

Chapter 1

POPULATION

Coverage

- Rural urban Distribution of Sex Ratio and Population Growth Rate in Post-Independence India
- State-wise percent share of Female population in Total Population
- Year-wise State-wise Sex-ratio in post independent India
- Sex ratio in the age-group 0-6 years by Residence
- State-wise sex ratio in various age Groups in the context of developmental planning
- Sex ratio at Birth based on registered events
- Percentage distribution of population by age-groups and sex
- Percentage distribution of population by sex, marital status and age-groups
- Women's Mean Age at Marriage in Major States
- Female Headed Households and their Average Size by Residence

Population and related Statistics

This chapter includes the data depicting the imbalances in the population on account of gender disparities. The rural urban classification has also been studied here in the form of following tables:

1.1 : Rural-Urban Distribution of Sex Ratio and Average Annual Growth Rate of Population of Post Independence

1.2 : State-wise Percent Share of Female Population in Total Population - 2011

1.3 : Year-wise State-wise Sex Ratio in post Independent India

1.4 : Sex ratio in the Age-Group 0-6 Years by Residence : 2011

1.5 : State-wise sex ratio in various age-groups in the context of developmental planning

1.6 : Sex Ratio at Birth based on registered events

1.7 : Percentage Distribution of Population by Age-group and Sex

1.8 : Percent Distribution of Population by Sex, Marital Status and Age-Group, 2012

1.9 : Women's Mean Age at Marriage in Major States

1.10 : Female Headed Households and their Average Size by Residence

Population

As per Census 2011, the population of India is more than 121 Crore with 48.5% females which is a corollary of the fact that there are 949 female to 1000 males in rural against 929 in urban India. However, the sex ratio has improved in urban & rural India over last decades and the gap in sex ratio in rural and urban India is converging in recent decades. This may be attributed to more migration of families to the urban setup. The State of Kerala, Puducherry, Manipur, Goa and Chhattisgarh have more females than males whereas Daman & Diu and Chandigarh are home to less than 800 females to 1000 males (details may be seen in Tables 1.1 and 1.2).

Sex Ratio

In the last 60 years, states of Assam, Delhi and West Bengal have improved the sex ratio substantially, but on the contrary, sex ratio has worsened in major states like Bihar and Odisha.

There are 918 females to 1000 males in the age-group 0-6 years, with maximum disparity in sex ratio of rural & urban area existing in Daman & Diu and Gujarat having lesser females in urban Area. The Sex Ratio is least for the Girl Child(0-19 Years) but 1033 females over 1000 males in the age group of 60+ indicating a threat of less economic activity by a sizable population. The economically active age group(15-59) has 944 females to 1000 males. Sex ratio at birth has been reported as 908 which has marginally decreased as compared to last year (details in Tables 1.4,1.5,1.6,1.7 and 1.8).

Mean Age at Marriage

As per the Sample Registration System, of the total females in 2012, 42.8% were never married, 48.9% were married and rest were widowed, divorced or separated, whereas 52.5% of total males are unmarried and 45.2% are married. The mean age at effective marriage for females stood at 21.2 years in 2012 with Urban age at 22.4 and rural mean age at 20.8. Among the major States, the highest mean age at marriage was 24.6 years for J&K and the lowest was 20.2 years for Jharkhand (details may be seen in Table 1.9).

Female Headed Households

As per National Sample Survey (68th Round), 11.5% of total households in rural and 12.4 % in urban were Female Headed Households as compared to 9.7% and 10.6% during 1993-94 (refer Table 1.10).

1.1 : Rural-Urban Distribution of Sex Ratio and Average Annual Growth Rate of Population of Post Independence India

(Population In Millions)

Year	Rural Population			Sex Ratio	Urban Population			Sex Ratio	Total Population			Sex Ratio	Average annual Exp		
	Female	Male	Person		Female	Male	Person		Female	Male	Person		Female	Male	Person
1951	146.66	151.98	298.64	965	28.87	33.57	62.44	860	175.54	185.55	361.09	946	1.26	1.24	1.25

Source: Office of the Registrar General, India.

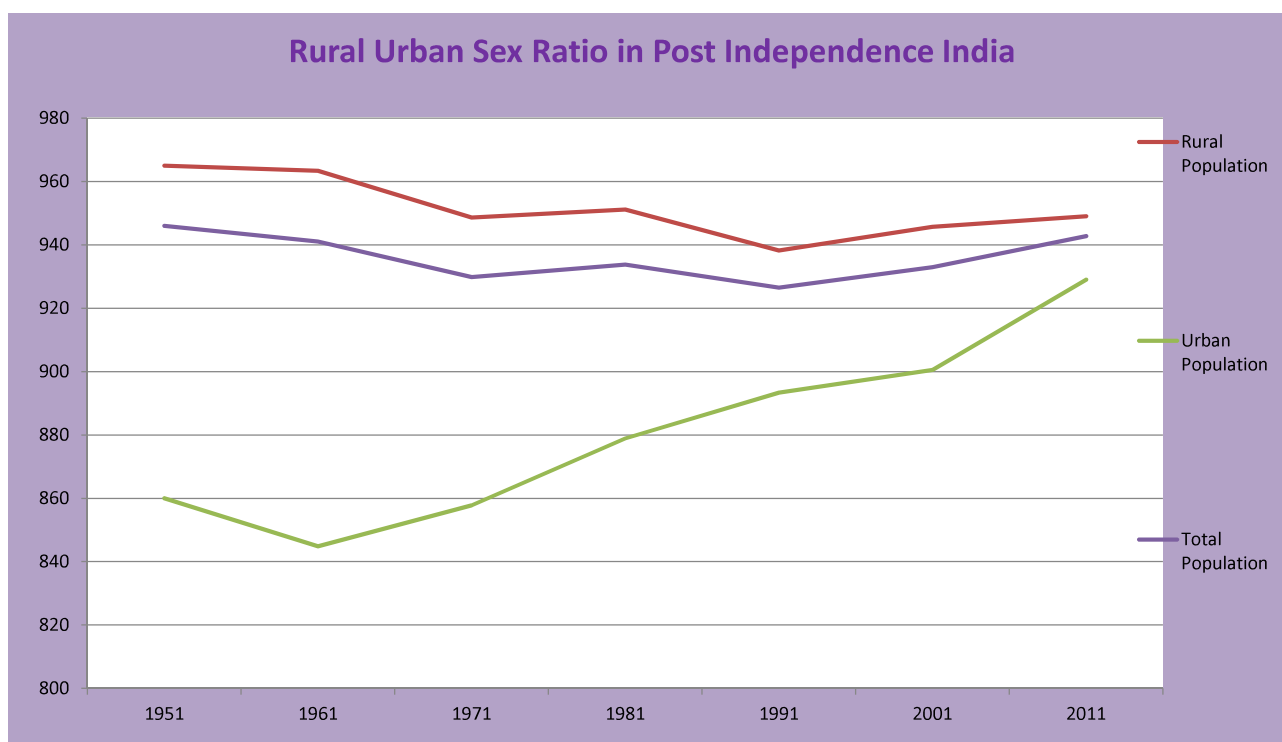

Notes:

Sex ratios have been calculated as the proportion of females to 1000 males.

Average annual Exp growth rate has been calculated using the formula $1/10 * \ln(\text{This year population} / \text{Population as reported in the last decade})$

2001 and 2011 population exclude the estimated population of Paomata, Mao Maran and Purul sub-divisions of Senapati district of Manipur.

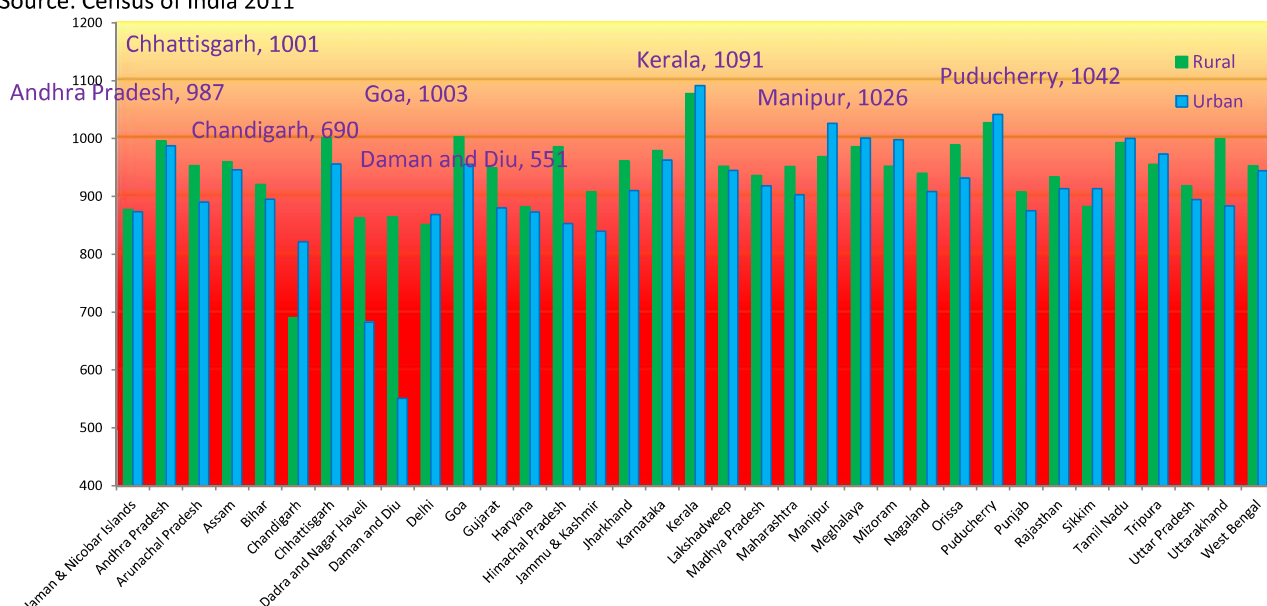

The population is as on 1st March of the year.

1.2 : State-wise Percent Share of Female Population in Total Population - 2011

State	% Share of Women			Sex Ratio
