## PREFACE

The agriculture and allied activities (livestock, forestry and fisheries) play a vital role in the Indian economy. Important developments in this sector have taken place over the years particularly after the green revolution, white revolution and blue revolution. The contribution of this sector to the gross domestic product (GDP) is estimated in terms of gross value added (GVA) using the production approach. The estimation of GVA involves valuation of the products and by-products and ancillary activities at the prices received by the producers after deducting the value of inputs of raw materials and services consumed in the process of production at purchasers' prices. In this context, information on state-wise value of output assumes considerable importance. With this in view, a brochure containing state-wise value of output of agriculture and allied activities is disseminated by CSO at regular intervals. The present one is seventh in the series including the state-wise estimates of value of output of Agricultural crops, Livestock products, Forestry and Fisheries with base year as 2004-05.

The earlier publications containing the state-wise estimates of value of output from Agriculture and Allied Activities from both at current and constant prices are as follows:

Sl No	Series	Base year	Year released
1	1960-61 to 1980-81	1970-71	1985
2	1980-81 to 1990-91	1980-81	1996.
3	1990-91 to 2001-02	1993-94	2004
4	1990-91 to 2002-03	1993-94	2006
5	1999-2000 to 2005-06	1999-2000	2008
6	2004-05 to 2008-09	2004-05	2011

We are grateful to the Ministry of Agriculture, Government of India and the Directorate of Economics and Statistics of all the State/UT Governments for their cooperation in making available the requisite data. We welcome suggestions for further improvement.

I would like to place on record my deep appreciation for the efforts of all officers and staff members of the Agricultural Unit of the NAD, CSO in bringing out this publication timely under the guidance and Supervision of Shri Ashish Kumar, Additional Director General and Head of National Accounts Division.

## Analyses and comparison of value of Agricultural products

**Agriculture in India** has a significant history. India ranks second worldwide in farm output. Agriculture and allied sectors like forestry and fisheries accounted for 14.5% of the GDP in 2010-11, about 50% of the total workforce and 10% of export earnings. The economic contribution of agriculture to India's GDP is steadily declining with the country's broad-based economic growth. Still, agriculture is demographically the broadest economic sector and plays a significant role in the overall socio-economic fabric of the country.

At 2004-05 price

Year	Over- all GDP (Cr Rs)	GDP - Agri(Cr Rs)	% Share of Agriculture
2004-05	2971464	565426	19.0
2005-06	3253073	594487	18.3
2006-07	3564364	619190	17.4
2007-08	3896636	655080	16.8
2008-09	4158676	655689	15.8
2009-10	4516071	660987	14.6
2010-11 (RE)	4937006	713477	14.5

India's arable land area of 15.97 crore hectares (39.46 crore acres) is the second largest in the world, after the United States. Its gross irrigated crop area of 8.26 crore hectares (21.56 crore acres) is the largest in the world. India has grown to become among the top three global producers of a broad range of crops, including wheat, rice, pulses, cotton, peanuts, fruits, and vegetables. Worldwide, as of 2011, the Country had the largest herds of buffalo and cattle, is the largest producer of milk, and has one of the largest and fastest growing poultry industries.

India is the world's largest producer of many fresh fruits and vegetables, milk, major spices, select fresh meats, select fibrous crops such as jute, several staples such as millets and castor oil seed. The country is the second largest producer of wheat and rice, the world's major food staples. It is also the world's second or third largest producer of several dry fruits, agriculture-based textile raw materials, roots and tuber crops, pulses, farmed fish, eggs, coconut, sugarcane and numerous vegetables. India ranked within the world's five largest producers of over 80% of agricultural produce items, including many cash crops such as coffee and cotton. It is also one of the world's five largest producers of livestock and poultry meat, with one of the fastest growth rates, as of 2011.

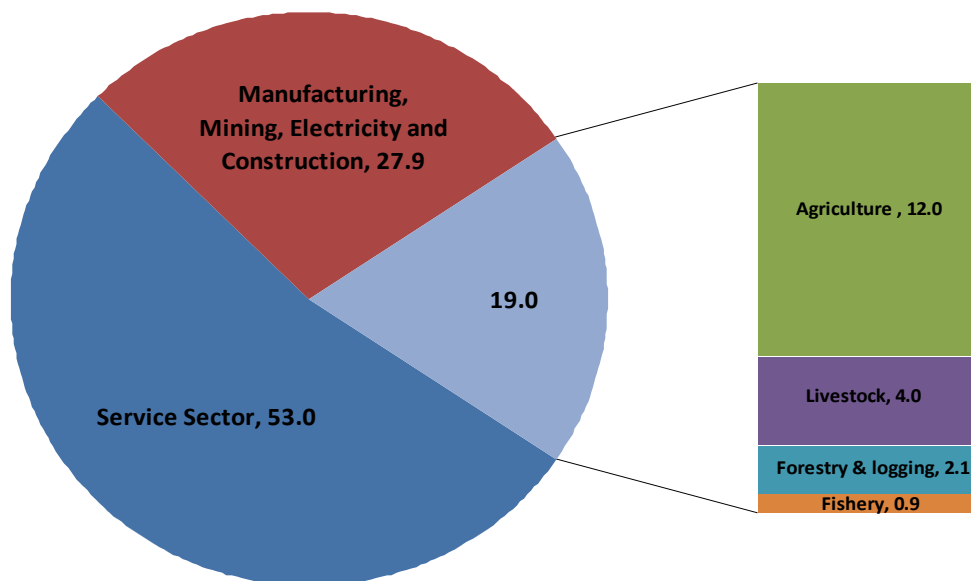

Between 1990 and 2010, Indian fish capture harvest doubled, while aquaculture harvest tripled. In 2008, India was the world's sixth largest producer of marine and freshwater capture fisheries, and the second largest aquaculture farmed fish producer. The country exported 600,000 metric tones of fish products to nearly half of all the world's countries.

Gross value of Output (GVO) of agricultural products during the period 2004-05 to 2010-11 have been analyzed and presented in the following pages. The GVO of these groups are presented in the following twelve groups: (1) Cereals, (2) Pulses, (3) Oil seeds, (4) Sugar, (5) Fibers (6) Drugs and Narcotics, (7)

Condiments and Spices (8) Fruits and Vegetables (9) Rubber & Gaur seed (10) Live Stock products (11) Forestry Products and (12) Fishery Products. Also the percentage contribution of individual items within each group during the base year 2004-05 and the year 2010-11 have been compared and presented.

**Sectoral share of GDP in 2004-05 and 2010-11 at constant price:**

**Sector-wise Percentage share in Total GDP (2004-05)**

**Sector-wise Percentage share in Total GDP (2010-11)**

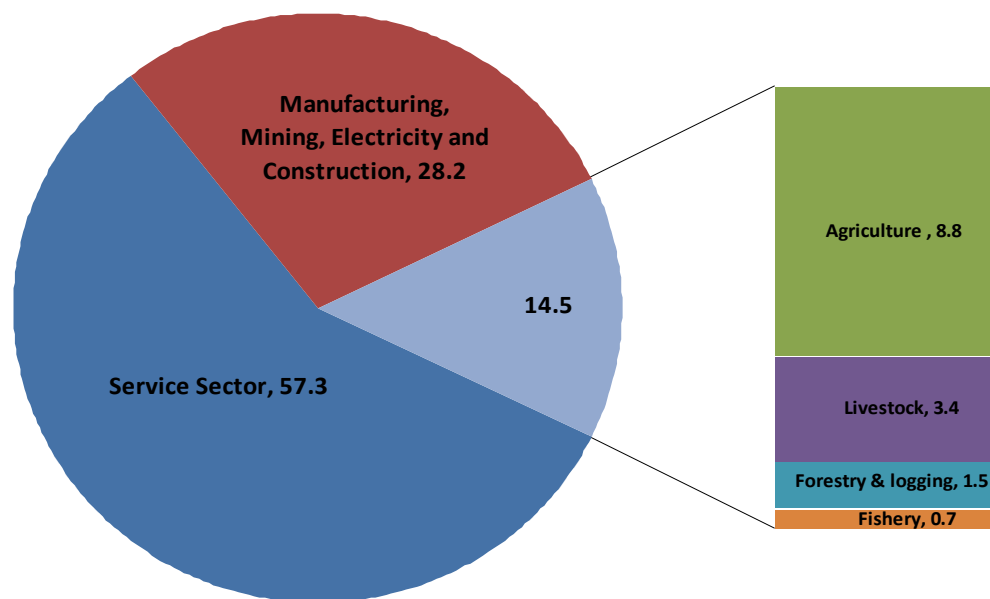

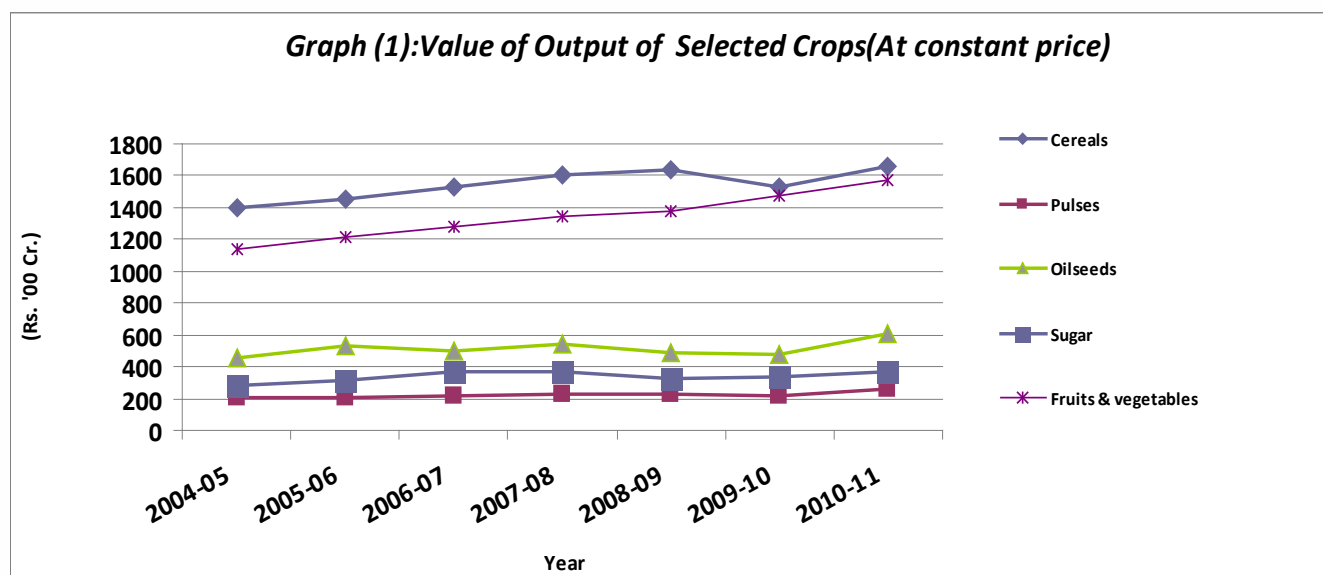

Table (1):

Fishery Products	320	340	357	377	389	400	420

\* It includes other items not covered in the table.

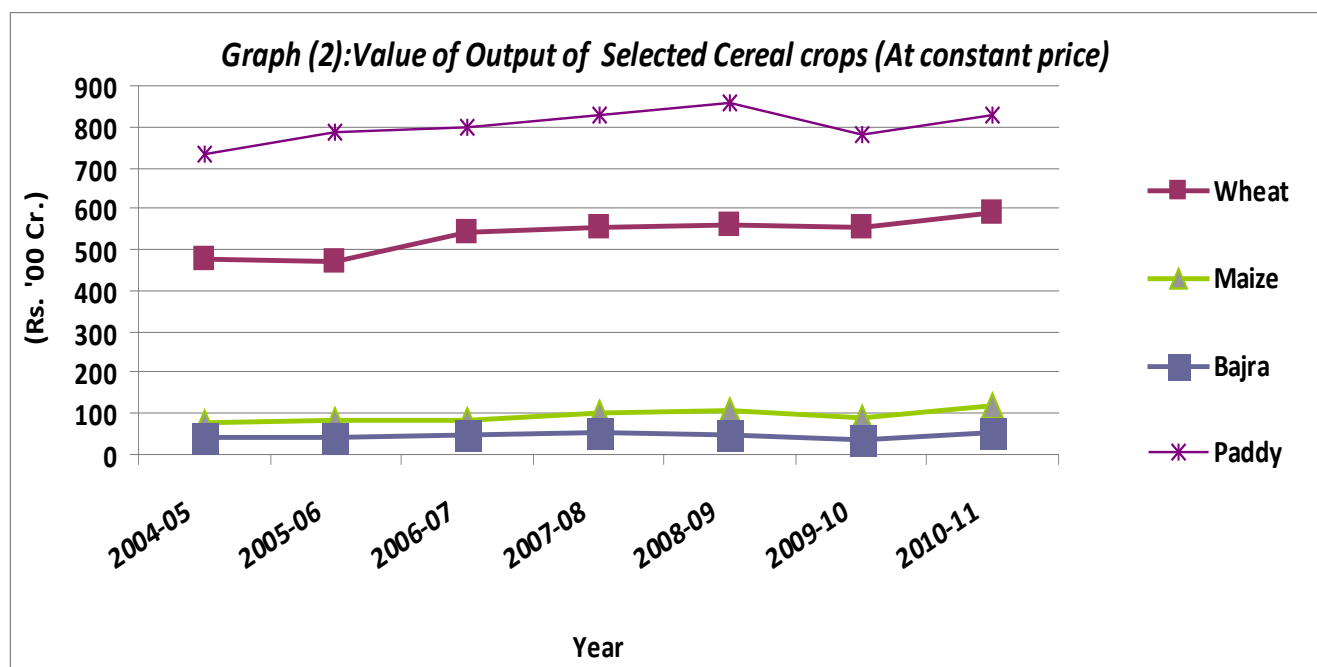

The value of output reported for Agricultural crops is showing steady increase in case of the crop groups cereals, pulses, oilseeds, sugar and fruits & vegetables for almost entire period of 2004-05 to 2010-11. However there is a slight decrease in the value of output of cereals, pulses and oilseed in 2009-10. In 2010-11, out of total value of farm crops, approximately 29% is contributed by Cereals and 27% by fruits & vegetables. A decline of 1% share by cereals and an increase of 2% share by Fruits and vegetables comparing to the base year 2004-05. Share of oilseeds and sugarcane in 2010-11 remained same as that of the base year. The percentage share of pulses to total value of farm crops is 5% in the year 2010-11 as compared to 4% in the base year.

Table(2): **Value of Output of selected Cereal crops**

Value of Output of selected Cereals Crops (At constant price)									(Rs. '00 Cr.)
Item	% Share	2004-05	2005-06	2006-07	2007-08	2008-09	2009-10	2010-11	% Share
	2004-05								2010-11
Paddy	52	732	789	799	829	857	781	827	50
Wheat	34	478	472	539	552	562	557	592	36

Bajra	3	44	39	45	52	48	35	56	3
<b>Total cereals*</b>		<b>1398</b>	<b>1451</b>	<b>1527</b>	<b>1607</b>	<b>1639</b>	<b>1525</b>	<b>1660</b>	

\* It includes other items not covered in the table.

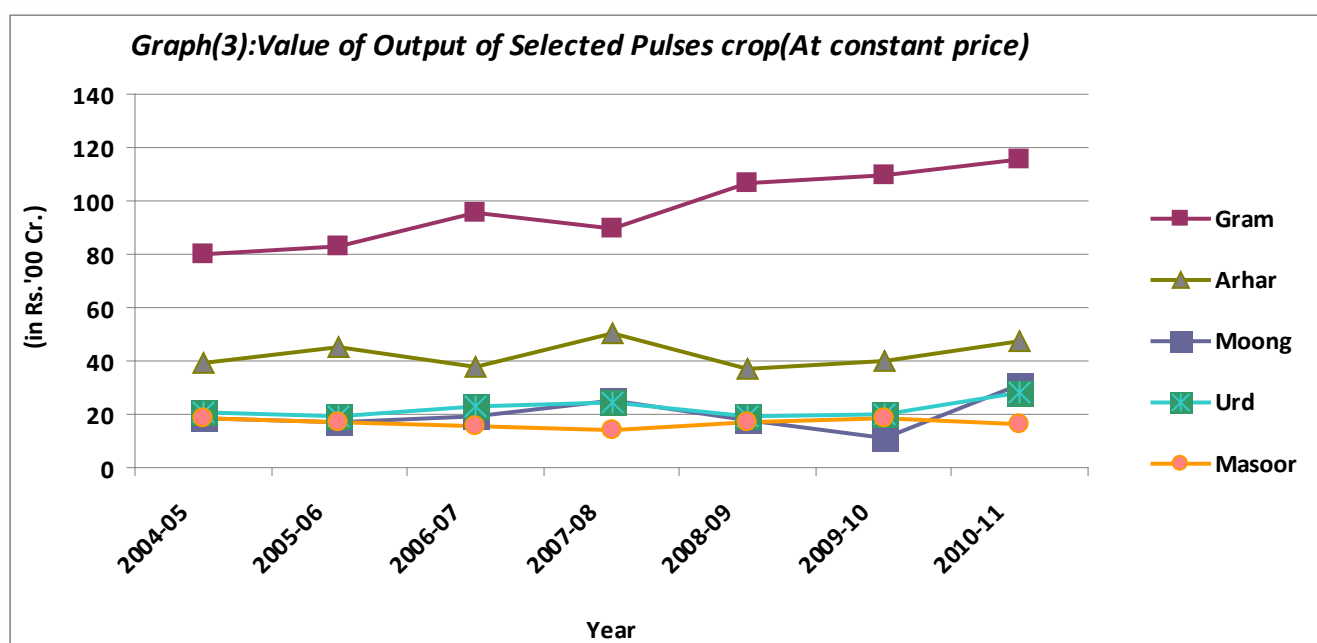

The value of output for Cereals is showing steady from 2004-05 to 2010-11, except for the year 2009-10, where there is slight decrease in value of output of paddy which resulted in overall decline in cereals. Rice and Wheat constitute 50% and 36% respectively of total value of cereals in 2010-11. The share of Rice declined from 52% in the base year to 50% in the year 2010-11 whereas wheat increased to 36% in the year 2010-11 from 34% in the base year. The percentage share of Maize and Bajra in total value of cereals is 7% and 3% respectively in 2010-11 as against 5% and 3% respectively in the year 2004-05.

Table(3): **Value of Output of Selected Pulses crops**

Value of Output of Selected Pulses crops (At constant price)									(Rs. '00 Cr.)
Items	% Share	2004-05	2005-06	2006-07	2007-08	2008-09	2009-10	2010-11	% Share
	2004-05								2010-11
Gram	39	80	83	96	90	107	109	116	44
Arhar	20	40	45	38	51	37	40	48	18
Moong	9	18	17	19	26	18	11	31	12
Urd	10	20	19	23	24	19	20	28	11
Masoor	9	18	17	16	14	17	19	16	6
<b>Total Pulses*</b>		<b>202</b>	<b>206</b>	<b>214</b>	<b>228</b>	<b>223</b>	<b>221</b>	<b>263</b>	

\* It includes other items not covered in the table.

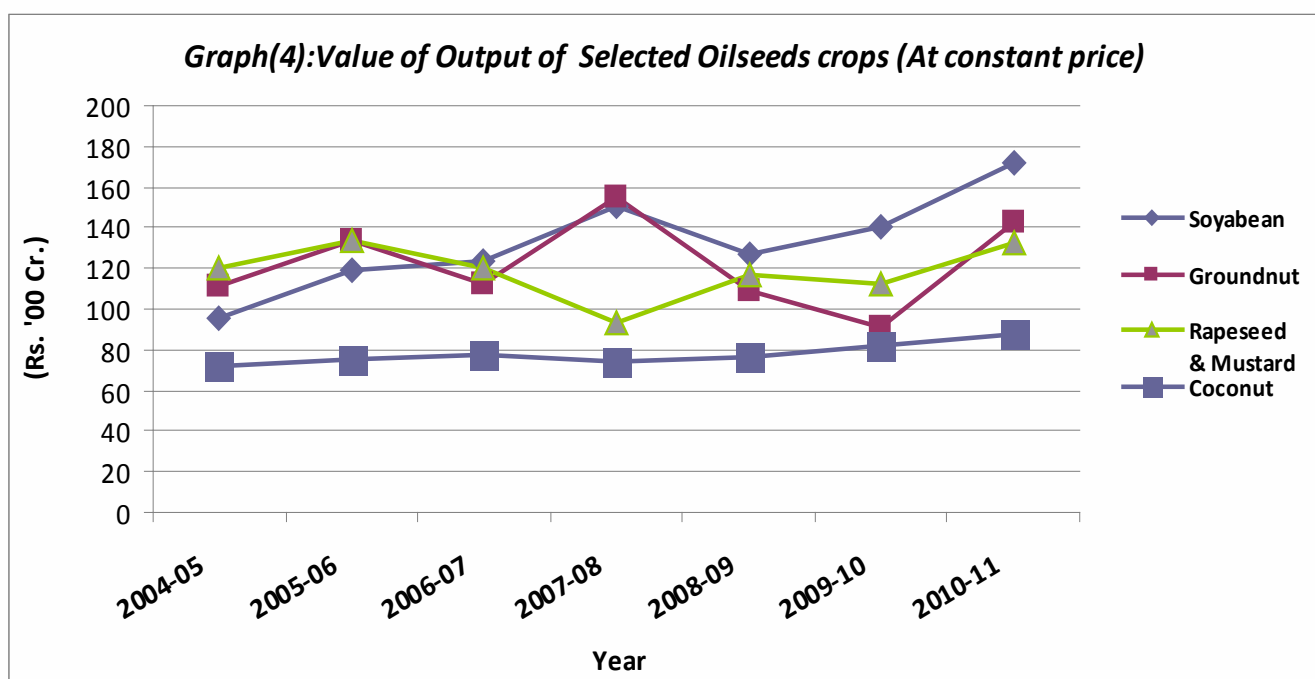

The value of output of Pulses group have slowly and steadily increased from the base year 2004-05 to 2010-11 except a marginal decline in 2009-10. However there is an increasing trend in value of output of Gram in the same period. The percentage share of Gram, Arhar, Moong, Urd and Masoor in Pulses group is 44%, 18%, 12%, 11% and 6% respectively in 2010-11 as compared to 39%, 20%, 9%, 10%, 9% in the year 2004-05.

Table(4): **Value of Output of Selected Oilseed crops**

Value of Output of Selected Oilseed crops (At constant price)									(Rs. '00 Cr.)
Items	% Share	2004-05	2005-06	2006-07	2007-08	2008-09	2009-10	2010-11	% Share
	2004-05								2010-11
Soyabean	21	96	120	123	151	127	140	171	28
Groundnut	24	112	134	112	155	109	91	143	24
Rapeseed & Mustard	26	120	134	120	94	117	112	133	22
Coconut	16	72	75	78	74	76	82	88	15
<b>Total oilseeds*</b>		<b>461</b>	<b>528</b>	<b>496</b>	<b>545</b>	<b>492</b>	<b>481</b>	<b>602</b>	

\* It includes other items not covered in the table.

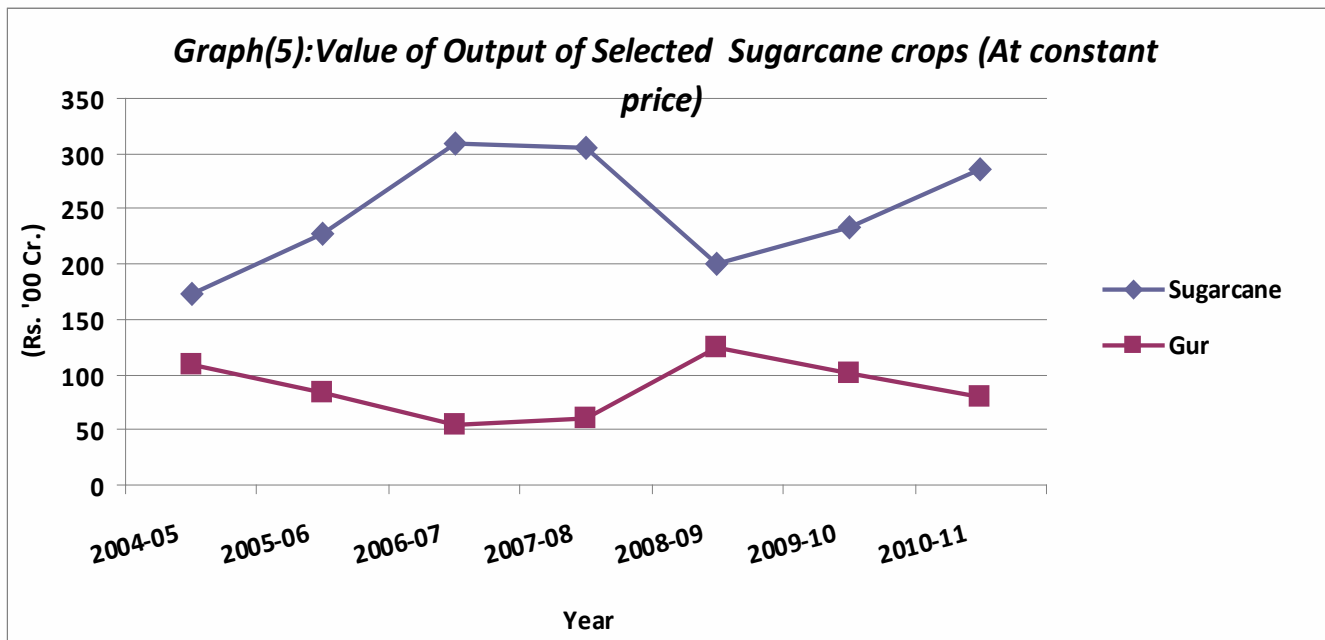

The value of output for major Oilseeds crops have been fluctuating from 2004-05 to 2010-11. However there is an increasing trend in value of output of Coconut in same period except 2007-08 when a slight decline was observed. The percentage share of Soyabean, Groundnut, Rapeseed & Mustard and Coconut is 28%, 24%, 22% and 15 % respectively of the total production of oilseed in the year 2010-11 as compared to 21%, 24%, 26% and 16% respectively in the base year 2004-05.

Table(5):

**Value of Output of Selected Sugarcane crops**

Value of Output of Selected Sugarcane crops (At constant price)									(Rs. '00 Cr.)
Items	% Share	2004-05	2005-06	2006-07	2007-08	2008-09	2009-10	2010-11	% Share
	2004-05								2010-11
Sugarcane	61	174	228	310	306	200	232	286	78
Gur	38	109	83	55	60	125	101	81	22
<b>Total Sugarcane*</b>		<b>284</b>	<b>313</b>	<b>367</b>	<b>367</b>	<b>326</b>	<b>335</b>	<b>368</b>	

\* It includes other items not covered in the table.

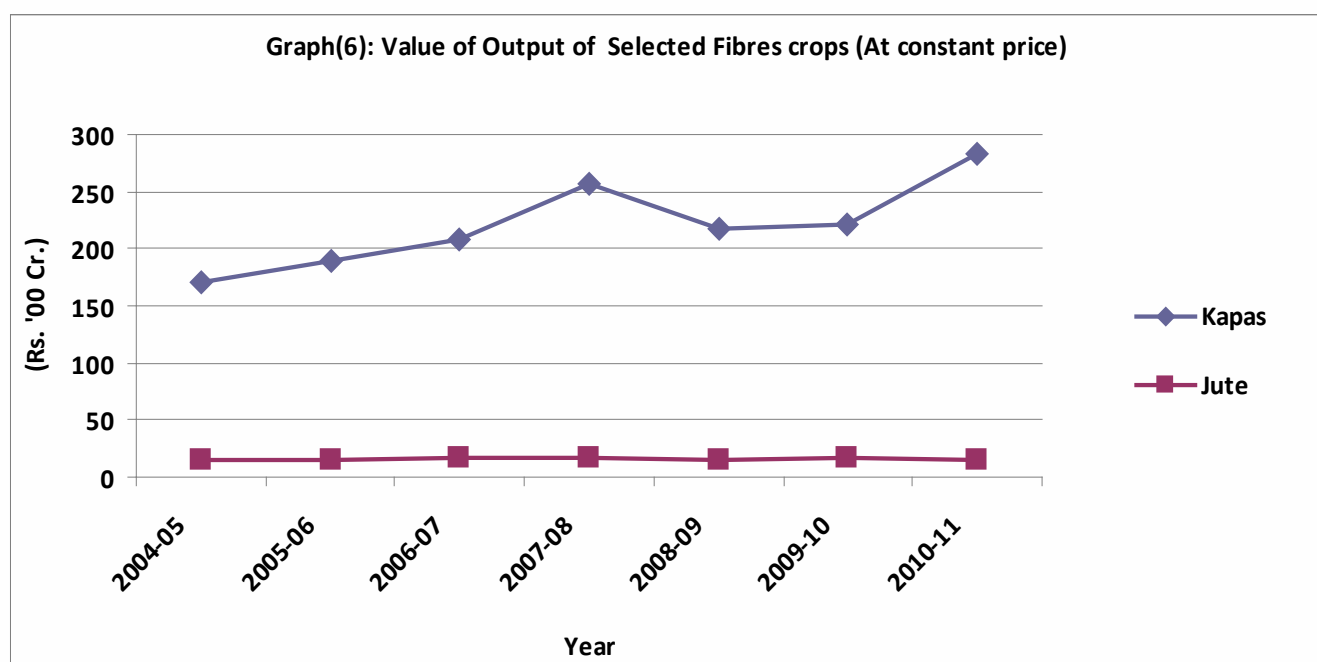

On comparison of the value of output of Sugarcane from 2004-05 to 2010-11, it is seen that the value of output for Sugarcane is maximum in the year 2006-07 to the tune of Rs 31000 crore but declined thereafter to Rs. 20000 crore in the year 2008-09 and again increased in year 2009-10 and 2010-11. It is also observed that value of output for Gur has been highly fluctuating during the period. The percentage share of Sugarcane and Gur in total value is 78% and 22% respectively in 2010-11 as compared to 61% and 38% respectively in the year 2004-05.

Table(6): **Value of Output of Selected Fiber crops**

Value of Output of Selected Fiber crops (At constant price)									(Rs. '00 Cr.)
Items	% Share	2004-05	2005-06	2006-07	2007-08	2008-09	2009-10	2010-11	% Share
	2004-05								2010-11
Kapas	91	171	189	208	257	218	221	282	94
Jute	8	15	16	16	16	15	18	16	5
<b>Total fibers*</b>		<b>188</b>	<b>207</b>	<b>227</b>	<b>276</b>	<b>235</b>	<b>240</b>	<b>300</b>	

\* It includes other items not covered in the table.

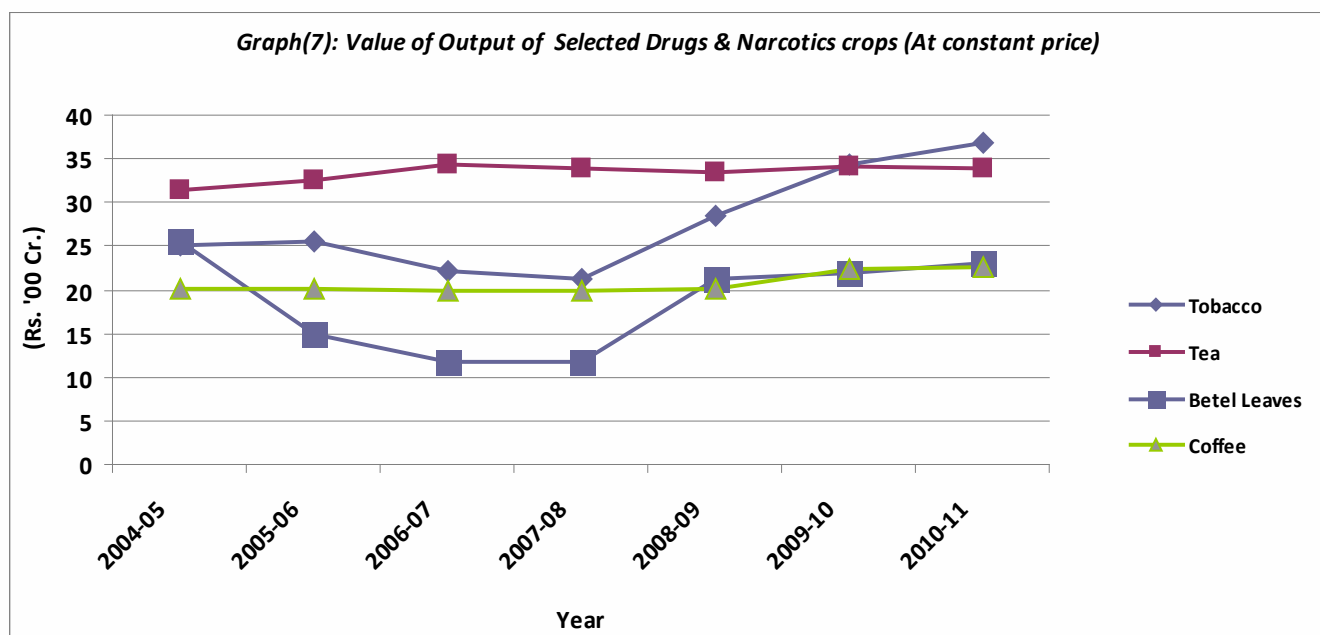

The value of output for Fiber group is showing increasing trend of Value of output of Kapas during the time period 2004-05 to 2010-11 except for the year 2008-09 & 2009-10 when a decline in value is being observed. Jute production has been consistent in the same period. Kapas and Jute constitute 94% and 5% respectively of the total value of output of Fiber Crops in year 2010-11 as compared to 91% and 8% respectively in the year 2004-05.

Table(7): **Value of Output of Selected Drugs & Narcotics crops**

\* It includes other items not covered in the table.

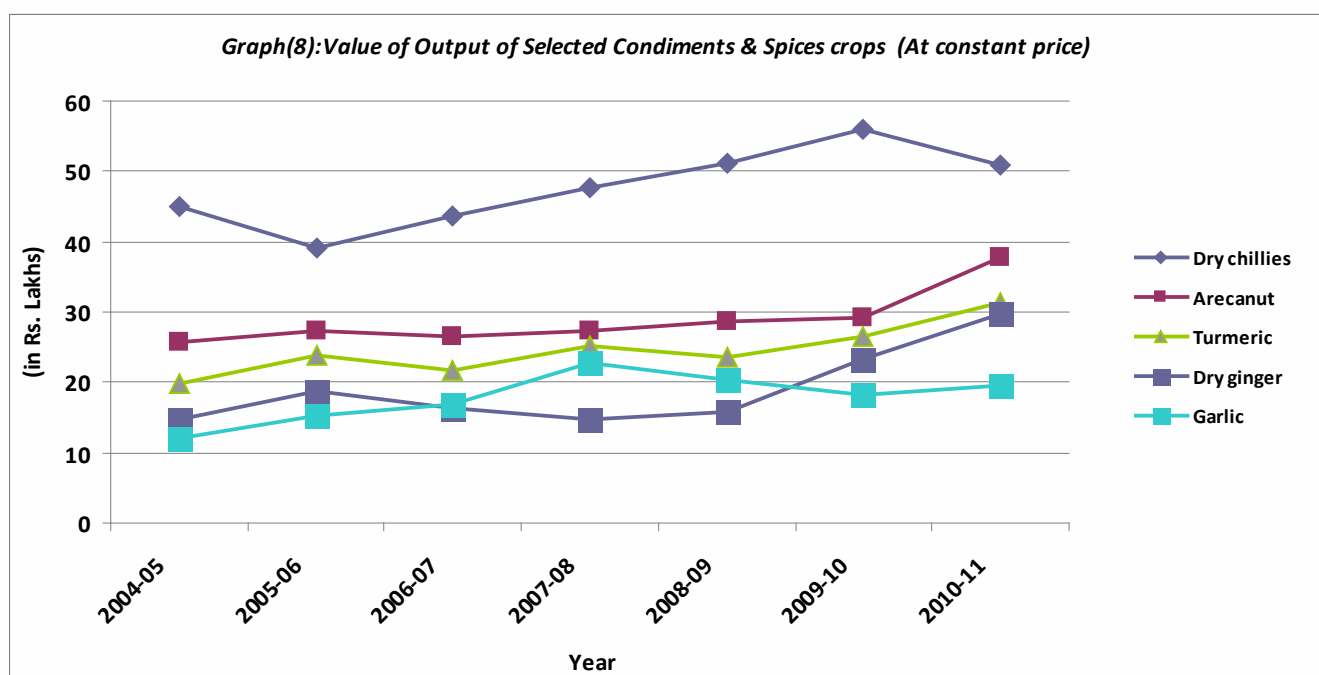

The value of output for Drugs and Narcotics group is showing fluctuation and minor change in the value of output for Tea and Coffee during the period 2004-05 to 2010-11. The percentage share of Tobacco, Tea, Betel Leaves, and Coffee in the total value of Drugs and Narcotics is 24%, 22%, 15% and 15% respectively in 2010-11 as compared to 18%, 23%, 18% and 14% respectively in the base year 2004-05.

Table (8): **Value of Output of Selected Condiments & Spices crops**

Value of Output of Selected Condiments & Spices crops (At constant price)									(Rs. '00 Cr.)
Items	% Share	2004-05	2005-06	2006-07	2007-08	2008-09	2009-10	2010-11	% Share
	2004-05								2010-11

\* It includes other items not covered in the table.

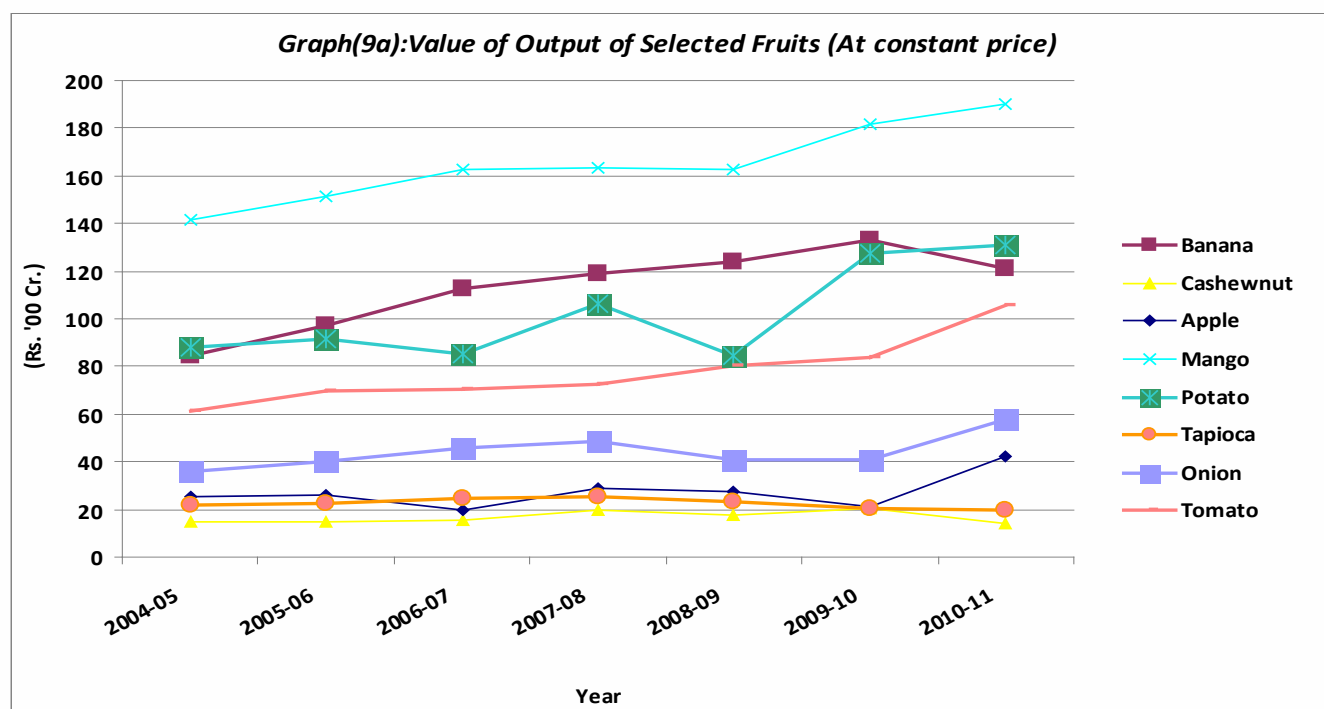

The total value of output for Condiments and Spices is showing an increasing trend during the period 2004-05 to 2010-11, however within the items between the years there were fluctuations. The percentage share of Dry Chillies, Arecanut, Turmeric, Dry Ginger & Garlic in total value of Condiments and Spices is 23%, 17%, 14%, 13% and 9% respectively in 2010-11 as compared to 28%, 16%, 12%, 9% and 8% in the base year 2004-05.

Table(9): **Value of Output of Selected Fruits & Vegetables**

Value of Output of Selected Fruits & Vegetables (At constant price)									(Rs. '00 Cr.)
Items	% Share	2004-05	2005-06	2006-07	2007-08	2008-09	2009-10	2010-11	% Share

<b>Total fruits &amp; veg*</b>		<b>1133</b>	<b>1220</b>	<b>1278</b>	<b>1350</b>	<b>1373</b>	<b>1476</b>	<b>1572</b>	

\* It includes other items not covered in the table.

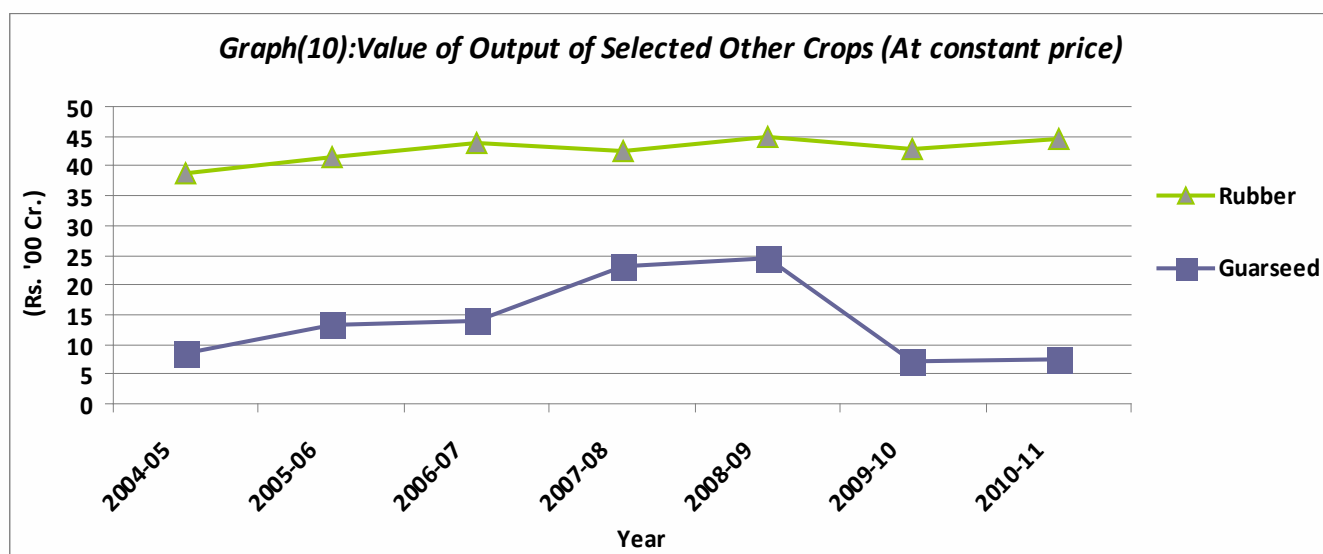

The Total value of output for Fruits & Vegetables is showing an increasing trend during the period 2004-05 to 2010-11. The percentage share of Banana, Apple, Mango, Potato, Onion and Tomato in total value of Fruits and vegetables group is 8%, 3%, 12%, 8%, 4% and 7% respectively in 2010-11 as compared to 7%, 2%, 13%, 8%, 3% and 5% in the base year 2004-05. The share of value of Potato has not changed between these two years.

Table(10): **Value of Output of Selected Other Crops**

Value of Output of Selected Other Crops (At constant price)									(Rs. '00 Cr.)
Items	% Share	2004-05	2005-06	2006-07	2007-08	2008-09	2009-10	2010-11	% Share

<b>Total forest product</b>		<b>730</b>	<b>743</b>	<b>768</b>	<b>778</b>	<b>793</b>	<b>816</b>	<b>834</b>	

The value of output for fuel wood is showing an increasing trend and the value of output of Industrial wood and Non-timber are marginally fluctuating. The percentage share of Industrial wood, fuel wood and Non timber in total value of forestry product is 44%, 45% and 12% respectively in 2010-11 as compared to 51%, 36% and 13% in the base year 2004-05

Table(13): **Value of Output of Fishery product**

Value of Output of Fishery product (At constant price)									(Rs. '00 Cr.)
Items	% Share	2004-05	2005-06	2006-07	2007-08	2008-09	2009-10	2010-11	% Share
	2004-05								2010-11
Inland fish	49	157	169	177	189	205	215	228	54
Marine fish	51	162	170	180	188	184	185	192	46
<b>Total fish</b>		<b>320</b>	<b>340</b>	<b>357</b>	<b>377</b>	<b>389</b>	<b>400</b>	<b>420</b>	

The value of output for Fish product is showing an increasing trend and the value of output of Inland Fish and Marine Fish are moving in the same direction during the period 2004-05 to 2010-11. The percentage share of Inland Fish and Marine Fish to the total value of fish product is 54% and 46% respectively in the year 2010-11 as compared to 49% and 51% in the base year 2004-05. The percentage share of value of production of Inland Fish has increased and the percentage share of the value of Marine Fish has declined on comparing between the base year and the year 2010-11.

## **Estimation procedures for the valuation of Agricultural products**

### **(A) Valuation of Output of Agricultural Crops**

(i) The Agriculture Sector comprises Agriculture crop production, Livestock, Forestry and Fishery. The agriculture crop production includes (a) growing of field crops, fruits, nuts, seeds and vegetables, (b) management of tea, coffee and rubber plantations.

(ii) Directorate of Economics & Statistics, Agriculture (DESAg), in the Ministry of Agriculture is the prime source for agricultural statistics used for the estimation of GVO. The information used for purposes of building up the estimates are (a) the Land Use Statistics (LUS), (b) Area and Out turn of Principal Crops.

(iii) The DESAg has divided crops into two groups' viz., major and minor crops. Major crops (25) are: Paddy, Wheat, jowar, bajra, maize, ragi, barley, small millets, gram, tur, other kharif pulses, other Rabi pulses, groundnut, sesamum, rapeseed and mustard, linseed, castor seed, safflower, niger seed, soybean, sunflower, cotton, jute, mesta and sugarcane. Minor crops (17) are potato, onion, banana, tapioca, sweet potato, pepper, ginger, garlic, chillies, turmeric, arecanut, coriander, cardamom, sun hemp, tobacco, guar seed and coconut.

The sources of data used in the preparation of the value of output are as under:

(iv) The estimates of area and production of 42 crops (25 major crops and 17 minor crops) covered in crop groups: (1) Cereals, (2) Pulses, (3) Oil seeds, (4) Sugar, (5) Fibers (6) Drugs and Narcotics, (7) Condiments and Spices (8) Fruits and Vegetables (9) Other crops (10) By-products and (11) Kitchen Garden, at State level are obtained from the DESAg. The estimates of area and production of Fruits and Vegetables, not covered by DESAg are obtained from National Horticulture Board (NHB). The estimates of area and outturn of plantation crops viz., Tea, Coffee, Rubber, Arecanut, Cashew nut and Cocoa are obtained from their respective commodity boards and area and outturn of opium is obtained from Central Bureau of Narcotics. However, in the case of sugarcane, outturn excluding the quantity converted into Gur by the cane growers is taken and Gur is evaluated separately.

(v) In the case of tea, the estimates of output available from Tea Board relate to production of processed tea instead of raw tea leaves. Since processing is the activity outside the scope of agriculture, the output of raw tea leaves alone is to be taken into account in the agriculture sector and this is taken to be equal to the input of raw tea leaf in the tea processing industry. The production of tea leaves is estimated as 4.44 times of the processed tea. This norm of 4.44

has been estimated by the Tea Board on the basis of TechnoEconomic Surveys.

(vi) The crops which do not have significant contribution in each of the groups are clubbed under 'other...' of each category. However in the current brochure, some more crops have been included which were hitherto covered under 'others.....' The list of such crops has been given in 'Annexure'. The data on these crops is available from Land Use Statistics. Such information is obtained through state DESs and DESAg. Value per hectare is derived from the respective groups.

(vii) **Toddy:** Toddy crop, a beverage, has now been included. NSSO Publication entitled "Consumption of some important commodities in India 2004-05"( National Sample Survey, 61<sup>st</sup> round), provides monthly per capita quantity and value of consumption for toddy in each state and UT with rural and urban break up, which is further multiplied with rural and urban population to obtain total consumption of Toddy.

(viii) **Betel Leaf:** For almost all betel leaves producing States, production approach is adopted for estimating production of betel leaf. In case of Assam, betel leaves production is estimated on the basis of arecanut to betel leaves consumption ratio (1:4), also, of the total production of arecanut, about 20% is used for dying purposes.

(ix) **Kitchen garden:** Evaluation of production under Kitchen garden is done on the basis of the ratio of total area under kitchen garden to the total rural area operated at all-India level (0.21 per cent) as observed in 1991-92, as per Report "*Operational Land Holdings in India, 1991-92 Salient Features*" March, 1997 and Livestock Holding Survey, 1991-92, NSS (48<sup>th</sup> round). This ratio of total area under kitchen garden to the total rural area operated has been assumed to be constant for the subsequent years as no data under kitchen garden was compiled during Livestock Holding Survey, NSS (59<sup>th</sup> round ), old norm i.e., '0.21 per cent of the net sown area' has been used for estimating area under kitchen garden for the new series . The estimates of value of output on account of production of crops in foreyard/backyard are made using these area estimates and the value per hectare of fruits and vegetable crops.

(x) **Floriculture:** Data on area, production of loose flowers in quintals and spikes in numbers are taken from NHB. The estimates of production are further multiplied with prices from the respective State DESs to get the values.

(xi) **Other crops:** Other crops are non-food crops not classified elsewhere. Direct outturn estimates are not available. The estimates of output for these crops are obtained by applying an appropriate average value of yield per hectare to the total area under these crops.

(xii) **Fodder and Grass:** The rates used for estimating production of fodder are on the basis

of the study conducted in 2004-05 by the Socio-Economic Research Centre, New Delhi, which are as under:

*Yield of cultivated Green Fodder*

- 50 tonne/hect. for Irrigated Land
- 25 tonne/hect. for Un- irrigated Land

(xiii) Grass is estimated on the basis of the combined area under permanent pasture land, culturable waste land, land miscellaneous tree crops, fallow lands and net areas sown (using the appropriate weights for different types of areas), which is based on NSS 1955-56 report. Fodder and grass are evaluated at producer prices received from DESs.

(xiv) **Sugarcane and Gur:** Conversion of sugarcane into gur is an activity undertaken by the agriculturists. The total sugarcane production is divided into two parts viz., sugarcane utilized as such and the sugarcane converted into gur. While the former is evaluated at sugarcane prices, the latter is evaluated at corresponding gur prices. Estimates of gur production are not directly available. The estimates are worked out using information on quantity of sugarcane used for various purposes. The information on utilization of sugarcane for seed, chewing, juice making etc., is gathered from the State Agricultural Departments, DMI and the CCS. The quantity of sugarcane crushed by the factories for the manufacture of crystal sugar is obtained from the Directorate of Sugar & Vanaspati, Ministry of Agriculture. The consumption of sugarcane for the production of khandsari, bura etc., is estimated separately for the registered and unregistered establishments from the ASI and NSSO respectively. Out of the total sugarcane, the quantity of sugarcane left over after allowing for the above uses is assumed to be converted into gur.

(xvi) The conversion rates from sugarcane to gur are taken from the production estimates of sugarcane in terms of gur, released by the DESAg. Bagasse obtained as a byproduct during conversion of sugarcane into gur is estimated as 35 per cent of gur production. Socio Economic Research Centre (SERC), in a study obtained the quantity of Bagasse production in 100 kg. of gur production from Sugarcane Breeding Institute, Coimbatore.

(xvii) **Byproducts:** In the process of cultivation of crops and their processing by indigenous methods, several byproducts are also produced. However, for the estimation of GVA only those byproducts which are readily identifiable and have some definite economic value are considered. The value estimates of these byproducts are based on the results of Cost of Cultivation Studies (CCS). The value per unit area of the byproducts available from the CCS is directly utilized for arriving at the value of output.

(i) For evaluation purposes of these crops, the producers' prices correspond to average wholesale prices ruling in the primary markets during the peak marketing periods and are furnished by the State Directorates of Economics and Statistics (DESs) to Central Statistical Office (CSO). The wholesale prices are collected by the agriculture produce marketing committees of

State Agriculture Departments or by the DESAg under the market intelligence scheme of DESAg. For averaging the weekly wholesale prices available from the selected primary markets, the following procedures are adopted by State DES.

- (a) Arithmetic averaging of the prices at the various centres within a district is done to get the weekly district prices.
- (b) Average price for a district is worked out as the arithmetic average over the 'peak marketing period' of weekly prices obtained at (a) above.
- (c) State average price is obtained as a weighted average of the district wise prices derived at (b) above, weights being the district-wise production of the corresponding crops.

### **(B) Valuation of Output of Livestock Products**

For purpose of estimation of value of output, the livestock products are divided into 7 broad groups viz., (i) milk, (ii) meat, (iii) eggs, (iv) wool, (v) dung, (vi) silk worm cocoons & honey, and (vii) increment in stock. The source of data used in the preparation of the value of output is as under:

(i) **Milk group:** The milk group comprises of milk consumed or sold in fluid form, ghee, butter and lassi produced by the producer households. It has been observed, during discussions with the DES that the quantity of milk used for conversion into ghee, butter and lassi by the producer households is quite minimal and the products converted are consumed mostly by the households themselves. Thus the evaluation of milk has been done as though it is consumed and sold in the fluid form itself. The milk production estimates released by the Department of Animal Husbandry, Dairying and Fisheries (DAHDF), Ministry of Agriculture are used for working out the value of output. The main source of data for milk production is the Integrated Sample Survey (ISS). In some States goat and buffalo milk are not estimated by DAHDF. Production of milk, in such cases, is estimated by using yield rate prevalent in the neighboring States and the production so estimated is added to the production estimated by DAHDF. Production of camel milk is also estimated by using the yield per camel in Gujarat.

(ii) **Meat group:** Meat group comprises of meat (including edible offal & glands and poultry meat), meat products (fats, heads, legs, etc.) and byproducts comprising hides (cattle and buffalo hides), skins (goat and sheep skin) and other products like guts, blood, bones, horns,

hoofs etc. The States estimate the total production of meat both from registered and unregistered slaughter houses. The estimates of meat products and by products are based on the number of slaughtered animals and fallen animals, wherever applicable and the corresponding yield rates. In the 2004-05 series the value of meat by-products (guts, blood, bones, horns, hooves, etc.) excluding hides and skins has been estimated as a percentage of the total value of meat and meat production based on the study conducted by the CSO in 6 states. The percentages used for estimating the value of meat by products of different animals to value of meat and meat production are 13.2% for cattle, 13.3% for buffalo, 2.4% for goat, 2.5% for sheep and 5% for pig.

(iii) **Eggs & poultry meat:** The data on production of eggs is estimated through ISS and ILC and are furnished by the DAHDF, Ministry of Agriculture. The estimates of poultry meat are prepared using the information on utilization of eggs for hatching (state-wise fixed ratio (as provided by the States)\* total egg production), chickens & duckling killed, adult fowl killed (50% of population of hens and cocks), adult duck killed (50% of population of ducks and drakes) and other poultry killed (37.5% of population of other poultry). Number of chickens & duckling killed is estimated by subtracting next year population from current year population and chicken and duckling survived out of total hatched eggs.

(iv) **Wool and Hair:** Estimation of production Wool and Hair is based on yield rate of hair from camel and yield rates of pig bristles in gm./animal/year provided by SERC and Study conducted by CSO during Pig Fair Mainpuri, UP respectively. Currently average yield rate of hair from single humped camel as 700 gm./animal/year and that of a double humped camel as 3.0 kg./animal/year. Average yield rates of pig bristles are estimated as 155 gm per pig per year.

(v) **Dung:** The estimates of production of dung are prepared on the basis of information on population and evacuation rates supplied by the Department of Animal Husbandry, Dairying and Fisheries (DAHDF), Ministry of Agriculture. The evacuation rates and population estimates are based on the ISS. For the remaining States, for which estimates are not available, the rates pertaining to the adjoining States along with the annual estimated animal population are used for arriving at the dung production estimates. Dung is used as manure as well as fuel. The utilization rates of dung for (i) dung used as manure and (ii) dung used as fuel is supplied by the (DAHDF), Ministry of Agriculture.

(vi) **Silk worm cocoons and honey:** The annual outturn estimates of silk worm cocoons by types (viz., mulberry, tasar, ericot and muga) and honey are obtained from Central Silk Board and KVIC respectively.

(vii) **Increment in stock:** The annual net increase in the population in each state is estimated separately for each category of livestock on the basis of the projected population. The population

has been projected on the basis of growth rates observed between two Livestock Censuses i.e. ILC 2003 and ILC 2007.

(viii) Evaluation of Livestock production is done by multiplying the quantities of production by the corresponding producers' prices. The prices of livestock products are obtained in special return by the State DESs to ensure reasonable coverage of state-wise prices of important livestock/livestock products. The state-wise prices are worked out as the simple average of all available price observations.

### **(C) Valuation of Output of Forestry**

(i) The data on production and prices of industrial wood and non timber forest products as well as on prices of fuel wood are supplied by the State Forest Departments (SFDs). The data on production of industrial wood generally relates to the quantities sold/auctioned at the assembling centers by the SFDs. In the case of minor forest products, the information on their production is generally not available. However, information is built up on the basis of royalty received (in value terms) from those authorized to exploit these minor forest products from the forests. The value of non timber forest products could be the royalty figures or economic value derived from the royalty figures. The estimates of production of fuel wood are prepared on the basis of five-yearly consumer expenditure surveys of the National Sample Survey Organization (NSSO).

(ii) Industrial Wood: The estimates of value of output at current prices are prepared by multiplying the category-wise production figures with their respective average annual prices (at the assembling centers), both of which are supplied by the SFDs. However, this information relates only to the authorized produce of Government forests. In addition to the production of industrial wood from these Government forests, there would be (i) authorized (but unrecorded) and unauthorized removals of timber from reserved/protected forests and (ii) unrecorded production from private owned forests and nontraditional forest areas (e.g., trees in village common fields, ridges, canal sides, road sides, fruit trees no longer productive etc.). The authorized removals are those done by the right holders staying in the periphery of natural forests and are generally not recorded in the official records of production. In order to account for the production of industrial wood, a norm of 10 per cent of recorded production (as reported by the SFDs) is adopted. However, it has been observed that there is a considerable production of wood from social forests and other plantations outside forests. Therefore, in the new series 2004-05, data on industrial wood produced from Trees Outside Forests(TOF) has been included in output estimates of forestry sector, in consultation with the Ministry of Environment and Forests. The data on output of industrial wood from tree outside forests has been provided by

the Forest Survey of India(FSI).

(iii) Non Timber Forest Products(NTFP): Data on quantity and producer prices of most of the minor forest products (MFPs) now classified as Non Timber Forest Products(NTFP) are available from the SFDs. The items of NTFP vary from state to state. Previously, output of fodder from forests sources was not included in the National Accounts compilation. In the new series 2004-05, this item has been included in consultation with the Ministry of Environment and Forests, as part of non timber forest products. It has been estimated by the Forest Survey of India that at the national level, 15.5% of the livestock population is solely dependent on forest areas for fodder/roughages.

(iv) Fuel wood: It constitutes an important basic need for large segment of the population in India. The quantity/output of fuel wood is estimated through consumption approach, as reliable estimates on production of fuel wood are not directly available. Data on prices are available from state DESs. The estimated production of fuel wood is based on three components, namely (i) household fuel wood consumption, (ii) agricultural by-products used as fuel wood (this amount is to be subtracted from the total consumption of fuel wood by the households, as it is already accounted for in the agriculture sector as by-products) and (iii) fuel wood consumed by industries and on funerals. The estimated value of output of fuel-wood is based on (a) the estimation of fuel wood consumption as available from the Quinquennial Surveys of Consumer Expenditure, conducted in the NSS 55<sup>th</sup> (1999-2000) and 61<sup>st</sup> (2004-05) Rounds (b) subtracting from the household total consumption of fuel wood estimated from NSS data, the actual estimates of value of output of agricultural products, namely, cotton sticks, arhar sticks and jute sticks, rapeseed stick, sunflower stick, castor sticks, baggase and whose value of output is already taken into account in the agriculture sector (this gives the total firewood consumption from forest sources) and (c) estimating afresh the consumption of firewood in the industry and on funerals is used 6% of total firewood consumption.

#### **(D) Valuation of Output of Fisheries**

(i) **Marine fish:** Data on estimated landings of marine fish, prices and value of fish catch are directly obtained from the State Fisheries Department of maritime states/union territories. For the estimation of marine fish production almost all maritime States follow the statistical sampling design. The produce of prawns is separately valued.

(ii) **Inland fish:** The data on inland fish production are also supplied by the SFDs. By and large the estimates are prepared on the basis of market arrivals of fish or on the basis of surveys conducted in selected landing centers; the key information that is used in collecting data on inland fish is on the data in respect of inland water bodies. The produce of prawns is separately valued.

(iii) **Subsistence fishing:** The data supplied by the SFDs includes production from subsistence

fishing, in the case of most of the states. For other states, it is estimated at 12.5 per cent of inland fish production. This ratio has been arrived at on the basis of type studies conducted by few state Governments.

(iv) **Salting, Sun-drying and Frozen Fish:** Most maritime states resort to allied activities of fish curing, which include salting and sun drying of fish. The data on quantities and prices of fish let-in (raw fish going into salting, sun drying and frozen purposes) and fish let-out (the resultant salted, sundried and frozen fish) is also available from, the SFDs.

(v) **Other products:** Data on producer prices and value of output in respect of gathering of pearls, chanks, oysters, seaweeds, limeshells, seashells etc., are not available, as such these are not included. However, from the available data from a few states, it is assessed that the contribution of these activities is not significant.

(vi) **Prices:** For working out the value of output, the average annual auction prices of marine fish (species wise) collected by the SFDs at the landing centers and the inland fish prices reported by the SFDs from the assembling centers, are used.

The users may refer for further details on the methodology of estimation, to the CSO publication entitled "National Accounts Statistics, Sources and Methods", 2012 and "New Series on National Accounts Statistics (Base Year 2004-05)". The value of output in respect of 111 crops or crop groups, 7 Livestock groups, 3 Forestry groups and 2 Fisheries groups has been presented in this brochure. For each groups information is given in the form of two statements. The first statement contains information on state-wise value of output at current prices for 2004-05 to 2010-11. This is followed by a statement providing information on state-wise value of output of crop/crop group at constant prices (2004-05) for 2004-05 to 2010-11.
