

Partnerships and Opportunities to Strengthen and Harmonize Actions for Nutrition in India

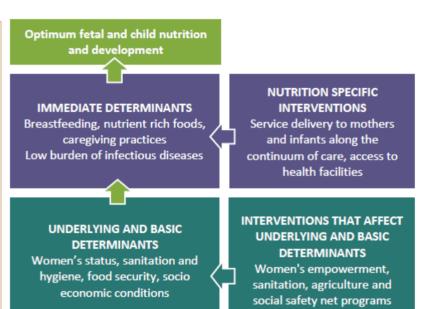

## Data Note

### No. 49 | SEPTEMBER 2021

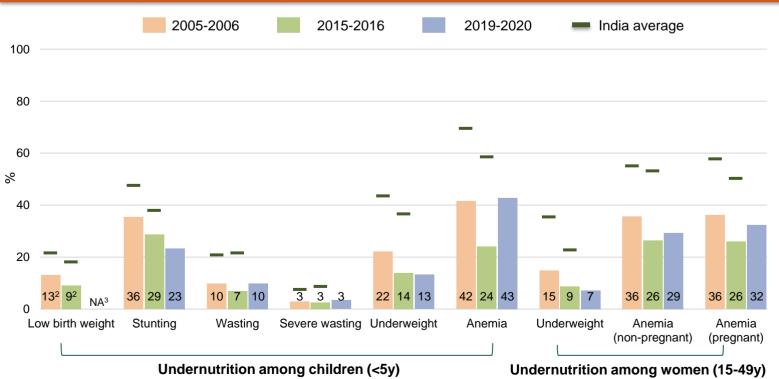

### **State Nutrition Profile: Manipur**

#### **ABOUT THIS DATA NOTE**

This Data Note describes the trends for a set of key nutrition and health outcomes, determinants, and coverage of interventions. The findings here are based on data from the National Family Health Survey (NFHS) 3 (2005-2006), 4 (2015-2016), and 5 (2019-2020). In addition to standard prevalence-based analyses, this Data Note includes headcount-based analyses aligned to the POSHAN Abhiyaan monitoring framework and uses data from NFHS-5 to provide evidence that helps identify priority districts and number of districts in the state with public health concern as per the WHO guidelines.<sup>1</sup> The Data Note includes a color-coded dashboard to compare the coverage of nutrition interventions across all the districts in the state. It concludes with key takeaways for children, women, and men and identifies areas where the state has potential to improve.

# Figure 1. Trends in undernutrition outcomes 2005-2006, 2015-2016, 2019-2020

#### Source: NFHS-3 (2005-2006), NFHS-4 (2015-2016), & NFHS-5 state factsheets (2019-2020). Note: Adult nutrition outcomes are based on the woman dataset, while child nutrition outcomes are based on all child data.

<sup>1</sup>WHO. Nutrition Landscape Information System (NLiS). Help Topic: Malnutrition in children. Stunting, wasting, overweight, and underweight.

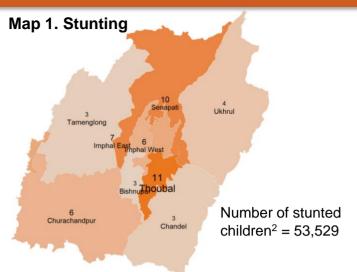

(https://apps.who.int/nutrition/landscape/help.aspx?menu=0&helpid=391&lang=EN).

<sup>2</sup>In NFHS-3, 51.9% of data was missing, while 32.7% of data was missing in NFHS-4.

<sup>3</sup>NA refers to the unavailability of data for a particular indicator in the specified NFHS round.

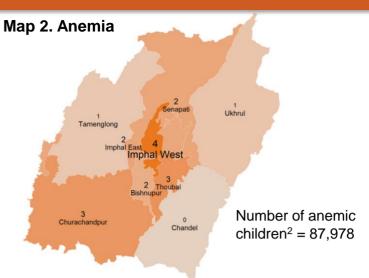

### MANIPUR

### Map 1 & 2. Number of stunted & anemic children <5y, 2019-2020

	3	Imphal West	1,185		
5 Imphal Fact 88	4	Thoubal	1,053		
	5	Imphal East	883		

No. of districts with public health concern<sup>1</sup>: 9 of 9

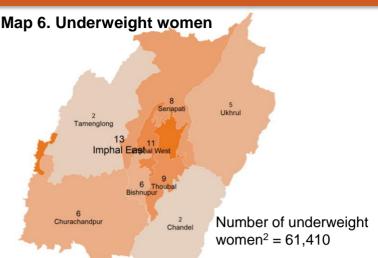

Source: IFPRI estimates - The headcount was calculated as the product of the undernutrition prevalence and the total eligible projected population for each district in 2019. Prevalence estimates were obtained from NFHS-5 (2019-2020; all child data) and projected population for 2019 was estimated using Census 2011. <sup>1</sup>Public health concern is defined as  $\geq$ 20% for stunting,  $\geq$ 40% for anemia,  $\geq$ 10% for wasting, and  $\geq$ 2% for severe wasting (WHO 2011). <sup>2</sup>The total number of children <5 years is 226,519.

No. of districts with public health concern <sup>1</sup> : 0 of 9						

### Map 7 & 8. Number of anemic women (15-49y), 2019-2020

Source: IFPRI estimates - The headcount was calculated as the product of the undernutrition prevalence and the total eligible projected population for each district in 2019. Prevalence estimates were obtained from NFHS-5 (2019-2020; all child/woman data) and projected population for 2019 was estimated using Census 2011. <sup>1</sup>Public health concern is defined as  $\geq$ 20% for underweight (children),  $\geq$ 10% for underweight (women),  $\geq$ 40% for anemia among non-pregnant women, and  $\geq$ 40% for anemia among pregnant women (WHO 2011). <sup>2</sup>The total number of children <5 years is 226,519, pregnant women 15-49 years is 57,412, and non-pregnant women 15-49 years is 839,588.

## Figure 2. Trends in overweight/obesity & NCDs<sup>1</sup> 2005-2006, 2015-2016, 2019-2020

## Table 1. Overweight/obesity & NCDs<sup>1</sup> at district-level 2015-2016, 2019-2020

Category	Outcomes	Worst performing districts (pp) <sup>5</sup>	Best performing districts (pp) <sup>5</sup>	Highest burden districts (thousands) <sup>2</sup>	No of districts with public health concern <sup>3</sup> (total=38)
		Difference between (2019-2020) & (2015- 2016)	Difference between (2019-2020) & (2015- 2016)	2019-2020	2019-2020
Children <5 years	Overweight/ obesity	Chandel: +3.5 Thoubal: +1.4	Tamenglong: -4.2 Ukhrul: -3	Senapati: 2 Thoubal: 2	0
	Overweight/ obesity	Bishnupur: +16.4 Tamenglong: +12	Not applicable	Imphal W⁴.:62 Imphal E⁴.: 58	8
Women (15-49 years)	High blood pressure	Thoubal: +8.9 Tamenglong: +8.4	Not applicable	Imphal W4: 37 Senapati: 27	5
	High blood sugar	Tamenglong: +1.3	Chura'pur⁴: -4 Ukhrul: -2.7	Imphal W.⁴:13 Imphal E⁴.: 11	0
Overweight /obesity Data not available at district level					
Men (15-54 years)	High blood pressure	Chandel: +12.6 Imphal W. <sup>4</sup> : +9.6	Not applicable	Imphal W⁴.: 59 Imphal E⁴.:47	9
	High blood sugar	Tamenglong: +1.9	Chura'pur⁴: -14.8 Bishnupur: -6.7	Imphal W⁴.:15 Imphal E⁴.: 12	0

Source: NFHS-3 (2005-2006), NFHS-4 (2015-2016), and NFHS-5 state and district factsheets (2019-2020). pp: percentage points.

Note: Adult nutrition outcomes are based on the woman/man dataset, while child nutrition outcomes are based on all child data.

<sup>1</sup>NCDs : non-communicable diseases

<sup>2</sup>Burden: The headcount was calculated as the product of the prevalence and the total eligible projected population for each district in 2019. Prevalence estimates were obtained from NFHS-5 (2019-2020) and projected population for 2019 was estimated using Census 2011.

<sup>3</sup>Public health concern is defined as prevalence ≥15% for overweight/obesity (children), ≥20% for overweight/obesity (women and men), ≥20% high blood pressure (women and men), and ≥20% high sugar (women and men) (WHO 2011).

<sup>4</sup>District codes: Chura'pur: Churachandpur; Imphal W: Imphal West; Imphal E: Imphal East.

<sup>5</sup>The difference is calculated only between districts that are comparable between 2015-2016 and 2019-2020. All districts in Manipur are comparable across periods.

# Figure 3. Trends in immediate determinants (%) 2005-2006, 2015-2016, 2019-2020

Diseases	Diarrhea in the last two weeks <sup>0</sup>	Imphal E. <sup>2</sup> : +7.9 Bishnupur: +3.2	Imphal W <sup>2</sup> .: -7.7 Thoubal: -4.5	Ukhrul: 2.1 Imphal W <sup>2</sup> : 2.3
	ARI in the last two weeks <sup>0</sup>	Bishnupur: +1.1 Chura'pur²: +0.7	Thoubal: -1 Imphal W.²: -0.3	Thoubal: 1.1 Chandel: 1.2

Source: NFHS-3 (2005-2006), NFHS-4 (2015-2016), and NFHS-5 state and district factsheets (2019-2020). pp: percentage points.

Note: Immediate determinants are based on the last child data; data on continued breastfeeding at 2 years, egg and/or flesh foods consumption, sweet beverage consumption, and bottle feeding of infants not available in NFHS-5 factsheets (2019-20)/state report

<sup>0</sup>Indicator definition differs slightly between NFHS-4 and NFHS-5.

<sup>1</sup>For all indicators, top coverage districts refer to the districts with the highest prevalence in immediate determinants, except for women with a BMI of 18.5 kg/m2, diarrhea in the last two weeks, and ARI in the last two weeks, for which it refers to the districts with the lowest prevalence in coverage.

<sup>2</sup>District codes: Chura'pur: Churachandpur; Imphal E.: Imphal East; Imphal W.: Imphal West.

<sup>3</sup>The difference is calculated only between districts that are comparable between 2015-2016 and 2019-2020. All districts in Manipur are comparable across periods.

Source: NFHS-3 (2005-2006), NFHS-4 (2015-2016) & NFHS-5 state factsheets and state reports (2019-2020).

<sup>0</sup>Indicator comparable between NFHS-3 and NFHS-4 but differs slightly from NFHS-5.

Note 1 : Interventions' coverage is based on the last child data.

Note 2: The following information is not available in the NFHS-5 factsheets and state reports (2019-20): receipt of at least one ANC visit, birth preparedness counselling, malaria prevention and food supplementation (6-35m). Information on use of bed nets during pregnancy is not available in NFHS-3 data (2006). Note 3: Data on food supplementation and health and nutrition education during pregnancy and post-natal care, and weight measurement during childhood and counselling on child growth for 2019-2020 are taken from NFHS-5 state reports.

Note 4: Refer to district dashboard for the inter-district variability in the coverage of interventions.

### Key takeaways

**Children:** Stunting and underweight prevalence declined by 7 percentage points (pp) and 8pp, respectively, from 2006 to 2016; stunting continued to decline by 6pp from 2016 to 2020 while underweight remained stable. Wasting declined by 3pp from 2006 to 2016 but increased by 3pp from 2016 to 2020. Anemia declined by 18pp from 2006 to 2016 but increased by 19pp from 2016 to 2020. Overweight/obesity was low (3-4%) and remained stable from 2006 to 2020. **Women**: Underweight declined by 6pp from 2006 to 2016 and continued to decline by 2pp from 2016 to 2020. Anemia among non-pregnant and pregnant women declined by 10pp from 2006 to 2016 but increased by 3pp and 6pp, respectively, from 2016 to 2020. Overweight/obesity increased by 13pp from 2006 to 2016 and continued to increase by 3pp and 6pp, respectively, from 2016 to 2020. Overweight/obesity increased by 13pp from 2006 to 2016 and continued to increase by 8pp between 2016 and 2020.

**Men:** Overweight/obesity increased by 12pp from 2006 to 2016 and continued to increase by 9pp from 2016 to 2020. **Attention is needed to improve** (%s in 2020):

- **Outcomes**: Anemia in children (43%) and women (~30%); overweight in women (34%) and men (30%)
- Immediate determinants: Early initiation of breastfeeding (54%); adequate diet (20%); 100+ IFA (52%)
- Underlying determinants: Women with ≥10 years education (48%)
- **Coverage of interventions:** Food supplementation (27-33%); health and nutrition education for women (2-3%); careseeking for ARI (41%); zinc during diarrhea (26%); weighing (9%); counselling on child growth (20%)

Source: NFHS-3 (2005-2006), NFHS-4 (2015-2016), and NFHS-5 state and district factsheets (2019-2020). pp: percentage points. Note: Interventions' coverage are based on the last child data. <sup>0</sup>Indicator definition differs slightly between NFHS-4 and NFHS-5. <sup>1</sup>Prevalence did not increase in any of the districts. <sup>2</sup>District codes: Imphal W:: Imphal West; Imphal E.: Imphal East. <sup>3</sup>The difference is calculated only between districts that are comparable between 2015-2016 and 2019-2020. All districts in Manipur are comparable across periods.

### Indicator definition

Nutrition outcomes	Definition
_ow birth weight	Percentage of live births in the five years preceding the survey with a reported birth weight less than 2.5 kg, based or either a written record or the mother's recall
Stunting among children	Percentage of children aged 0-59 months who are stunted i.e., height-for-age z score < -2SD
Vasting among children	Percentage of children aged 0-59 months who are wasted i.e., weight-for-height z score < -2SD
Severe wasting among children	Percentage of children aged 0-59 months who are wasted i.e., weight-for-height z score < -3SD
Jnderweight children	Percentage of children aged 0-59 months who are underweight i.e., weight-for-age z score < -2SD
Anemia among children	Percentage of children aged 6-59 months who are anemic i.e., (Hb <11.0 g/dl)
Jnderweight women	Percentage of women aged 15-49 whose Body Mass Index (BMI) is below normal (BMI <18.5 kg/m2)
Anemia among non-pregnant vomen	Percentage of non-pregnant women aged 15-49 who are anemic (<12.0 g/dl)
Anemia among pregnant women	Percentage of pregnant women aged 15-49 who are anemic (<11.0 g/dl)
Overweight/obesity - children	Percentage of children aged 0-59 months who are overweight i.e., weight-for-height z score > 2SD
Overweight/obesity - women	Percentage of men aged 15-54 who are overweight or obese (BMI ≥25.0 kg/m2)
Overweight/obesity - men	Percentage of men aged 15-54 who are overweight or obese (BMI ≥25.0 kg/m2)
High blood pressure among women^	Percentage of women aged 15-49 with elevated blood pressure (Systolic >140 mm Hg or diastolic >90 mm Hg)
High blood pressure among men^	Percentage of men aged 15-54 with elevated blood pressure (Systolic >140 mm Hg or diastolic >90 mm Hg)
High sugar level among women^	Percentage of women aged 15-49 with elevated blood pressure (Systolic >140 mm Hg or diastolic >90 mm Hg)
High sugar level among men^	Percentage of men aged 15-54 with high blood sugar levels (141-160 mg/dl)
mmediate determinants	
Early initiation of breastfeeding	Percentage of children under aged 3 years breastfed within one hour of birth for the last child born in the 3 years before the survey
Exclusive breastfeeding	Percentage of youngest children under age 6 months living with mother who were exclusively breastfed
Timely introduction of	<sup>1</sup> Percentage of youngest children aged 6-8 months living with mother who received solid or semi-solid food during the
complementary foods <sup>0</sup>	previous day; <sup>2</sup> Percentage of youngest children aged 6-8 months living with mother who received solid or semi-solic food and breastmilk
Continued breastfeeding at 2 years <sup>\$</sup>	Percentage of youngest children 12–23 months of age who were fed breast milk during the previous day
Adequate diet	Percentage of youngest children 6–23 months of age who consumed a minimum acceptable diet during the previous day
Eggs and/or flesh foods consumption\$	Percentage of youngest children 6-23 months of age who consumed egg and/or flesh food during the previous day
Sweet beverage <sup>\$</sup>	Percentage of youngest children 6-23 months of age who consumed a sweet beverage during the previous day
Bottle feeding for infants <sup>\$</sup>	Percentage of youngest children 0-23 months of age who were fed from a bottle with a nipple during the previous d
Women with body mass index <18.5 kg/m <sup>20</sup>	<sup>1</sup> Percentage of women aged 15-49 with a youngest child < 5 years who have BMI below normal (BMI <18.5 kg/m2) <sup>2</sup> Percentage of women aged 15-49 whose BMI is below normal (BMI <18.5 kg/m <sup>2</sup> )
Consumed IFA 100+ days	Percentage of mothers aged 15-49 who consumed iron folic acid for 100 days or more during the last pregnancy in last five years preceding the survey
Diarrhea in the last two weeks <sup>0</sup>	<sup>1</sup> Percentage of youngest children under age five who had diarrhea in the two weeks preceding the survey; <sup>2</sup> Percentage of children under age 5 who had diarrhea in the 2 weeks preceding the survey
ARI in the last two weeks <sup>0</sup>	<sup>1</sup> Percentage of youngest children under age five who had symptoms of acute respiratory infection (ARI) in the two weeks preceding the survey; <sup>2</sup> Percentage of children under age five who had symptoms of acute respiratory infection (ARI) in the two weeks preceding the survey
Underlying determinants	
Women who are literate <sup>0</sup>	<sup>1</sup> Percentage of women aged 15-49 with a birth in five years preceding the survey who are literate i.e., those who completed standard 6 or higher and can read a whole sentence; <sup>2</sup> Percentage of women aged 15-49 who are literat i.e., those who completed standard 9 or higher and can read a whole sentence or part of a sentence.
Women with ≥10 years education <sup>0</sup>	<sup>1</sup> Percentage of women aged 15-49 with a birth in five years preceding the survey with 10 or more years of schoolin <sup>2</sup> Percentage of women aged 15-49 with 10 or more years of schooling
Girls 20-24 years married before age of 18 years <sup>0</sup>	<sup>1</sup> Percentage of women aged 20-24 years with a birth in five years preceding the survey who were married before ag 18 years; <sup>2</sup> Percentage of women aged 20-24 years who were married before age 18 years
Women 15-19 years with child or pregnant	Percentage of currently married women aged 15-49 who had their first birth before age 20 years and in the five year preceding the survey
HHs with improved drinking water source <sup>0</sup>	<sup>1</sup> Percentage of youngest children under age 5 living in household that use an improved source of drinking water; <sup>2</sup> Population living in households that use an improved sanitation facility
HHs with improved sanitation	<sup>1</sup> Percentage of youngest children under age 5 living in household that uses improved toilet facility; <sup>2</sup> Population living in households that use an improved sanitation facility
facility <sup>0</sup> HHs with hand washing facility/%	
HHs with hand washing facility <sup>^\$</sup> Open defecation <sup>®</sup>	Percentage of youngest children under age 5 living in household that had soap and water for washing hands Percentage of youngest children under age 5 living in household that has no toilet facility/defecates in open
Safe disposal of feces <sup>\$</sup>	Percentage of youngest children living with mother whose stools were disposed of safely
HHs with BPL card <sup>®</sup>	Percentage of youngest children under age 5 living in households with BPL card
	<sup>1</sup> Percentage of youngest children under age 5 living in household that has electricity; <sup>2</sup> Population living in household
HHs with electricity <sup>0</sup>	reicentage of youngest children under age 5 hving in nousenoid that has electricity. Fobulation hving in nousenoid

<sup>^</sup> Indicator not available in NFHS-3. <sup>\$</sup> Indicator not available in NFHS-5 factsheets/state reports <sup>0</sup>Indicator comparable between NFHS-3 and NFHS-4 but differs slightly from NFHS-5. <sup>®</sup> Indicator not available in NFHS-5 factsheets but available in NFHS-5 states reports. <sup>1</sup> Definition per NFHS-3/NFHS-4. <sup>2</sup> Definition as per NFHS-5 factsheet.

### Indicator definition

Interventions	Definition
Demand for FP satisfied <sup>®</sup>	Percentage of currently married women aged 15-49 with demand for family planning satisfied by modern methods
lodized salt <sup>0</sup>	<sup>1</sup> Percentage of women aged 15-49 living in HHs that use iodized salt; <sup>2</sup> Percentage of households using iodized salt
Any ANC visits <sup>\$</sup>	Percentage of women aged 15-49 with a live birth in the five years who received at least one ANC for the last birth
ANC first trimester	Percentage of women (15-49 years of age) attended by any provider during the first trimester of pregnancy that led to
	the birth of the youngest child in the last 2 years
≥ 4ANC	Percentage of mothers aged 15-49 who had at least 4 antenatal care visits for last birth in the 5 years before the
Received MCP card	survey Percentage of mothers who registered last pregnancy in the 5 years preceding the survey for which she received a
Received MCF card	Mother and Child Protection (MCP) card
Received IFA tab/syrup@	Percentage of women who received IFA (given or purchased) tablets during the pregnancy for their most recent live
	birth in the 5 years preceding the survey
Tetanus injection	Percentage of women whose last birth was protected against neonatal tetanus (for last birth in the five years
	preceding the survey )
Deworming- pregnancy <sup>@</sup>	Percentage of women who took an intestinal parasite drug during the pregnancy for their most recent live birth in the
	5 years preceding the survey
Weighing- pregnancy <sup>@</sup>	Percentage of women aged 15-49 with a live birth in the five years preceding the survey who were weighed during
	ANC for the last birth
Birth preparedness counselling <sup>\$</sup>	Percentage of women who had at least one contact with a health worker in the three months preceding the survey
	and were counselled on birth preparedness; calculated among women aged 15-49 who gave birth in the five years
Proportfooding opuppolling@	preceding the survey
Breastfeeding counselling <sup>@</sup>	Percentage of women who met with a community health worker in the last three months of pregnancy and received advice on breastfeeding (for the last pregnancy in the five years preceding the survey)
Counselling on keeping baby	Percentage of women who met with a community health worker in the last three months of pregnancy and received
warm <sup>@</sup>	advice on keeping the baby warm for their most recent live birth in the five years preceding the survey
Cord care counselling <sup>^@</sup>	Percentage of women who met with a community health worker in the last three months of pregnancy and received
	advice on cord care for their most recent live birth in the five years preceding the survey
Food supplementation -	<sup>1</sup> Percentage of youngest children under age 5 whose mother received supplementary food from AWC during
pregnancy <sup>@</sup>	pregnancy; <sup>3</sup> Among children under 6 years, percentage whose mother received specific benefits from AWC during
	pregnancy: supplementary food
Health & nutrition education –	<sup>1</sup> Percentage of mothers who received health and nutrition education from an Anganwadi Centre (AWC) during last
pregnancy®	pregnancy in the five years preceding the survey; <sup>3</sup> Among children under 6 years, percentage whose mother received
	specific benefits from AWC during pregnancy: health and nutrition education
Malaria prevention- use of bed	Percentage of women who used mosquito net during the pregnancy for their most recent live birth in the 5 years
nets <sup>^\$</sup>	preceding the survey
Institutional birth <sup>0</sup>	<sup>1</sup> Percentage of women aged 15-49 who gave birth in health/institutional facility for their most recent live birth in the 5
	years preceding the survey; <sup>2</sup> Percentage of live births to women aged 15-49 in the five years preceding the survey that took place in a health/institutional facility
Financial assistance (JSY) <sup>@</sup>	Percentage of women who received financial assistance under JSY for their most recent live birth that took place in
	institutional facility in the 5 years preceding the survey
Skilled birth attendant <sup>0</sup>	<sup>1</sup> Percentage of women whose last delivery was attended by a skilled health personnel for their most recent live birth
	in the 5 years preceding the survey; <sup>2</sup> Percentage of births attended by skilled health personnel for births in the 5
	years before the survey
Postnatal care for mothers	Percentage of mothers who received postnatal care from a doctor/nurse/LHV/ANM/midwife/other health personnel
	within 2 days of delivery for their most recent live birth in the five years preceding the survey
Postnatal care for babies	Percentage of children who received postnatal care from a doctor /nurse /LHV /ANM /midwife /other health personnel
	within 2 days of delivery for last birth in the 5 years before the survey
Food supplementation – postnatal <sup>®</sup>	<sup>1</sup> Percentage of youngest children under age 5 whose mother received supplementary food from AWC while
	breastfeeding; <sup>3</sup> Among children under 6 years, percentage whose mother received specific benefits from AWC while
Legith 9 putrition advantion	breastfeeding: supplementary food
Health & nutrition education – postnatal <sup>®</sup>	<sup>1</sup> Percentage of youngest children under age 5 whose mother received health check-ups from AWC while breastfeeding; <sup>3</sup> Among children under 6 years, percentage whose mother received specific benefits from AWC while
postnatal	breastfeeding: health and nutrition education
Full immunization <sup>0</sup>	<sup>1</sup> Percentage of youngest living children aged 12-23 months fully vaccinated based on information from either
	vaccination card or mother's recall; <sup>2</sup> Percentage of children aged 12-23 months fully vaccinated based on information
	from either vaccination card or mother's recall
Vitamin A – early childhood <sup>0</sup>	<sup>1</sup> Percentage of youngest children aged 6-59 months who received Vitamin A supplementation in the last 6 months
-	preceding the survey; 2 Percentage of children aged 9-35 months who received a vitamin A dose in the last 6 months
Pediatric IFA <sup>0@</sup>	Percentage of youngest children aged 6-59 months who received iron supplements in the past 7 days preceding the
	survey
Deworming – early childhood <sup>0@</sup>	Percentage of youngest children aged 6-59 months who received deworming tablets in the last 6 months preceding
	the survey
Care seeking for ARI <sup>0</sup>	<sup>1</sup> Percentage of youngest children under age 5 years with fever or symptoms of ARI in the 2 weeks preceding the
	survey taken to a health facility or health provider; <sup>2</sup> Percentage of children under age 5 years with fever or symptoms of ARI in the 2 weeks preceding the survey taken to a health facility or health provider
ORS during diarrhea <sup>0</sup>	<sup>1</sup> Percentage of youngest children under age 5 years with diarrhea in the 2 weeks preceding the survey who received
	oral rehydration salts (ORS); 2Percentage of children under age 5 years with diarrhea in the 2 weeks preceding the
	survey who ORS
Zinc during diarrhea <sup>0</sup>	<sup>1</sup> Percentage of youngest children under age 5 years with diarrhea in the 2 weeks preceding the survey who
<b>U</b> - <sup>1</sup>	received zinc; <sup>2</sup> Percentage of children under age 5 years with diarrhea in the 2 weeks preceding the survey who
	received zinc
Food supplementation (children 6-	Percentage of youngest children aged 6-35 months who received food supplements from AWC in the 12 months
35 months) <sup>\$</sup>	preceding the survey
Weighing – early childhood®	Percentage of youngest children under age 5 who were weighed at AWC in the 12 months preceding the survey
Counselling on child growth <sup>@</sup>	Percentage of youngest children under age 5 whose mother received counselling from an AWC after child was
	weighed in the 12 months preceding the survey

<sup>^</sup> Indicator not available in NFHS-3. <sup>\$</sup>Indicator not available in NFHS-5 factsheets/state reports. <sup>@</sup>Indicator not available in NFHS-5 factsheets but available in NFHS-5 states reports. <sup>0</sup>Indicator comparable between NFHS-3 and NFHS-4 but differs slightly from NFHS-5. <sup>1</sup>Definition per NFHS-4. <sup>2</sup>Definition as per NFHS-5 factsheet. <sup>3</sup>Definition as per NFHS-5 state reports.

#### **ABOUT POSHAN**

Partnerships and Opportunities to Strengthen and Harmonize Actions for Nutrition in India (POSHAN) is a multi-year initiative that aims to support the use of data and evidence in decision-making for nutrition in India. It is supported by the Bill & Melinda Gates Foundation and led by IFPRI in India. http://poshan.ifpri.info/

#### **ABOUT DATA NOTES**

POSHAN Data Notes focus on data visualization to highlight geographic and/or thematic issues related to nutrition in India. They draw on multiple sources of publically available data.
