# PART A

SECOND ADVANCE ESTIMATES
OF NATIONAL INCOME 2023-24,
QUARTERLY ESTIMATES
OF GROSS DOMESTIC PRODUCT FOR THE
THIRD QUARTER (OCTOBER-DECEMBER), 2023-24

#### **NOTE ON**

# SECOND ADVANCE ESTIMATES OF NATIONAL INCOME, 2023-24, QUARTERLY ESTIMATES OF GROSS DOMESTIC PRODUCT FOR THE THIRD QUARTER (OCT-DEC), 2023-24

In this part, the Second Advance Estimates (SAE) of National Income, 2023-24 as well as Quarterly Estimates of Gross Domestic Product (GDP) for the Third quarter (October-December) of 2023-24 (Q3, 2023-24) at both Constant (2011-12) and Current Prices are given.

- 2. Estimates of Gross/Net National Income and Per Capita Income along with Gross Value Added (GVA) at Basic Prices by kind of economic activity and the Expenditure Components of GDP for the year 2023-24 besides quarterly estimates and April-December Estimates for the years 2021-22, 2022-23 and 2023-24 at Constant (2011-12) and Current Prices, along with percent changes are given in **Statements 1A to 12A** placed at the end of this part of the press note.
- 3. Real GDP or GDP at Constant (2011-12) Prices in the year 2023-24 is estimated at ₹172.90 lakh crore, against the First Revised Estimates (FRE) of GDP for the year 2022-23 of ₹160.71 lakh crore. The growth in real GDP during 2023-24 is estimated at 7.6 per cent as compared to 7.0 per cent in 2022-23.
- 4. Nominal GDP or GDP at Current Prices in the year 2023-2 estimated at ₹293.90 lakh crore, against the FRE of GDP for the year 2022-23 of ₹269.50 lakh crore. The growth in nominal GDP during 2023-24 is estimated at 9.1 per cent as compared to 14.2 per cent in 2022-23.
- 5. GDP at Constant (2011-12) Prices in Q3 of 2023-24 is estimated at ₹43.72 lakh crore, against ₹40.35 lakh crore in Q3 of 2022-23, showing a growth rate of 8.4 percent. GDP at Current Prices in Q3 of 2023-24 is estimated at ₹75.49 lakh crore, as against ₹68.58 lakh crore in Q3 of 2022-23, showing a growth rate of 10.1 percent.
- 6. The Advance Estimates of National Income are indicator-based and are compiled using the benchmark-indicator method i.e. the estimates available for the previous year (2022-23) are extrapolated using the relevant indicators reflecting the performance of sectors. The First Advance Estimates (FAE) for 2023-24 were based on very limited data and by using Provisional Estimates of 2022-23 as benchmark estimates.
- 7. For compilation of SAE 2023-24, the Provisional Estimates of 2022-23 used at the time of FAE have been replaced by First Revised Estimates (FRE) 2022-23 which have been compiled using industry-wise/institution-wise detailed information. Thus, variations in SAE from FAE is attributed to revision of benchmark estimates and additional data available on various indicators like CPI, IIP, Revised Estimates of fiscal data, financial results of listed companies etc. used for compiling the estimates for 2023-24. The quarterly estimates of previous years along with the first and second quarter estimates of 2023-24 released earlier have also undergone revision in accordance with the revision policy of National Accounts.
- 8. The sector-wise estimates have been compiled using indicators like (i) Index of Industrial Production (IIP), (ii) Financial performance of Listed Companies in the Private Corporate sector available for Q1, Q2 and Q3 of 2023-24, (iii) Second Advance Estimates of Crop Production for

- 2023-24, (iv) Production targets as well as summer and rainy season production estimates of Major Livestock Products for 2023-24, (v) Fish Production, (vi) Production/ Consumption of Cement and Steel, (vii) Net Tonne Kilometers and Passenger Kilometers for Railways, (viii) Passenger and Cargo traffic handled by Civil Aviation, (ix) Cargo traffic handled at Major and Minor Sea Ports, (x) Sales of Commercial Vehicles, (xi) Bank Deposits & Credits, (xii) Accounts of Central & State Governments, etc., available for first 9-10 months of the financial year 2023-24. Year-on-Year growth rates (%) in the main indicators used in the estimation are given in the **Annexure A**.
- 9. The total tax revenue used for GDP compilation includes non-GST revenue as well as GST revenue. The Revised Estimates of tax revenue for 2023-24, as available in the Annual Financial Statement of the Central Government for 2024-25, latest available information on the websites of Controller General of Accounts (CGA) and Comptroller and Auditor General of India (CAG) have been used for estimating taxes on products at Current Prices. For compiling taxes on products at constant prices, volume extrapolation is done using volume growth of taxed goods and services. The total product subsidies were compiled using the latest information on major subsidies viz. Food, Urea, Petroleum and Nutrient based subsidy as available on CGA website and the expenditure incurred on subsidies by most States upto December, 2023 as available on CAG website along with the Centre/ State-wise RE and BE provision for 2023-24. Information on Revenue expenditure, Interest payments, Subsidies etc. from Centre and States for 2023-24 are used for estimating Government Final Consumption Expenditure (GFCE).
- 10. Improved data coverage, actual performance of various indicators, actual tax collections and expenditure incurred on subsidies in the following months and revision in input data made by source agencies will have a bearing on subsequent revisions of these estimates. Estimates are, therefore, likely to undergo revisions for the aforesaid causes in due course, as per the release calendar. Users should take these into consideration while interpreting the figures.
- 11. The next release of quarterly GDP estimates for the quarter January-March, 2024 (Q4 2023-24) and Provisional Estimates of National Income for the year 2023-24 will be on 31<sup>st</sup> May, 2024.

8. The growth rates of Primary sector (comprising Agriculture, Livestock, Forestry, Fishing and Mining & Quarrying), Secondary sector (comprising Manufacturing, Electricity, Gas, Water Supply & Other Utility Services, and Construction) and Tertiary sector (Services) have been estimated as 4.4 per cent, 2.1 per cent and 10.0 per cent respectively in 2022-23 as against growth rates of 4.8 per cent, 12.7 per cent and 9.2 per cent respectively in the previous years. The growth in real GVA during 2022-23 is on account of growth in 'Electricity, Gas, Water Supply & Other Utility Services', 'Construction', 'Trade, repair, Hotels and Restaurants', 'Transport, Storage and Communication & Services related to Broadcasting', 'Financial Services', 'Real Estate, Ownership of Dwelling & Professional Services' and 'Other services' as may be seen from Statement 4.2B. #### REMARKS ON THE FORMULAE

(i) Production taxes or subsidies are paid or received with relation to production and are independent of the volume of actual production. Some examples are:

Production Taxes - Land Revenues, Stamps & Registration fees and Tax on profession Production Subsidies - Subsidies to Railways, Subsidies to village and small industries.

(ii) Product taxes or subsidies are paid or received on per unit of product. Some examples are:

Product Taxes- Goods & Services Tax, Excise duties, Sales tax, Service Tax and Import, Export duties

Product Subsidies- Food, Petroleum and fertilizer subsidies.

- (iii) Other Current Transfers refers to current transfers other than the primary incomes.
- (iv) Gross Capital Formation (GCF) at the current as well as the constant prices is estimated by two approaches: (i) through flow of funds, derived as Gross Saving plus net capital flow from Rest of the World (RoW); and (ii) by the commodity flow approach, derived by the type of assets.
