## MESSAGE

Agriculture and allied sectors (i.e. crops, livestock, forestry and logging, fishing and aquaculture) play a vital role in Indian economy. It contributed around 20% of the country's Gross Value Added at basic prices in 2020-21 and employs nearly half of the workforce. A large section of Indian population depends on agriculture and allied sectors for their livelihood. This sector has undergone structural changes over time both in terms of mechanization, improved inputs and investment in infrastructure. The State-wise value of output of these sectors assume considerable importance in the economy and this brochure provides this information. This is the 15<sup>th</sup> publication since it was first brought out in 1985 for the period 1960-61 to 1980-81 and contains State-wise and item-wise value of output for the period 2011-12 to 2020-21 at current and constant (2011-12) prices.

We acknowledge the contribution of Ministry of Agriculture and Farmers' Welfare, Government of India and the State/UT Directorates of Economics and Statistics for their cooperation in making available the relevant data. We welcome suggestions for further improvement.

I would like to place on record my deep appreciation for the efforts of all officers and officials of the Agriculture Unit of the National Accounts Division, NSO in bringing out this publication under the guidance of Smt. R. Savitri, Addl. DG (NAD).

(Nivedita Gupta)

## PREFACE

National Statistical Office (NSO), Ministry of Statistics & Programme Implementation publishes National Income and related Macro-Economic Aggregates both at national level and regional level. It also provides disaggregated information on value of output of different commodities produced by the agriculture and allied sectors, comprising of the economic activities of crop production, livestock, forestry, logging, fishing and aquaculture, in its annual publication titled 'National Accounts Statistics' at national level.

The agricultural statistical system in India is vast as well as complex. Collection of data for the agriculture and allied sectors is done from diverse sources like Central and State Governments, autonomous bodies etc. which is challenging and time consuming. To meet user demands of State/UT specific data, the NSO has been compiling and publishing this information from time to time for use by planners and other users. I compliment the officers and officials of the Agriculture Unit, National Accounts Division (NAD), NSO in preparation of the present publication containing State-wise and item-wise estimates of value of output from agriculture and allied sectors for the years from 2011-12 to 2020-21, both at current and constant (2011-12) prices.

I appreciate the sincere efforts of Dr. Subhra Sarker, Dy. DG (NAD) and the team consisting of Shri Rajeev Kumar, Director; Shri Manish Bindal, Dy. Director; Shri Pradeep Kumar, Sr. Statistical Officer, Shri Dinesh Solanki, Jr. Statistical Officers and Shri Niteen Kumar, Jr. Statistical Officers in bringing out this publication.

  
(R. Savithri)

New Delhi

April, 2023

## **ACKNOWLEDGEMENTS**

The compilation and preparation of publication ‘State-wise and item-wise value of output from agriculture and allied sectors (2011-12 to 2020-21) with base year 2011-12’ is based on the data sourced from various sources like the Ministry of Agriculture and Farmers’ Welfare, Tea Board, Coffee Board, Cashew nut & Cocoa Development Board, Directorate of Areca nut & Spices Development, Central Bureau of Narcotics, Rubber Board, Silk Board, Food Corporation of India, Forest Survey of India, all State/UT Directorates of Economics and Statistics and many more. The Ministry gratefully acknowledges the cooperation of these organizations and looks forward to their continued support in the future as well.

# 1. Introduction

1.1. The pre-eminent role of crop, livestock, forestry & logging and fishing & aquaculture (agriculture and allied sectors, in short) in the Indian economy needs no emphasis. Over time, there have been important developments in crop sector, especially in the context of farm mechanization, use of hybrid & genetically modified seeds and adoption of market driven cropping patterns thereby leading to increase in crop yields and emergence of new cropping patterns. Similar developments are also being observed in livestock and fishing sub-sectors. While application of biotechnology in the livestock sector has increased the output of the livestock products, prawn farming and market driven fish farming are being observed in recent years in fishing sector. In this context, it has, therefore, become necessary to analyse as to how value of output of different commodities belonging to agriculture and allied sectors have behaved over years in different States and UTs, both in nominal and real terms.

1.2. In the course of analysis and preparation of estimates of national income related macro-aggregates originating from agriculture, NAD has accumulated a large body of data over years, which is useful to research workers, Government departments and other agencies. As it would be cumbersome to include all these details in the annual NAS, a domain specific publication providing a long time-series of data on GVO for the goods belonging to agriculture and allied sectors in one place became incumbent. To meet this objective, from the year 1985, a brochure containing State-wise value of output of agriculture and allied sectors is disseminated by NAD at regular intervals. The current brochure presents information on GVO of Agriculture and allied sectors for the years 2011-12 to 2020-21 both at current and constant (2011-12) prices.

1.3. Agriculture and allied sectors consist of four sub-sectors, namely:

1.3.1. Crop;

1.3.2. Livestock;

1.3.3. Forestry and logging; and

1.3.4. Fishing and aquaculture.

1.4. The economic activities included in crop sector are the growing of non-perennial and perennial crops and the plant propagation. To simplify, it includes:

1.4.1. growing of field crops, fruits, nuts, seeds and vegetables;

1.4.2. management of tea, coffee and rubber plantations;

- 1.4.3. agricultural and horticultural services on a fee or on contract basis such as harvesting, baling and thrashing, preparation of tobacco for marketing, pest control, spraying, pruning, picking, packing etc.;
  - 1.4.4. ancillary activities of cultivators such as gur making, transportation of own produce to primary markets etc.; and
  - 1.4.5. operation of irrigation systems which comprises supply of water through various Government canals, tube-wells, tanks etc. to the agriculturists.
- 1.5. Livestock sector includes breeding and rearing of animals and poultry (besides private veterinary services), production of milk, slaughtering, preparation and dressing of meat, production of raw hides and skins, eggs, dung, raw wool, honey and silk worm cocoons etc.
- 1.6. Forestry and logging sector (forestry, in short) includes:
- 1.6.1. Forestry;
  - 1.6.2. logging and transportation of forest products to the sale depots/assembly centres; and
  - 1.6.3. farmyard wood (industrial wood and fuelwood collected by the primary producers from trees outside regular forests).
- 1.7. The forest products are classified into two broad groups, namely
- (a) major products comprising industrial wood (timber, roundwood, match and pulpwood) and fuelwood (firewood and charcoal wood) and
  - (b) NTFP comprising a large number of wild growing forest material such as bamboo, fodder, lac, sandalwood, honey, resin, gum, tendu leaves, cork, balsams, vegetable hair, eelgrass, acorns, horse chestnuts, mosses, lichens etc.
- 1.8. The activities covered in the fishing and aquaculture sector (fishing, in short) are:
- 1.8.1. commercial fishing in (a) ocean, coastal and offshore waters and (b) inland waters, that includes catching, tackling and gathering of fish from rivers, irrigation and other canals, lakes, tanks, fields, inundated tracts etc.;
  - 1.8.2. subsistence fishing in inland waters and artificial ponds;
  - 1.8.3. gathering of sea weeds, sea shells, pearls, sponges and other ocean & coastal water products; and
  - 1.8.4. fish curing, namely salting and sun-drying of fish. The activities of salting and sun-drying of fish are also included in fishing sector, since these are undertaken predominantly by the same households, which are engaged in commercial/ subsistence fishing.

## 2. Methodology for Valuation of Output

### 2.1. Valuation of output of crops

2.1.1. The different groups of crops under the crop sub-sector, published in the NAS are: (1) cereals, (2) pulses, (3) oilseeds, (4) sugars, (5) fibres, (6) indigo, dyes and tanning material, (7) drugs and narcotics, (8) condiments & spices, (9) fruits & vegetables, (10) other crops, (11) by-products, and (12) kitchen garden. For different crops, at State/UT level, the estimates of area and production are obtained from DESAg. The estimates of area and production of fruits and vegetables, not covered by DESAg, are obtained from HSD, MoAgFW. The estimates of area and production of plantation crops viz. tea, coffee, rubber, areca nut, cashew nut and cocoa are obtained from their respective commodity boards. The area and production of opium is obtained from Central Bureau of Narcotics. However, in the case of sugarcane, production excluding the quantity converted into gur by the cane growers is taken and output of gur is evaluated separately.

2.1.2. DESAg is the principal source for agricultural statistics used for the estimation of GVO. The information used for purposes of building up the estimates is (a) area and production of Principal Crops and (b) LUS. However, for some State/UT specific crops, the concerned State/UT DES provides the area and production of such crops. The farm harvest prices of all crops are provided by concerned State/UT DES.

2.1.3. Data source of cereals, pulses, oilseeds, sugars and fibres: Data on production and area of cereals, pulses, oilseeds, sugars and fibres are taken from DESAg, with few exceptions, namely coconut and sannhemp. For these two crops, data is taken from the respective State/UT DES.

2.1.4. Data source for indigo, dyes and tanning material, drugs and narcotics: Data on production and area of these crops are obtained from the respective State/UT DES.

2.1.5. Data source of condiments & spices and fruits & vegetables: Production and area data of most of these crops are obtained from HSD of MoAgFW. For few of these crops, namely banana, cashew nut, potato, sweet potato, tapioca and onion; production and area data are obtained from respective State/UT DES.

2.1.6. Data source for other crops are different for different crops. For rubber, production data is obtained from Rubber Board. Production data of guar seed and mulberry are obtained from respective State/UT DES. Production of fodder and grass is

estimated from LUS provided by the DESAg as well as respective DES. Production data of mushroom is obtained from HSD and DES.

2.1.7. In case of by-products, area is obtained from DESAg and the value per hectare of by-products is estimated from the CCS results published by DESAg.

2.1.8. In the 2011-12 series, estimates of output of crops such as cowpea, rajma, val, batna and choula (earlier covered in 'other pulses'), beans, bitter gourd, bottle gourd, capsicum, carrot, cucumber, muskmelon, radish, parmal, pumpkin and water melon (earlier covered in 'other vegetables'), anola/amla, ber, custard apple, kiwi, passion fruit, peach, plum, pomegranate and strawberry (earlier covered in 'other fruits') have also been segregated.

2.1.9. In case of tea, the estimates of output available from Tea Board relate to production of processed tea instead of raw tea leaves. Since processing activity is outside the scope of agriculture, only output of raw tea leaves needs to be considered in crop sector. Output of raw tea leaves is estimated as equal to input of raw tea leaves in the tea processing industry. A norm of 4.44 as ratio of raw tea leaves to processed leaves has been estimated by the Tea Board on the basis of Techno Economic Surveys. Therefore, production of raw tea leaves is estimated as 4.44 times the production of processed tea.

2.1.10. For almost all States/UTs which grow betel leaves, production approach is adopted for estimating production of betel leaf. In case of Assam, betel leaves production is estimated on the basis of areca nut to betel leaves consumption ratio (1:4). Out of total production of areca nut, about 20% is assumed to be used for dyeing purposes.

2.1.11. Toddy, a beverage, has also been included in crop sector. The NSS report 558 'Household Consumption of Various Goods and Services in India, 2011-12' provides monthly per capita quantity and value of consumption for toddy in each State/UT with rural/urban break up. Production of toddy is estimated by multiplying per capita consumption of toddy with projected rural and urban population.

2.1.12. The unit of reporting of data on area and production of loose flowers are hectare and tonne respectively and that of spikes are in numbers. These are obtained from HSD, DESAg.

2.1.13. Evaluation of production under kitchen garden (i.e. Foreyard/ Backyard Farming) is done on the basis of the ratio of total area under kitchen garden to the total rural area operated at all India level (0.21%) as observed in 1991-92. This ratio has

been obtained from NSS Report 'Operational Land Holdings in India, 1991-92 Salient Features', published on the basis of 48<sup>th</sup> round of NSS Land and Livestock Holding Survey, 1991-92. This ratio of total area under kitchen garden to the total rural area operated has been assumed to be constant for the subsequent years as no data under kitchen garden was compiled during Land and Livestock Holding Surveys in subsequent NSS Rounds. This norm i.e. '0.21% of net area sown' has been used for estimating area under kitchen garden for the new series. The estimates of value of output on account of production of crops in kitchen garden are made using these area estimates and the value per hectare of fruits and vegetable crops.

2.1.14. Direct production estimates of 'other crops' and 'non-food crops not classified elsewhere' are not available. The estimates of output for these crops are obtained by applying an appropriate average value of yield per hectare to the total area under these crops.

2.1.15. The rates used for estimating production of fodder are on the basis of the study conducted in 2004-05 by the SERC, New Delhi. The yield of cultivated Green Fodder has been estimated as under:

- 50 tonnes / hectare for irrigated land
- 25 tonnes / hectare for un-irrigated land

2.1.16. Grass is estimated on the basis of the combined area under permanent pasture, culturable waste, land under miscellaneous tree crops, fallow lands and net areas sown (using the appropriate weights for different types of areas), which is based on NSS 1955-56 report. Fodder and grass are evaluated at producers' prices received from respective State/UT DES.

2.1.17. Conversion of sugarcane into gur is an activity undertaken by the agriculturists. The total sugarcane production is divided into two parts viz. (i) sugarcane utilized as such and (ii) sugarcane converted into gur. While the former is evaluated at sugarcane prices, the latter is evaluated at corresponding gur prices. As the estimates of gur production are not directly available, the same are worked out using information on quantity of sugarcane used for various purposes. The information on utilization of sugarcane for seed, chewing, juice making etc., is gathered from the State Agricultural Departments, Directorate of Marketing and Inspection and the CCS. The quantity of sugarcane crushed by the factories for the manufacture of crystal sugar is obtained from the Directorate of Sugar & Vegetable Oils under Department of Food and Public Distribution, Government of India. The consumption of sugarcane for the production of

Khandsari, Bura etc., is estimated separately for the registered and unregistered establishments from the ASI and NSSO respectively. Out of the total sugarcane, the quantity of sugarcane left over after allowing for the above uses is assumed to have been converted into gur.

2.1.18. The conversion rates from sugarcane to gur are taken from benchmark study. Bagasse obtained as a by-product during conversion of sugarcane into gur is estimated as 35% of gur production as estimated by SERC.

2.1.19. In the process of cultivation of crops and their processing by indigenous methods, several by-products are also produced. However, for the estimation of GVA, only those by-products which are readily identifiable and have some definite economic value are considered. The value estimates of these by-products are based on the CCS results. The value per unit area (hectare) of the by-products available from the CCS is directly utilized for arriving at the value of output.

2.1.20. For evaluation purpose of these crops, the producers' prices known as FHP correspond to average FHP ruling in the nearest primary markets during the peak arrival periods, which is normally within 2 months after the crop is harvested. The same is furnished by the respective State/UT DES to NAD.

2.1.21. For the purpose of this publication, the crops which do not have significant contributions in the respective groups are clubbed under 'Other' sub-group of the corresponding group. Data on these crops is available from LUS. Such information is obtained through DESAg and respective State/UT DES.

## **2.2. Valuation of output of livestock**

2.2.1. For estimating value of output from livestock, the livestock products are divided into 7 broad groups viz. (i) milk, (ii) meat, (iii) eggs, (iv) wool and hair, (v) dung, (vi) silk worm cocoons & honey, and (vii) increment in livestock.

2.2.2. The milk group comprises milk consumed or sold in liquid form, ghee, butter and lassi produced by the producer households. The milk production estimates released by DADF, (currently DAHD), MoFA&D are used for estimating value of output. The main source of data for milk production is ISS conducted by DAHD. In some States/UTs, namely Mizoram, Sikkim, Dadra & Nagar Haveli and Delhi; goat and buffalo milk are not estimated by DAHD. For few other smaller States/UTs, either production of goat milk or production of buffalo milk is not available. Production of milk in such cases is estimated by using yield rate prevalent in the neighbouring States and the production

so estimated is added to the production estimated by DAHD. Production of camel milk is also estimated by using the yield per camel in Gujarat, Haryana and Rajasthan.

2.2.3. Meat group comprises of meat (including edible offal & glands and poultry meat), meat products (fats, heads, legs etc.) and meat by-products comprising hides (cattle and buffalo hide), skins (goat and sheep skin) and other products like guts, blood, bones, horns, hoofs etc. The estimates of meat products and by-products are based on the number of slaughtered animals and fallen animals, wherever applicable and the corresponding yield rates. In the 2011-12 series, the ratio of meat product and meat by-products to total meat produced in terms of value and quantity for each species of livestock as estimated by NRCM, Hyderabad has been used in estimation of value of total output of meat. The ratio (in percentages) of meat products & meat by-products to total meat as per NRCM study for cattle, buffalo, goat, sheep and pig are as follows: Cattle- 16.0%; Buffalo- 14.49%; Goat- 21.59%; Sheep- 23.05%; and Pig- 9.4%.

2.2.4. The data on production of eggs is estimated through ISS and ILC and is furnished by the DAHD. The estimates of poultry meat are prepared using the information on utilization of eggs for hatching (State-wise fixed ratio, as provided by the States/UTs × total egg production), chickens & duckling killed, adult fowl killed (50% of population of hens and cocks), adult duck killed (50% of population of ducks and drakes) and other poultry killed (37.5% of population of other poultry). Number of chicks & duckling killed is estimated by subtracting next year population from current year population and chick and duckling survived out of total hatched eggs.

2.2.5. Estimation of production of 'wool and hair' from camel and pig not covered under ISS is based on yield rate of hair from camel provided by SERC and yield rates of pig bristles from type study conducted by CSO in 2004-05. Currently, average yield rate of hair from single humped camel is 800 gm./animal/year and that of a double humped camel is 3.0 kg/animal/year. Average yield rates of pig bristles are estimated as 155 gm./animal/year.

2.2.6. The estimates of production of dung are prepared on the basis of information on population and evacuation rates supplied by DAHD. The evacuation rates and population estimates are based on the ISS. For remaining States/UTs, for which estimates are not available, the rates pertaining to the adjoining States along with the annual estimated animal population are used for arriving at the dung production estimates. Dung is used as manure as well as fuel. The utilization rates of dung for (i)

dung used as manure and (ii) dung used as fuel is supplied by DAHD. In 2011-12 series, the value of evacuation/droplet from goat and sheep has been estimated by using results of a joint study by Central Institute for Research on Goats and National Centre for Agricultural Economics and Policy Research on 'Positive Environmental Externalities of Livestock in Mixed Farming Systems of India' published in year 2013. The evacuation rate, as per this study, for goat is 0.3 kg per day and for sheep is 0.8 kg per day. The value of droplets is estimated using the prices of dung and grouped with the estimates of dung.

2.2.7. The annual production estimates of silk worm cocoons by types (viz. mulberry, tassar, eri and muga) and honey are obtained from Central Silk Board and KVIC respectively. However, HSD has become the main source for providing the annual production estimates of honey since 2018-19 in place of KVIC.

2.2.8. The annual net increase in the livestock population in each State/UT is estimated separately for each category of livestock on the basis of the projected population. The population has been projected on the basis of growth rates observed between two Livestock Censuses i.e. ILC 2003 and ILC 2012 for the years 2011-12 to 2016-17 and ILC 2012 and ILC 2019 for the years 2017-18 to 2020-21. For any particular State/UT, if the calculation based increment is negative, then it was estimated as 'Zero'.

2.2.9. Evaluation of Livestock production is done by multiplying the quantities of production by the corresponding producers' prices. The state-wise prices are worked out as the simple average of all available price observations of the Livestock products.

### **2.3. Valuation of output of forestry and logging**

2.3.1. The data on production and prices of industrial wood and non-timber forest products as well as on prices of fuelwood are supplied by the SFDs. The data on production of industrial wood generally relates to the quantities sold/auctioned at the assembling centres by the SFDs. In the case of minor forest products, the information on their production is generally not available. However, information is built up on the basis of royalty received (in value terms) from those authorized to exploit these minor forest products from the forests. The value of non-timber forest products could be the royalty figures or the economic value derived from the royalty figures. The estimates of production of fuelwood are prepared on the basis of quinquennial consumer expenditure surveys of NSSO.

2.3.2. The estimates of value of output at current prices of industrial wood are prepared by multiplying the category-wise production figures with their respective average annual prices (at the assembling centres), both of which are supplied by the SFDs. However, this information relates only to authorized produce of Government forests. In addition to the production of industrial wood from these Government forests, there would be (i) authorized (but unrecorded) and unauthorized removals of timber from reserved/protected forests and (ii) unrecorded production from private owned forests and non-traditional forest areas (e.g. trees in village common fields, ridges, canal sides, road sides, fruit trees no longer productive etc.). The authorized removals are those done by the right-holders staying in the periphery of natural forests and are generally not recorded in the official records of production. In order to account for the production of industrial wood, a norm of 10% of recorded production (as reported by the SFDs) is adopted. However, it has been observed that there is a considerable production of wood from social forests and other plantations outside forests. Therefore, in the 2004-05 series, data on industrial wood produced from TOF has been included in the output estimates of forestry sector, in consultation with the Ministry of Environment, Forest and Climate Change. The data on output of industrial wood from TOF has been provided by FSI. Further, volume of wood from TOF has been estimated using potential production of Timber as estimated by FSI and the annual linear growth rate has been applied to extrapolate for the subsequent years. Timber from TOF has been revised using latest data on growth rate of growing stock of TOF. As per ISFR, Growing Stock in 2019 and 2021 has shown an annual increase of 4.17% per annum during this period.

2.3.3. Data on quantity and producers' prices of most of NTFP are available from the SFDs. Latest data for fodder from forest has been updated using ISFR 2011 and WPI for cattle feed.

2.3.4. Fuelwood constitutes an important basic need for a large segment of the population in India. The quantity/output of fuelwood is estimated through consumption approach, as reliable estimates on production of fuelwood are not directly available. Data on prices are available from respective State/UT DES. The estimated production of fuelwood is based on three components, namely (i) household fuelwood consumption, (ii) agricultural by-products i.e. straw and sticks used as fuelwood (this amount is to be subtracted from the total consumption of fuelwood by the households, as it is already accounted for in the agriculture sector as by-products) and (iii) fuelwood

consumed by industries, religious and other social rituals. The estimated value of output of fuelwood is based on (a) the estimation of fuelwood consumption as available from the Quinquennial Surveys of Consumer Expenditure, conducted in the NSS 68<sup>th</sup> Round (2011-12), (b) subtracting from the household total consumption of fuelwood estimated from NSS data, the actual estimates of value of output of agricultural products, namely cotton sticks, arhar sticks, jute sticks, sesamum sticks, rapeseed sticks, sunflower sticks, castor sticks and bagasse (this gives the total firewood consumption from forest sources) and (c) estimating afresh the consumption of firewood used for industries, religious and other social rituals to arrive at a ratio. In the new series, the ratio of consumption of firewood used for industries, religious and other social rituals to total firewood consumption has been revised to 7.64% from 6%.

## **2.4. Valuation of output of fishing and aquaculture**

2.4.1. Data on estimated landings of marine fish, prices and value of fish catch are directly obtained from the concerned State/UT Department of Fisheries (SDF) of maritime States/UTs. For estimation of marine fish production, almost all maritime States/UTs follow statistical sampling design. The produce of prawns is separately valued.

2.4.2. The data supplied by the most of the SDFs include production from subsistence fishing. For remaining States/UTs, subsistence fishing is estimated at 12.5% of inland fish production. This ratio has been arrived at on the basis of type studies conducted by few State Governments.

2.4.3. Most maritime States/UTs resort to allied activities of fish curing, which include salting and sun-drying of fish. The data on quantities and prices of fish let-in (raw fish going into salting, sun-drying and frozen purposes) and fish let-out (the resultant salted, sun-dried and frozen fish) is also available from the SDFs.

2.4.4. Data on producers' prices and value of output in respect of gathering of pearls, chanks, oysters, sea-weeds, lime-shells, sea-shells etc., are available with few States/UTs. Whenever a State/UT provides other marine products along with the producers' prices, the same are taken into consideration.

2.4.5. For estimating value of output, the average annual auction prices of marine fish (species-wise) collected by the SDFs at the landing centres and the inland fish prices reported by the SDFs from the assembling centres, are used.

- 2.5. The users may refer for further details on the methodology of estimation cited in the NSO publication entitled 'National Accounts Statistics, Sources and Methods, 2012' and 'Changes in Methodology in the New Series on National Accounts (Base Year 2011-12)'.
- 2.6. The value of output in respect of 138 crops or crop sub-groups, 7 livestock groups, 3 forestry groups and 2 fisheries groups have been presented in this brochure. For each group, information on State-wise value of output for 2011-12 to 2020-21 is given in the form of two statements. The first statement contains information at current prices followed by a statement containing the information at constant (2011-12) prices.
- 2.7. The estimates of value of output prepared for this brochure are subject to following data limitations:
- 2.7.1. It may be recalled that the price data for all the items of output are supplied by the concerned State/UT. In certain cases, when the State DES is unable to get the prices of certain items in a year, they tend to repeat the prices quoted in the base year. If that is not available, all India WPI of that item or the closest sub-group is applied on previous year price. As a result, the Statements presented here contain few items where the value at both current and constant prices is identical for all the years/most of the years.
- 2.7.2. For obtaining value of output, data both on production and price of an item is required. In certain cases however, although production data is available from MoAgFW, corresponding price data for a particular year may not be available or the State DES gets price data for a group of items. For example, for Punjab, the prices of bittergourd, bottlegourd, carrot, radish etc. are not available since 2014-15. As a result, for 2011-12 to 2013-14, the value of output has been shown against these items, while from 2014-15 to 2016-17, these were included in output of 'other vegetables'. Subsequently, from 2017-18 onwards, separate output for these items have been computed as separate price data were made available.
- 2.7.3. In few cases, although major data source for production of an item is MoAgFW, the respective State/UT DES report both production and price, if quantum of production is relatively small. In such cases, the estimated output may get reported separately for these items for few years.
- 2.7.4. Where output of items is computed using residual approach, there is a possibility of negative value of production of such items. In such cases, value of output has been estimated as 'zero'.

2.7.5. In few cases, the current price estimates of value of output at all India level are less than those at constant prices due to higher prices in 2011-12 as compared to current year prices. For example, nutmegs, cloves, castor, cherry, pear, peach, nuts and dry fruits, guar seed, rubber etc.

2.7.6. At state level also, there are few instances where the current price estimates of GVO are less than those of constant price estimates in respect of some of the crops in minor producing States. This is mainly because of decline in prices during the recent years.

2.8. For the year 2020-21, separate data for Ladakh & Jammu & Kashmir UT is not available for all the items. So, value of output of Jammu & Kashmir State (combined for both UTs) is provided in all tables for all the years. Also, value of output of Daman & Diu and Dadar & Nagar Haveli UTs for the year 2020-21 has been combined.

### 3. Salient Features and Summary Results

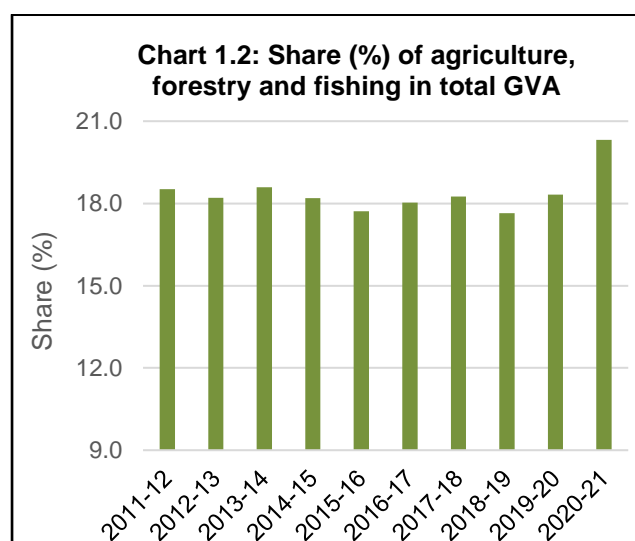

3.1. India ranks second worldwide in arable land (156.07 million hectares); third in production of cereals; second in groundnut, fruits, vegetables, sugarcane, tea; and first in jute. Worldwide as of 2019, the country had the largest herds of buffaloes, goats; and ranked second in cattle, sheep; and seventh in chicken population. It is the largest producer of milk; third in production of eggs and fifth in production of meat<sup>1</sup>.

3.2. Agriculture, forestry and fishing accounted for 20.3% of the GVA at current basic prices in 2020-21. However, the share of this sector in overall GVA of the country is showing a fluctuating trend over the years.

**Table 1: Share of agriculture, forestry and fishing in GVA at current basic prices<sup>2</sup>**

(₹ '000 Crore)

Year	GVA at current basic prices		% share
	Entire economy	Agriculture, forestry and fishing	
2011-12	8,107	1,502	18.5
2012-13	9,203	1,675	18.2
2013-14	10,363	1,926	18.6
2014-15	11,504	2,094	18.2
2015-16	12,574	2,228	17.7
2016-17	13,965	2,519	18.0
2017-18	15,506	2,830	18.3
2018-19	17,175	3,030	17.6
2019-20	18,381	3,368	18.3
2020-21	18,189	3,695	20.3

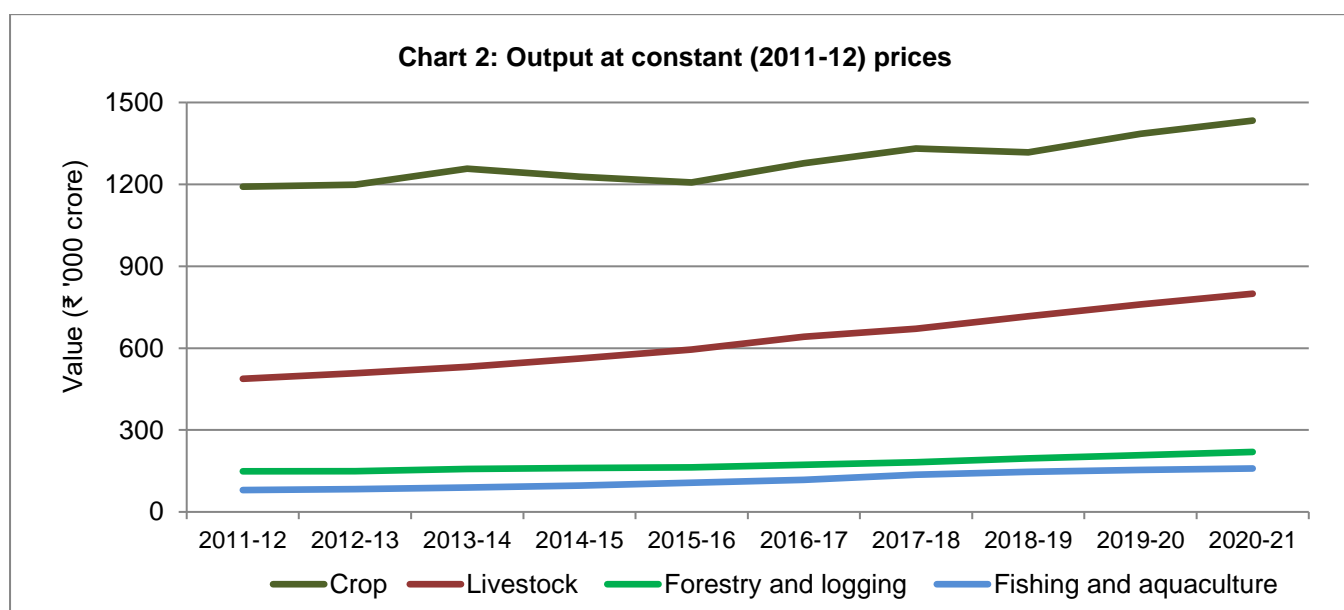

<sup>1</sup>Table 6.2: India's Position in World Agriculture in 2019, Agricultural Statistics at a Glance, 2021, MoAgFW.

<sup>2</sup>Statement 4.1B, Press note on first revised estimates of national income, consumption expenditure, saving and capital formation for 2021-22 released on 28<sup>th</sup> Feb., 2023

3.3. Table 2 below presents the GVO at constant (2011-12) prices of the four main sub-sectors, namely crop, livestock, forestry & logging and fishing & aquaculture which together are called as agriculture and allied sectors. It may be perused that the crops sub-sector accounted for 62.4% of the agriculture and allied sectors in 2011-12, which has gradually come down to 54.9% in 2020-21.

**Table 2: Output at constant (2011-12) prices**

(₹ '000 crore)										
Item	2011-12	2012-13	2013-14	2014-15	2015-16	2016-17	2017-18	2018-19	2019-20	2020-21
Crop	1,191	1,199	1,257	1,228	1,207	1,278	1,332	1,318	1,386	1,434
Livestock	488	508	531	562	595	641	671	717	760	799
Forestry and logging	149	149	158	161	164	173	182	196	208	220
Fishing and aquaculture	80	84	90	97	107	118	136	147	153	159
Agriculture, forestry and fishing (excluding irrigation)	1,908	1,940	2,036	2,048	2,072	2,209	2,321	2,378	2,507	2,612
Crop as % to agriculture, forestry and fishing	62.4	61.8	61.8	60.0	58.2	57.8	57.4	55.4	55.3	54.9

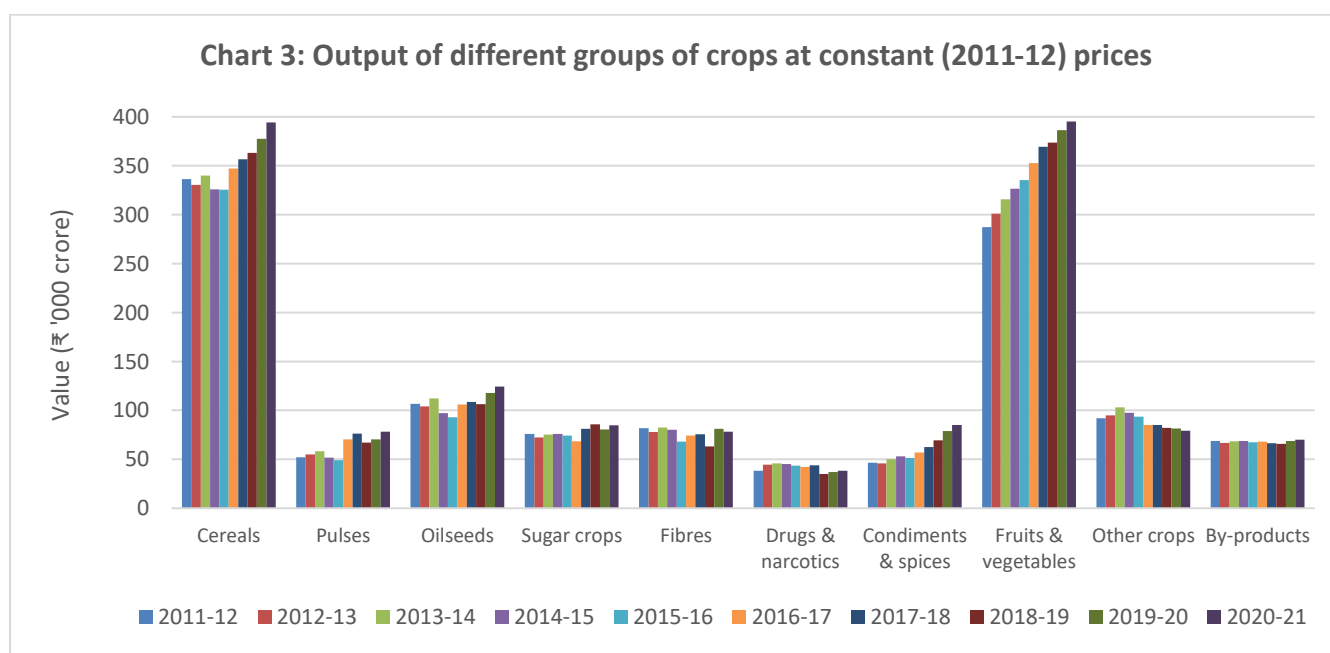

3.4. Since crops account for nearly 55% of the output of agriculture and allied sectors, GVO of crops is now being presented after dividing them into 12 similar groups, namely (i) cereals, (ii) pulses, (iii) oilseeds, (iv) sugars, (v) fibres, (vi) indigo, dyes and tanning materials, (vii) drugs and narcotics, (viii) condiments and spices, (ix) fruits and vegetables, (x) other crops, (xi) by-products and (xii) kitchen garden. Table 3 shows the GVO of these groups of crops at constant (2011-12) prices. A pictorial representation of the same has been provided at chart 3. Two smallest groups, namely indigo, dyes and tanning materials

and kitchen garden have been excluded from the chart owing to their too relatively miniscule contributions to be meaningfully visible in the chart.

**Table 3: GVO of different groups of crops at constant (2011-12) prices and percentage share of each group of crops in 2011-12 and 2020-21**

Crop-group	% share 2011-12	GVO (₹ '000 crore)										% share 2020-21
		2011-12	2012-13	2013-14	2014-15	2015-16	2016-17	2017-18	2018-19	2019-20	2020-21	
Cereals	28.2	336.4	330.5	340.0	325.9	325.6	347.2	356.8	363.3	377.6	394.1	27.5
Pulses	4.4	52.2	55.0	58.1	51.6	49.1	70.3	76.1	67.0	70.3	78.2	5.5
Oilseeds	9.0	106.7	104.1	112.4	97.3	93.0	106.1	108.8	106.5	117.7	124.2	8.7
Sugar crops	6.4	76.0	72.3	75.2	75.9	74.2	68.3	81.1	85.9	80.7	84.8	5.9
Fibres	6.9	81.9	78.0	82.5	80.2	68.1	74.4	75.5	63.2	81.0	78.4	5.5
Indigo, dyes & tanning material	0.0	0.1	0.1	0.1	0.1	0.1	0.1	0.1	0.1	0.1	0.1	0.0
Drugs & narcotics	3.2	38.5	44.6	45.7	45.3	43.5	42.2	43.8	35.2	36.9	38.3	2.7
Condiments & spices	3.9	46.4	45.8	50.0	53.0	51.5	56.9	62.6	69.3	78.8	85.1	5.9
Fruits & vegetables	24.1	287.4	301.1	315.9	326.6	335.3	352.9	369.5	373.6	386.3	395.1	27.6
Other crops	7.7	92.0	94.8	103.1	97.6	93.6	85.2	85.0	82.1	81.6	79.3	5.5
By-products	5.8	68.9	66.9	68.6	68.8	67.3	68.2	66.5	65.7	68.7	70.0	4.9
Kitchen garden	0.4	5.1	5.4	5.5	5.7	5.6	5.9	6.1	6.0	6.0	5.9	0.4
<b>Crops</b>	<b>100.0</b>	<b>1191.5</b>	<b>1198.6</b>	<b>1257.1</b>	<b>1228.0</b>	<b>1206.7</b>	<b>1277.5</b>	<b>1331.8</b>	<b>1317.8</b>	<b>1385.8</b>	<b>1433.6</b>	<b>100.0</b>

3.5. It is clearly visible from Table 3 and Chart 3 that 'cereals' and 'fruits and vegetables' (two largest groups of crops) together accounted for more than 52% of sector in 2011-12, and increased to nearly 55% in 2020-21.

3.6. As a group, GVO of cereals, at ₹336.4 thousand crore, was highest among all the crop-groups in 2011-12. However, in 2020-21, GVO of 'fruits and vegetables' was ₹395.1 thousand crore, about ₹1 thousand crore higher than that of cereals.

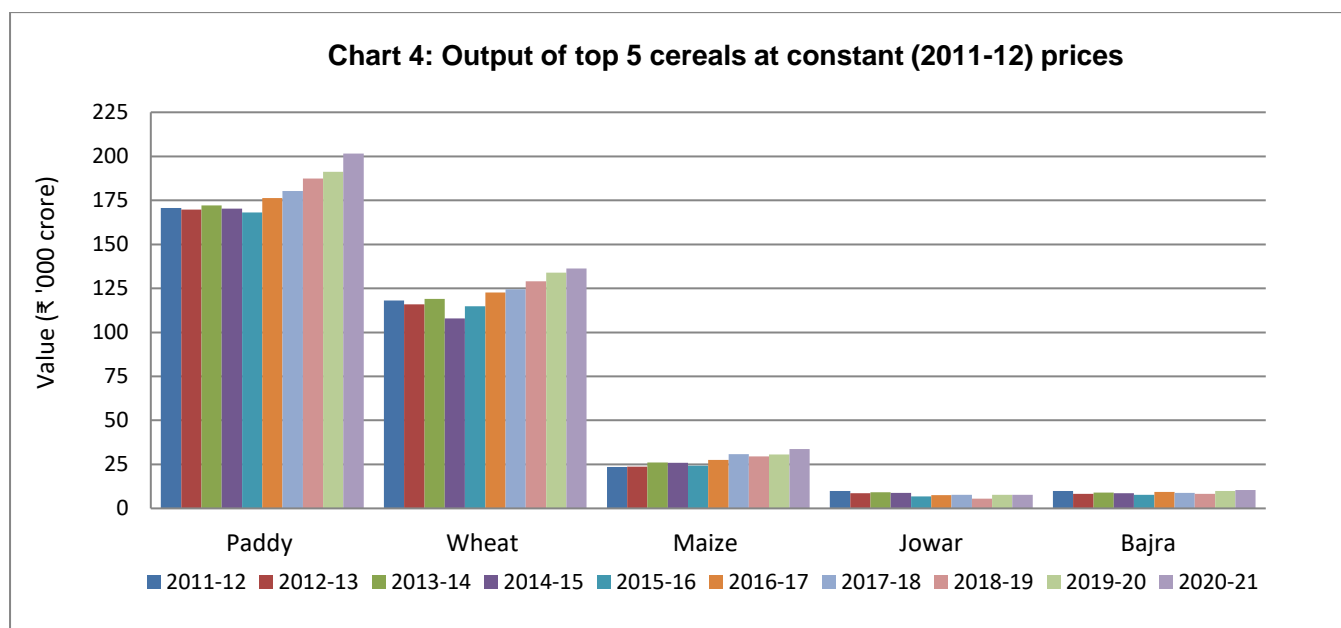

3.7. The GVO of few groups of crops, namely, 'fibres', 'drugs and narcotics', and 'other crops' have marginally reduced in 2020-21 compared to 2011-12.

3.8. Table 4 and Chart 4 show the GVO of five top-most items in cereals group. On expected lines, GVO of paddy (₹170.6 thousand crore in 2011-12 and ₹201.6 thousand crore in 2020-21) was the highest in all the years, followed by that of wheat (₹118.1 thousand crore in 2011-12 and ₹136.2 thousand crore in 2020-21).

**Table 4: Output of top 5 cereals at constant (2011-12) prices**

Item	% share 2011-12	GVO (₹ '000 crore)										% share 2020-21
		2011-12	2012-13	2013-14	2014-15	2015-16	2016-17	2017-18	2018-19	2019-20	2020-21	
Paddy	50.7	170.6	169.8	172.1	170.3	168.0	176.2	180.3	187.3	191.2	201.6	51.2

**Chart 4: Output of top 5 cereals at constant (2011-12) prices**

3.9. State-wise output of cereals for top-5 States have been presented in Table 5 and Chart 5 below. Uttar Pradesh recorded the highest output of cereals in all the years, although its share in all India output has marginally decreased from 18.6% in 2011-12 to 18.3% in 2020-21. The share of Madhya Pradesh has gone up considerably from 6.2% in 2011-12 to 8.9% in 2020-21.

**Table 5: Output of cereals at constant (2011-12) prices: top 5 States**

State	% share 2011-12	GVO (₹ '000 crore)										% share 2020-21
		2011-12	2012-13	2013-14	2014-15	2015-16	2016-17	2017-18	2018-19	2019-20	2020-21	
Madhya Pradesh	6.2	20.9	24.0	23.7	31.1	32.7	34.9	32.6	33.9	37.8	35.2	8.9
West Bengal	6.9	23.2	23.8	24.4	23.7	25.5	24.5	23.8	26.4	26.3	27.7	7.0
Haryana	7.8	26.1	23.6	24.8	23.3	23.9	24.4	22.9	25.3	25.0	25.5	6.5
Punjab	12.0	40.3	40.8	42.0	38.4	40.8	40.9	45.7	45.2	42.7	45.1	11.4
Uttar Pradesh	18.6	62.6	63.0	62.9	50.0	53.8	62.1	63.7	68.3	69.9	72.3	18.3
<b>All India</b>	<b>100.0</b>	<b>336.4</b>	<b>330.5</b>	<b>340.0</b>	<b>325.9</b>	<b>325.6</b>	<b>347.2</b>	<b>356.8</b>	<b>363.3</b>	<b>377.6</b>	<b>394.1</b>	<b>100.0</b>

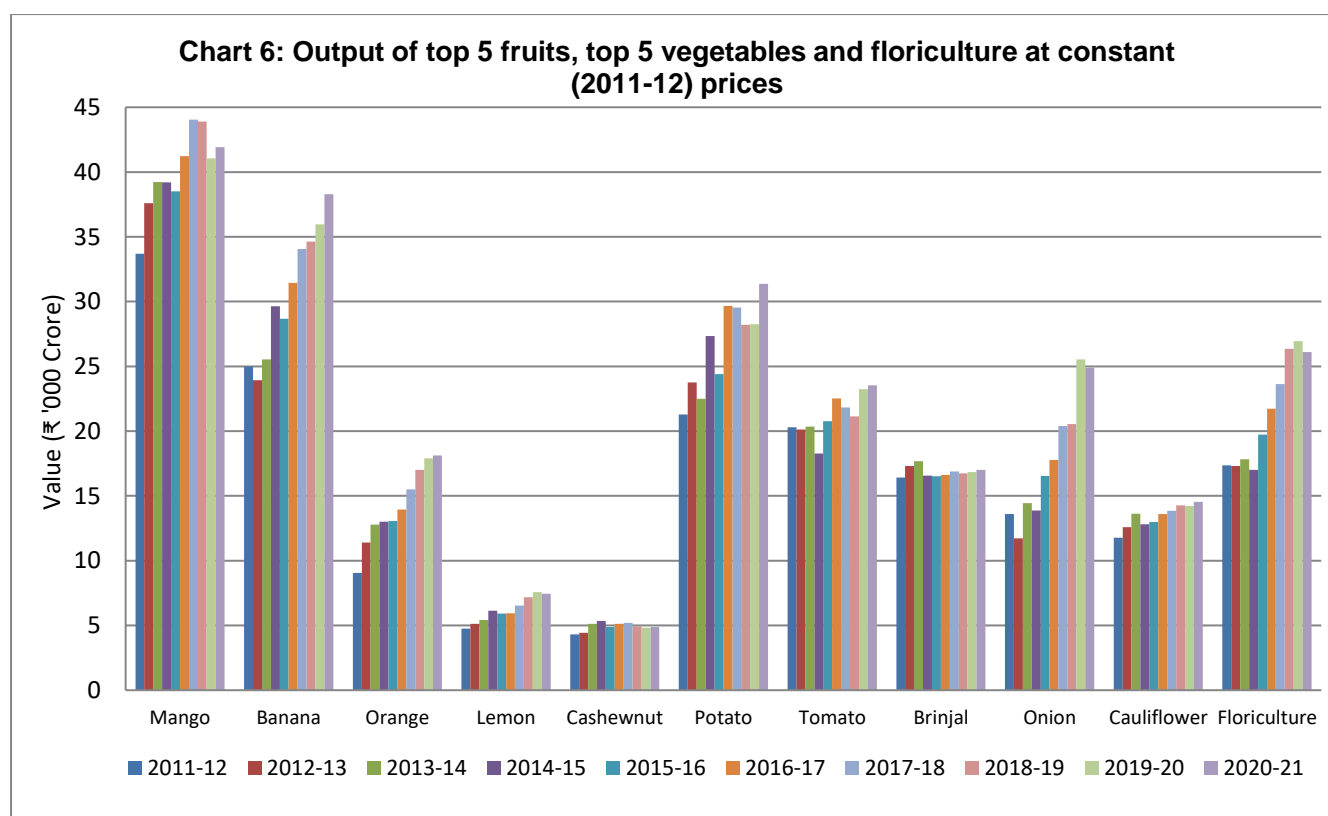

3.10. During 2011-12 to 2020-21, there has been a steady growth in the real output of 'fruits & vegetables', which has increased from ₹287.4 thousand crore in 2011-12 to nearly ₹395 thousand crore in 2020-21 at constant (2011-12) prices. The 'fruits and vegetables' group comprises of fruits, vegetables and floriculture. Among the fruits, output was highest for mangoes, followed by that of banana. Together, it accounted for more than one fifth of output of the entire group. Among the vegetables, potato and tomato together contributed highest production, accounting for about 14% output of the group.

Floriculture accounted for about 7% of the output of this group. Table 6 and Chart 6 below have been presented to show the output of top 5 fruits, top 5 vegetables and floriculture.

**Table 6: Output of top 5 fruits, top 5 vegetables & floriculture at constant (2011-12) prices**

	Item	% share 2011-12	GVO (₹ '000 crore)										% share 2020-21
			2011-12	2012-13	2013-14	2014-15	2015-16	2016-17	2017-18	2018-19	2019-20	2020-21

3.11. The inter-se position of different States in output of fruits and vegetables has changed during 2011-12 to 2020-21. Table 7 and Chart 7 below depict all the 7 States which were in the top-5 either in 2011-12 (the base year) or 2020-21 (the latest year for which this brochure has been prepared). Although West Bengal has reported the highest output in fruits and vegetables in all these years, its share in all India output has reduced from 13.9% in 2011-12 to 11.7% in 2020-21. On the other hand, Madhya Pradesh and Andhra Pradesh increased their output during this period to claim the second and fifth spots in 2020-21. The total share of Tamil Nadu and Gujarat in all India output has reduced in 2020-21 compared to that in 2011-12.

**Table 7: Output of fruits & vegetables at constant (2011-12) prices: top 5 States**

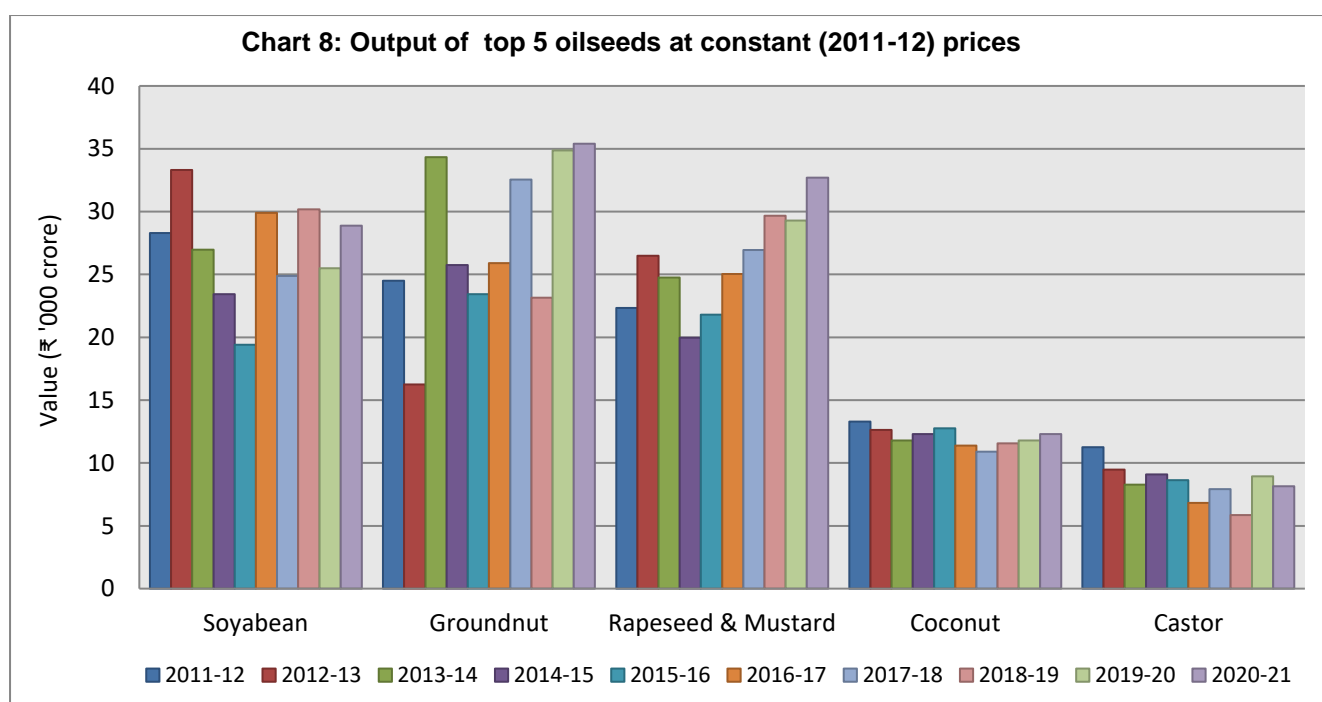

State	% share 2011-12	GVO (₹ '000 crore)										% share 2020-21
		2011-12	2012-13	2013-14	2014-15	2015-16	2016-17	2017-18	2018-19	2019-20	2020-21	
West Bengal	13.9	40.1	41.7	39.5	43.8	42.1	44.7	46.6	45.9	45.0	46.2	11.7
Maharashtra	10.4	29.8	29.4	39.0	31.7	30.5	32.8	37.2	33.9	38.1	38.0	9.6

<b>All India</b>	<b>100.0</b>	<b>287.4</b>	<b>301.1</b>	<b>315.9</b>	<b>326.6</b>	<b>335.3</b>	<b>352.9</b>	<b>369.5</b>	<b>373.6</b>	<b>386.3</b>	<b>395.1</b>	<b>100.0</b>

3.12. Groundnut and soyabean accounted for highest outputs in the 'oilseeds' group of crops in 2011-12 which was almost half of output of the group. In 2020-21, Groundnut and Rapeseed & Mustard have accounted for highest outputs (about 55%) in this group. Table 8 and Chart 8 below depict the output of top five items in the 'oilseeds' group of crops.

**Table 8: Output of top 5 oilseeds at constant (2011-12) prices**

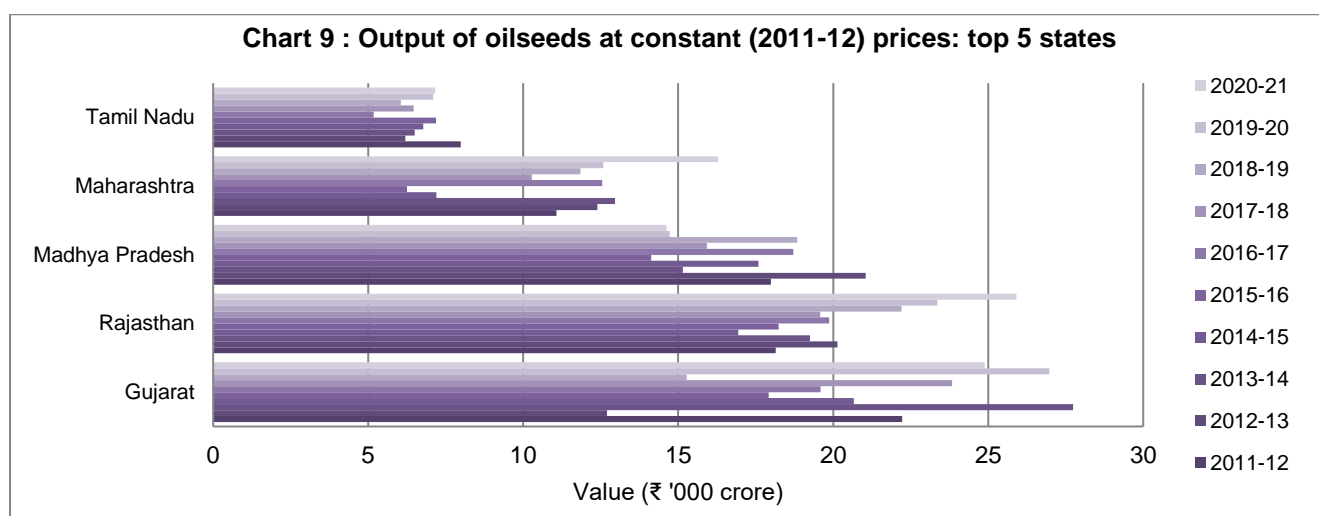

Item	% share 2011-12	GVO (₹ '000 crore)										% share 2020-21
		2011-12	2012-13	2013-14	2014-15	2015-16	2016-17	2017-18	2018-19	2019-20	2020-21	
Soyabean	26.5	28.3	33.3	27.0	23.4	19.4	29.9	24.9	30.2	25.5	28.9	23.2

3.13. Four States, namely Gujarat, Rajasthan, Madhya Pradesh and Maharashtra together accounted for nearly two third of all India output of Oilseeds. However, production in different years has not been uniform in all these States. For example, owing to fall in production of groundnut, the output of oilseeds in Gujarat was lower in 2012-13 compared to the previous as well subsequent yearly output of the State.

**Table 9: Output of oilseeds at constant (2011-12) prices: top 5 States**

State	% share 2011-12	GVO (₹ '000 crore)										% share 2020-21

3.14. During 2011-12 to 2020-21, the output of 'fibre' group of crops has reduced from about ₹82 thousand crore in 2011-12 to about ₹78 thousand crore in 2020-21 at constant prices. Kapas accounted for nearly 95% of output of 'fibre' crops. During this period, the output of kapas was lowest in 2018-19 (₹59 thousand crore). The output of jute is slightly reduced over the past years after 2011-12.

**Table 10: Output of fibres at constant (2011-12) prices**

Item	% share 2011-12	GVO (₹ '000 crore)										% share 2020-21
		2011-12	2012-13	2013-14	2014-15	2015-16	2016-17	2017-18	2018-19	2019-20	2020-21	
Kapas	94.5	77.4	73.7	77.9	75.8	64.0	70.1	71.6	59.3	77.1	74.6	95.2

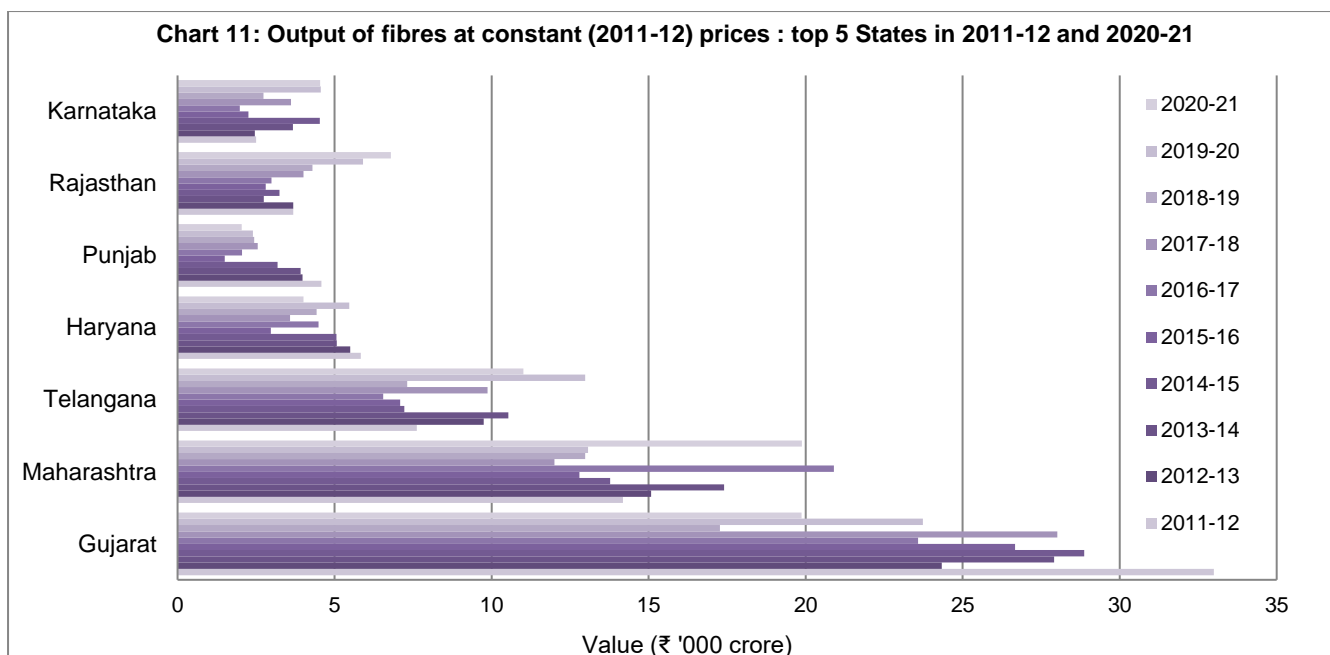

**Chart 10: Output of fibres at constant (2011-12) prices**

3.15. The inter-se position of different States in output of fibres has changed during 2011-12 to 2020-21. Table 11 and Chart 11 below depict all the 7 States which were in the top-5 either in 2011-12 (the base year) or 2020-21 (the latest year for which this brochure has been prepared). Although Gujarat has reported the highest output in fibres in all these years, its share in all India output has reduced from 40.3% in 2011-12 to 25.4% in 2020-21. On the other hand, Rajasthan and Karnataka increased their output during this period to claim the fourth and fifth spot in 2020-21. The total share of Haryana and Punjab in all India output has reduced in 2020-21 compared to that in 2011-12.

**Table 11: Output of fibres at constant (2011-12) prices: top 5 States in 2011-12 and 2020-21**

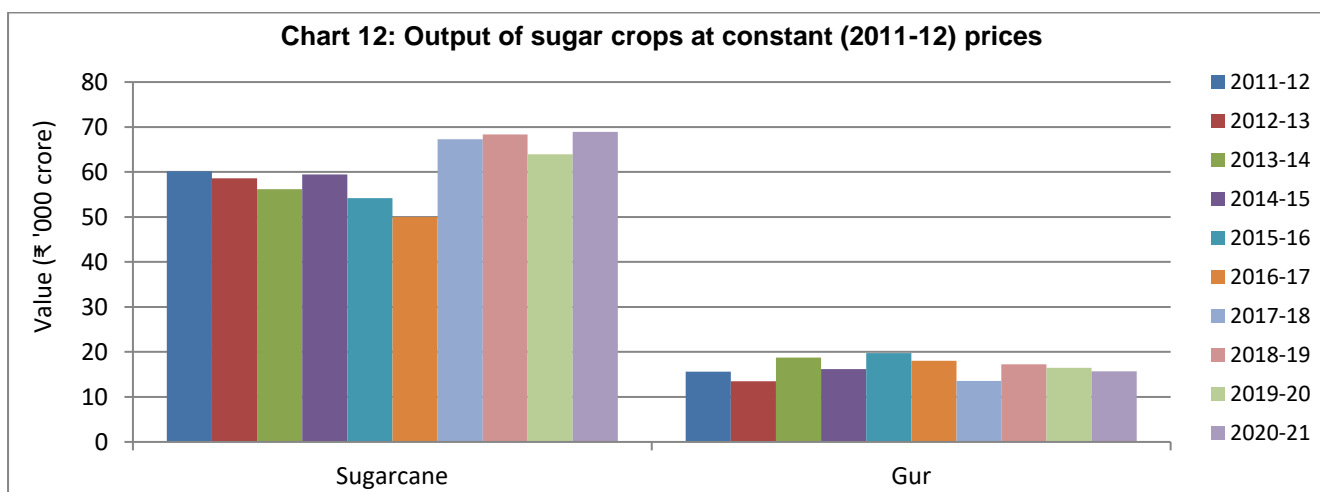

State	% share 2011-12	GVO (₹ '000 crore)										% share 2020-21
		2011-12	2012-13	2013-14	2014-15	2015-16	2016-17	2017-18	2018-19	2019-20	2020-21	
Gujarat	40.3	33.0	24.3	27.9	28.9	26.7	23.6	28.0	17.3	23.7	19.9	25.4

3.16. Sugarcane, excluding 'sugarcane used for gur making', accounted for nearly 79% of the output of 'sugars' group of crops in 2011-12. However, its share in this group increased to about 81% in 2020-21. The output of sugarcane (excluding that used for gur making) and the output of gur fluctuated during this period.

**Table 12: Output of sugar crops at constant (2011-12) prices**

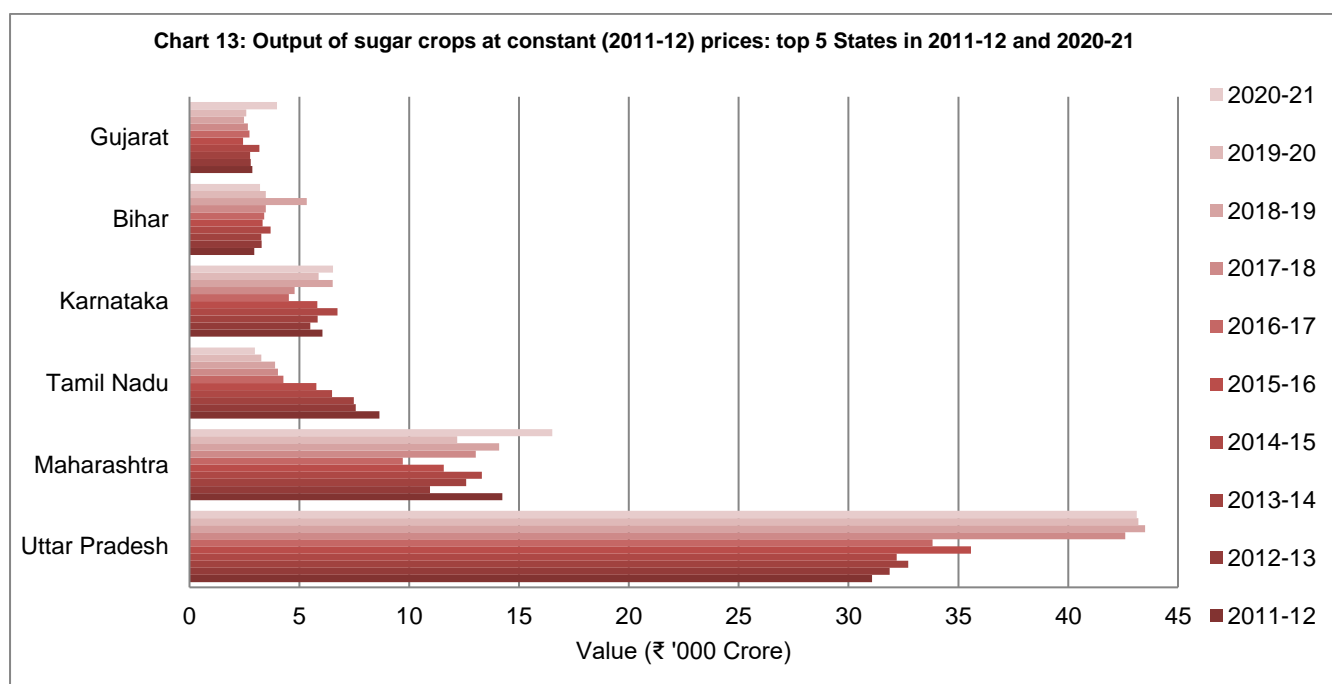

Item	% share 2011-12	GVO (₹ '000 crore)										% share 2020-21

3.18. The output of 'pulses' in 2020-21 was above ₹78 thousand crore, substantially higher than the output of pulses in 2011-12 (about ₹52 thousand crore). Gram and arhar together accounted for nearly 63% of the output of 'pulses' group of crops in 2020-21. These two, together with urd, moong and masoor, comprise more than 90% of the output of pulses. Table 14 and Chart 14 below give the output of these crops.

**Table 14: Output of top 5 pulses at constant (2011-12) prices**

3.20. The output of 'livestock' sub-sector increased steadily during the period 2011-12 to 2020-21. During this period, the output of milk, meat and eggs also recorded an increasing trend. The share of milk, meat and eggs in output of livestock sub-sector was 66.8%, 23.2% and 3.6% respectively in 2020-21, compared to 67.2%, 19.7% and 3.4% respectively in the base year 2011-12.

**Table 16: Output of livestock products at constant (2011-12) prices**

3.22. It may be recalled that estimates of output for forestry and logging sub-sector depends on the latest data available in the ISFR. The output of this sub-sector has shown an increase during 2011-12 to 2020-21. Within this sub-sector, the share of industrial wood has increased during this period. Output of industrial wood increased from ₹74.3 thousand crore to ₹148 thousand crore. The percentage share of value of output from industrial wood, fuelwood and NTFP to total value of output of forestry sector is about 67%, 21% and 12% respectively in 2020-21 as compared to 50%, 32% and 18% respectively in the year 2011-12.

**Table 18: Output of forest products at constant (2011-12) prices**

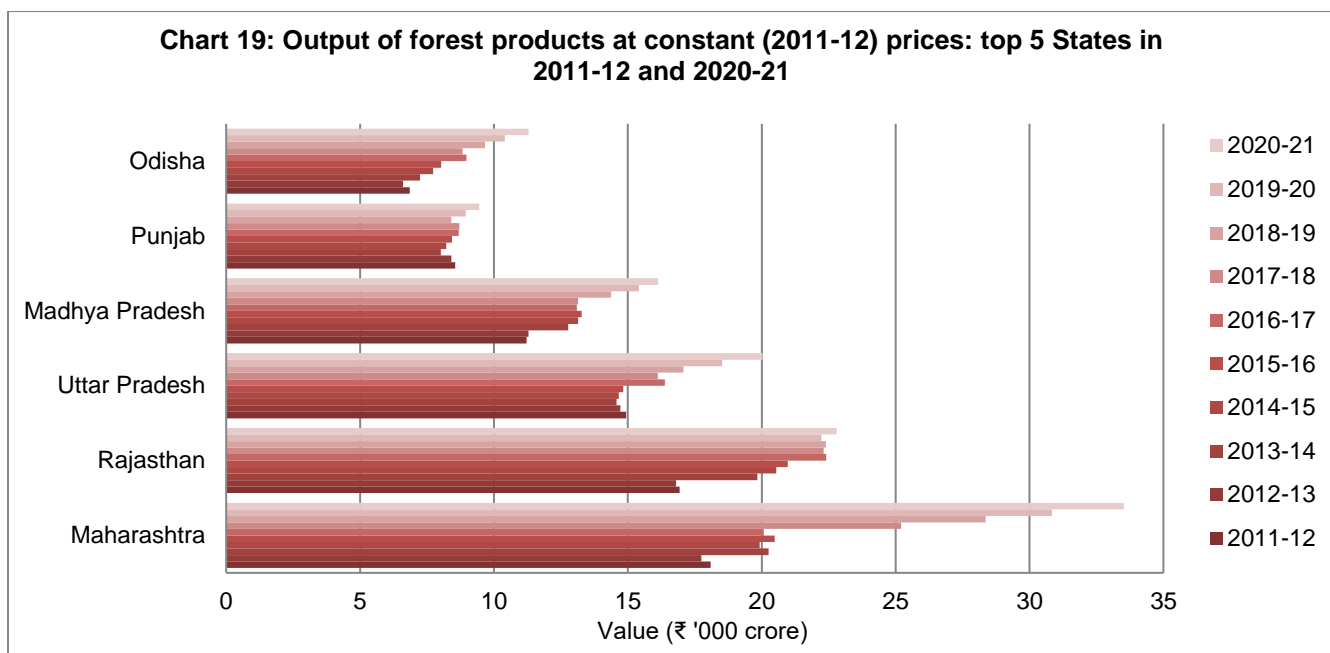

Item	% share 2011-12	GVO (₹ '000 crore)										% share 2020-21
		2011-12	2012-13	2013-14	2014-15	2015-16	2016-17	2017-18	2018-19	2019-20	2020-21

3.23. The inter-se position of different States in output of forestry and logging sub-sector has changed during 2011-12 to 2020-21. Table 19 and Chart 19 below depict all the 6 States which were in the top-5 either in 2011-12 (the base year) or 2020-21 (the latest year for which this brochure has been prepared). Maharashtra and Rajasthan have together accounted for almost a quarter of output of forestry and logging sub-sector. Odisha has increased its output during this period to claim the fifth spot in 2020-21 and the total share of Punjab in all India output has reduced in 2020-21 as compared to that in 2011-12.

**Table 19: Output of forest products at constant (2011-12) prices: top 5 States in 2011-12 and 2020-21**

3.24. The output of fishing and aquaculture sub-sector increased steadily from about ₹80 thousand crore in 2011-12 to about ₹159 thousand crore in 2020-21. The output of inland and marine fishing activities is given in Table 20 and Chart 20 below. It may be noted that output of marine fishing includes entire output of prawn, be it inland or marine.

**Table 20: Output of fishing and aquaculture at constant (2011-12) prices**

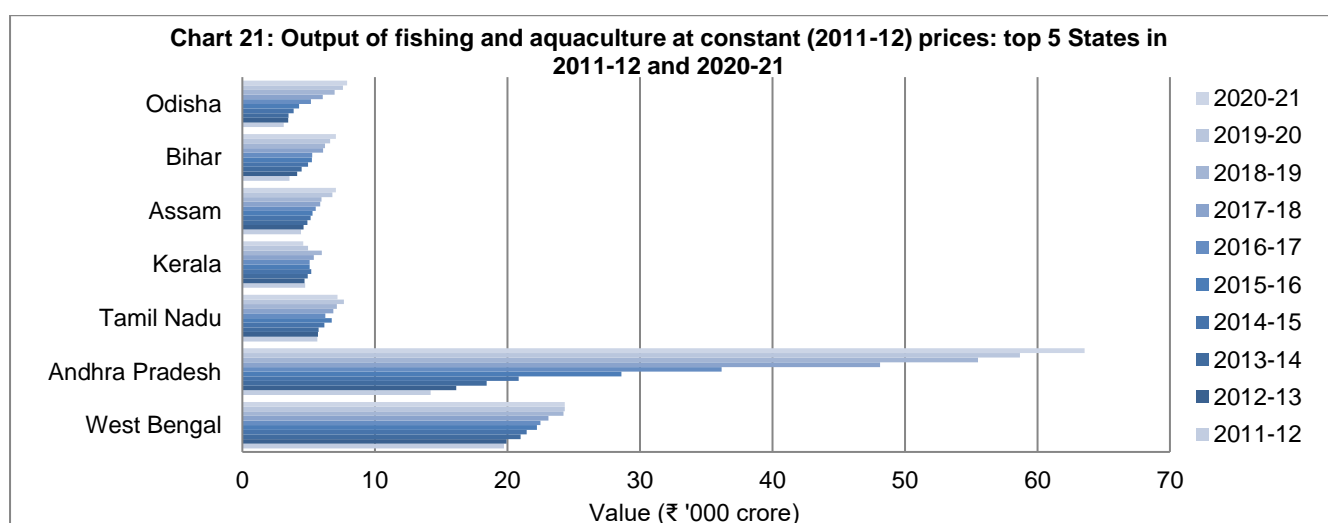

Item	% share 2011-12	GVO (₹ '000 crore)										% share 2020-21
		2011-12	2012-13	2013-14	2014-15	2015-16	2016-17	2017-18	2018-19	2019-20	2020-21

3.25. The inter-se position of different States in output of fishing and aquaculture sub-sector has changed during 2011-12 to 2020-21. Table 21 and Chart 21 below depict all the 7 States which were in the top-5 either in 2011-12 (the base year) or 2020-21 (the latest year for which this brochure has been prepared). West Bengal has reported the increasing output in fishing and aquaculture sub-sector in all these years, yet its share in all India output has reduced from 24.6% in 2011-12 to 15.3% in 2020-21. On the other hand, Odisha and Bihar increased their output during this period to claim the third and fifth spots in 2020-21. The total share of Assam and Kerala in all India output has reduced in 2020-21 compared to that in 2011-12. Andhra Pradesh recorded large increase in output of fishing and aquaculture during the period 2015-16 to 2020-21. Accordingly, its share in all-India output increased from 17.7% in 2011-12 to 40% in 2020-21.
