## **PREFACE**

The Report on 'Fifth Economic Census in Delhi' is prepared on the basis of the data collected during May-July 2005 under the plan scheme totally financed by Central Statistical Organisation, Dept. of Statistics, Govt. of India. This report is Fifth of its kind in a row brought out by this Directorate. The huge task of conduct of Fifth Economic Census was undertaken independently by DES like the Fourth Economic Census.

The report contains information on the total number of entrepreneurial units in agriculture (excluding crop production and plantation) & non-agriculture in Delhi and the total number of persons usually working in them. The special feature of this report is that data is presented district-wise for the first time. In other words, the report provides useful data on some of the important numerical indicators of economic growth in the economy of Delhi. Detailed information on various characteristics of the entrepreneurial activities viz. location, nature of operation, registration particulars, sources of finance etc. are also presented in the report. The data generated under the Fifth Economic Census is expected to provide necessary frame for the launching of follow-up socio-economic surveys on different sub-sectors of unorganised non-agricultural sector. It is also likely to provide guidance to the planners/administrators in devising schemes and programmes for development.

The report was prepared by the Economic Census Unit of this Directorate. The fieldwork was conducted by unemployed youth/students, teachers of MCD/NDMC/Delhi Government and employees of Govt. of NCT of Delhi. Data processing work was done by Registrar General of India, New Delhi Office. The special efforts put in by Sh. K.S. Bansal, System Analyst and Sh. Sabir Ali, Statistical Officer deserves special appreciation. The untiring efforts made by Sh. M.W. Deshkar, Statistical Assistant in the preparation of the report deserves commendation. This Directorate is grateful to the households and entrepreneurs who have made this economic census a success by providing required data. The valuable guidance provided by the officers and other functionaries of Economic Census Division, Central Statistical Organization, Ministry of Statistics & Programme Implementation, Government of India is acknowledged.

# **EXECUTIVE SUMMARY**

# **FIFTH ECONOMIC CENSUS IN DELHI**

## **EXECUTIVE SUMMARY**

The following are the main highlights of the Fifth Economic Census held in Delhi during 2005.

### **1. NUMBER OF ESTABLISHMENTS**

- ❑ Delhi was ranked **16<sup>th</sup>** in all India ranking (based on the results of only 35 states & UTs) in respect of number of establishments contributing about 1.80% of the total establishments in India.
- ❑ The total No. of establishments found to be operating during 2005 in the geographical boundaries of NCT of Delhi stood at **757743**.
- ❑ Out of them 754453 (99.57%) establishments were non-agricultural and rest of the 3290 (0.43%) establishments were agricultural in nature.
- ❑ Number of establishments have registered a growth rate of 1.50% as their number has increased from 685852 in 1998 to 757743 in 2005.

- ❑ Sector-wise break-up revealed that the rural areas accounted for only 3.48% of the total establishments and the rest 96.52% were in Urban areas.

## 2. **TYPE OF ESTABLISHMENTS**

- ❑ Distribution of establishments into own-account establishments (OAEs) and establishments (H) revealed that 3.14 lakhs (41%) were OAEs and 4.44 lakhs (59%) were establishments those were employing atleast one hired worker.
- ❑ The major economic activity group of 'Retail Trade' with 48.9% of share in total establishments ranked first followed by 'Manufacturing (including repair)' and 'Community, Social, Personal services & others' activities with 18.19% and 9.99% shared respectively.

## 3. **EMPLOYMENT IN ESTABLISHMENTS**

- ❑ Delhi was ranked 12<sup>th</sup> in all India ranking (based on the results of only 35 states & UTs) in respect of employment contributing about 3.61% of the total employment in India.
- ❑ The total Number of persons usually found to be working in the establishments were **3556387**. The average employment per establishment comes to 4.69 persons. Employment registered an annual growth rate of 0.23% between 1998-2005.

- ❑ Average employment of household establishments (OAE) comes to 1.22 persons and that of establishments with at least one hired worker, i.e Establishments (H) was 7.15 persons.
- ❑ Employment in the establishments of rural areas stood at 70063 (1.97%) and that of Urban areas was 3486324 (98.03%).
- ❑ Out of the total employment 3.82 lakh (10.74%) persons were engaged in Own Account Establishments and 31.74 lakh (89.26%) persons were working in establishments (H).
- ❑ Hired employment accounted for 75.25% (26.76 lakh persons) of the total employment.
- ❑ Composition of females in the total employment was 3.73 lakh (10.50%).
- ❑ Share of female workers in employment of agricultural establishments was 12.54%, while for non-agricultural establishments it was 10.49%.

- ❑ The density, i.e. Establishments per sq. km. was highest in Central District (3223) followed by North-East District (1625) and East District (1492).
- ❑ The major economic activity group “Retail Trade” is dominating more or less in all the Districts.

# **CHAPTER ONE**

## **INTRODUCTION**

## **CHAPTER ONE**

### **INTRODUCTION**

 he growing importance of informal sector in the process of economic development of the country like India need not be over emphasised. This sector with high degree of elasticity in employment generation is ideally suited for the populated country like India. This calls for collection and maintenance of structural data on this sector to assist the planners in devising relevant support programmes for their smooth and rapid progress.

The prolonged efforts of statisticians and planners in finding a way out for collection of information on this important and at the same time amorphous area of activity resulted in a decisive breakthrough with the advent of conduct of Economic Census. The Central Statistical Organisation accordingly conducted the first economic census in 1997 with the active co-operation of Dte. Of Economics & Statistics of concerned States/U.Ts. Subsequently this exercise was repeated in 1980, 1990 and 1998. The latest in the series namely Fifth Economic Census was conducted in 2005. The Fifth Economic Census in respect NCT of Delhi was conducted under the agies of Directorate of Economics & Statistics.

### **MEANING, SCOPE AND COVERAGE**

Economic Census may be taken to mean as the complete enumeration of entrepreneurial activities operating in the geographical boundaries of State/Country at a given point of time to come out with the official count of establishments and their characteristics.

The subject of coverage under the Fifth Economic Census briefly includes all types of entrepreneurial activities in the field of agriculture (except crop production and plantation) as well as non-agriculture. Entrepreneurial activities mean, all those economic activities dealing with the production and/or distribution of goods/services not solely for the purpose of own consumption.

To illustrate, a Tailor engaged in the tailoring activity and charges for the service is included and a housewife stitching the clothes of family members alone, as a part of her domestic work is excluded for the purpose of economic census.

The main agricultural activities covered under the Fifth Economic Census include livestock production, agricultural servicing, hunting, trapping, forestry, logging and fishing. Non-agricultural field of activity covered by the economic census operations includes Mining & Quarrying, manufacturing, electricity, gas & water supply, construction, trade, hotels & restaurants, transport, communication servicing, financial insurance, real estate, business services and community, social and personal services. The above said activities whether they are in household or institutional private or public were covered without exception.

### **ECONOMIC CENSUS IN PERSPECTIVE**

The first Economic Census was conducted in India in 1977. The coverage of the census was confined to non- agricultural establishments. The census did not cover own- account and agricultural establishments. The items of information collected from each establishment were its location, description of activity, total number and the number of hired persons usually working by gender, type of ownership, activity, power/fuel used for carrying out the activity, value of annual output/turn over/receipts mixed activity or not, registered/licensed/recognised or not, and

act/authority, if registered. In addition to the above, a schedule giving village amenities in rural areas was also canvassed. A mixed approach was followed for collection of requisite data. It was complete house listing in the entire urban area and in those villages (contiguous, compact and well identifiable area units) with a census population of more than 5000. In other smaller villages (i.e. villages with 5000 population or less), a village level enquiry was made to list establishments and they were later visited and establishment slips were canvassed, wherever warranted.

The second and third Economic Censuses were clubbed with the houslisting operations of population censuses conducted in 1980 and 1990 respectively keeping in view the operational convenience and cost effectiveness. These censuses had wider scope and coverage than that of the first one. Both own account establishments and establishments (H), agricultural and non-agricultural establishments were covered. The items on which information was collected under these economic censuses were more or less the same as those collected in the first economic census. However, based on the field problems faced and experience gained in the first Economic Census, the collection of information relating to value of output/turnover/receipts was dropped. Domestic workers engaged by household (maids) were also not included in the coverage of Economic Census. The same line of approach was adopted under the Fourth and Fifth Economic Census as well. New feature added during the Fifth Economic Census was canvassing of a separate "Address Slip" among the establishments employing 10 workers or more for compilation of a Directory of larger establishments.

## **ECONOMIC CENSUS : OBJECTIVES**

The main objectives behind the conduct of Economic Census are explained below:-

- i) The economic census which mainly gives head count of establishments, employment and other main characteristics in numerical terms and their growth over a period of time gives a measure of impact of policies of Government in this regard.
- ii) It provides area sample frame for follow-up surveys. The follow-up surveys give out data on size, region, distribution, employment, value added of each of non-agricultural sector. This will help bridge data gaps in the unorganised sector of the economy. The rationale behind the repetition of this exercise periodically is to update the database.

## **GEOGRAPHICAL COVERAGE**

The Fifth Economic Census was conducted in the rural as well as urban areas of Delhi without exception.

The unit of survey in rural areas was census village. Rural area consists of 165 villages. Census village refers to those areas classified and covered as villages during 2001 Population Census conducted by Registrar General of India (RGI).

Urban area of Delhi comprised of three statutory towns viz. Municipal Corporation of Delhi (MCD), New Delhi Municipal Committee (NDMC), Delhi Cantt and 59 census towns. Census towns may be taken to mean those villages with a population of 5000 and above and covered as urban areas during the Population Census 2001 by RGI. The unit of survey in these

urban areas was the block(s) carved out by National Sample Survey Organisation (NSSO), Field Operation Division (FOD) under the Urban Frame Survey (UFS). The total number of such blocks covered during the course of fieldwork of Fifth Economic Census in all the 62 towns and 165 villages taken together came to 21950.

Further, under the Fifth Economic Census, Delhi was divided in nine revenue district and data was collected district wise.

### ***METHODOLOGY***

*During the course of fieldwork, dual approach was adopted for covering the entrepreneurial activities. In respect of establishments operated with fixed premises, such units were covered at the place of their operation. On the other hand, economic activities that are carried out without any fixed premises or location were accounted at the respective households (residence). This was done to ensure the complete coverage of the activities without exception. The actual work of enumeration was done on house to house basis, covering the length and breadth of Delhi.*

The format of House list, Establishment List and Address Slip used during the Fifth Economic Census are annexed at the end of the report.

## **ECONOMIC CENSUS DATA LIMITATIONS**

The limitations of data generated under the Fifth Economic Census are discussed below, keeping in view, the interest of users of this data.

- i) Supply of information under economic census is purely voluntary and there is no statutory sanction behind it. Despite wide publicity through mass media some degree of non-co-operation on the part of informants is apprehended.
- ii) The method of collection of data under economic census is not record based information but only oral information provided by the informants. In this method under reporting of employment, unintended accuracy, recall lapse and casual approach on the part of the informants is likely to some extent.
- iii) It is widely known that entrepreneurial activities in the unorganised sector are subject to high degree of mobility and morbidity. However, its impact at the macro level may be very negligible.
- iv) Majority of field workers employed under the Fifth Economic Census in Delhi were unemployed youth/students who were totally new to such type of work. The limited availability of the services of school teachers, who are considered to be seasoned field workers for such type of enumeration work, was felt during the course of organisation of field work.

Despite the above limitations, the data collected under the Fifth Economic Census is expected to fulfil the needs of planners and other data users richly.

## **FIELD OPERATIONS AND DATA PROCESSING**

The fieldwork of Fifth Economic Census in Delhi was held during May-July 2005. Local unemployed youth/students were recruited on contract basis as enumerators and deployed for fieldwork after giving requisite training. Besides, services of a few teachers of MCD, NDMC and Delhi Government were also utilised in this huge task. Fieldwork was supervised by the officers belonging to statistical cadre of DES and other Delhi Government Offices. Fieldwork was conducted under most difficult circumstances because the weather conditions were unsuitable for smooth conduct of fieldwork during May-July months. Subsequently quick estimates were generated through manual tabulation of data from summary sheets. The coding work was handled by the staff of this Directorate. The data processing work was accomplished by the RGI Office, New Delhi through Intelligent Charter Recognition (ICR) Technology.

The foregoing chapters, namely II to V will give out the results of the Fifth Economic Census at a glance, results of agriculture sector, non-agriculture sector and district wise profile respectively with the help of summary statements and graphs. Detailed statistical tables are also added for further reference in Chapter VI.

## **CONCEPTS AND DEFINITIONS**

The concepts and definitions adopted during the Fifth Economic Census are explained in this section. In fact there is no change in these concepts and definitions when compared to those used at the time of fourth Economic Census held in 1998. However, in order to meet the international guidelines and to be at par with international concept new nomenclatures were adopted as follows-

- i) 'Enterprise' replaced by 'Establishment'
- ii) 'Own Account Enterprises' replaced by 'Own Account Establishment'; and
- iii) 'Establishment' replaced by 'Establishments with at least one hired worker'

### **Establishment**

An establishment is an undertaking engaged in production and/or distribution of goods and/or services not for the sole purpose of own consumption. The workers in an establishment may consist of members of the household or hired workers or both. The activity of the establishment may be carried out at one or more than one distinct location. The activity of the establishment may also be carried out only for a part of the year but on a fairly regular basis; i.e. it is in operation for the major part of the season/year. An establishment may be owned or operated by a single household or by several households jointly (on a partnership basis) or by an institutional body or by government.

In case where more than one entrepreneurial activity is carried on by the same person or by the same household but separate accounts are kept for each of these activities, they were treated as separate establishment. However, in case where the activities cannot be distinguished from one another, then only one establishment pertaining to the major activity was recorded and all items of information of all other minor activities were clubbed with that major activity.

### **Agricultural Establishment**

An Agricultural establishment for the purpose of Economic census is defined as one engaged in livestock production, agricultural services, hunting, trapping and game propagation, forestry & logging and fishing. Establishments engaged in activities pertaining to agricultural production and plantation were not covered under the Economic Census.

### **Non-Agricultural Establishment**

Establishments engaged in activities other than agricultural activities are termed as non-agricultural establishments.

### **Own Account Establishment**

An own account establishment (OAE) is an establishment having no hired worker and is owned and operated with the help of household members only.

### **Establishment with at least one hired worker [ Estt. (H) ]**

The another type of establishment are those engaged in economic activities with the assistance of atleast one hired worker on a fairly regular basis. Where “Establishments (H)” is used it shall be taken as “Establishment with having at lest one hired worker”.

### **Perennial/Seasonal Establishment**

An establishment which runs more or less regularly throughout the year, is termed as perennial establishment and the establishment which runs in a particular season only is termed as seasonal establishment. In case of persons/institutions engaged in different seasonal establishments in different parts of the year, not more than two such major establishments were taken into account during enumeration.

### **Establishment with premises and without premises**

Establishment operations in census house (or in front of a census house), was classified as with premises and on the other hand if the entrepreneurial activity is undertaken outside the census house (and cannot be linked to any census house) or by moving, it is termed as without premises.

### **Establishment by Type of Power/fuel Used**

Establishments have been classified according to the type of power used by them in its main process/activity. Use of power/fuel for lighting purpose is not relevant here. In this connection, use of manpower was treated as 'No Power Used'.

### **Private Non-Profit Establishment**

Establishments which are financed and controlled by households/Institutions and operated with 'No profit motto' were grouped under this head. Example: Temple, Dharamshala, Trusts etc.

### **Private Establishment**

Establishments owned and operated by a single or group of private persons or institutions with no participation of government, both in terms of management and share capital have been treated as private establishments. An establishment, simply because it has taken a loan from Government/Government agency, cannot be treated as a Government Establishment.

### **Government Establishment**

All establishments which are owned by Centre/State Government including Public sector undertaking, Local Bodies are considered as Government Establishments. Universities,

Educational Bodies and such similar Institutions, which are autonomous but are getting grants from Central/State/Local Governments, are included under this category.

**No. of Persons usually working**

It refers to all hired persons including paid/unpaid apprentice, salaried partners in case of partnership establishment, usually working on an average on a working day during the last year/last-working season in case of perennial and non-perennial establishments respectively. Persons receiving honorarium for the service rendered on fairly regular basis to the establishment were treated as hired workers. Likewise working members of the Co-operative Society who often manage the day-to-day work of the society were included in the hired workers category.

**CHAPTER TWO**

**RESULTS  
AT  
A  
GLANCE**

## CHAPTER TWO

### RESULTS AT A GLANCE

This chapter is devoted to the analysis of the main findings of the Fifth Economic Census held in Delhi. The raw data collected in respect of 165 villages and 62 towns (MCD, NDMC, Delhi Cant. & 59 Census Towns) was initially got tabulated and released in the form of quick estimates. Subsequently the raw data was scrutinised thoroughly to rectify the clerical and non-clerical errors and all the establishments were assigned appropriate codes as per National Industrial classification 2004. In this process some minor modifications have occurred in the final tally of results presented in this report when compared to the summary results released under quick estimates. On grouping all the entrepreneurial units under the broad sectors of the economy, namely Primary, Secondary and Tertiary, it was found that the final outcome was on expected lines as tertiary sector popularly known as Service Sector, was in the fore front both in the number of Establishments and Employment with 80.51% share in number of establishments and employment accounting for 64.30% share in the total no. of persons usually working. The main findings are discussed with the help of Tables, Graphs and wherever it is feasible, comparison with the earlier Economic Census data was also made to project the changes that had taken place between three economic census.

### DISTRIBUTION OF ESTABLISHMENTS

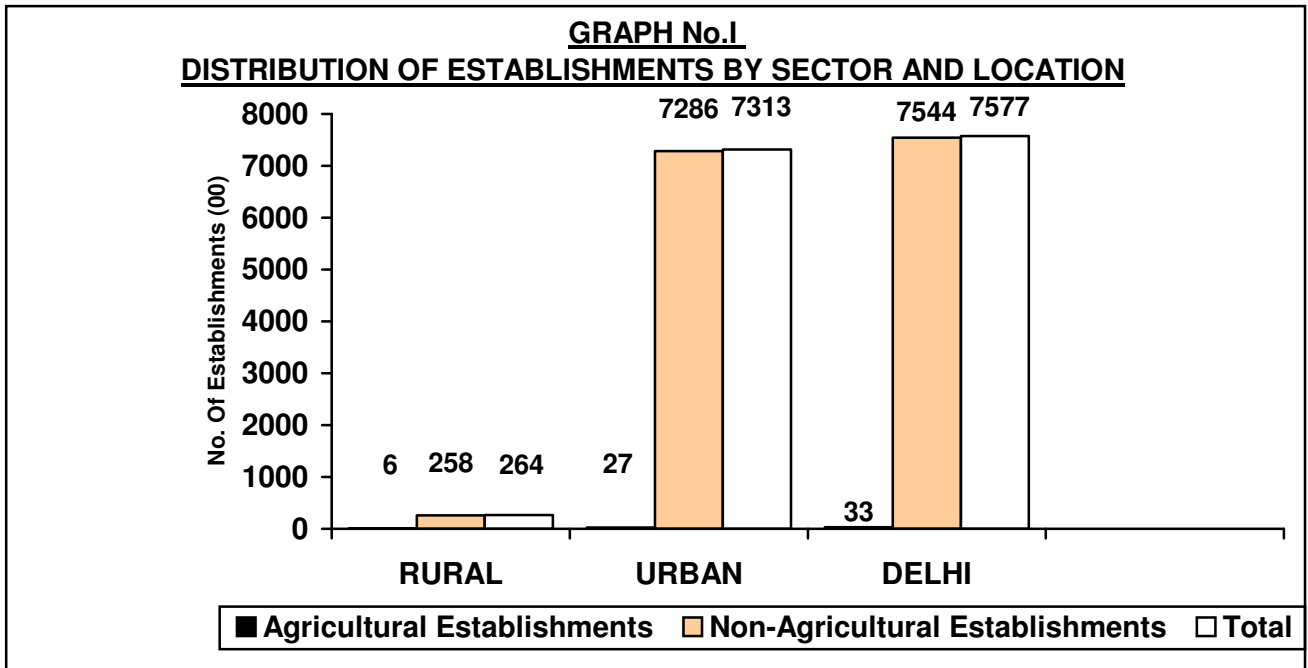

The final tally of establishments found to be operating in the geographical boundaries of NCT of Delhi during 2005 comes to **757743**. Out of them only 26380 (3.48%) were in rural areas and 731363 (96.52%) in urban areas. Break-up of establishments, as shown in Table No.2.1 in terms of agricultural and non-agricultural type revealed that 3290 (0.43%) belong to former category and 754453 (99.57%) to latter. In the rural areas out of total establishments 577 belong to agriculture and 25803 to non-agriculture.

Similar classification in respect of urban areas revealed that there were 2713 agricultural and 728650 non-agricultural establishments in this sector. Location-wise distribution of establishments is presented in Graph - I. The insignificance of rural areas in the context of number of establishments is clearly visible from the graph in which bars of rural are just trying to show up.

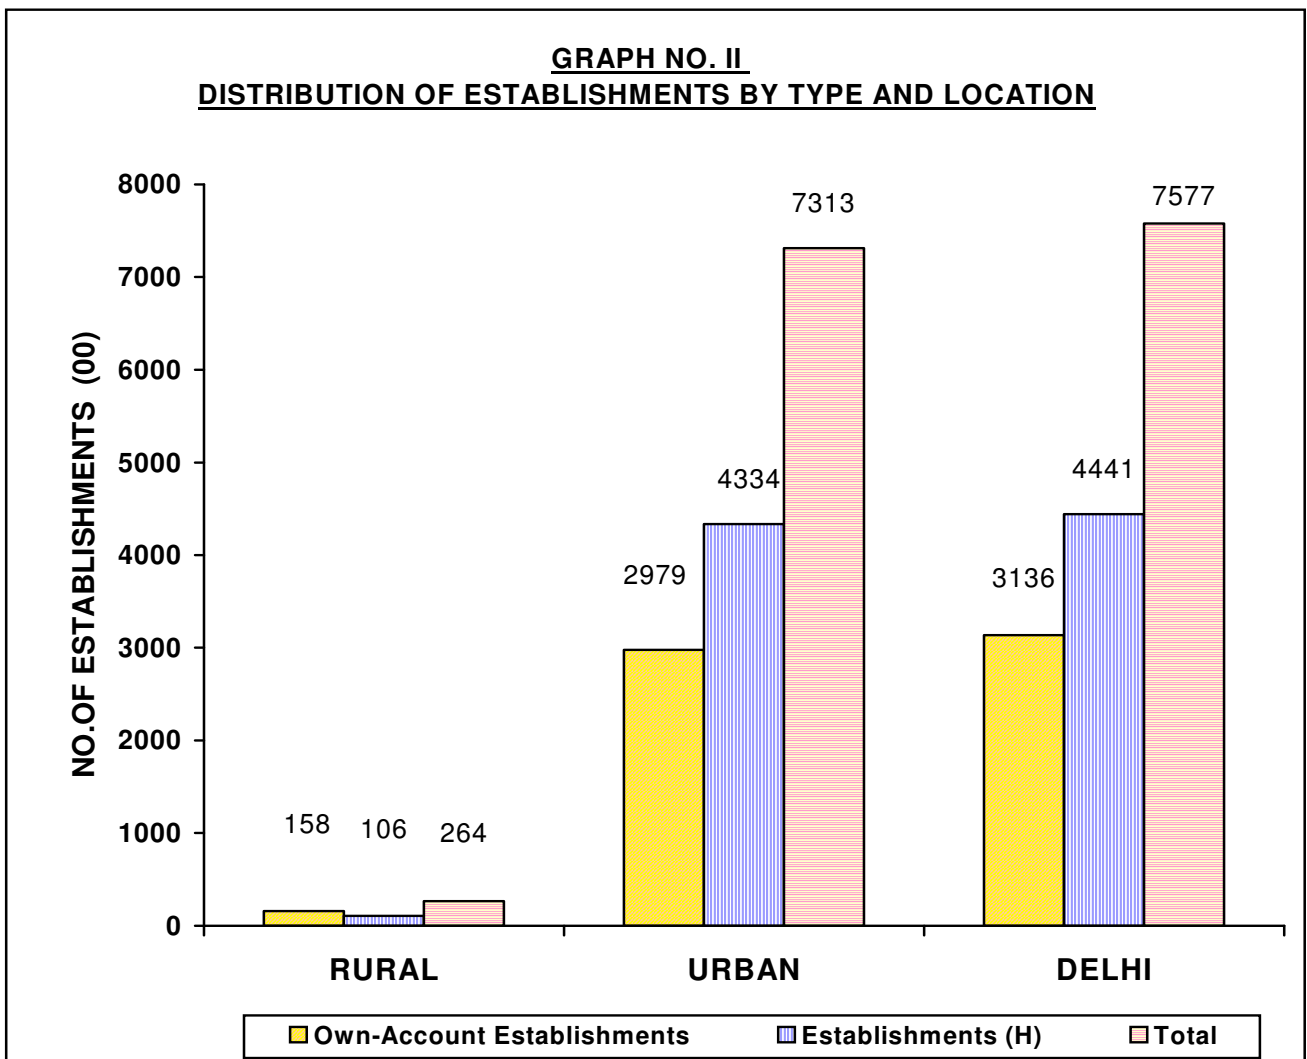

Establishments can be classified into two broad categories on the basis of nature of employment viz. Own-account establishments (OAEs) operated without hired worker and establishments run with at least one hired worker. Out of the total establishments 313666 (41%) were OAEs and 444077 (59%) were establishments (H).

Establishments (H) were further divided into non-directory establishments (NDE) and directory establishments (DE) on the basis of no. of workers employed. Accordingly, there were 336532 NDEs employing below 6 workers and 107545 directory establishments employing 6 or more workers. (Ref.: table No.2.2). There were 15744 own account establishments, and 10636 establishments (H) in rural Delhi whereas in urban they account for 297922 and 433441 number respectively. It is observed that the share of OAE's was 59.68% in rural when compared to that of 40.74% in urban. On the whole OAE's account for 41% whereas establishments (H) constitute 59% of the total establishments in Delhi. Distribution of establishments by type in Delhi is shown in Graph II. Classification of establishments in terms of own account establishments and establishments (H) had made it clear that their respective share in the total no. of establishments was more or less equal as they are separated by nine percentage points from the exact 50:50 mark. This is also reflected in the graph II as the bars representing own account establishments and establishments (H) are neck to neck to each other.

Sector wise and establishment type wise distribution of establishment by major economic activity groups is presented in Table 2.3. At the state level, economic activities in filed of 'Trade', 'Manufacturing' and 'Community, Social, Personal services & others' emerged as the first three major economic activities with the largest number of establishments (76.34%) in the same order.

In rural, 'Retail Trade' activity with 14135 (53.58%) establishments occupied the first place followed by 'Community, Social, Personal services & others' and 'Manufacturing' activities with 3318 (12.58%) and 2825 (10.71%) establishments respectively.

In urban Delhi, 'Retail Trade' which nearly accounts for half of total urban establishments stood first among the major the economic activity groups with 356097 (48.69%) establishments. The major economic activity group 'Manufacturing' with 14.91% share stands as the second largest group of activity. 'Community, Social, Personal services & others' activity occupied third position with 72340 (9.89%) establishments.

In rural, out of the total establishments, 93.57% were found to be employing persons in the range of 1-5 and they account for 58.37% of total persons employed in rural areas. About 5.00% of the total establishments were found to be employing persons in the range of 6-9 persons and 1.43% in the range of 10 or more persons. It can be stated that majority of the establishments in rural were small size units. In urban, the position was slightly different as 85.45% of the total establishments were found to be employing persons in the range of 1-5, 12.01% in the range of 6-9 persons and 2.54% establishments employing 10 or more persons. However, the proportion of persons usually working in urban based establishments with employment size class 10 and above was the highest (43.02%).

## **PRINCIPAL CHARACTERISTICS OF ESTABLISHMENTS**

The important features of entrepreneurial activity are known by the factors like nature of their operation, main source of power used, premises type, type of ownership, source of finance, etc. and details about these characteristics will provide a measure of working of these units

**DISTRIBUTION OF ESTABLISHMENTS BY OWNERSHIP AND SOCIAL GROUP OF OWNER OF PRIVATE ESTABLISHMENTS:**

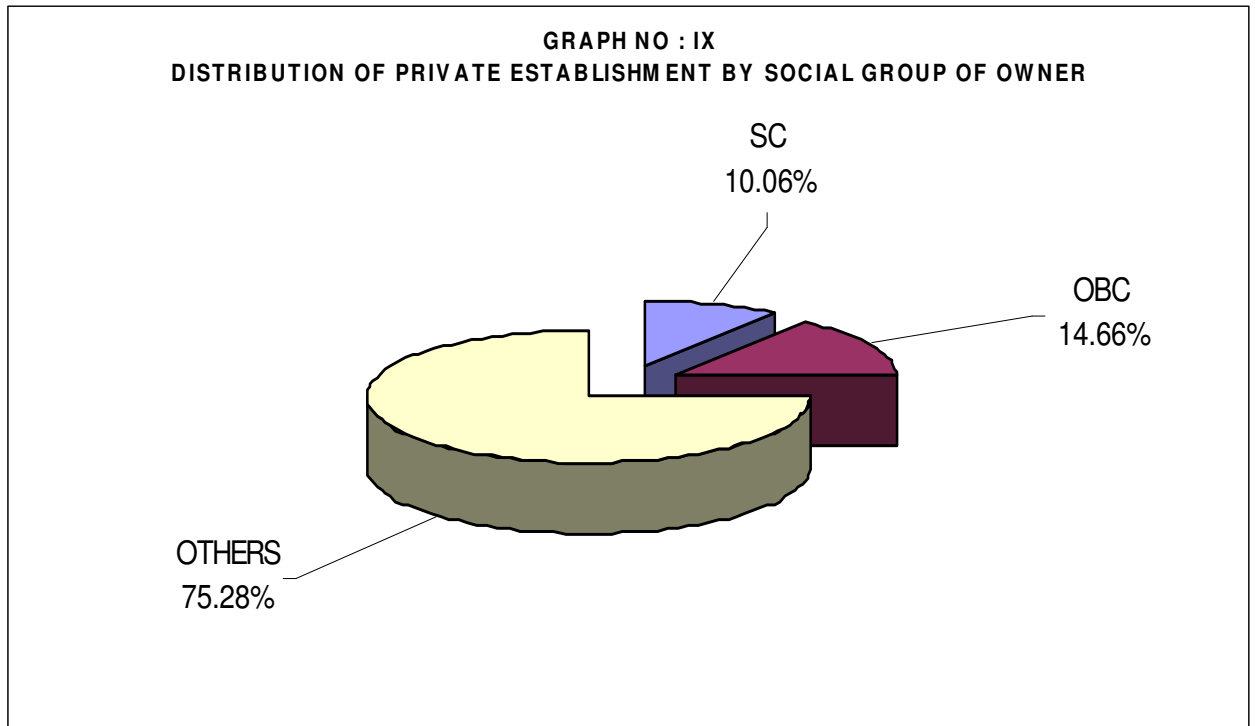

During the Fifth Economic Census data was collected on the type of ownership of establishments in terms of Govt./Private/Co-operative/Private Non-Profit type. In respect of Private Establishments further details of social group of the owner was also collected sex wise & sector-wise. Table 2.10 gives these essential details establishment type and location wise.

Out of the total 19872 establishments owned by women 4210 belong to S.C., 3764 O.B.C. and 11898 other Social Groups. Social group-wise break-up of women owned private establishments is presented in graph XI.

## CLASSIFICATION OF ESTABLISHMENTS BY TYPE OF PREMISES

Establishments have been classified into two broad groups with respect to type of premises viz. Establishments with premises and without premises (i.e. Moving type). Economic census covered both types of units to ensure complete coverage of activities.

**Table 2.12: Distribution of establishments by Type of Premises**

SLNo	LOCATION	WITHOUT PREMISES	WITH PREMISES	ALL
1.	Rural	6155 (23.33)	20225 (76.67)	26380 (100.00)

3.	All	115320 (15.22)	642423 (84.78)	757743 (100.00)

**Note: Figures in ( ) indicate percentage to total**

Analysis of related data revealed that out of the total establishments 84.78% were establishments operating with a fixed premises and rest of the 115320 establishments accounting for 15.22% were operating without any fixed premises. In Rural 76.67% of the establishments were operating from fixed premises and in Urban this share was 85.07%. Establishments with fixed premises were found to be employing about 95% of persons usually working in Delhi.

## NATURE OF OPERATION:

Based on the nature of operation, establishments were classified into two groups viz. perennial and non-perennial. Out of the total establishments 7.49 lakhs((98.9%) were perennial in nature as they were operational throughout the year. The rest of them, about 0.09 lakh establishments constituting only 1.1% were operational in particular seasons.

## GRAPHIC PRESENTATION OF SELECTED FEATURES OF ESTABLISHMENTS

Principal characteristics of establishments located in Rural and Urban Delhi is presented separately in graphs XIII and XIV respectively. From the graphs it is evident that features are more or less same in both the locations.

## TYPE OF REGISTRATION:

Enquiry into the registration of establishments under different acts/authorities revealed that 4158(0.55%) establishments were reported registered under Factory Act 1948, 2487(0.33%) with State Industries Department, 306(0.04%) recognised by KVIC/KVIB (Khadi and Village Industries Commission/Board), 901 (0.12%) with Powerloom/handloom/handicrafts, 37425(4.94%) with Central Excise/Sales Tax, 23355 (3.08%) under Shops & Establishment Act and 118376 (15.62%) with other agencies.

A fairly large number of units, namely about 5.77 lakh (76%) units were un-registered.

### SOURCE(S) OF FINANCE:

Data on sources of finance for the establishments was also collected during Fifth Economic Census, though it is a hard task to gather such record based information through oral enquiries. Out of total establishments nearly 97% have been reported as self financed units. Institutional finance including schemes of government was about 2% and non-institutional and other sources accounted for remaining 1%.

The total number of establishments have increased from 6.85 lacs in 1998 to 7.58 lacs during 2005. The rate of growth during 1998-2005 comes to 1.50% as against the growth rate of 6.35% during 1990-98.

On the other-hand the number of persons usually working has increased from 35.00 lacs to 35.56 lacs and thereby recorded a growth rate of 0.23% per annum during 1998-2005.

Sector-wise break-up of establishments indicate that in Rural number of establishments have decreased from 29527 to 26380 during 1998-2005. Likewise, number of persons usually working also decreased from 85768 in 1998 to 70063 in 2005. In Urban areas of Delhi both Establishments and Employment have increased as they recorded a growth of 1.63% and 0.30% per annum respectively during the intervening period of Fourth & Fifth Economic Census.

Broad Sector-wise study revealed that agricultural activity has receded with the fall in the number of Establishments from 7133 to 3290 (- 7.70%) between 1998-2005. Non-agricultural activity attained 1.59% growth rate during 1998-2005 as against 6.46% during 1990-98.

On comparison of data relating to Social group of owner of establishments in terms of SC/ST and OBC under 3<sup>rd</sup> & 4<sup>th</sup> & 5<sup>th</sup> Economic Census it was found that establishments owned by SCs increased from 50548 to 73555 thereby registering an increase of about 45.51% during 1998-2005. The data on Other Backward Classes owned establishments (OBCs) registered an increase of 57.72% during 1998-2005.

### **INTER STATE/UT COMPARISON OF FIFTH ECONOMIC CENSUS RESULTS**

Table 2.18 gives the details of number of establishments and employment recorded under fifth economic census in states/union territories. The sum total of establishments in respect of 35 states and union territories comes to 421.28 lakhs and number of persons usually working in those establishments was 984.45 lakhs.

**AGRICULTURAL  
ESTABLISHMENTS**

## **CHAPTER - THREE**

### **AGRICULTURAL ESTABLISHMENTS**

Entrepreneurial activities in the primary sector of the economy were also covered under the Fifth Economic Census though the main thrust was on non-agricultural economic activities. In fact, this has been the pattern followed since the second economic census, as far as subject of coverage is concerned. The coverage however, is limited to all those agricultural activities minus crop production and plantation. Accordingly, 'Agricultural Establishments' referred to in this chapter may be taken to mean those engaged in Live Stock Production, Agricultural services, hunting trapping, game propagation, forestry logging and fishing. The importance and proportion of this sector is on the decline in Delhi due to rapid urbanisation. This is evident from the fact that agricultural establishments account for only 0.43% of total establishments and no. of persons employed is 0.34% of the total employment in Delhi. Among the agricultural activities covered under the Fifth Economic Census the sub sector 'Farming of Animals' emerged as the main activity.

The principal features of agricultural establishments were explained in terms of no. of establishments, employment, type of ownership and other principal characteristics to give an idea about this activity both in rural and urban areas of Delhi.

### **NUMBER OF AGRICULTURAL ESTABLISHMENTS**

The total number of agricultural establishments as per the Fifth Economic Census comes to 3290. Out of them 577 (17.54%) were located in rural areas and rest of the 2713 (82.46%) in urban areas. Table 3.1 gives the details of agricultural establishments by type, location and

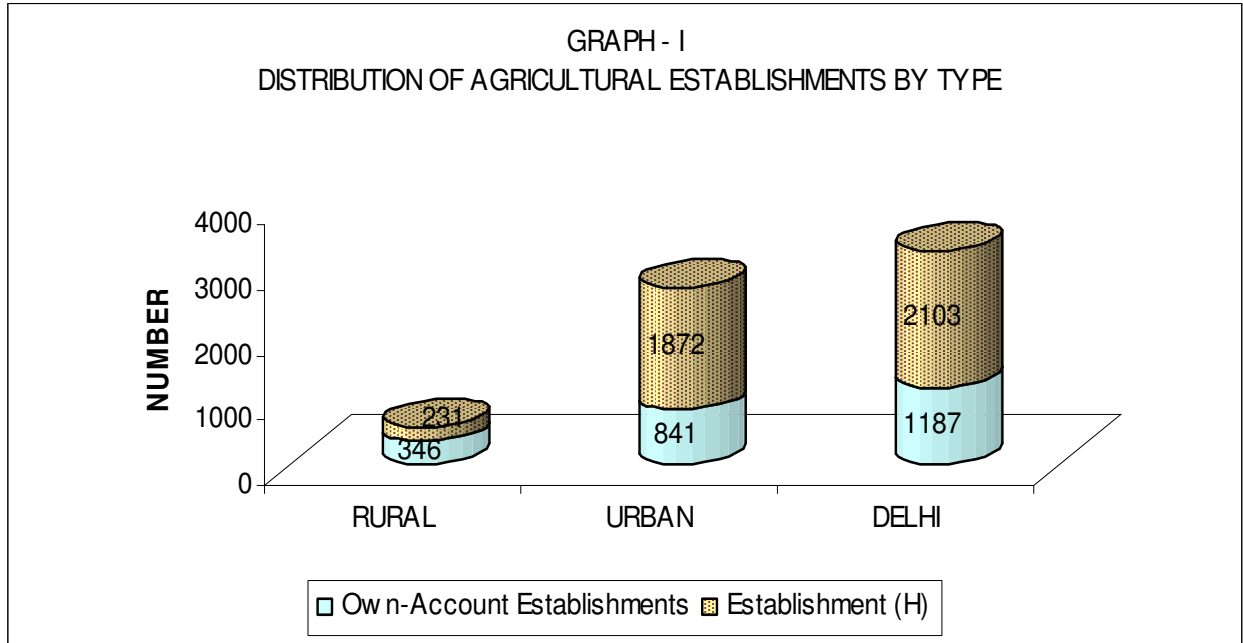

employment thereof. Further distribution of these establishments in terms of own account establishments and establishments (H) revealed that 1187 (36.08%) belong to former and 2103 (63.92%) to later category.

Note: Figures in ( ) indicate percentage to total

In rural out of the total agricultural establishments 346 (60%) were own-account type and 231 (40%) establishments (H). In urban, on the other hand, 841 (31%) were in the category of own account establishments and 1872 (69%) were establishments (H). Graph I exhibits these details location-wise.

Establishments (H) in agricultural sector were further classified into NDE's and DE's .  
Out of 2103 establishments (H) 1593 were NDE's and 510 were DE's.

Distribution of agricultural establishments (H) location-wise is presented in table3.2.

Break-up of employment by establishment type revealed that 2551 (20.80%) persons were gainfully employed in own account establishments and 9711 (79.20%) persons in establishments (H). There were 7162 hired persons employed in the agricultural establishments (H) of Delhi. Out of them 555 were working in rural based agricultural establishments (H) and 6607 in the agricultural establishments (H) of urban Delhi.(refer table 3.1)

Hired employment constitutes about 58.4% of the total employment in agricultural establishments. Average no. of persons employed per establishment (H) comes to 4.62 persons. Similar figure for own account establishments was about 2.15 persons per enterprise.

Employment in agricultural establishments by type of establishments and location is presented in graph III.

## **AGRICULTURAL OWN-ACCOUNT ESTABLISHMENTS**

### **SIZE OF EMPLOYMENT**

Table 3.4 gives the distribution of own account agricultural establishments in terms of employment size class and corresponding employment. It helps to ascertain the intensity of employment in agricultural establishments. Out of the total 1187 agricultural own-account establishments, 1164 (98.06%) were found to be employing persons in the range of 1-5, 23 (1.94%) establishments in the range of 6-9 persons and no enterprise was found to be employing 10 or more persons.

The share of rural and urban establishments employing persons in the range 1-5 was 98.56% and 97.86% respectively.

The number of agricultural establishments though registered a marginal annual growth rate of 2.08% during the decade falling between 1990 and 1980, this upward trend was not

maintained between 1990-98 and 1998-2005. In fact, number of establishments decreased from 7133 in the year 1998 to 3290 in the year 2005. It is also worthwhile to observe that number of agricultural establishments were sharply decreased in both rural and urban areas in 2005 in comparison to 1998. This can perhaps be due to the urbanisation of some of the villages which were covered as rural areas in the earlier economic census. Likewise, employment was also decreased from 22334 to 12262 persons between 1998 and 2005.

Graph no. IV provides the comparative position in respect of establishments and employment under economic census starting from second economic census.

**NON-AGRICULTURAL  
ESTABLISHMENTS**

## **CHAPTER – FOUR**

### **NON-AGRICULTURAL ESTABLISHMENTS**

The main focus of Economic Census has been the non-agricultural economic activities though a part of the agricultural activities are covered under it. The rationale behind giving main thrust to this set of activities is that it will help to build up a firm base for launching detailed sample surveys on each of the major non-agricultural economic activity. This in turn is expected to generate valuable database on the contribution of un-organised economic activity to the economy. Its importance gets multiplied in respect of State of NCT of Delhi as this set of activities occupy pivotal position as 99.6% of establishments come under this category. In fact Delhi's economy is sustained to a great extent by service sector which is an important component of non-agricultural sector.

Fifth economic census covered all types of non-agricultural economic activities whether they are registered or un-registered, private or otherwise, seasonal or perennial, fixed or moving type, employing hired labour or managing with household members, all and sundry thereby making this a colossal operation. Since the very essence of economic census is the measurement of non-agricultural activities in terms of its physical properties, a detailed analysis of each field of activity is made in this section. Before that, a brief review of the size, scope and important features of the non-agricultural economic activities is made.

## NUMBER OF NON-AGRICULTURAL ESTABLISHMENTS

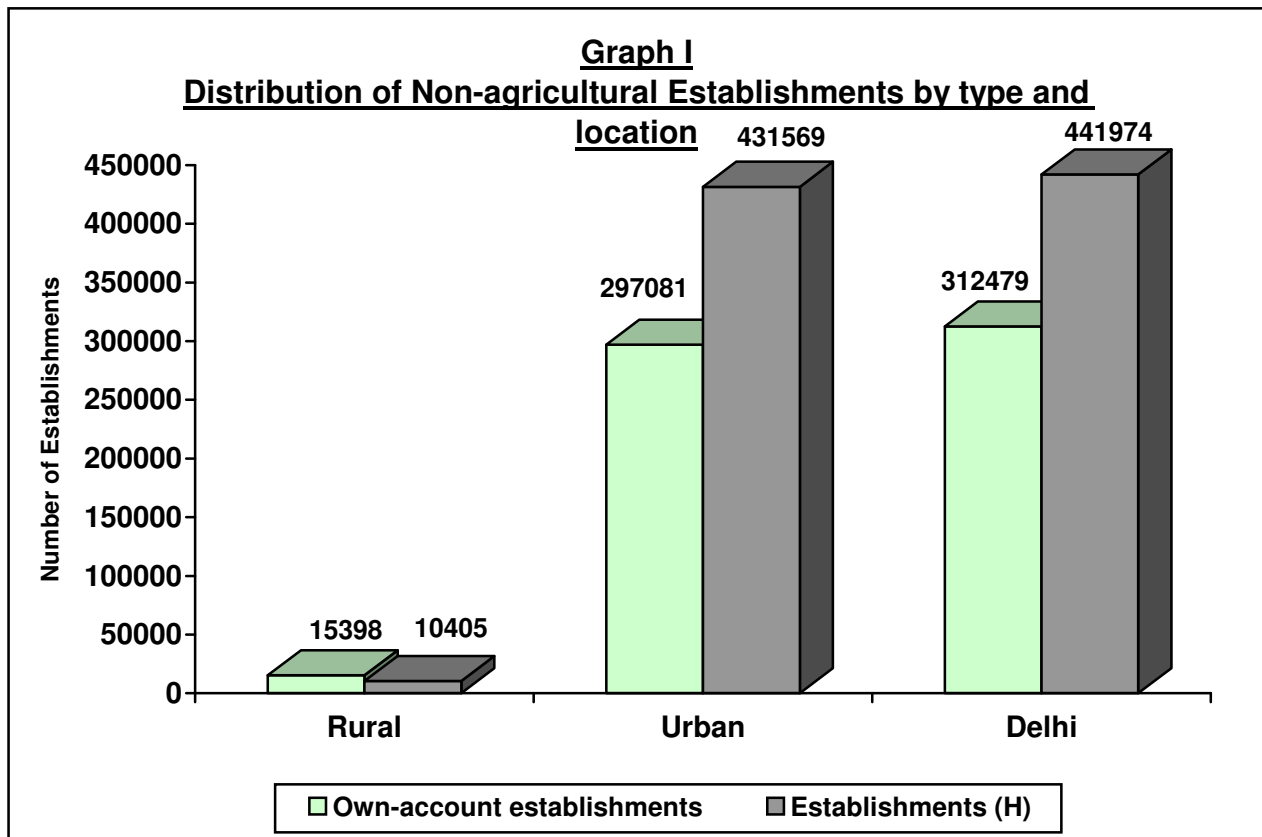

Fifth economic census has brought to light that, but for the meagre half percent of entrepreneurial activities, all other establishment are non-agricultural in nature. This is ably supported by the fact that 754453 out of 757743 establishments are in this sector as presented in Table 4.1. The total employment generated by these entrepreneurial units stated in terms of number of persons usually working was 3544125 (99.66%) out of the overall employment of 3556387 recorded under the fifth economic census.

## **REVIEW OF PROGRESS OF NON-AGRICULTURAL**

The non-agricultural economic activities are spread over secondary and tertiary sector. The secondary sector which comprises of major economic activity groups like Mining & Quarrying, Manufacturing, Electricity, Gas & Water and Construction accounts for 19.13% (144359) establishments. Its share in employment was 1257561 (35.48%) persons. This sector on the whole registered an annual growth of 0.59% in establishments and (-) 2.90% in employment during 1998-2005 as against the corresponding rate of growth of 5.08% and 16.62% between 1990-98.

The manufacturing activity which also includes repair services was the leading activity with 1.38 lakhs (18.27%) establishments employing about 12.12 lakhs (34.20%) persons in this sector. Construction and Electricity, Gas & water activities occupied a very distant subsequent positions with 5266 and 1227 number of establishments. However, Mining & Quarrying activity had become a non-existing activity, keeping in tune with Govt. policy.

The tertiary sector, the most important of the three sectors as far as the economy of Delhi is concerned, was found to be flourishing with all types of service activities under its belt. This sector accounted for 610094 (80.87%) establishments and was providing employment to 2286584 (64.52%) persons. This sector on the whole achieved a growth rate of 1.85% in number of units during 1998-2005. In case of employment, rate of growth was 2.90% between 1998-2005 when compared to that of 4.64% between 1990-98.

All the major economic activity groups achieved positive growth in their number and employment with the exception of storage and warehousing. The major economic activity group retail trade with 3.70 lakhs establishments and 9.01 lakhs employment topped the non-agricultural sector in the number of establishments, and in respect of employment it had taken an overall second

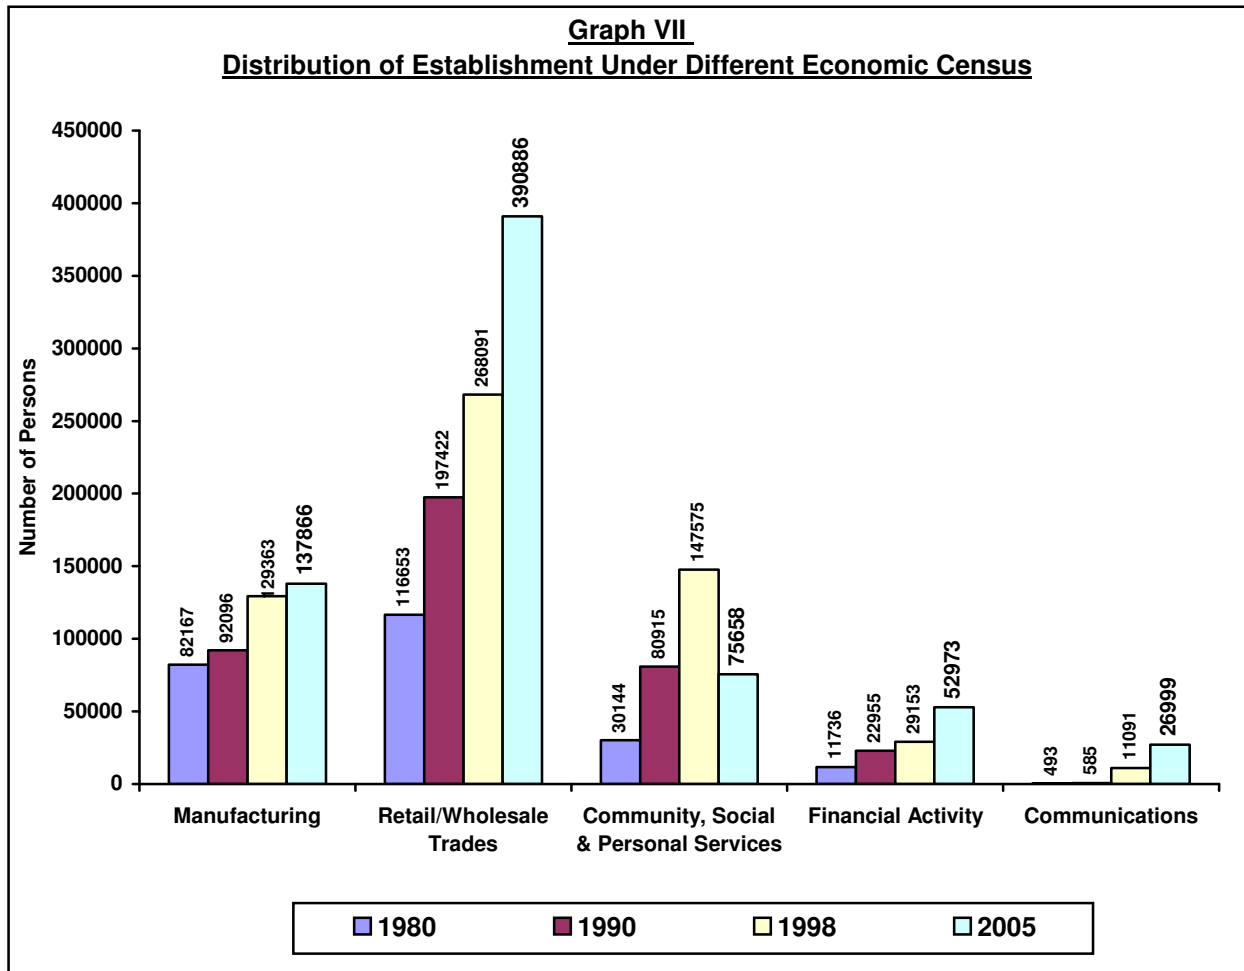

position in the non-agricultural sector. The annual growth rate of this activity in the number of establishments was 8.60% and that of employment was 9.73%.

The major economic activity group manufacturing ( including- repairing) with 1.38 lakhs establishments and about 12.12 lakh employment against its credit had taken an overall second position in number of establishments and first position in employment in the non-agricultural sector. The rate of growth in establishments and employment were 0.94% and (-) 2.26% respectively. The status of other major economic activity groups may be see from the table 4.5.

During 1998-2005, number of establishments engaged in financial activity had moved from 29153 to 52973 and their employment had increased from 2.07 lakhs to 2.97 lakhs persons during the same period.

The number of establishments in Hotels and Restaurants group had progressed from 30247 to 36099, Communications activity marched from 11091 to 26999 establishments during the intervening period of fourth and fifth economic census. The number of persons usually working in Hotels & Restaurants group had increased from 115470 to 156979 persons.

However, the number of units in the major economic activity group Transport & storage diminished drastically i.e. from 53886 to 27479 and the decrease in the employment was 163775 to 108956. The number of establishments in major economic activity group Community, Social & Personal Services & Other had decreased from 147575 to 75658 but the rate of fall in the employment was not that steep (622454 to 581413). The non-agricultural sector on the whole achieved an annual growth rate of 1.59% in establishments and 0.27% in employment during 1998-2005 as against the growth-rate of 6.46% and 8.57% during 1990-98 respectively. Graph no. VII and VIII show the comparative position of selected major economic activity groups which have made significant progress in respect of number of establishments and employment recorded under the last three economic census.

## OWN-ACCOUNT NON-AGRICULTURAL ESTABLISHMENTS

### SELECTED CHARACTERISTICS

Table 4.6 gives the distribution of own-account non-agricultural establishments and the employment thereof location-wise. The data presented in this table will be useful for further studies on informal sector as own account establishments constitute major chunk of this sector.

Note: Figures in ( ) indicate percentage to total.

There were 312479 own account establishments which account for 41.42% of total non-agricultural economic activities in the state of Delhi. The strength of own account

establishments slightly decreased from 326061 in 1998 to 312479 in 2005. Out of them 15398 (4.93%) were in rural and 297081(95.07%) in urban areas. Analysis of data relating to own account establishments with respect to their number and employment revealed that retail trade activity with 1.89 lakh (60.53%) establishments leads the table followed by community, social & personal services and Manufacturing (incl. repairing) activity with 26980(8.63%) and 26802(8.58%) establishments respectively, these three major groups coupled with the share of communication activity (5.50%) forms nearly 83% of the total own account establishments in non-agricultural activities. The reason for their major share is that activities in these fields are freelance in nature. They are governed by minimal governmental/statutory restrictions for setting up self-employment ventures in these fields of activities.

In respect of number of persons usually working in different own account non-agricultural enterprise groups, it was found that retail trade, community, social and personal services and communication activity contributed 59.56%, 8.98% and 10.16% of the employment respectively. The share of communication activity was 5.63%.

The principal features of own account establishments in this sector are presented in table 4.7.

## CHAPTER – FIVE

### DISTRICT-WISE PROFILE

For the first time in the history of conduct of Economic Census in Delhi, data was collected and presented district-wise which hitherto grouped under one single district. Number of establishments, employment and other features are presented district-wise in Table No. 5.1 to 5.7 Accordingly, North-West District with the share of 17.30% in the total number of establishments is leading the table. This is closely followed by South District (13.83%) and West District (13.37%). In the case of employment South District with a 16.54% of share is in the forefront. It is followed by North-West District (14.91%) and North – East District (12.74%). New Delhi District is ranked least both in case of number of establishments and employment among the 9 district for obvious reasons.
