operate 24X7 and 11 regional channels which operate for a few specified hours. The bouquet also has 44 audio channels of AIR. Activities of All India Radio are discussed in the section under Radio sector.

Print Media

9.32 Print accounted for the second largest share of the Indian M&E industry with revenue of ₹30,550 crore in 2018 with a growth of 0.7 per cent (FICCI & EY Report 2019). Print Industry is declining all over the world primarily due to huge in roads of internet and TV channels in media industry. India is also no exception to this phenomenon. The share of advertising revenue in Print Media is 71 per cent of the total revenue income while the balance is accounted for subscription revenue. While newspapers accounted for about 96 per cent of the revenue, the rest was through the magazines.

9.33 As per the Registrar of Newspapers for India (RNI), the number of registered publications in the country as on 31st March 2018 stood at 1,18,239, registering a growth of 3 per cent in 2017-18 over the previous year. However, growth of circulation of publications contracted by 11.9 per cent in 2017-18 over the previous year. The total circulation of publications in the country during 2017-18 was 43 crore of which Hindi, English and Urdu publications were 19.56

crore, 5.34 crore and 2.52 crore respectively. In terms of circulation of daily newspapers, there was a contraction by 11.9 per cent in 2017-18 with total circulation of daily newspapers falling to 24.26 crore. Hindi dailies continue to be the largest in terms of circulation followed by English and Urdu. (As on March 31, 2018).

Films

9.34 As per FICCI-EY Media & Entertainment Report (2019), India is the world’s biggest producer of films with 1,776 domestic film releases in 2018. Indian film industry grew at 12 per cent in 2018 with revenue of ₹17,450 thousand crore. The highest number of films were released in Kannada (243) followed by Hindi (238) and Telugu (237).

9.35 Despite producing the most number of movies in the world, India has less than 25 per cent of the number of screens as compared to China or USA. India has 9601 screens, of which 47 per cent are in the five southern states. China has been adding cinema screens at a CAGR of over 16 per cent over the last two years. India’s screens per million of population is also the very low, primarily due to lack of cinema penetration in tier-II, tier-III and tier-IV markets in India. This presents a large untapped potential for the Indian film segment (Figure 7, 8 and 9).

9.36 In the Overseas Theatre Performances, the highest number of film exports were made to the Gulf region (50) followed by Australia (48) and USA/Canada (46). In terms of value, however, China became the largest international market for Indian film content, accounting for highest collection of US\$272.3 million. While the number of screens (both single and multi-screen) have been steadily increasing, the screen count is still lower than large international markets.

Figure 7: Number of screens in India

Source: FICCI-EY Media & Entertainment Report (2019)

Digital Media

9.37 The various segments of digital media include- online video viewing, audios, news through OTT platforms and social media etc. As per FICCI-EY Media & Entertainment

Report (2019), total number of mobile subscribers stood at 1.17 billion in 2018. Smartphone users increased by 39 per cent to reach 340 million in 2018. Average data consumption doubled from 4 GB to 8 GB per month between 2017 and 2018. Moreover, digital media market grew 42 per

cent to reach ₹169 billion in 2018. Internet subscribers grew 28 per cent from 446 million in December 2017 to 570 million in November 2018, driven by rural internet subscriber growth of 49 per cent. Given that there are around 4 billion internet users in the world, one in eight is Indian (Table 9).

Table 9: Internet Penetration in India (2018)

	Dec-17 (Million)	Nov-18 (Million)	Growth (per cent)
Total internet subscribers	446	570	28
Urban internet subscribers	314	373	19
Rural internet subscribers	132	197	49

Figure 10: Category wise consumption of mobile content (Jan - Sept 2018)

Source: FICCI-EY Media & Entertainment Report (2019)

9.38 According to the total rate of content consumption on UC News Feed platform in India, Entertainment was the largest category in mobile content consumption for Indian users, accounting for 27.4 per cent, followed by sports (18.6 per cent) and lifestyle (13.8

per cent) (Figure 10).

9.39 Social Media penetration reached 17 per cent in 2018, up from 11 per cent in 2015. The most active social media platforms were YouTube, Facebook, WhatsApp and Instagram. (Figure 11)

Figure 11: Social media users and penetration in India (2018)

Radio Sector

9.40 All India Radio (AIR) broadcasts are functional at 479 locations covering nearly 92 per cent of the geographical area and 99.2 per cent of the population of the country. Presently, FM Service of AIR is being provided from 495 transmitters functional at 458 locations across the country reaching nearly 39 per cent of the area and 52 per cent of the total population of the country. Further expansion of AIR FM is being carried out in a phased manner under forthcoming schemes of AIR. In addition, 37 radio channels of AIR are available on Doordarshan's DTH platform (DD Free Dish) which can be received through a set top box all over the country.

9.41 The opening of private FM radio since 1999 has not only resulted in providing good quality of reception to radio listeners, but also helped encouraging local talent and generating employment to large number of people in various cities. As on May 2019, 380 Private FM channels are operational in 107 cities spread across 27 States and 3 Union Territories. The Government has announced policy guidelines on expansion of private FM Radio broadcasting (Phase-III) wherein the Ministry of Information and Broadcasting will auction 683 channels in 236 cities in

subsequent batches. Community Radio Stations are set up with the involvement of various educational institutions and civil society organizations. At present, 250 Community Radio stations have been operationalized. It is proposed to establish at least one CRS in each district with priority to coastal districts and aspirational districts.

Emerging Media

9.42 As compared to the traditional media, it is the non-linear media comprising of digital media including OTT, animation & VFX, live events, online gaming, etc. that has been witnessing double digit growth in the media & entertainment sector in recent years. The spread of broadband connectivity, fall in data prices, demand for regional language content have triggered the growth of digital media. The Animation, VFX, gaming and comics sector in India is also a thriving business with even Hollywood movies being outsourced to India for work related to post-production which includes video editing, visual effects, animation, 2D-3D conversion, etc. It is one of the sunrise sectors for India and given the rapid expansion of the sector the requirement of skilled professionals is also immense.

Policy initiatives

9.43 The Media and Entertainment sector needs to be holistically reviewed in the light of technological interventions that have redefined entertainment today. The following initiatives have been taken in the recent years to facilitate Media and Entertainment industry.

- In view of increasing piracy of films by unauthorized recording of films in cinema halls, a Bill has been introduced in the Rajya Sabha in February 2019 to amend the Indian Cinematograph

Act 1952. The Bill has since then referred to the Standing Committee on Information Technology for detailed examination.

- Audio-visual service has been identified by the Government as one among the 12 Champion Service sectors identified for focused development so as to reap its full potential. Ministry of Information & Broadcasting is proposing various incentives to promote audio-visual services. These include: Audio-visual co-production with foreign countries, incentives for shooting of foreign films in India, organization of global film summit and promotion of single screens in Tier II and Tier III cities.
- With the objective of imparting world class education in animation, gaming, visual effects and employment generation in the sector, Government of India is in the process of setting up National Centre of Excellence (NCOE) for Animation, Visual Effects, Gaming and Comics. Government of India has taken over the possession of land from Government of Maharashtra in March, 2018 at Goregaon, Mumbai. The project is being executed through Indian Institute of Mass Communication, New Delhi.
- As part of the initiative to encourage talent among youngsters of the North East in the sector of film and television, the Government of India has decided to establish a Film and Television Institute in Arunachal Pradesh. The project has been sanctioned at an estimated cost of ₹204.32 crore. Foundation stone for FTI, Arunachal Pradesh was laid in February 2019. A temporary campus has been set up in Itanagar where short courses have been conducted.

Space Services

9.44 Indian Space Programme contributes to National Development, through the application of space technology, comprising of earth observation, communication and navigation to address issues related to socio-economic development from macro to micro levels. Over the last three decades, space technology has matured from providing simple mapping applications to development of complex models, decision support and early warning systems, incorporating space and derived inputs. Satellite launch services and satellite database mapping and Geospatial services are areas in which India is making a mark and has huge potential for the future. India has achieved significant milestones in space transportation capability through the operationalization of Polar Satellite Launch Vehicle (PSLV), Geosynchronous Satellite Launch Vehicle (GSLV) and Geosynchronous Satellite Launch Vehicle Mark III (GSLV Mk-III) for launching satellites for earth observation, communication, navigation and space exploration. India became the sixth nation to develop this highly coveted complex cryogenic rocket propulsion technology and also paved the way for the development of a high thrust Cryogenic engine & stage for the next generation launch vehicle i.e. GSLV Mk-III.

9.45 In the case of Satellite Launching, as on March 2019, PSLV had cumulatively launched 324 satellites that include 45 National Satellites, 10 student satellites built by Universities/Academic institutions and 269 International customer satellites from 32 Countries. PSLV also holds the distinction of launching the highest number of satellites, 104, in a single launch. GSLV Mk-III has successfully completed a sub-orbital experimental flight followed by two developmental flights. In its second

developmental flight on November 14, 2018, GSLV Mk- III launched the heaviest satellite from Indian soil, GSAT-29, and has entered the operational phase. The first operational flight is slated to launch Chandrayaan-2 in 2019, which is India's second lunar mission and the first landing mission to the moon.

Bhuvan Services

9.46 ISRO's Bhuvan Geo-portal provides multi sensor, multi-platform and multi temporal Satellite Imagery, thematic maps and satellite data-derived information related to Earth Observation & Disaster Management Support. Since its launch in 2009, it has grown horizontally in diverse areas of applications, and vertically, in terms of number of images and thematic & disaster services including high-resolution satellite data. Presently, more than 6500 map services offered by Bhuvan are being used under various applications. Bhuvan has enriched portals of more than 20 Central Ministries/Departments and 30 States, and is also providing Geospatial support for many flagship programmes of the Government.

Mapping and Geospatial Services

9.47 Satellite data, synchronous with ground data, are used to estimate crop acreage in-season forecasting of production for 8 major crops in the country viz. wheat, rice (kharif & rabi), mustard, rabi sorghum, jute, winter

potato, sugarcane, cotton in the country. Using the techniques developed by ISRO, the Mahalanobis National Crop Forecast Centre (under Ministry of Agriculture & Farmers Welfare) regularly generates crop forecasts at District/State/National level and provides to the Government for planning and decision making. Some of the major satellite data based mapping/Geospatial services developed include Horticulture Crop Inventory, Hydro-informatic products under National Hydrology Project (NHP), Village level Ground Water Prospects, Telegana and Andhra Pradesh Water Resources Information & Management Systems (TWRIS/APWRIMS), Watershed Monitoring under Integrated Watershed Management Programme (IWMP), Monitoring of progress of road construction under PMGSY, GIS implementation of MGNREGA (GeoMGNREGA), Inventory & site Management plans for heritage sites & monuments, Monitoring of stage of construction of beneficiary houses under Housing for All-Urban (PMAY), Geospatial database for Urban Master Plan formulation under AMRUT, etc.

9.48 Periodic assessment of state of natural resources like vegetation, land cover, snow & glacial and wetland is also being carried out, in addition to national level assessment of status of wastelands and land degradation.

CHAPTER AT A GLANCE

- Services sector (excluding construction) has a share of 54.3 per cent in India's GVA and contributed more than half of GVA growth in 2018-19.
- The services sector growth declined marginally to 7.5 per cent in 2018-19 from 8.1 per cent in 2017-18 due to deceleration in the growth of sub sectors such as trade, hotels, transport, communication and broadcasting services. However, growth of financial services, real estate and professional services accelerated.

- India's services sector does not generate jobs in proportion to its share in GVA. Services share in employment is 34 per cent in 2017 which is significantly lesser than its share of 54 per cent in GVA
- The moderation in services growth is reflected in various other high frequency indicators such as bank credit to services sector, Nikkei India Services PMI, air passenger traffic etc.
- During 2018-19, FDI equity inflows into service sector fell by US\$696 million or 1.3 per cent from the previous year to about US\$28.26 billion.
- India received 10.6 million foreign tourists in 2018-19 compared to 10.4 million in 2017-18. The foreign exchange earnings from tourism stood at US\$27.7 billion in 2018-19 compared to US\$28.7 billion in 2017-18.
- The IT-BPM industry grew by 8.4 per cent in 2017-18 to US\$167 billion and is estimated to reach US\$181 billion in 2018-19.

Social Infrastructure, Employment and Human Development

10 CHAPTER

“More than ever before, there is a global understanding that long-term social, economic, and environmental development would be impossible without healthy families, communities and countries.”

Gro Harlem Brundtland¹

Inclusiveness has been the cornerstone of India’s development agenda. Over the last few years, efforts in this direction have been accelerated by the Government through the mantra of inclusiveness ‘Sabka Sath, Sabka Vikas’, further elaborated by ensuring ‘Sabka Vishwas’. As India is a developing economy with resource constraints, we have to prioritize and optimize the expenditure on social infrastructure to promote sustainable and inclusive growth. It is critical at this juncture to focus on public investments in human capital and strengthen the delivery mechanisms of government interventions to ensure transparency and accountability. With India having the demographic advantage, improving educational standards, skilling the youth, enhancing job opportunities, reducing disease burden and empowering women will help in realizing the potential of a buoyant economy in the future.

INTRODUCTION

10.1 The 2030 Agenda for Sustainable Development as reflected in the 17 Sustainable Development Goals (SDGs) and 169 targets, calls for global partnership to ensure peace and prosperity for people and the planet, now and into the future. It is recognized that ending poverty and other deprivations must go hand-in-hand with strategies that improve health and education, reduce inequality and spur economic growth in a sustainable manner. India is committed to achieve these SDGs and a strong social infrastructure is key to achieve them. The Government has been focusing

on provisioning of assets such as schools, institutes of higher learning, hospitals, access to sanitation, water supply, road connectivity, affordable housing, skills and livelihood opportunities. This gains significance given the fact that India is home to the world’s youngest population as half of its population is below the age of 25. It has also been estimated that demographic advantage in India is available for five decades from 2005-06 to 2055-56, longer than any other country in the world (UNFPA, 2018). This demographic advantage can be reaped only if education, skilling and employment opportunities are provided to the young population.

¹ First female Prime Minister of Norway. Brundtland Commission submitted its report ‘Our Common Future’ which brought the concept of Sustainable Development in the global agenda.

HUMAN DEVELOPMENT INDEX

10.2 India's HDI (Human Development Index) has improved significantly over the years between 1990 and 2017. The country's HDI value increased from 0.427 to 0.640, but its position is still lowest among its peer countries (Asian and developing economies). As per the UNDP Human Development Index (HDI), India is ranked 130 among 189 countries. Moreover, India also reflects inter-State disparities in regional and human development which are reflected by State level HDIs.

10.3 The Subnational Human Development Index (SHDI) for different States for the period 1990 and 2017, released by UNDP show that all States have shown significant improvement in levels of human development. The minimum SHDI for year 2017 is more than maximum SHDI for year 1990 across all States (Figure 1).

10.4 The 2017 HDI scores indicate that the States like Kerala, Goa, Himachal Pradesh

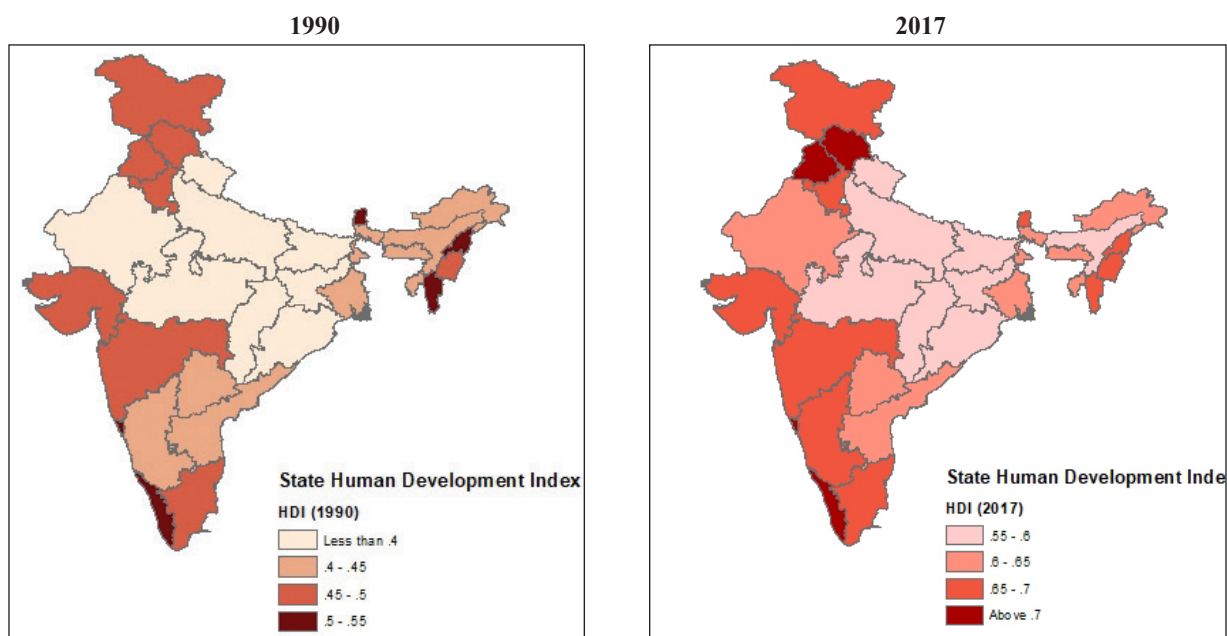

and Punjab occupy the top four positions while the States like Bihar, UP and MP are at the bottom of the rankings. The States which were the worst-performing ones in HDI during 1990s are presently doing well in the social parameters. The region-wise trend of HDI scores suggests that most Southern and Northern States have performed much better as compared to their Eastern counterparts who have registered poor performance in SHDIs.

Sustainable Development Goals (SDGs)

10.5 As mentioned earlier, the SDG's are a collection of 17 global goals and 169 targets set to be achieved by 2030, aimed at addressing global challenges. To measure India's performance in SDG's, NITI Aayog has developed the SDG India Index for all States and UTs. Based on this index, States are classified into four categories, for each of the SDGs (except Goals 12, 13, 14 and 17):

- a. **Achiever** – when SDG India Index score is equal to 100.

Figure 1: Subnational Human Development Index 1990 vs 2017

Source: SBI Research and UNDP Global Data Lab

- b. Front Runner** – when SDG India Index score is less than 100 but greater than or equal to 65.
- c. Performer** – when SDG India Index score is less than 65 but greater than or equal to 50.
- d. Aspirant** – when SDG India Index score is less than 50.

that States like Kerala, Himachal Pradesh and Tamil Nadu are occupying top three positions and are in the front runner category while UP, Bihar and Assam are ranked at the lowest in the aspirant category. Figure 2 shows the ranks of different States along with their categories. Chapter 5 on Sustainable Development and Climate Change may be referred for more details.

10.6 The 2018 SDG India index indicates

Figure 2: States Rank and categories in SDG India Index (2018)

Source: SDG India Index by NITI Aayog

Table 1: SDGs targets and achievements in Health - Goal 3: Good Health & Well-Being

	Global Targets	India's Achievements
1	By 2030, reduce the global MMR to less than 70 per 100,000 live births.	India's MMR during 2014-16 was 130.
2	To reduce neonatal mortality to at least as low as 12 per 1,000 live births by 2030.	In 2016, Neo-natal mortality rate of India was 24.
3	To reduce under-5 mortality to at least as low as 25 per 1,000 live births by 2030.	In 2016, under-5 mortality rate of India was 39.

Table 2: SDGs target and achievements in Education - Goal 4: Quality Education

Global Targets	India's Achievements
1. By 2030, ensure that all girls and boys complete free, equitable and quality primary and secondary education leading to relevant and effective learning outcomes.	U-DISE provisional data shows that the all India gross enrolment ratio (GER) under elementary education is 93.55 per cent during 2016-17, while it is 79.35 per cent in secondary education.
2. By 2030, ensure equal access for all women and men to affordable and quality technical, vocational and tertiary education, including higher education.	India's GER is significantly lower in higher education. The MHRD provisional data for the year 2017-18 indicates that the GER in higher education is 25.8 per cent (18-23 years).
3. By 2030, eliminate gender disparities in education and ensure equal access to all levels of education and vocational training for the vulnerable, including persons with disabilities, indigenous peoples and children in vulnerable situations.	India's gender parity index (GPI) shows an improvement in girls' education at all levels of education, except higher education. In the case of Scheduled Tribe (ST) students, the GPI value is <1 indicating disparity between girls and boys in primary education.
4. By 2030, ensure that all youth and a substantial proportion of adults, both men and women, achieve literacy and numeracy.	The total literacy rate is 73.0 per cent in 2011 for the age group 7 and above having 80.9 per cent and 64.6 per cent for male and female respectively.

Source: Reports of GoI

10.7 The underlying dimensions of SDG targets are closely related to education and health aspects as evident in the positive correlation between HDI and SDG rankings of Indian States (Figure 3).

Hence, it is imperative that the government policies give necessary focus on investments in education and health to achieve equitable and inclusive development in the country.

Figure 3: Correlation between HDI and SDG rankings of Indian States for year 2018

Source: Calculation based on SDG India Index - Baseline Report, 2018 and UNDP-SBI Research (SBI-ECOWRAP), March 2019.

GENDER ISSUES

10.8 As the World aspires to achieve the SDGs by 2030, one of the most important factors which will determine whether countries achieve their targets set under SDGs will be ‘gender equality’ (SDG-5). The role of women is critical not only across agriculture and industrial sectors but also in governance, education and health services. Societies with patriarchal norms and gender stereotyping will continuously move backwards without making progress. The Government of India has initiated several programmes like *Beti Bachao, Beti Padhao (BBBP)*, *Ujjwala Scheme*, *Poshan Abhiyaan*, *Pradhan Mantri Matra Vandana Yojana etc.*, to mainstream women and make women active agents of

change in the society.

Financial Inclusion and level of household autonomy of women

10.9 Financial inclusion of women is considered as an essential tool for empowerment of women as it enhances their self-confidence and enables financial decision-making to a certain extent. As far as financial inclusion in India is concerned, significant progress has been made during the last decade (Figure 4). At all India level, the proportion of women having a bank or saving account that they themselves use have increased from 15.5 per cent in 2005-06 to 53 per cent in 2015-16.

Figure 4 : Percentage of women having bank account-State wise

Source: NFHS-4 (2015-16) (latest available).

Note: Data for newly created states Andhra Pradesh & Telangana have not been reported for 2005-06.

10.10 As far as women’s participation in household decision making is concerned, it has also improved significantly. As per NFHS-4, participation of currently married women in household decision making has increased from 76.5 per cent in 2005-06 to 84

per cent in 2015-16 at all India level. States like Chhattisgarh, Goa, Himachal Pradesh, Kerala, West Bengal and North Eastern States are front runners in terms of women’s participation in household decision making compared to other States (Figure 5).

Figure 5 : Percentage of Currently Married Women (15-59 years) involved in Household Decision Making- State wise

Source: NFHS 4 (2015-16) (latest available).

Note: Data for newly created states Andhra Pradesh & Telangana have not been reported for 2005-06.

Box 1: Gender Budgeting

“Gender Budgeting is a tool for gender mainstreaming. It uses the Budget as an entry point to apply a gender lens to the entire policy process (MoWCD, 2015)”. The Ministry of Women and Child Development (MoWCD) as the Nodal agency has adopted the mission strategy of 'Budgeting for Gender Equity' to ensure that government budgets are planned according to the differential needs of women and men and accordingly prioritized. Gender Budgeting is concerned with gender-sensitive formulation of legislation, policies, plans, programmes and schemes; allocation and collection of resources; implementation and execution; monitoring, review, audit and impact assessment of programmes and schemes; and follow-up corrective action to address gender disparities. It is undertaken through several institutional mechanisms such as Gender Budget Statement, Gender Budget Cells, as well as various schemes/programmes for women and girls.

Gender budgeting was referred for the first time by the then Finance Minister of India in his budget speech in 2001. Subsequently, it was recommended to have a separate chapter in annual reports of Ministries/Departments. Department of Expenditure has been issuing a note on Gender Budgeting as a part of budget circular since 2005-06. Further, Chief Secretaries of all States/UTs were instructed to set up gender budget cells on the lines of the Charter for Gender Budget cells issued by the Ministry of Finance in 2012. A guideline was also issued to provide a road map towards institutionalising Gender Budgeting at State level in 2013. In order to implement Gender Budgeting at State level, MoWCD has been conducting number of trainings, workshops, one to one interactions and development of resource material.

In the Gender Budget Statement of 2019-20, 30 Ministries/Departments reported having schemes with women's component, amounting to approximately 5 per cent (₹1,31,699.52 Crore) of the total Union Budget. Furthermore, 57 Ministries/Departments have formed Gender Budget Cells to institutionalise and strengthen gender budgeting processes. During the last 3 financial years, over 4500 Government officials have been trained under the GB Scheme.

TRENDS IN SOCIAL SECTOR EXPENDITURE

10.11 The expenditure on social infrastructure like health and education is a critical indicator of the commitment of the government towards these sectors. Public investment in social infrastructure has a critical role in providing access to social services for the people, especially the marginal and vulnerable sections of the society.

10.12 The expenditure on social services by the Centre and States as a proportion of GDP

has registered an increase of more than 1 percentage points during the period 2014-15 to 2018-19 (BE), from 6.2 per cent in 2014-15 to 7.3 per cent in 2018-19 (BE) (Table 3). The increase was witnessed across all social sectors especially education where the public expenditure as a per cent of GDP increased from 2.8 per cent in 2014-15 to 3 per cent in 2018-19. The share of expenditure on social services out of total budgetary expenditure increased from 24.9 per cent in 2013-14 to 26 per cent in 2018-19.

Table 3: Trends in Social Services Expenditure by General Government (Combined Centre and States)

Item	2013-14	2014-15	2015-16	2016-17	2017-18 RE	2018-19 BE
(₹ in crore)						
Total Budgetary Expenditure	30,00,299	32,85,210	37,60,611	42,65,969	48,57,990	53,61,181
Expenditure on Social Services of which:	7,46,391	7,67,622	9,15,500	10,40,620	12,52,943	13,93,643

Source: Budget Documents of Union and State Governments, Reserve Bank of India.

Note:

1. Social services include, education, sports, art and culture; medical and public health, family welfare; water supply and sanitation; housing; urban development; welfare of SCs, STs and OBCs, labour and labour welfare; social security and welfare, nutrition, relief on account of natural calamities etc.
2. Expenditure on 'Education' pertains to expenditure on 'Education, Sports, Arts and Culture'.
3. Expenditure on 'Health' includes expenditure on 'Medical and Public Health', 'Family Welfare' and 'Water Supply and Sanitation'.
4. The ratios to GDP at current market prices are based on 2011-12 base.

10.13 The Government has been committed to provision of social security which is evident in the initiation of major social sector schemes by the Government of India during the last five years as shown in Table 4.

Table 4: Major Social Protection Schemes and Achievements during 2014-2019

Scheme	Features	Status
Pradhan Mantri Suraksha Bima Yojana, 2015	Accident insurance scheme, offers a one-year accidental death and disability cover. Annual premium is ₹12. Available to people in the age group 18 to 70 years	As on 31/10/2018, gross enrolment is 14.27 crore. Amount of claims raised: ₹449.82 crore
Pradhan Mantri Jeevan Jyoti Bima Yojana, 2015	Government-backed life insurance scheme. Annual premium is ₹330. Available to people between 18 and 50 years of age	As on 31/10/2018, gross enrolment is 5.57 crore, Amount of claims raised: ₹2422.54 crore
Atal Pension Yojana, 2015	Pension scheme targeted at the unorganized sector.	In 2017-18, total subscribers enrolled were 97.05 lakh
Pradhan Mantri Fasal Bima Yojana, 2016	A Crop Insurance Scheme. Replaces the existing two schemes National Agricultural Insurance Scheme as well as the Modified NAIS.	Kharif 2017: 13.7 million farmers received compensation of ₹17209.94 crore.
Pradhan Mantri Vaya Vandana Yojana, 2018	Pension Scheme exclusively for the senior citizens aged 60 years and above.	As on 30/11/2018, 3.31 lakh subscribers, corpus of ₹22,812.75 crore
Atal Bimit Vyakti Kalyan Yojana, 2018	For Insured Persons (IP) covered under the Employees' State Insurance Act, 1948. Relief payable in cash in case of unemployment and while they search for new engagement.	To benefit 3 crore insured persons under ESIC coverage

Pradhan Mantri Rojgar Protsahan Yojana	12 per cent of employer contribution to EPFO of the new employees' drawing salary upto ₹15000 pm is given by government for the initial three years.	Number of establishments benefitted between 2016-17 & 15 th January, 2019 was 1.24 lakh.
PM Shram-Yogi Mandhan Yojana, 2019	Offers every individual with a regular pension after they attain 60 years. Beneficiaries in unorganized sector workers.	As on 20 th June, 2019 30.67 lakh subscribers
PM-KISAN, 2019	Offers income support of ₹6000/- per annum in three equal instalments to all eligible farmers irrespective of land holdings.	As on 23 rd April, 2019, around 3.10 crore small farmers have received the first tranche of ₹2,000 and 2.10 crore farmers have got the second instalment.
Ayushman Bharat, 2018	Umbrella scheme of two major health initiatives: (i) Health & Wellness Centres to provide to comprehensive primary health care. (ii) PMJAY aims to cover 10.74 crore poor & vulnerable families providing health coverage upto ₹5 lakh per family per year for secondary & tertiary hospitalization.	As on 11 th January, 2019, 4503 HWCs operationalized. PMJAY: as on 30 th December, 2018, no. of hospitals empaneled: 16,112, beneficiaries admitted: 6.81 lakh, e-cards issued: 39.48 lakh.
National Nutrition Mission or POSHAN Abhiyaan	Ensure attainment of malnutrition free India by 2022. Targeted intervention in areas with high malnutrition burden.	Scheme rolled out in all districts of 36 States/UTs. Mass media campaign and information dissemination at grassroots level being undertaken. September 2018 observed as Rashtriya Poshan Maah (month).
Mission Indradhanush (MI) and Intensified Mission Indradhanush (IMI)	To vaccinate unreached/partially reached pregnant women and children so as to reduce vaccine preventable under-5 mortality rate. The drive is focused on pockets of low immunization average and hard to reach areas where proportion of unvaccinated and partially vaccinated children and pregnant women is high.	As of 12 th April, 2019, 3.39 crore children immunized of which 81.79 lakh fully immunized. Under IMI, full immunization coverage in 190 districts increased from 50.5 per cent to 69 per cent as per Coverage Evaluation Survey, 2018 conducted by WHO and UNDP.
Pradhan Mantri Awas Yojana-Rural & Urban	Housing for All by 2022	PMAY - Urban: 80.96 lakh houses sanctioned and 25.69 lakh houses completed as on 27 th May, 2019. 90 lakh houses completed in PMAY-Gramin during 2017-19.
Swachh Bharat Mission-Urban +Rural	100 per cent open defecation free by 2019	Urban areas of 21 States/UTs declared ODF 5.33 lakh villages in 25 States/UTs declared ODF

Source: Year-end achievements of various Central Ministries.

EDUCATION FOR ALL

10.14 Goal 4 of Sustainable Development Goals (SDGs) on education requires ensuring equitable, inclusive and quality education along with promotion of lifelong learning opportunities for all by 2030.

Status of Education in India

10.15 As per Educational Statistics at a Glance (ESAG), 2018, the thrust on

providing primary education has yielded results across social categories and gender in Gross Enrolment Rate (GER). Over the years, remarkable progress has been made in respect of female participation up-to secondary level and GER for girls has exceeded that of boys (Table 5). But girls' enrolment rate is lower than that of boys at the higher education level. At this level, the gap is visible across the social categories too (Figure 6).

Table 5: GER (per cent), Drop-out Rate (per cent) and Pupil Teacher Ratio at levels of schooling

Level	GER (2016-17)	Drop-Out Rate (2016-17)	Pupil Teacher Ratio (Norm) 2015-16
Primary	Male: 94.02	Male: 6.3	23 (30 - RTE)
	Female: 96.35	Female: 6.4	
Upper Primary	Male: 86.90	Male: 4.97	17 (35 - RTE)
	Female: 95.19	Female: 6.42	
Secondary	Male: 78.51	Male: 19.97	27 (30 – Secondary level laid down in the relevant Scheme)
	Female: 80.29	Female: 19.81	
Senior Secondary	Male: 54.93	Male: 6.37	37
	Female: 55.91	Female: 5.49	
Higher Education	Male: 26.3	NA	30
	Female: 25.4	NA	

Source: Educational Statistics at a Glance 2018, U-DISE 2016-17 and AISHE 2017-18 (latest available).

Figure 6: GER at Higher Education Level (per cent) 2017-18

Source: AISHE, 2017-18 (Ministry of Human Resource Development)

10.16 The drop-out rates are very high for boys at the secondary school level. According to NSSO 71st round² (2014), the reasons for male students dropping out are economic activities, lack of interest in education and financial constraints. The transition rate from secondary school to senior secondary and further to higher education is also very low. The Pupil Teacher Ratio (PTR) at national level for primary schools is 23, 17 for upper primary, 27 for secondary and 37 for senior secondary schools. While the PTR appears to be satisfactory, it is clear that while there are sufficient teachers, the main issue is their balanced deployment based on student strength.

² Key Indicators of Social Consumption in India: Education, 2014.

Gender Parity Index (GPI) based on GER

10.17 GPI based on GER indicates increasing trend of female participation at all levels (Figure 7). At the higher education level the GPI is low (0.92 in 2015-16 for

Figure 7: Gender Parity Index (2015-16)

Source: Educational Statistics at a Glance, 2018

Learning Outcomes: Improving quality of education

10.18 As per Annual Status of Education Report (ASER, 2018), from 2014 to 2018, there is a gradual improvement in both basic literacy and numeracy for Class III students but still only a quarter of them are at grade level (ability to read and do basic operations like subtraction of Class II level). The report also shows that 1 out of 4 children leaving Class VIII are without basic reading skills (ability to read at least at Class II level).

10.19 The Rules of the RTE Act were amended in February, 2017 to include, for the first time, the class wise, subject wise Learning Outcomes till Class VIII, thereby emphasising the importance of quality education. In this regard, Learning Outcomes for each class in Languages (Hindi, English and Urdu), Mathematics, Environmental Studies, Science and Social Science up to the elementary stage have been developed. These

higher education level and for all other levels it was above 1) (Figure 7). Although, enrolment of girls is higher than that of boys in government schools, the pattern gets reversed in private schools. The gender gap in enrolment in private schools has consistently increased across age groups (Figure 8).

Figure 8: Gender gap in GER in Private schools (per cent)

Source: ASER, 2018.

are the basic levels of learning that students should achieve at the end of each class.

National Achievement Survey

10.20 National Achievement Survey (NAS) which was earlier based on textbook content, has been made a competency-based evaluation from 2017. As compared to only 4.43 lakh students who were earlier tested across Classes 3, 5 and 8, in 2017 over 22 lakh students from around 1,10,000 schools across 701 districts of India (including rural and urban) were assessed. In the case of Class X, over 15 lakh students from around 44000 schools across 609 districts were assessed in 2018 compared to 2.77 lakh students assessed in the previous cycle at the State level only. The NAS, 2017 was therefore one of the world's largest sample surveys of student learning achievement. The District wise report cards, generated under NAS, show the learning levels of students in every district against the expected learning

outcomes of a particular grade. In the case of Class X, over 15 lakhs students from around 44000 schools across 609 districts were assessed in 2018 compared to 2.77 lakh students assessed in the previous cycle at the State level only.

Shortfall of teachers

10.21 The shortage of teachers is a perennial problem with 9.08 lakh vacancies of teachers at elementary level in government schools as on 31st March 2016. This is despite the high number of pass-outs in D.Ed./B.Ed. programme and the number of surplus teachers in zero enrolment schools (Table 6).

Table 6: Available manpower for teaching job, pass out in D.Ed. /B.Ed. and number of surplus teachers during 2015-16

No. of candidates	Male	Female	Total
D.Ed. or equivalent pass out	39011	49501	88512
B.Ed. pass-out	197793	348440	546233
Teachers in schools with zero enrolment	-	-	24921
Total availability of school teachers	-	-	636861
Demand for teachers at elementary level	-	-	400000 (approx.)

Box 2: Recent Initiatives in School Education Sector

Samagra Shiksha: A comprehensive programme subsuming Sarva Shiksha Abhiyan (SSA), Rashtriya Madhyamik Shiksha Abhiyan (RMSA) and Teacher Education (TE). For first time, it also includes provisions for support at pre-school level, library grants and grants for sports and physical equipment. The vision of the Scheme is to ensure inclusive and equitable quality education from pre-school to senior secondary stage in accordance with the Sustainable Development Goal (SDG) for Education (SDG-4).

Swayam platform offers 10 courses of Diploma in Elementary Education (D.El.Ed) and more than 13 lakh unqualified teachers have enrolled for this diploma.

UDISE+, an updated online real time version of UDISE (Unified District Information on School Education) has been launched with three additional features – GIS mapping, data verification through third-party mobile application and data analytics.

PGI, Ministry of Human Resource Development has launched a 70-point Performance Grading Index (PGI) to assess areas of deficiency in each state's school education system so that targeted interventions can be made at every level from pedagogy to teacher training.

ICT driven initiatives: Shaala Sidhi (to enable all schools to self-evaluate their performance), e-Pathshala (providing digital resources such as textbooks, audio, video, periodicals etc.) and Saransh (an initiative of CBSE for schools to conduct self-review exercises).

10.22 The shortage of teachers and principals and administrative staff, lack of regular supervision and inspection, inadequate training of the teachers, timely availability of finances are some of the factors plaguing the education system in the country as captured by

PGI (Performance Grading Index, 2017-18) in the Governance and Management Domain for the first time. As per PGI report, 2017-18 in this domain, the top score (279, Gujarat) is only 78 per cent of the maximum points (360) and at the other end of the spectrum,

the minimum score obtained in this Domain is below 40 per cent (36.1 per cent). This clearly implies that ‘Governance’ is the domain which all States and UTs must focus upon. The PGI accords the highest importance to the Domain relating to Governance and Management because compliance with the indicators here will lead to critical structural reforms in areas ranging from monitoring the attendance of teachers to ensuring a transparent recruitment of teachers and principals.

SKILL DEVELOPMENT

10.23 The schooling system improves the educational level of the population. It is skill

training that equip the youth to enter the labour market and improves their employability. According to NSSO Report 2011-12, only 2.3 per cent of the total workforce in India had formal sector skill training. Keeping in view the predominance of young population, the Government had formulated the National Policy on Skill Development & Entrepreneurship, 2015 under which the Skill India Mission by 2022 was formulated. The government had launched a comprehensive skill development programme in the last five years with the setting up of a Ministry for Skill Development & Entrepreneurship. Some of the major skill development programmes are listed in Table 7.

Table 7: Skilling in India: Recent Government Initiatives

Initiatives	Objectives	Achievements
Pradhan Mantri Kaushal Vikas Yojana (PMKVY) (1.0), 2015	Mobilize youth to take up industry relevant skill training. Targets to train 1 crore youth by 2020. Recognizes and certifies prior learning.	During 2015-16, 19.8 lakh youth were trained as against the target of 24 lakh.
Pradhan Mantri Kaushal Vikas Yojana (2.0), 2016-20	PMKVY version 2 has mandatory provisions for placement tracking.	Short term training: 30 lakh candidates enrolled, 27.9 lakh trained, 12.05 lakhs placed. Placement percentage: 54 per cent. Recognition of Prior Learning: 22.65 lakh enrolled, 22.08 lakh trained and 17.84 lakh assessed out of which 16.60 lakh passed as on 13 th May, 2019
Pradhan Mantri Kaushal Kendra, 2015	Aspirational Model Training Centers to be opened in every district.	Till June 2019, 851 PMKKs have been allocated, 601 PMKKs have already been established.
National Apprenticeship Promotion Scheme, 2016	To promote apprenticeship. Consists of Basic Training and On-the-Job Training/ Practical Training at workplace.	Till June 2019, 11.87 lakhs candidate registered. 76,860 establishments registered under the scheme.
SANKALP, 2017	Creating convergence among all skill training activities, improving quality of skill development programmes, Creating industry led and demand driven skill training capacity.	As on December 2018, the process of disbursements of funds to States/ UTs is underway. Regional workshops with States/ UTs are also being held to facilitate roll out.
STRIVE, 2017	Creating awareness through industry clusters, integrating and enhancing delivery quality of ITIs.	As on December 2018, the operations manual of the project has been prepared.

Source: Ministry of Skill Development & Entrepreneurship.

Bridging the disconnect in the Skilling Ecosystem

10.24 The various government initiatives in the skilling ecosystem require further coordinated and concerted efforts between various Departments/Ministries and State governments for improving quality, relevance, quantity, aspirations, mobility and financing of skill development. Some recommendations towards improving the skill development programmes are stated below:

- Approximately 30 per cent of the surveyed STT participants in PMKVY were not looking for employment

currently. At implementation level, proper pre-screening on the candidates should be done and ensure that only eligible candidates are enrolled for the programme. Moreover, stronger facilitation support to avail MUDRA loan should be provided to PMKVY certified candidates.

- Skill Voucher can be introduced as a financing instrument given to a beneficiary that enables them to sign up for vocational education course at any accredited training institute. Once training is completed, the accredited

Box 3: Impact of PMKVY.2 on Employability and Income- An Evaluation

The key question which the evaluation of PMKVY.2 aimed to answer is: *What is the impact of PMKVY training and certification on the employability and income of its participants?*

For evaluation of STT (Short Term Training) component, a three-arm design has been adopted. Arm 1 consists of individuals who have completed their training and have been certified under PMKVY. Arm 2 consists of individuals who have completed their training but have not been certified (did not appear or pass the assessment test) under PMKVY. Arm 3 consists of individuals who are similar to the PMKVY trained/certified respondents in terms of eligibility criteria but have not attended the PMKVY training. Through this design, the study aims to essentially assess the impact of PMKVY training and certification on employment and salary premium, based on survey conducted during December, 2018 to January, 2019 of PMKVY trained candidates.

Employment impact: Impact analysis of STT on the employability shows that PMKVY training and certification has led to a nine-percentage point increase in proportion of employed individuals, as the proportion of employed individuals was 32 per cent in Arm 1 as compared to 23 per cent in Arm 3. PMKVY training alone was found to have an impact of eight percentage points on employability, as Arm 2 employment rate was 31 per cent as compared to 23 per cent in Arm 3. However, PMKVY certification alone, was found to have a non-significant impact of two percentage points when the employment rate of Arm 1 was compared with employment rate of Arm 2 respondents.

Income impact: On assessment of impact of STT on the income, PMKVY training and certification was observed to have an impact of 15 per cent on the mean monthly income (₹8629/- in Arm 1 as compared to ₹7474/- in Arm 3). PMKVY training alone was observed to have an impact of nine per cent, as mean monthly income of PMKVY trained individuals was observed to be ₹8283 as compared to ₹7584 of the comparison group. Also, PMKVY certification alone was found to have an impact of nine per cent on the mean monthly income (₹8588 in Arm 1 as compared to ₹7907 in Arm 2).

While assessing the impact of RPL (Recognition of Prior Learning) programme on income, a significant difference of 19 per cent was observed in the mean monthly income of RPL certified candidates (₹10997/-) when compared to that of the comparison group (₹9275/-). The analysis of the before RPL and current monthly income of RPL certified individuals suggest a 25 per cent increase in their mean monthly income (₹11006/- currently as compared to ₹8836/- before RPL programme). Further, 35 per cent of PMKVY certified respondents who had an increase in their current income, have acknowledged the contribution of RPL programme in the same.

Source: Ministry of Skill Development & Entrepreneurship.

institution can redeem the voucher from the government.

- Industry should be incentivized to set up training institutions in PPP mode. Local Industry must be involved for curriculum development, training modules, provision of equipment, training of trainers etc. Industry can help in developing a database of instructors for selection of Training providers.
- The personnel of Railways and other para-military forces could be used for skill training or lending institutional support in imparting training in hilly, inaccessible and difficult terrains. Local bodies can be used for skill mapping and creating a data base of youth at local level to assess demand supply gaps.

EMPLOYMENT SCENARIO

Findings of Periodic Labour Force Survey

10.25 The Periodic Labour Force Survey (PLFS) has been designed to yield annual estimates of the labour force on employment and unemployment along with quarterly estimates for the urban areas. The first annual PLFS (2017-18) provides quarterly employment statistics for urban areas on Current Weekly Status (CWS) basis and annual estimates of employment indicators both in rural and urban areas on CWS and usual status basis³. However, labour market estimates by PLFS is not strictly comparable with NSSO-EUS. For comparability, the result of the PLFS with earlier rounds of NSSO surveys need to be understood in the context with which the survey methodology and sample solution has been designed.

10.26 As per PLFS estimates, Labour Force Participation Rate (LFPR) in India has

Table 8: Key Labour Market indicators for all age group in 2017-18 (in per cent)

Indicators	Rural	Urban	Total
Usual Status			
LFPR	37.0	36.8	36.9
WPR	35.0	33.9	34.7
UR	5.3	7.8	6.1
CWS			
LFPR	35.7	36.4	35.9
WPR	32.6	32.9	32.7
UR	8.5	9.6	8.9

Source: Annual Report, PLFS (2017-18)

declined to 36.9 per cent in 2017-18 from 39.5 per cent in 2011-12 (NSSO) as per usual status. In rural areas, it has declined by 3.6 percentage points while it has declined by 0.1 percentage points in urban areas. The Worker Population Ratio (WPR) has also shown similar trend. As per usual status, WPR in India has declined to 34.7 per cent in 2017-18 from 38.6 per cent in 2011-12 (NSSO). The WPR has declined by 4.9 percentage points in rural areas while it has declined by 1.6 percentage points in urban areas (Table 8).

10.27 The unemployment rate (UR) in India stood at 6.1 per cent with 5.3 per cent in rural areas and 7.8 per cent in urban areas as per usual status. As per CWS, the UR was 8.9 per cent with 8.5 per cent in rural areas and 9.6 per cent in urban areas (Table 8).

10.28 General education of youth has improved to 65.4 per cent for urban females and 65.8 per cent for urban males. However, 94.3 per cent of those aged 15 or over in urban areas do not have technical education. The proportion of urban youth who received formal vocational training has improved to 4.4 per cent in 2017-18. PLFS found on average, a male employee earned nearly 1.2-1.3 times the earnings of female regular

³ A person who is unable to get work for even for an hour in the last seven days of reference week despite available and seeking for work is considered as unemployed under CWS while under usual status activity of a person is determined on the basis of reference period of 365 days preceding the date of survey.

salaried worker in 2018. However, self-employed male workers earned 2 times more than the earnings of self-employed female workers in urban areas in 2018.

10.29 Keeping in view India's demographic advantage and with almost 93 per cent of the informal workforce, it is important to improve measures of employment through administrative statistics, which should be complemented by periodic surveys. In this direction, the Ministry of Statistics and Programme Implementation has started bringing out estimates of new subscribers/members enrolling in large

social security schemes like the Employees' Provident Fund (EPF), Employees' State Insurance (ESI) Scheme and the National Pension Scheme (NPS). The next section examines the indicator for employment in formal sector based on the payroll data of EPFO.

Indicators for Employment in Formal Sector

10.30 The Government has been bringing out the employment related statistics in the formal sector (since April 2018) covering the period September 2017 onwards, using

Figure 9: Indicator for Employment in Formal Sector (in thousands)

Source: EPFO data

information on the number of subscribers who have subscribed under three major schemes, namely, the Employees' Provident Fund (EPF) Scheme, the Employees' State Insurance (ESI) Scheme and the National Pension Scheme (NPS). There are elements of overlap and the estimates are not additive. However, the payroll data released by EPFO based on the number of members subscribing to the scheme gives an idea of the level of employment in the formal sector

(Figure 9).

10.31 The net employment generation in the formal sector was higher at 8.15 lakh in March 2019 against 4.87 lakh in February, 2018. The trend line reflects a positive trend in terms of employment in the formal sector.

HEALTH FOR ALL

10.32 Human health and wellbeing are interrelated with sustainable development in a complex, bidirectional way, in that investment

Figure 10: MMR: Global Comparison**Figure 11: Decline in MMR (in points) for EAG States (2011-13 to 2014-16)**

Source: MMEIG Report 2015 and SRS Report for India (2018) & EAG States (latest available).

in health for all supports social, economic and environmental sustainability (WHO, 2017). A healthy productive population is an enabler for sustainable development and hence it is critical that the Government remains committed to improve public health delivery, reduce health inequities and ensure affordable health care for all. Though India has made substantial progress, there are areas which require policy interventions to attain the goals of accessible, affordable and quality health care.

Status of Health

10.33 The National Health Mission (NHM), with its two sub-missions National Urban Health Mission (NUHM) and National Rural Health Mission (NRHM) envisages achievement of universal access to equitable, affordable and quality healthcare services that are accountable and responsive to peoples' needs. Under this Mission, support is provided to States/UTs to provide accessible, affordable, accountable and effective healthcare up to District Hospital level. Major programme components under NRHM are Reproductive-Maternal-Neonatal-Child and Adolescent Health and Communicable and Non-Communicable diseases.

Maternal Health

10.34 Maternal Mortality Ratio (MMR) of India has declined by 37 points from 167 per lakh live births in 2011-13 to 130 per lakh live births in 2014-16, in a span of three years. Between 1990 and 2015, MMR in India has declined by 77 per cent as compared to 44 per cent decline in global average (Figure 10).

10.35 Between 2011-13 and 2014-16, all Empowered Action Group (EAG) States have shown MMR decline which is higher than that of National Average (SRS 2014-16) (Figure 11). New initiatives of the Government to improve Maternal and New-born Health are given in Box 4.

Child Health

10.36 As per the latest Sample Registration System, 2016 report, the Under Five Mortality Rate in India is 39 per 1000 live births, Infant Mortality Rate is 34 per 1000 live births and Neonatal Mortality Rate is 24 per 1000 live births. The U5MR has declined at a faster pace in the period 2008-2016, registering a compound annual decline of 6.7 per cent per year, compared to 3.3 per cent compound annual decline observed over 1990-2007.

Box 4: New Initiatives for Maternal & New born Health

LaQshya: 'LaQshya - Quality Improvement Initiative' was launched in December, 2017 with the objectives of reducing preventable maternal and new born mortality, morbidity and stillbirths associated with the care around delivery in Labour room and Maternity OT (Operation Theatre) and to ensure respectful maternity care. LaQshya initiative is a focused and targeted approach to strengthen key processes related to the labour rooms and maternity operation theatres in order to achieve time bound targets and to ensure desired outcome within a short period.

Midwifery initiative: The revision of Nurse Practitioner in Midwifery curriculum is being undertaken by the Indian Nursing Council to include core competence. The Government has initiated midwifery services throughout the country in 2018, with an objective to provide access to quality maternal and new born health services, promote natural birthing, ensure respectful care and reduce over medicalization. The Midwifery Services Initiative aims to create a cadre for Nurse Practitioners in Midwifery who are skilled in accordance to ICM competencies, knowledgeable and capable of providing compassionate women-centric pregnancy care.

Pradhan Mantri Surakshit Matritva Abhiyan (PMSMA): Pradhan Mantri Surakshit Matritva Abhiyan (PMSMA) was launched in 2016 to provide comprehensive and quality Ante-Natal Care (ANC) to pregnant women on the 9th of every month. Under PMSMA, doctors from both the public and private sector examine pregnant women on 9th of every month at Government health facilities. So far, more than 1.8 Crore antenatal check-ups (in addition to routine four ANC check-ups) have been conducted across the country under this program.

Expenditure on health

10.37 As per the National Health Accounts Estimates during 2013-14 to 2015-16, there is an encouraging trend of decreasing Out of Pocket Expenditure (OOPE) and an increase in public health expenditure out of Total Health Expenditure (THE). Public health expenditure (Centre, States and Local Bodies), as a percentage of Total Health Expenditure (THE) increased from 22.5 per cent in 2004-05 to 30.6 per cent in 2015-16 (Figure 12).

10.38 The Out-of-Pocket expenditure still remains the major component of healthcare expenditure, as evidenced from the cross-country analysis (Figure 13).

10.39 One major component of OOPE is expenditure on medicines. Government has made various provisions to provide medicines free of cost in Government facilities, but in reality, a majority (more than 60 per cent) of the patients are still forced to pay for some of the medicines they receive. The Government has taken several steps to reduce Out of Pocket

Figure 12: Government Health Expenditure & OOPE (in per cent)

Source: National Health Accounts Estimates for India, MoHFW (latest available).

Figure 13: OOPE as a percentage of Current Health Expenditure (in per cent)

Source: Global Health Expenditure Database, WHO, OOPE India figure calculated by WHO (extracted on May 31, 2019).

Box 5: Ayushman Bharat – a major step towards achieving Universal Health Coverage

Ayushman Bharat is a flagship programme of the Government, which comprises of two inter-related components, viz. establishment of “Health and Wellness Centres” (HWCs) for delivering Comprehensive Primary Health Care and “Pradhan Mantri Jan Arogya Yojana” (PMJAY), a health assurance scheme for preventing the financial hardships in availing in-patient care. This is the strategy adopted by India to achieve the vision of Universal Health Coverage (UHC) with its underlying commitment of “leaving no one behind”.

The National Health Policy, 2017 recommends strengthening the delivery of primary health care, through establishment of Health and Wellness Centres and calls for a commitment of two third of the health budget for Comprehensive Primary Health care. Government of India announced upgradation of 1,50,000 Sub Centres and Primary Health Centres to Health and Wellness Centres by 2022 under Ayushman Bharat. This initiative is an attempt to move from selective and segmented approach to a comprehensive need-based health care service delivery.

The HWCs provide preventive, promotive, rehabilitative and curative care for Reproductive, Maternal, New Born, Child plus Adolescent Health (RMNCH+A), Communicable diseases, non-communicable diseases, Ophthalmology, ENT, trauma services etc. The HWCs would undertake population based screening, prevention and control for Common NCDs- Hypertension, Diabetes, and the three common cancers (Oral, Cervix and Breast cancer), building on the already existing National Programme for the Prevention and Control of Cancer, Diabetes, Cardiovascular Diseases and Stroke (NPCDCS). The HWC would be the first point of contact with the PHC/ CHC serving as the first referral point. This would, over time, reduce the burden on secondary and tertiary centres having to provide care for primary health as well, and also reduce out of pocket expenditures.

The second component of Ayushman Bharat, PMJAY, the largest public health insurance scheme in the world aims at providing financial protection (Swasthya Suraksha) to 10.74 crore poor and vulnerable families (approx. 50 crore beneficiaries) as per the latest Socio-Economic Caste Census (SECC) data, and existing RSBY beneficiaries. The scheme offers a benefit cover of ₹5 lakh per family per year (on a family floater basis). PMJAY covers medical and hospitalization expenses for most of the secondary and tertiary care procedures. PMJAY has defined 1,350 medical packages covering surgery, medical and certain day care treatments including medicines, diagnostics and transport.

To ensure that nobody is left out (especially the girl child, women, children and elderly), there is no cap on family size and age in the scheme. The scheme is cashless and paperless at public hospitals and empanelled private hospitals. The benefits also include pre and post-hospitalization expenses. The scheme is entitlement based.

Expenditure (OOPE) and burden of diseases in the country. One of the major steps taken by the Government to move towards Universal Health Coverage has been the launch of Ayushman Bharat (Box 5). Free Drugs and Diagnostics Service initiatives is another key initiative to bring down OOPE.

10.40 Affordability is a key issue in healthcare. In terms of the costs to the Government and for the individuals who seek healthcare in a country like India, the potential of AYUSH in reducing health expenses is immense. This aspect has been rightly recognised by the National Ayush Mission (NAM)⁴. There are several scalable

⁴ Recognising the scope of alternative systems of medicine, the Mission was launched by Hon’ble PM in September 2014 to address the gaps in health services through supporting the efforts of State/UT Governments for providing AYUSH health services/education in the country, particularly in vulnerable and far-flung areas. Under NAM special focus will be given for specific needs of such areas and for allocation of higher resources in their Annual Plans.

projects in the areas of infertility treatments, NCDs etc. which can be adopted across India by co-locating AYUSH healthcare services under single roof so that people are free

to choose, what is appropriate for them, thus making healthcare more accessible, accountable, affordable and customised (Box 6).

Box 6: Promoting AYUSH: An Affordable Healthcare Option for All

The role of AYUSH in preventive and promotive healthcare has not received the attention which is due to it, owing to the market driven supply systems that have emerged in health sector. As per NSSO, 71st round, only 5 to 7 per cent usage of 'other' including AYUSH (Ayurveda, Yoga or Naturopathy Unani, Siddha and homoeopathy) has been reported both in rural and urban areas. In terms of costs, the average out of pocket expenditure on AYUSH medicines per treated person is lower compared to non-AYUSH medicine as can be seen below:

Average out of pocket expenditure on AYUSH medicines and other (non-AYUSH) medicines per treated person in the last 15 days by sex and place of residence, 2014

System of medicine	OOP expenditure (in ₹)					
	Rural			Urban		
	Male	Female	All	Male	Female	All
AYUSH medicine	322	228	270	462	311	378
Other (non-AYUSH) medicine	381	402	392	485	430	454

Source: NSSO 71st Round on Social Consumption: Health (2014).

Further, there are scalable projects which can be replicated in other States depending on the local traditional preference/acceptability for the systems, like Unani in Uttar Pradesh, Sidhha in Tamil Nadu and Ayurveda across India, since it is India's own system of medicine.

'*JANANI*'⁵ scheme of Government of Kerala is an exemplar which has popularised the system of homeopathy treatment for infertility in public health facilities⁶. In July to December 2012, the launch year of the pilot project *JANANI*, the number of cases at Kannur district was less than 100. However, over time there has been exponential growth in the number of infertility cases being registered and treated (see Figure) at Kannur District Homeopathy Hospital.

There is immense scope and potential in expanding the AYUSH systems of treatment for attaining the universal healthcare goals set by India. Recognising the significance of alternative systems, government has approved the continuation of National Ayush Mission (NAM) from 01.04.2017 to 31.03.2020 with an outlay of ₹2400 crore over the 3 year period.

⁵ Mother and child' Pilot project for Homeopathic Intervention in infertility launched in Kannur District Homeopathy Hospital in 2012; Newsletter, Dept. of Homeopathy, Government of Kerala, February 2019.

⁶ Government of Kerala, Survey data show, in Kerala 10.25% of women face the problem of infertility but more than 60% of couples in Kerala resort to modern system of treatment, which entails huge costs for infertility treatment and hospitalization charges.

Health Infrastructure in Rural Areas

10.41 Health infrastructure is an important indicator of the quality of health care delivery systems. IPHS (Indian Public Health Standards) are a set of uniform standards envisaged to improve the quality

of health care delivery in the country. The upgradation of facilities to IPHS norms can lead to reduction in maternal mortality. MMR in the States where PHCs were functioning according to IPHS norms ranged between 1.7 per cent (Haryana) to 100 per cent (Andhra Pradesh) (Figure 14).

Figure 14: State-wise status of antenatal care (per cent) and Maternal Mortality Ratio with PHCs functioning as per IPHS norms (per cent)

Source: Rural Health Statistics 2016, NFHS-4 and Census SRS Bulletin on MMR 2014-16

10.42 Andhra Pradesh, Tamil Nadu are the States where higher percentage of PHCs are following IPHS norms, indicating higher level of antenatal care, thereby reflecting low MMR. Haryana and UP had very low percentage of PHCs functioning as per IPHS norms and they reflect very high MMR.

Human Resource in health sector

10.43 The rural public health facilities across the country have difficulty in attracting,

retaining, and ensuring regular presence of highly trained medical professionals. There exists shortfall across all cadres in the posts of doctors and specialists. There are large number of PHCs which are functioning with one doctor or without doctor. The States where large number of PHCs are functioning with ‘one doctor and without doctor’ indicate relatively higher level of rural IMR and MMR compared to other States (Figure 15).

Figure 15: State-wise PHCs with Doctors and without doctors (per cent), IMR-Rural and MMR

Source: Rural Health Statistics 2017, and Census SRS Bulletin on MMR 2014-16 (latest available).

10.44 Moreover, what this data do not reveal is that even if the personnel are present, their level of participation in providing health services, may not be at desirable levels due to lack of supplies, inadequate infrastructure facilities, poor monitoring of the staff, and so on. Public health services delivery in rural areas warrants better governance mechanisms through adoption of technologies, community and Local Self Government (LSG) participation and social audit.

National Quality Assurance Programme

10.45 In order to improve healthcare delivery through the public health facilities and to improve beneficiary satisfaction, ‘Kayakalp’ initiative was introduced. This initiative rewards public health facilities to maintain cleanliness, hygiene and infection control in the facilities (Box 7).

Box. 7 : ‘Kayakalp’: Assuring Quality across Health Systems for Improving Outcomes

The lack of sanitation and hygiene protocols in health care facilities in India could cause for spreading infections and other diseases. Keeping in view, the urgency of the situation, under the ambit of NQAP, Kayakalp: Clean Hospital Initiative was launched in 2015. It is the ramification of Swachh Bharat Abhiyan in public health system. Kayakalp aims to promote sanitation and hygiene in public healthcare institutions. Facilities are assessed using objective checklist covering seven domains (a) Hospital Upkeep, (b) Sanitation & Hygiene, (c) Waste Management, (d) Infection control, (e) Support Services (f) Hygiene Promotion, and (g) Beyond the hospital boundary.

The programme made modest beginning in 2015-16 involving District Hospitals only and later included SDH/ CHC, PHC, UPHC and UCHC. The number of facilities participating in Kayakalp has risen from 712 in 2015-16 to 23975 in 2017-18. The number of facilities achieving Kayakalp awards has also increased from 97 facilities in 2015-16 to 1459 facilities in 2016-17 and 2959 in 2017-18.

Percentage of facilities scoring more than 70 per cent in external assessment

The major achievement with the advent of Kayakalp is the improvement of many of the components of basic amenities related to availability of water, sanitation, hand hygiene, biomedical waste management and basic environmental cleaning in public health facilities.

RURAL DEVELOPMENT**Rural Connectivity**

10.46 The quality of life of people can be substantially improved by improving connectivity which will enhance their access to medical services, schools, markets and

many other social services. The Pradhan Mantri Gram Sadak Yojana launched in 2000, aims to provide funds to States to construct rural roads to connect villages by all-weather roads. The rigor with which the scheme has been pursued has been reflected in the numbers.

Figure 16: Length of rural roads constructed under PMGSY in India (in K.m.)

Source: Ministry of Rural Development

10.47 Figure 16 shows the length of rural roads constructed in each year. Since 2014, around 190,000 km of rural roads has been constructed. The rate of rural

road construction, i.e. kms of rural road constructed per day, there is an increased momentum from 2015-16 onwards (Figure 17).

Figure 17: Rate of rural road construction under PMGSY (Km per day)

Source: Ministry of Rural Development

Figure 18: Length of rural roads by States (in thousand Km)

Source: Basic Road Statistics of India, 2016-17 (M/o Road, Transport & Highways)

Note: The Rural Roads comprise of PMGSY, rural roads built by State PWD/RWD & those constructed by Panchayati Raj Roads.

10.48 Some of the better performing states are Maharashtra, Assam, Uttar Pradesh & Odisha. Whereas on the other end, we have Mizoram, Sikkim, Goa & Meghalaya where the length of rural roads is very less. Total length in North Eastern areas (except Assam) is quite poor, due to the hilly terrain (Figure 18).

10.49 PMGSY is aggressively encouraging use of “Green Technologies” and non-conventional materials like waste plastic, cold mix, geo-textiles, fly-ash, iron and copper slag etc. in rural roads (Box 8). This is to reduce the “Carbon Footprint” of rural roads,

reduce environmental pollution, increase the working season and bring cost effectiveness. Using “Green Technologies”, 28,619 km of roads have been constructed and a record road length of 14,756 km was constructed in 2018-19.

Rural housing (PMAY-G): Shelter for the Poorest of the Poor

10.50 Pradhan Mantri Awas Yojana (Gramin) (PMAY-G) was launched in 2016 with a target to complete one crore pucca houses with basic amenities by March 31, 2019.

Box 8: PMGSY – WAYS TO RECYCLE

62 million tonnes of solid waste is generated daily in India and 8 per cent of this is plastic waste. Recycling is the best way to manage plastic waste. PMGSY is recycling waste plastics in a novel way by constructing roads out of recycled plastics. Plastic waste material is shredded to a fine size and mixed with hot aggregates in a mixing chamber where it uniformly coats the aggregates. The plastic coated aggregate is then mixed with hot bitumen and the resultant mixture is used for road construction.

Besides solving the problem of plastic disposal, bitumen usage is also reduced by one tonne per kilometer. Plastic as construction material also increases the strength of roads by reducing road fatigue and these roads have better resistance towards rainwater and cold weather. 12,666.52 kms of roads have been constructed across the country using waste plastic.

During 2014-2019, 1.54 crore houses were completed including those carried over from Indira Awas Yojana through convergence of government initiatives like piped drinking water, toilets under Swachh Bharat Mission/ MGNREGS, electricity connection under Saubhagya programme, LPG connection under Ujjwala programme.

10.51 On account of DBT, geo tagging, fair beneficiary selection, effective transaction based MIS, monitoring through “AwaasSoft” and mobile based application “AwaasApp” etc, misutilization of funds was substantially brought down leading to faster completion of houses. The average number of days taken for completion of a house under IAY was 314 days (more than 10 months) against 221 days (seven months) under first year of PMAY in 2016-17 and around 114 days (three months) during the second year of PMAY in 2017-18 (Figure 19).

Mahatma Gandhi National Rural Employment Guarantee Act (MGNREGA)

10.52 Mahatma Gandhi National Rural Employment Guarantee Act (MGNREGA), 2005 aims at enhancing livelihood security of households in rural areas of the country

Figure 19: Average construction completion time (in days)

Source: NIPFP Study (2018) findings on PMAY-G

by providing at least one hundred days of guaranteed wage employment in a financial year to every rural household whose adult members volunteer to do unskilled manual work. Chapter 10 in Volume-1 examines MGNREGS in detail, especially the role of technology in welfare programmes. Creation of productive assets of prescribed quality & durability, social inclusion, gender parity, social security and equitable growth are the foundational pillars of Mahatma Gandhi NREGA. The Government has accorded

Figure 20: Budgetary Support to MGNREGA (in thousand crore)

Source: Ministry of Rural Development.

priority for providing adequate budgetary support to MGNREGS which is reflected in the upward trend in budget allocation and release of funds to the States in the last four years (Figure 20).

10.53 MGNREGS has been instrumental and a guiding factor for tackling rural poverty and

unemployment by providing employment to the rural poor and unskilled people. It has generated 267.96 crore persondays during 2018-19. Out of the total persondays, persondays for women was 54.6 per cent, SC was 20.7 per cent and ST was 17.4 per cent which are well above the norms (Table 9). During 2018-19, 66 per cent of total works

Table 9: Key performance indicators/ Achievements under MGNREGA

Indicators	2014-15	2015-16	2016-17	2017-18	2018-19
Persondays Generated so far [In Cr]	166.2	235.1	235.6	233.7	267.9
SC persondays per cent as of total persondays	22.4	22.2	21.3	21.6	20.7
ST persondays per cent as of total persondays	16.9	17.8	17.6	17.5	17.4
Women Persondays out of Total (per cent)	54.8	55.3	56.2	53.5	54.6
Total Households Worked [In Cr]	4.1	4.8	5.1	5.1	5.3
Average days of employment provided per Household	40.1	48.85	46	45.7	50.9
Total No of HHs completed 100 Days of Wage Employment	24,92,654	48,47,975	39,91,202	29,55,152	52,05,443

Source: Ministry of Rural Development

taken up pertained to individual beneficiary schemes and 63 per cent of the total expenditure was on agriculture and allied works. Around 85,000 km of road length was constructed under MGNREGA during 2018-19.

THE WAY FORWARD

10.54 India's development trajectory is critically intertwined with the investments in social infrastructure. To reap the benefits

of demographic dividend, the government is committed to improve the outcomes in education and skilling, and to provide employment and affordable healthcare to all. Scaling up development programmes for improving connectivity, providing housing, and bridging gender gaps in socio-economic indicators is of paramount importance for sustainable development. India's march towards achieving SDGs is firmly anchored in investing in human capital and inclusive growth.

CHAPTER AT A GLANCE

- The public investments in social infrastructure like education, health, housing and connectivity have a critical role in ensuring inclusive development in a developing country like India.
- The 17 SDGs (Sustainable Development Goals) and 169 targets envisaged in the Agenda 2030, are closely interrelated with social infrastructure. With the underlying dimensions of education and health embedded in SDGs, the improvement in HDI is also interlinked to SDGs as evidenced in the correlation between SDG rankings and HDI rankings of the States.
- India being a developing economy, the percentage of GDP expended on education has remained stagnant at around 3 per cent while that on health has hovered around 1 per cent during the past few years.
- With the available resources, India has made substantial progress in both quantitative and qualitative indicators of education. This is reflected in the improvements in Gross Enrolment Ratios, Gender Parity Indices and learning outcomes at primary school levels. The rural urban disparities in access to quality schooling and drop out rates at senior secondary levels are areas of concern.
- The Skilling ecosystem in India is equipping the youth to meet the challenges of a dynamic labour market by providing various short term and long term skilling under programmes like Pradhan Mantri Kaushal Vikas Yojana. PMKVY has had positive impact on employment and incomes of the youth as per evaluation studies.
- The PLFS has reported declining LFPR along with increasing unemployment rate.
- For a healthy India, accessible, affordable and quality healthcare are being provided by the Government under the National Health Mission and through new schemes like Ayushman Bharat. The select health indicators like MMR, IMR, U5MR have shown tremendous improvement over the past few years.
- Household autonomy of women is the first step towards achieving empowerment and becoming agents of change in patriarchal societies like India. Financial inclusion has improved the household autonomy of women as reflected by the NFHS data.
- Connectivity is critical for rural areas to improve quality of lives of the poor by enhancing access to various social services, education, health and access to markets. PMGSY has played a crucial role in connecting the unconnected in rural India and enhanced their livelihood opportunities.
- Government has accorded highest priority to rural housing, by providing dwelling with all basic facilities to the most needy under PMAY-G.
- Government has also prioritized employment programmes like MGNREGS which is reflected in the upward trend in budget allocation and release of funds to the States in the last four years.

ECONOMIC SURVEY 2018-19
STATISTICAL APPENDIX

1 National Income and Production		
1.1	Gross National Income and Net National Income	A1-A2
1.2	Annual Growth Rates of Gross National Income and Net National Income	A3-A4
1.3 A	Real Gross Value Added at Factor Cost by Industry of Origin	A5-A6
1.3 B	Real Gross Value Added at Basic Prices by Industry of Origin	A7
1.4 A	Nominal Gross Value Added at Factor Cost by Industry of Origin	A8-A9
1.4 B	Nominal Gross Value Added at Basic Prices by Industry of Origin	A10
1.5 A	Annual Growth Rates of Real Gross Value Added at Factor Cost by Industry of Origin	A11-A12
1.5 B	Annual Growth Rates of Real Gross Value Added at Basic Prices by Industry of Origin	A13
1.6	Components of Gross Domestic Product at Current Prices	A14-A15
1.7	Components of Gross Domestic Product at Constant Prices	A16-A18
1.8	Gross Domestic Saving and Gross Capital Formation (at current prices)	A19-A22
1.9	Gross Domestic Saving and Gross Capital Formation (as per cent of GDP at current market prices)	A23-A26
1.10 A	Net State Domestic Product at Current Prices (2011-12 Series)	A27
1.10 B	Growth of Net State Domestic Product at Current Prices (2011-12 Series)	A28
1.11 A	Per Capita Net State Domestic Product at Current Prices (2011-12 Series)	A29
1.11 B	Growth of Per Capita Net State Domestic Product at Current Price (2011-12 Series)	A30
1.12	Index Numbers of Agricultural Production	A31
1.13	Index Numbers of Area Under Principal Crops	A32
1.14	Index Numbers of Yield of Principal Crops	A33
1.15	Production of Major Crops	A34
1.16	Gross Area Under Major Crops	A35
1.17	Yield per Hectare of Major Crops	A36
1.18	Production of Important Crops in Three Largest Producing States in 2016-17	A37
1.19	Per Capita Net Availability of Cereals and Pulses	A38
1.20	Net Availability, Procurement and Public Distribution of Foodgrains	A39
1.21	Per Capita Availability of Certain Important Articles of Consumption	A40
1.22	Production, Imports and Consumption of Fertilizers	A41
1.23	Production of Major Livestock Products and Fish	A42
1.24	Production of Coal and Lignite	A43
1.25	Progress of Electricity Supply (Utilities and Non-utilities)	
	A: Installed Plant Capacity	A44
	B: Energy Generated	A45
1.26	Operations of Indian Railways	A46
1.27	Revenue Earning Goods Traffic on Indian Railways	
	A: Traffic Originating	A47
	B: Goods Carried	A48
1.28	Operations of Road Transport	A49
1.29	Growth of Civil Aviation	A50-A51

Notes :

1. For the years prior to 1999-2000 totals under col. 7 may not add up to totals of individual item under col. 2 to col. 6 due to splicing technique applied independently at the level of each industry and at the total level.
2. Estimates for the years 2011-12 onwards (at base 2011-12) are available at basic prices only and are given in table 1.3B.

Notes :

- For the years prior to 1999-2000 totals under col. 7 may not add up to totals of individual item under col. 2 to col. 6 due to splicing technique applied independently at the level of each industry and at the total level.
- Estimates for the years 2011-12 onwards (at base 2011-12) are available at basic prices only and are given in table 1.4 B.

P - Provisional figures is based on 4th Advance Estimates of production for 2017-18, Net Import for April 2017 to March 2018 and stock position as on 01.04.2018.

* The net availability of foodgrains is estimated to be Gross Production (-) seed, feed & wastage, (-) exports (+) imports, (+/-) change in stocks. The net availability of foodgrains divided by the population estimates for a particular year indicate per capita availability of foodgrains in terms of kg/year. Net availability, thus worked out is further divided by the number of days in a year i.e., 365 days which is taken as net availability of foodgrains in terms of grams/day.

Figures in respect of per capita net availability given above are not strictly representative of actual level of consumption in the country especially as they do not take in to account any change in stocks in possession of traders, producers and consumers.

Table 1.20. Net Availability, Procurement and Public Distribution of Foodgrains

Notes:

na: not available

a : Net availability = Net production + Net Imports - changes in Government stocks.

b : Includes quantities released under the Food for Work Programme during the year 1978 to 1990.

1. Figures for procurement and public distribution relate to calendar years.
2. For calculation of per capita net availability, the figure of net imports from 1981 to 1994 are based on imports and exports on Government of India account only.
Net import from 1995 are, however, based on the total exports and imports (both Government as well as Private accounts).
3. Net Imports are total Imports minus Exports of the Country.

Notes:

na : not available P : Provisional

a : Includes groundnut oils, rapeseed and mustard oil, sesamum oil, nigerseed oil, soyabean oil and sunflower oil but excludes oil for manufacture of vanaspati.

b : Relates to calendar year.

c : Relates to actual releases for domestic consumption, sugar season/year commencing from November to October of following year as opposed to financial year.

d : The data of cloth; prior to 1980-81 is calendar year wise; in meters upto 1984-85; in square meter from 1985-86 onwards.

e : Figures for blended/mixed fabrics were not separately available prior to 1969. These have been included under man-made fibre fabrics after 1969.

f : Figures up to 1971-72 relate to coffee season and are thereafter on calendar year basis.

RE : Revised Estimates

BE : Budget Estimates

- Includes plan expenditure of Railways, Communications and non-departmental commercial undertakings financed out of their internal and extra budgetary resources, including market borrowings and term loans from financial institutions to State Governments public enterprises. Also includes developmental loans given by the Central and State Governments to non-departmental undertakings, local bodies and other parties. However, it excludes a notional amount of ₹45 crore in 1980-81 on account of conversion of loan capital given to non-departmental commercial undertakings into equity capital.
- Includes general administration, pensions and ex-gratia payments to famine relief (only non-plan portion), subsidies on food and controlled cloth, grants and loans to foreign countries and loans for non-developmental purpose to other parties, but excludes Contingency Fund transactions. It also excludes notional transactions in respect of subscriptions to International Monetary Fund of ₹559 crore in 1980-81, ₹550 crore in 1990-1991, ₹629 crore in 2000-2001, ₹1613 crore in 2011-12, ₹4323 crore in 2012-13, ₹367 crore in 2013-14, ₹4619 crore in 2014-15 and ₹52920 crore in 2015-16(RE).
- Includes internal resources of Railways, Communications and non-departmental commercial undertakings for the plan.
- Includes market borrowings of State Government public enterprises.
- Excludes the notional receipts on account of repayments of loans by non-departmental commercial undertakings due to their conversion into equity capital. It also excludes notional transactions in respect of International Monetary Fund and Contingency Fund transactions.
- ₹538 crore for loans from IMF Trust Fund are included in 1980-81 under external loans and an amount of ₹572 crores for revolving fund is included in External loans for 1990-91.

Notes:

RE : Revised Estimates

BE : Budget Estimates

a : For 1965-66, includes ₹ 53 crore as additional payments to IMF, IBRD, IDA & ADB following the change in the par value of the rupee. This is a nominal outlay as it is met by the issue of non-negotiable Government of India securities.

b : From 1993-94 onwards, Delhi is not included.

c : From 1997-98 onwards loans to States/UTs are exclusive of loans against States/UTs shares in small saving collections.

Notes:

RE: Revised Estimates

BE: Budget Estimates

- Gross capital formation in this table includes loans given for capital formation on a gross basis. Consequently domestic capital receipts include loan repayments to the Central Government.
- Consumption expenditure is the expenditure on wages and salaries and commodities and services for current use.
- Interest payments, subsidies, pension etc. are treated as current transfers.
- Gross capital formation & total expenditure are exclusive of loans to States'/UTs' against States'/UTs' share in the small savings collection.
- The figures of total expenditure of the Central Government as per economic and functional classification do not tally with figures given in the Budget documents. In the economic and functional classification, interest transferred to DCUs, loans written off etc, are excluded from the current account. In the capital account, expenditure financed out of Railways, Posts & Telecommunications' own funds etc, are included.
- Point contribution refers to contribution of individual component to total growth.

Notes: RE: Revised Estimates BE: Budget Estimates

(1) Negative (-) sign indicates surplus in deficit indicators.

(2) The ratios to GDP at current market prices are based on CSO's National Accounts 2004-05 series and data from 2011-12 onwards are based on new base 2011-12.

(3) Capital Receipts include public account on a net basis.

(4) Capital disbursements are exclusive of public accounts.

(5) Data pertains to budgets of 29 States.

February	312	303	307	141.0	138.6	139.9	917	925
March	315	304	309	141.2	139.5	140.4	924	932

Source: 1. Labour Bureau for consumer price indices for Industrial Workers (IW), Agricultural Labourers (AL) and Rural Labourers (RL),

2. CSO for consumer price indices- new series (CPI-NS).

Notes:

1. Weights of CPI-IW for food & non-food with base 1982=100 are 57% & 43% respectively and with base 2001=100 are 46.20% & 53.80% respectively.
2. CPI- New Series (Rural, Urban & Combined) with base 2010=100 was introduced w.e.f. January 2011. The CPI-UNME has since been totally discontinued.
3. CPI- New Series figures for 2013-14, 2014-15 and 2015-16 is based on new base 2012=100.
- a: The current series of CPI for Industrial Workers with 2001 base was introduced w.e.f. January, 2006 and the figures from 2005-06 (last month) are based on new base. The earlier series on base 1982=100 was simultaneously discontinued. The conversion factor from the current to the old series is 4.63 in case of the General Index, and 4.58 for Food Index.
- b: Average index from November, 1995 to March 1996.

Table 5.4. Index Numbers of Wholesale Prices – Relative Prices of Manufactured and Agricultural Products

Year/Months	General Index of Wholesale Price	Price Index of Manufactured Products	Price Index of Agricultural Products ^a	Manufactured price Index as percent of Agricultural Price Index
Weight (Base: 2004-05)	100.00	64.97	18.59	(col.3/Col.4)*100

Notes:

- a: Statutory Minimum Price (SMP) upto 2008-09. Fair and Remunerative Price (FRP) from 2009-10 onwards.
b: Including Special onetime drought relief (SDR) price announced for 2002-03.
c: An additional incentive bonus of Rs. 40 per quintal was payable on procurement between January 10, 2006 to March 31, 2007.
d: A bonus of Rs. 40 per quintal was payable over and above the MSP.
e: Medium staple.
f: Long staple.
g: An incentive bonus of Rs. 50 per quintal is payable on wheat over the Minimum Support Price (MSP).
h: An additional incentive bonus of Rs. 100 per quintal was payable over the MSP.
i: Staple length (mm) of 24.5-25.5 and micronaire value of 4.3-5.1
j: Staple length (mm) of 29.5-30.5 and micronaire value of 3.5-4.3
k: An additional incentive bonus of Rs. 50 per quintal was payable over the MSP.
l: Additional incentive at the rate of Rs. 500 per quintal of tur, urad and moong sold to procurement agencies.
m: At 9.5 percent recovery, subject to a premium of Rs.1.53 for every 0.1 percent increase in the recovery above 9.5 percent.
n: Bonus of Rs. 75 per quintal is payable over and above the MSP.
o: Bonus of Rs. 200 per quintal is payable over and above the MSP.
p: Single MSP has been fixed irrespective of the variety.
q: Bonus of Rs. 200 per quintal is payable over and above the MSP.
r: Bonus of Rs. 150 per quintal is payable over and above the MSP.
s: Bonus of Rs. 425 per quintal is payable over and above the MSP.
t: Bonus of Rs. 100 per quintal is payable over and above the MSP.
*: Including Bonus of Rs. 100 per quintal
** : Including Bonus of Rs. 200 per quintal.
: Including Bonus of Rs. 150 per quintal

Notes:

SDRs: Special Drawing Rights,

RTP : Reserve Tranche Position in IMF

--- : Nil or Negligible.

a : Excludes ₹544.53 crore drawn under Trust Fund.

b : Drawals under Extended Fund Facility (EFF).

c : Drawals of ₹ 1883.6 crore under Compensatory and Contingency Financing Facility and ₹ 1450.2 crore under First Credit Tranche of Stand-by Arrangement.

d : Drawals of ₹ 2217.2 crore under Compensatory and Contingency Financing Facility and ₹ 987.5 crore under First Credit Tranche of Stand-by Arrangement.

e : Includes voluntary repurchases of Rupees (₹ 199 crore) and sales of Rupees (₹ 35.2 crore) by IMF under its General Resources Account.

f : Sales of Rupees by IMF.

g : Additionally, SDR 59.9 million in May 1979, SDR 7.3 million in July 1980 and SDR 34.5 million in March 1982 were used for voluntary repurchases of Rupees.

h : SDR 66.50 million were used for repurchases of drawals under Compensatory Financing Facility.

i. SDR 33.25 million and Rs. 117.85 crore in foreign currencies were used for repurchases of drawals under CFF.

j : SDR 66.5 million and SDRs 131.25 million were used for repurchases of drawals under CFF and EFF, respectively.

k : SDR 431.25 million were used for repurchases of drawals under EFF.

l : SDR 704.17 million were used for repurchases of drawals under EFF.

m : SDR 804.18 million were used for repurchases of drawals under EFF.

n : SDR 681.25 million were used for repurchases of drawals under EFF.

o : SDR 468.75 million were used for repurchases of drawals under EFF.

p : SDR 337.49 million were used for repurchases of drawals under EFF.

q : SDR 237.49 million were used for repurchases of drawals under EFF.

r : SDR 95.84 million were used for repurchases of drawals under EFF.

s : SDR 812.77 million were used for repurchases of drawals under EFF.

t : SDR 1130.48 million were used for repurchases of drawals under EFF.

u : SDR 678.38 million were used for repurchases of drawals under EFF.

v : SDR 449.29 million were used for repurchases of drawals under EFF.

w : SDR 212.46 million were used for repurchases of drawals under EFF.

1. Figures after 1965-66 are not comparable with those of the earlier years owing to devaluation of the Rupee in June 1966.

2. Also figures for July 1991 onwards are not comparable with those of earlier periods due to the downward adjustment of the Rupee effected on July 1, 1991 and July 3, 1991.

3. Drawals, Repurchase and outstanding repurchase obligations are calculated at the ruling rates of exchange.

4. While reserves pertain to end period, repurchases are for the relevant periods.

5. Gold is valued at Rs. 53.58 per 10 grams up to May 1966 and at Rs. 84.39 per 10 grams up to September 1990 and closer to international market price w.e.f. October 17, 1990.

6. Foreign exchange includes (a) foreign assets of the Reserve Bank of India and (b) Government balances held abroad up to 1955-56.

7. i) FCA excludes US \$ 250.00 million invested in foreign currency denominated bonds issued by IIFC (UK) since March 20, 2009, excludes US \$ 380.00 million since September 16, 2011, excludes US\$ 550 million since February 27, 2012, excludes US \$ 673 million since 30th March 2012 and US \$ 790 million since July 5, 2012 as also its equivalent value in Indian rupee in respective months.

ii.) SDRs 530.73 million since March 24, 2014 (Transferred by Government of India to RBI), SDR 530.80 million since June 2014, SDR 530.92 million since September 2014, SDR 1104.74 million since January 2015, SDR 1104.96 million since June 2015. SDRs 1105.24 million since December 2015 (as also its equivalent value in Indian Rupee).

iii.) US\$ 100 million under SAARC swap arrangement with Royal Monetary Authority of Bhutan during the period from March 2013 to June 2013, US\$ 400 million under SAARC swap arrangement with Central Bank of Sri Lanka during period April to October 2015 and US\$ 1100 million with Central Bank of Sri Lanka since September 2015 (as also its equivalent value in Indian Rupee).

8. FCA excludes US \$ 250.00 million invested in foreign currency denominated bonds issued by IIFC (UK) since March 20, 2009, excludes US \$ 380.00 million since September 16, 2011, excludes US\$ 550 million since February 27, 2012, excludes US \$ 673 million since 30th March 2012 and US \$ 790 million since July 5, 2012 as also its equivalent value in Indian rupee in respective months.

9. Totals may not tally due to rounding off.

Source: Reserve Bank of India

Notes:

P: Preliminary, PR : Partially Revised, a: Commercial borrowings include short term credit.

- Grants received are covered under item 4(a).
- Estimated interest accrued and credited to NRI deposits during the year has been treated as notional outflow under invisible payments and added as reinvestment in NRI deposits under banking capital.
- In accordance with the provision of IMF's Balance of Payments Manual (5th Edition), gold purchased from the Government of India by the RBI has been excluded from the BOP statistics. Data for the earlier years has, therefore, been amended by making suitable adjustments in "Other Capital-Receipts and Foreign Exchange Reserves". Similarly, item "SDR Allocation" has been deleted from the table.
- With effect from 1996-97, private transfer receipts include redemption in rupees of both principal and interest under Non-Resident External (Rupee) Account [NRE(R)A] and Non-Resident Non-Repatriable Rupee Deposit [NR(NR)RD] schemes. This marks an improvement in data reporting.
- Totals may not tally due to rounding off.

Notes:

a : The Euro came into existence on January 1, 1999.

b : Peso revalued in January 1993, 1000 old Peso = 1 New Peso.

c : Indicative rates announced by Foreign Exchange Dealers Association of India (FEDAI).

d: 100 Turkish Lira

e : Turkish Lira has been replaced by New Lira w.e.f. 1.1.2005.

1. Annual/monthly averages. During March 1992 to February 1993, a dual exchange rate system was prevalent, in which the official rate was fixed by the RBI and the market rate was determined in the Inter-Bank market for the US dollar.

2. The data for 2001-02 in respect of Deutsche Mark, French Franc and Italian Lira pertain to 11 months only as Germany, France and Italy accepted the Euro as their national currency w.e.f. March 1, 2002.

3. Figures of US dollar, Pound sterling, Euro and Japanese yen from May 2012 onwards are RBI's reference rates.

4. Financial Benchmarks India Private Limited (FBIL) commenced dissemination of reference rates w.e.f. July 10, 2018.

Source: DGCI&S, Kolkata

Notes:

1. Net terms of trade, i.e., the ratio of overall export unit value index to similar Import index.
2. Gross terms of trade, i.e., the ratio of overall import quantum Index to similar export index.
3. Income terms of trade = (NTT x QIE)/100
4. QIE = Quantum Index of Exports.

Notes :

1. Figures of authorization have been arrived at by applying the average exchange rate of the rupee with individual donor currencies.
2. Figures of utilization are at current rates applicable on the date of transaction.
3. Figures of authorization and utilization include loans and grants on both Government and Non-Government accounts.
4. Totals may not tally due to rounding off.

Source: Ministry of Finance (Department of Economic Affairs), Ministry of Defence, Reserve Bank of India, Securities & Exchange Board of India .

Notes:

PR: Partially Revised; QE : Quick Estimates.

IFC(W): International Finance Corporation, Washington D.C.

FII: Foreign Institutional Investors

a: Relates to SDR allocations from March 2004 onwards.

b: Includes Financial Lease since 1996.

c: Also includes India Development Bonds (IDBs), Resurgent India Bonds (RIBs), India Millennium Deposits (IMDs),

Foreign Currency Convertible Bonds (FCCBs) and net investment by 100% FII debt funds and securitized borrowings of commercial banks

FCCB debt has been adjusted since end-March, 1998 after netting out conversion into equity and redemptions.

d: Figures include accrued interest.

e: Rupee denominated debt owed to Russia and payable through exports.

NRO Deposits are included under NRI Deposits from the quarter ended June 2005. Supplier's Credits upto 180 days and FII investment in short-term debt instruments are included under short-term debt from the quarter ended March 2005. Vostro balances / Nostro overdrafts of commercial banks, balances of foreign central banks/international institutions with RBI and investment in T-bills/securities by foreign central banks/ international institutions have been included in external debt from the quarter ended March 2007.

Source: Ministry of Finance (Department of Economic Affairs), Ministry of Defence, Reserve Bank of India, Securities & Exchange Board of India.
Notes:

PR: Partially Revised; QE: Quick Estimates.

IFC(W): International Finance Corporation, Washington D.C.

FII: Foreign Institutional Investors

a: Relates to SDR allocations from March 2004 onwards.

b: Includes Financial Lease since 1996.

c: Also includes India Development Bonds (IDBs), Resurgent India Bonds (RIBs), India Millennium Deposits (IMDs), Foreign Currency Convertible Bonds (FCCBs) and net investment by 100% FII debt funds and securitized borrowings of commercial banks

FCCB debt has been adjusted since end-March, 1998 after netting out conversion into equity and redemptions.

d: Figures include accrued interest.

e: Rupee denominated debt owed to Russia and payable through exports.

f: The definition of concessional debt here includes 'concessional' categories under multilateral and bilateral debt and rupee debt under item VII.

NRO Deposits are included under NRI Deposits from the quarter ended June 2005. Supplier's Credits upto 180 days and FII investment in short-term debt instruments are included under short-term debt from the quarter ended March 2005. Vostro balances / Nostro overdrafts of commercial banks, balances of foreign central banks/international institutions with RBI and investment in T-bills/securities by foreign central banks/ international institutions have been included in external debt from the quarter ended March 2007.
