ENSURE REGISTRATION OF EVERY BIRTH AND DEATH

PREFACE

Birth and Deaths are the two most important vital events that define life of an individual. Not only do they describe the legal existence of an individual, registration of these events is a primary source of vital data of the population to which they belong. Civil Registration is a continuous, permanent, compulsory recording of the occurrence and characteristics of vital events, like births, deaths and still births. These vital statistics are invaluable for planning, monitoring and evaluating various programmes related to primary health care, family planning, maternal and child health, education etc. Nevertheless, information collected through registration process about vital events provides useful and important statistics.

2. This issue of the Report on 'Vital Statistics of India based on the Civil Registration System' for the year 2019 provides an overview of the working of the Civil Registration System (CRS) in the country and presents a compilation of data on registered births, deaths, infant deaths and still births with rural-urban & sex-wise break-up and sex ratio at birth based on Civil Registration Records. Ideally, an Annual Report on vital statistics containing more detailed information should have been brought out. However, due to limited availability of information contained in the Annual Reports of some of the States, the report for the year 2019 containing key information of events pertaining to the time period 1st January 2019 to 31st December 2019 has been brought out for the convenience of users. An attempt has been made to present more detailed analysis as compared to previous Reports.

3. The publication is divided into two parts. Part I provides a brief review of the Civil Registration System and contains a summary analysis of data on registered births, deaths, infant deaths and sex ratio at birth at State level. Apart from this, need was felt to revise the Level of Registration of Births and Deaths, as new population projections based on Census 2011 has been released by the National Commission on Population. Accordingly, the revised figures for Level of Registration of Births & Deaths for the years 2011-2018 for States/Union territories and India has been duly included in the report. Part II consist of the main tables which provide State and District-wise data on registered births, deaths, infant deaths and still births with rural-urban & sex-wise break-up.

4. The data source for the report is the statutory Annual Statistical Report prepared by the Chief Registrars of Births & Deaths of States/UTs. I take this opportunity to express my sincere gratitude to all the Chief Registrars of Births & Deaths of various States/UTs for their kind co-operation in providing the requisite information in short time. I am thankful to each one of them for their invaluable cooperation. I am hopeful for the similar response from the states/UTs in future also. I am very positive that, more dynamic implementation of the provisions the RBD Act-1969 shall help reduce the time gap and establish this as a reliable source of information on the Birth and Death registration in country.

5. The report has been prepared by the CRS Section of this office. I would like to place on record my appreciation for the efforts put in by all the officers and staff working in the CRS Section of the Office of the Registrar General and the Officers/Staff connected with the Civil Registration system in the States/UTs.

Limitations

1. Level of Registration of States/UTs and India level presented in the report are arrived at using the Mid-Year Projected Population of respective States/UTs of from 2011-2019 based on 2011 census (Report of the Technical Group on Population Projections, July. 2020, National Commission on Population, Ministry of Health & Family Welfare) and therefore not comparable with rates presented in previous reports.

Civil Registration System (CRS) in India is the unified process of continuous, permanent, compulsory and universal recording of the vital events (births, deaths, still births) and characteristics thereof. The Registration of Births and Deaths Act, 1969 (Act No. 18 of 1969) provides for the compulsory registration of births and deaths. Civil Registration records are the best source of Vital Statistics. For the individual, records emanating from CRS provides her/his legal identity and access to the rights of a citizen including entitlements (social benefits provided by the Government). For the country, the requirement of a complete CRS system is a must as it has important administrative and statistical uses. Level of reporting: indicates the status of returns of registered births and deaths by the concerned Registrar within a State / UT during the year.

Level of Registration: The level of registration, defined as the percentage of registered births/deaths to the births/deaths estimated through SRS, determines the performance level of a State / Union territory with regard to functioning of Civil Registration System.

$$Level\ of\ Registration\ (LOR) = \frac{Number\ of\ events\ registered\ during\ the\ year}{Number\ of\ estimated\ events\ for\ the\ year} \times 100$$

$$Number\ of\ estimated\ events\ for\ a\ year = \quad Mid-year\ population\ \times SRS\ Rate$$

Mid-year Population: Population at the mid-point of the year, i.e., 1st July of the year provided by population projections based on 2011. (Source: Population Projections for India and States 2011–2036, Report of the Technical Group on Population Projections constituted by National Commission on Population, July. 2020)

$$Sex\ Ratio\ of\ Registered\ Birth\ = \frac{Number\ of\ female\ births\ registered\ during\ the\ year}{Number\ of\ male\ births\ registered\ during\ the\ year} \times 1000$$

Delayed Registered Birth events of more than one year have been duly deducted for arriving the sex ratio of Registered Birth

CHAPTER – I

CIVIL REGISTRATION SYSTEM - AN INTRODUCTION

1.1 The requirement for a complete and up to date Vital Statistical System to yield reliable data on vital events hardly needs any emphasis. These data are essential for socio-economic planning and development and also to evaluate the effective implementation of various public schemes and programs. The main sources of data on vital events in India are Civil Registration System (CRS), Sample Registration System (SRS) and Population Census. Though the Population Census is the main source of information on population and its characteristics; however, being a decennial exercise, it does not provide the measure of changes in population from year to year. The measures of fertility and mortality derived from Census are centered on the midpoint of the decade and as such do not provide yearly change in the population. Of the other two sources of vital statistics for getting the vital rates on a regular basis, the SRS has been designed to provide reliable estimates at National and State level. Robust estimates of vital rates at District level on an annual basis through sample survey are difficult to obtain on account of prohibitively large sample size and variety of resultant factors such as controlling of non-sampling errors etc. CRS is thus the only source for providing vital rates at district level. Rather, a complete CRS can provide these rates at all administrative levels.

1.2 The Civil Registration System (CRS) may be defined as a unified process of continuous, permanent, compulsory and universal recording of the vital events and characteristics thereof, as per legal requirements in the country. In India, the Civil Registration System covers registration of births and deaths. Civil registration system provides the best source of information on the vital rates at all levels. Ensuring cent percent coverage of vital events by registration machinery can help in getting the critical vital statistics, equally important for planning and research. Therefore, emphasis should also be given to the proper monitoring of the activities under the system. Civil registration system is considered to be complete if it covers 100 per cent of all births and deaths taking place within a country or area.

1.3 The registration records are primarily useful for their value as legal documents and secondarily as the source of vital statistics. Civil registration as a source of vital statistics is relatively less expensive, as the statistics generated from the registration records are the by-products of an essential administrative process. The registration records can also generate current and continuous statistics, which can be more accurate than any other method of data collection apart from being a continuous source of such data. However, the accuracy of the vital statistics obtained through the registration system depends much on the completeness and promptness with which events are registered and the correctness of the information in the registration records. The improvement in the system of registration of births and deaths is critically dependent on the importance given by the respective States and District administrations to this work and regular monitoring by them. Besides, the level of awareness among the general public about the utility of birth or death certificate is also equally and crucially important.

1.4 Vital statistics obtained through registration records at different administrative levels enable estimation of the size, structure and geographical distribution of the population except for migration. Vital statistics also enables the projections for coming years on the basis of probable trends of fertility and mortality as derived from these vital statistics and their interactions with social, economic and other demographic factors. The vital statistics data generated through an effective Civil Registration System is of immense use for formulation of various development and welfare programmes/ schemes

and increases their effectiveness at State and District level. The Civil Registration data acquires paramount importance in the wake of 73rd and 74th amendments to the constitution of India, as it can provide data at local level for micro level planning, monitoring and evaluation of schemes. At national level, the vital statistics data generated through Civil Registration is also quite useful for medical research and in the study of sex ratio, mortality and morbidity rates and also in the study of causes of deaths.

Registration of births and deaths in India

1.5 In India, the registration of births and deaths is carried out under provisions of the Registration of Births and Deaths (RBD) Act, 1969. The registration is done by the Registrar of the local area, appointed by concerned State/UT Government.

1.6 Provision for registration of births and deaths and the mechanism thereof had been in existence in India for more than a century. Earlier, the work of registration of birth and death was carried out under various laws and byelaws existing at that time in different parts of the country. The need for improvement in the vital statistics system was felt for long and, therefore, after detailed deliberations at various levels, the Registration of Births & Deaths Act, 1969 was enacted providing compulsory registration of births and deaths in India. Since then, this Act has been enforced uniformly across all the States and Union territories (UT). This Act provides for registration of births and deaths and publication of statistical reports annually based on the civil registration data. The enactment of this Act *has* provided a common framework for putting in place an effective system of registration of births and deaths in the country.

1.7 The registration work at various levels in States/UTs is performed by different Departments. The existing organizational set-up involved in the work of civil registration at various levels in different States/ UTs is given at **Annexure-A**. A uni-linear hierarchy exists in 11 States/ UTs where single department is involved at all levels of registration. In 9 States namely Assam, Chandigarh, Haryana, Lakshadweep, Meghalaya, Odisha, Punjab, Sikkim and A&N Islands; Health Department is involved at all levels of registration. Panchayat department in Kerala, and Local Administration Department in Puducherry are responsible for execution of this work at all levels. At present, Health Department supervises the civil registration work at State level in 21 States/ UTs, Department of Planning, Economics & Statistics in 13 States/ UTs, Department of Panchayats in Kerala and Local Administration Department in Puducherry.

1.8 In order to simplify and speed up the process of registration and to bring in uniformity in birth and death registration formats, the registration system was revamped in the year 2000. Under the revamped system, the procedure for registration of births and deaths was also modified to some extent and the forms were redesigned. Most of the tables that are to be part of the Annual Report of the Chief Registrars on registration of births and deaths under revamped system would be based on the information of place of usual residence of mother in case of births and place of usual residence of the deceased in case of deaths. The revamped system became operational in 2000 in all States/Union Territories except Assam, Arunachal Pradesh, Gujarat, Haryana, Himachal Pradesh, Jharkhand, Odisha, Punjab, Uttarakhand and Uttar Pradesh. It was implemented in Assam, Arunachal Pradesh and Odisha in 2001, Haryana in 2002, Himachal Pradesh, Uttarakhand and Uttar Pradesh in 2003, Gujarat and Punjab in 2004 and Jharkhand in 2009.

Statistical Reports

1.9 System of registration of births and deaths is constantly generating statistical information at the local level. The information contained in the reporting forms is consolidated by the Registrar for onward transmission to the Chief Registrar of Births & Deaths of concerned State/UT. The Chief Registrar of the States/UTs, who are the chief executive authorities for the activities on registration of Births and Deaths in the State/UT, are mandated to submit to the State Government Annual Report on Working of the Act in the State/UT along with the Statistical Report referred under section 19(2) on registered births and deaths for each year immediately following the year to which the report relates to. The Chief Registrars are also required to send a copy of these Reports to the Registrar General, India, Govt. of India.

1.10 Based on the Annual Reports prepared by the States/UTs, the Office of the Registrar General, India, brings out an annual comprehensive report entitled "Vital Statistics of India based on Civil Registration System". These reports have been brought out since 1958 (Before the enactment of Act, only statistical reports were brought out). However, some of the States are not bringing out their Annual Statistical Reports in time, and this in turn, delays the publication of the corresponding national report. It has also been observed that some States also do not include all the prescribed tables in their reports thereby creating a limitation while bringing out the national report. However, notwithstanding all these constraints, this report provides vital indicators including the District-wise registered births and deaths along with infant deaths with sex-wise and rural-urban break-up of registered events for the year 2019.

CHAPTER-II

ANNUAL REPORT FOR 2019 ON THE WORKING OF THE REGISTRATION OF BIRTHS AND DEATHS (RBD) ACT, 1969

2.1. **Annual report on the working of the Registration of Births and Deaths (RBD) Act, 1969**: Under the provision of Section 4 (4) of the Act, the Chief Registrars are required to submit an Annual Report on the working of the RBD Act to the respective State Governments. The Office of Registrar General of India consolidate/compile the working of said Act reports received from States/UTs and release working of RBD Act report at National level. The aforesaid statutory Annual Report for the year 2019 has been received from 35 States and UTs except State of Manipur.

2.2. **Registration Machinery:** Section 3 to 7 of the Registration of Births and Deaths (RBD)Act, 1969 provides for the appointment of Civil Registration System functionaries at all levels like:-

(i) National level:- Registrar General, India; section 3 of the RBD Act
(ii) State level:- Chief Registrar; section 4 of the Act
(iii) District level:- District Registrar/Additional District Registrar under Section 6 of the Act

(v) Sub-Registrar for specified area within the area under the jurisdiction of a Registrar under section 7 (5) of the Act.

The Central Government under section 3(1) of the RBD Act, 1969 appoints the Registrar General, India (RGI) at Central level who has been empowered under the said Act to take steps to coordinate and unify the activities of Chief Registrars of all States/Union territories and issues general directions regarding registration of births and deaths under section 3(3) of the Act. The work relating to Civil Registration in the office of the Registrar General, India is handled in the Vital Statistics Division.

The State Governments under section 4 (1) of the Act appoints Chief Registrar for the State/UT. The Chief Registrars under section 4 (3) of the said Act has been declared as the chief executive authority in the respective States/ UTs for implementing the provisions of RBD Act and the Rules and orders made thereunder. The State Government also appoints District Registrar of births and deaths for each revenue district under section 6 of the RBD Act. The actual work of registration of births and deaths in the field is carried out by the local Registrars, who are appointed under section 7 of the said Act.

There is a wide variation in the registration machinery across the country, details of which are given below:-

- The Chief Registrars of births and deaths in 18 States and 3 Union Territories are from the Health Department, in 10 States and 3 Union Territories are from Planning, Economics & Statistics Department, in 1 State (Kerala) from Panchayat Department and in remaining 1 UT (Puducherry) it is with Local Administration Department.
- The district level authorities are mainly divided among District Collectors/ District Magistrate (in 8 States and 1 UT), Chief Medical Officers/ District Medical and Health (in 12 States and 3 UT), District Statistical/ Planning Officers (in 4 States and 2 UT), Deputy Commissioner are appointed as District Registrar in 4 States and Deputy Director, Panchayat in 1 State and Dy. Director, local administration in 1 UT.

- At Rural level, the registration work is entrusted to the officials of Panchayat Department in 14 States and 3 UTs, Health Department in 10 States and 4 UTs, Revenue Department in 2 States, Education Department in 2 States and Police Department in 1 State. In urban areas, the Health Officer of Municipal Corporation / Municipalities etc. or in absence of such a post, the Executive Officer of the town administration functions as the Registrar of Births and Deaths

2.3. **Registration of Births and Deaths occurring to Indian Citizens abroad:** Under the provisions of Citizenship Act, 1955, the event of births and deaths of Indian Citizens occurring abroad are registered by the respective Indian Consulates. Under Rule 5 of Citizen's (Registration at Indian Consulates) Rules 1956, Consulates are statutorily required to send the annual returns of births and deaths of Indian Citizens to the O/o the RGI. It has been observed that requisite returns are not furnished by all Indian Consulates; such returns for the year 2019 have been received from 154 missions of 125 countries only, covering 46475 births and 7428 deaths. Out of total registered births at the various Indian missions during 2019, Embassy of Dubai in United Arab Emirates accounted for 22.67 % births, Embassy of Kuwait City in Kuwait 9.87%, Embassy of Abu Dhabi in United Arab Emirates 9.21% births and Embassy of Riyadh in Saudi Arabia 7.05% births. In case of total registered deaths at various missions, Embassy of Dubai in United Arab Emirates accounted for 18.98% deaths, Embassy of Riyadh in Saudi Arabia 17.08% deaths, Consulate General Jeddah in Saudi Arabia 14.59 % and Embassy of Kuwait City in Kuwait 9.52% deaths in 2019. Details of information furnished by the Indian Consulates/Missions are given in the Statement No. 26.

2.4. **Inter Departmental Coordination Committees (IDCC**): In order to resolve the operational problems and for proper implementation of the provisions of the RBD Act and the State Rules, coordination among the implementing departments is essentially required. On the other hand, the work of registration of births and deaths in most of the States/UTs is being done through the officials drawn from more than one department of the State Government/Union Territory Administration. The need for coordination between the stake holder departments is a precondition for effective functioning of the system in each of the State. In view of the above, the State level Inter-Departmental Coordination Committees (IDCCs) have been constituted in all States and Union Territories. In most of the States / UTs, IDCC committee is chaired by the Principal Secretary/Secretary of the Department from which the Chief Registrar belongs.

In order to formulate the strategies for further improvements in Civil Registration System and effective implementation of the provisions of the RBD Act in the respective State, it is desire to convene the meeting of such committee at least once in a year. However, it has been observed that despite persuasion of this office with the State Governments from time to time, such meetings have not being convened regularly by the most of the States/ UTs.

During 2019, such meetings were held in 17 States/UTs namely Bihar, Chhattisgarh, Gujarat, Haryana, Himachal Pradesh, Jammu & Kashmir, Karnataka, Maharashtra, Meghalaya, Mizoram, Odisha, Punjab, Rajasthan, Sikkim, Tamil Nadu, Uttar Pradesh and Chandigarh. Such Coordination Committees have also been set up at District and below district level (i.e. at Mandal and Taluka level in many States. However, the information on convening the regular meeting of District Level Coordination Committees (DLCCs) meetings and below district level meetings has not been received from all the States/UTs. The following information regarding district level and below district level meetings during 2019 has been provided by the Chief Registrars in the respective annual report of State/UT:-

At state level summary reports are being compiled through form No. 11, 12 and 13 for validation of data entry of births and deaths registered at local bodies / registration units. All tables are being generated through said web based application. All Gram Panchayats, municipalities and 3 municipal corporations have been covered under "e-Olakh" (GCRS). 3.11.1 Chart 7 and 8 respectively shows the sex-wise distribution of registered births and deaths for the major States (population of more than 1 Crore as per Census 2011). The data on birth registration reveals that the share of male registration is more than the female in almost all these major States. This gap is much wider for Rajasthan, Jharkhand, Madhya Pradesh, Gujarat, Jammu & Kashmir, Punjab and Assam. In case of Death Registration, the gap is wider almost in all major States viz. Haryana,

Rajasthan, Madhya Pradesh, Assam, Bihar, Uttarakhand and Andhra Pradesh. The State-wise figures have been provided in Statement 15.

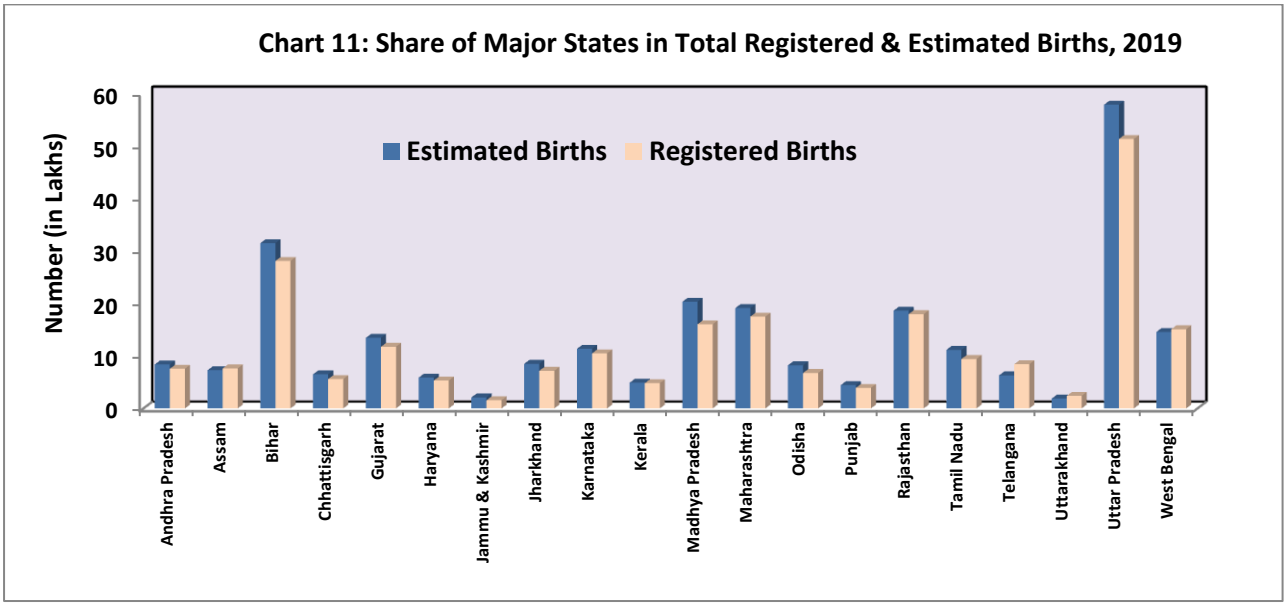
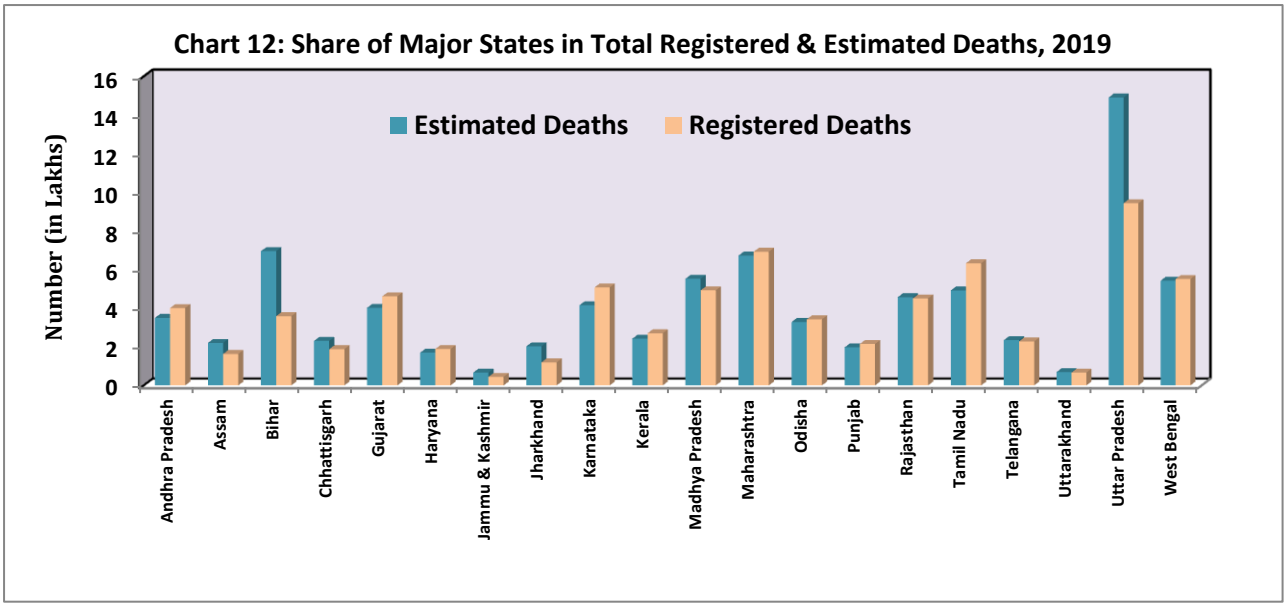
The States of West Bengal, Telangana, Assam and Uttarakhand have more number of registered births than estimated. Chart 11 shows the distribution of estimated and registered births respectively in major States.



3.13.2 Similarly for estimated and registered deaths, there is significant gap in estimated and registered deaths in, Uttar Pradesh, Bihar, Jharkhand, Madhya Pradesh, Assam, Chhattisgarh. Chart 12 shows the distribution of estimated and registered deaths in major States.



3.14 Medical attention received at the time of birth and death

3.14.1 The complete information for 2019 in respect of birth by type of medical attention received at the time of delivery has been reported from only 32 States/UTs. As partial information has been submitted by four States namely, Bihar, Jharkhand, Maharashtra and Sikkim, their data has not been taken into account while consolidating the data. The distribution of medical attention received at the time of birth for these States/UTs has been illustrated in Chart 13. While the data shows that majority of births have been occurred in an institution, either in Government or private hospitals. Institutional births occurred in about 81.2% of cases, 8.4% of the cases were attended by the Physicians/Nurse/Midwife. However, about 4.5% of the events are still attended by untrained Mid-wife/Dai and another 3.2% by others.

3.14.2 Complete information on Medical Attention received by deceased at the time of death has been received from 31 States/UTs. Four States namely Bihar, Jharkhand, Maharashtra and Sikkim have submitted only partial data and therefore their data has not been used to while consolidating the data. Also one State Haryana has not submitted the requisite information. Chart 14 represents the distribution of medical attention received by the deceased at the time of death. It is evident from Chart that 32.1% of the total registered deaths have occurred in institutions and is on a higher side than that of other places from where the deceased had received medical attention. About 14.4% of Registered Deaths were reported under Medical Attention Other than Institutions. About 3.0% of the total registered deaths during 2019 have received medical attention from qualified allopathic professional and practitioner of other system and 34.5% of deceased did not receive any medical attention at the time of death.

3.15 Infant Deaths

3.15.1 The infant deaths registered by place of occurrence (Rural /Urban) of the event for the year 2019 has been given in Statement 17. It may be observed that the share of rural area is only 24.5% while that of urban area is 75.5% in total registered infant deaths during the year. Non-registration of infant deaths in rural area is a cause of concern which may be due to non-reporting of infant deaths to the Registrars especially in case of domiciliary events. This figure is exclusive of returns of Jharkhand due to non-receipt of information from the State.

Statement 17: Percentage distribution of registered infant deaths by place of occurrence, 2019

Place of Occurrence	No. of Registered Deaths	No. of Registered Infant Deaths	% Share of Registered Infant Deaths by Place of Occurrence	% of Registered Infant Deaths to Total Registered Deaths

Urban	3157532	124806	75.5	4.0
Total	7641076	165257	100.0	2.2

Statement 18 gives the percentage distribution of sex wise infant deaths which reveals that the share of female deaths in total female deaths is slightly higher than the corresponding male figures.

Statement 18: Percentage distribution of infant deaths by sex, 2019

3.16 Still Births

3.16.1 The World Health Organisation (WHO) defines a still birth as a baby born with no signs of life at or after 28 weeks' gestation. Still birth, also known as foetal death, has been defined as *'death prior to the complete expulsion or extraction from its mother of a product of human conception, irrespective of the duration of pregnancy and which is not an induced termination of pregnancy. The death is indicated by the fact that after such expulsion or extraction, the fetus does not breathe or show any other evidence of life, such as beating of the heart, pulsation of the umbilical cord, or definite movement of voluntary muscles. Heartbeats are to be distinguished from transient cardiac contractions; respirations are to be distinguished from fleeting respiratory efforts or gasps.'*

3.16.2 Statement 19 presents still births registered by place of occurrence (Rural /Urban) of the event for the year 2019 and it may be observed that in total registered still births, share of rural registered still births is only 41.6% which may be due to poor netting of still births in rural areas. In urban areas, this share is about 58.4% which may be due to better netting of still births from medical institutions. This is based on registered events from 35 States/UTs. The data from one State namely Manipur is not available. State/UT-wise registered still births has been depicted in Table 4.

Statement 19: Still Births registered during 2019

Place of Occurrence	No. of Registered Still Births	% Share of Registered Still Births by Place of Occurrence
Rural	69093	41.6
Urban	96926	58.4
Total*	166019	100.0

**Sum of Rural and Urban may not match with Total as some of States have not supplied Rural-Urban breakup.*

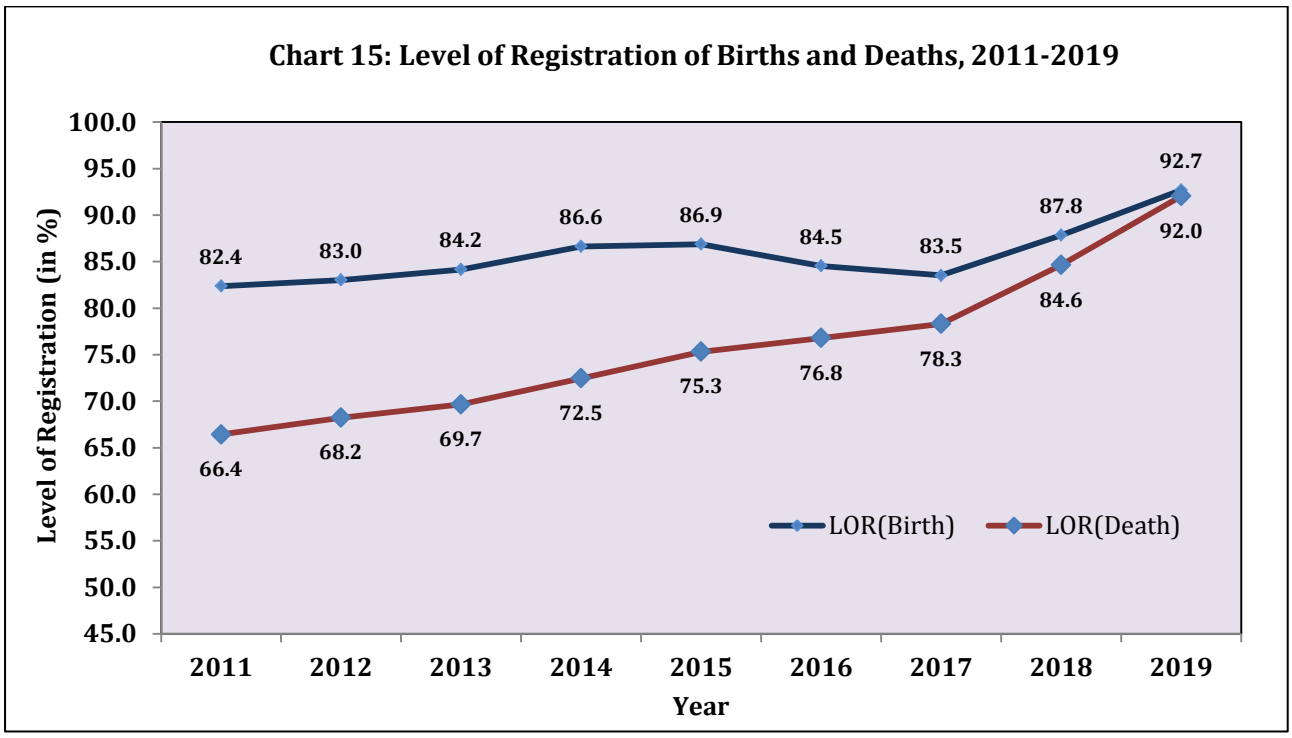
3.17 Analysis and Findings

Level of Registration (LOR)

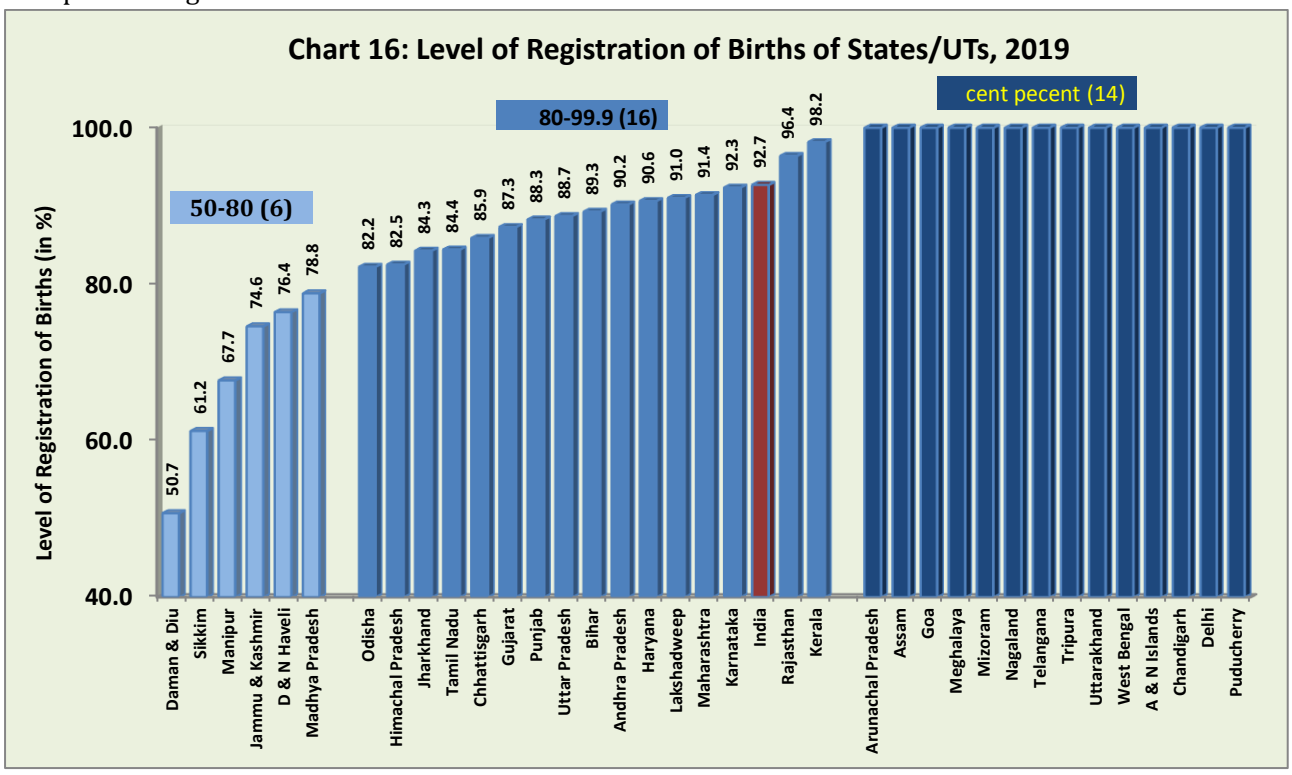
3.17.1 The level of registration, defined as the percentage of registered births/deaths to the births/deaths estimated through SRS, determines the performance of a State / Union Territory in registration of births and deaths. In the absence of reliable estimates of number of births and deaths on a year to year basis from any other source, the number of events as revealed from SRS is used to calculate the level of registration. The level of registration so calculated is very high for some of the smaller States/Union Territories either due to the lower estimates of vital events than the actual and due to the fact that SRS estimates of vital events are based on the place of usual residence while events are registered at the place of occurrence irrespective of the place of residence.

3.17.2 New population Projections for India and States 2011–2036 based on findings of the Technical Group on Population Projections constituted by National Commission on Population Expert were released recently and need was felt to revise the Level of Registration of Births and Deaths from 2011 onwards as Mid-year population is one of the vital constituents in calculation of Level of Registration. New Population Projections are more reliable and accurate as the earlier estimates were based on population census 2001. In the absence of any alternate reliable and single source to provide yearly intercensal yearly estimates for population of States/UTs and India previous versions of this report continued with the best available alternative. Now, as the new population projection report is released the figures for Level of Registration of Births & Deaths for the years 2011-2019 for States/Union territories and India has been duly revised and included in the report which are more accurate. One more constituent of Level of Registration is Sample Registration Survey's Rates (SRS) i.e Birth and Death Rates. As the survey for the year 2019 which was scheduled for 2020 could not be completed as was affected by spread of COVID-19 pandemic. For the calculation of Level of Registration for the year 2019, SRS rates for the year 2018 have been used. Due to revision of population, the data presented in this report for Level of Registration and Estimated Births and Deaths for the years 2011-2018 are not comparable with earlier reports.

3.17.3 Under this section Level of Registration of Births & Deaths are based on revised mid-year population as per the recently released projections based on census 2011 unless specified. The levels of registration of births and deaths for India and States/UTs for the period 2011 to 2019 are shown in Statements 20 and 21 respectively. The level of registration of births has increased to 92.7 in 2019 from 82.4% in 2011 i.e. in last 9 years an increase of about 10.3%. Similarly, the level of registration of deaths has also increased to 92.0% in 2019 from 66.4% in 2011, showing an increase of 25.6% over the last 9 years. Chart 15 depicts the trend in level of registration of births and deaths from 2011 to 2019. Due to continuous efforts of the States and UTs the gap between Levels of Birth and Death Registration is narrowing down with a difference of 0.7% observed in 2019.



3.17.4 Chart 16 gives the level of registration of births for India and States/UTs for the year 2019. There are 14 States/UTs namely Arunachal Pradesh, Assam, Goa, Meghalaya, Mizoram, Nagaland, Telangana, Tripura, Uttarakhand, West Bengal, A& N Islands, Chandigarh, Delhi and Puducherry which have recorded cent percent registration of births in 2019.



There are 16 States/UTs where level of Registration of Birth is above the India level of 92.7% , of which 6 are major States namely Rajasthan, Kerala, Assam, Telangana , Uttarakhand and West Bengal. Among the Major States which are below the India Level, 12 States namely Odisha, Jharkhand, Tamil Nadu, Chhattisgarh, Gujarat, Punjab, Uttar Pradesh, Bihar, Andhra Pradesh, Haryana, Maharashtra and Karnataka are having the Level of Registration of Births above 80 Percent. While 2 Major States namely Madhya Pradesh and Jammu & Kashmir are below 80% level.

3.17.5 Statement 20 reveals that the States/UTs continue to function at different levels of registration during 2011-2019.
