ENSURE REGISTRATION OF EVERY BIRTH AND DEATH

PREFACE

Birth and Deaths are the two most important vital events that define life of an individual. Not only do they describe the legal existence of an individual, registration of these events is a primary source of vital data of the population to which they belong. Civil Registration is a continuous, permanent, compulsory recording of the occurrence and characteristics of vital events, like births, deaths and still births. These vital statistics are invaluable for planning, monitoring and evaluating various programmes related to primary health care, family planning, maternal and child health, education etc. Nevertheless, information collected through registration process about vital events provides useful and important statistics.

2. This issue of the Report on 'Vital Statistics of India based on the Civil Registration System' for the year 2020 provides an overview of the working of the Civil Registration System (CRS) in the country and presents a compilation of data on registered births, deaths, infant deaths and still births with rural-urban & sex-wise break-up and sex ratio at birth based on Civil Registration Records. Ideally, an Annual Report on vital statistics containing more detailed information should have been brought out. However, due to limited availability of information contained in the Annual Reports of some of the States, the report for the year 2020 containing key information of events pertaining to the time period 1st January 2020 to 31st December 2020 has been brought out for the convenience of users.

3. The publication is divided into two parts. Part I provides a brief review of the Civil Registration System and contains a summary analysis of data on registered births, deaths, infant deaths and sex ratio at birth at State level. Part II consist of the main tables which provide State and District-wise data on registered births, deaths, infant deaths and still births with rural-urban & sex-wise break-up.

4. The data source for the report is the statutory Annual Statistical Report prepared by the Chief Registrars of Births & Deaths of States/UTs. I take this opportunity to express my sincere gratitude to all the Chief Registrars of Births & Deaths of various States/UTs for their kind co-operation in providing the requisite information in short time. I am thankful to each one of them for their invaluable and continuing cooperation. I am hopeful that more dynamic implementation of the provisions the RBD Act-1969 shall help reduce the time gap and establish this as a reliable source of information on the Birth and Death registration in country.

5. The report has been prepared by the CRS Section of this office. I would like to place on record my appreciation for the efforts put in by all the officers and staff working in the CRS Section of the Office of the Registrar General and the Officers/Staff connected with the Civil Registration system in the States/UTs.

EXECUTIVE SUMMARY

Civil Registration System (CRS) in India is the unified process of continuous, permanent, compulsory and universal recording of the vital events (births, deaths, stillbirths) and characteristics thereof. The Registration of Births and Deaths Act, 1969 (Act No. 18 of 1969) provides for the compulsory registration of births and deaths. Civil Registration records are the best source of Vital Statistics. For the individual, records emanating from CRS provides her/his legal identity and access to the rights of a citizen including entitlements (social benefits provided by the Government). For the country, the requirement of a complete CRS system is a must as it has important administrative and statistical uses. The data generated through a complete and up to date CRS is essential for socio-economic planning and to evaluate the effectiveness of various social sector programs. They also serve as the cornerstone of the public health system. The Annual Report on Vital Statistics of India based on Civil Registration System for 2020 has been brought out on the basis of reports provided by the Chief Registrar of Births and Deaths of respective States/Union Territories. CHAPTER - I

CIVIL REGISTRATION SYSTEM - AN INTRODUCTION

1.1 The requirement for a complete and up to date Vital Statistical System to yield reliable data on vital events hardly needs any emphasis. These data are essential for socio-economic planning and development and also to evaluate the effective implementation of various public schemes and programs. The main sources of data on vital events in India are Civil Registration System (CRS), Sample Registration System (SRS) and Population Census. Though the Population Census is the main source of information on population and its characteristics; however, being a decennial exercise, it does not provide the measure of changes in population from year to year. The measures of fertility and mortality derived from Census are centered on the midpoint of the decade and as such do not provide yearly change in the population. Of the other two sources of vital statistics for getting the vital rates on a regular basis, the SRS has been designed to provide reliable estimates at National and State level. Robust estimates of vital rates at District level on an annual basis through sample survey are difficult to obtain on account of prohibitively large sample size and variety of resultant factors such as controlling of non-sampling errors etc. CRS is thus the only source for providing vital rates at district level. Rather, a complete CRS can provide these rates at all administrative levels.

1.2 The Civil Registration System (CRS) may be defined as a unified process of continuous, permanent, compulsory and universal recording of the vital events and characteristics thereof, as per legal requirements in the country. In India, the Civil Registration System covers registration of births and deaths. Civil registration system provides the best source of information on the vital rates at all levels. Ensuring cent percent coverage of vital events by registration machinery can help in getting the critical vital statistics, equally important for planning and research. Therefore, emphasis should also be given to the proper monitoring of the activities under the system. Civil registration system is considered to be complete if it covers 100 per cent of all births and deaths taking place within a country or area.

1.3 The registration records are primarily useful for their value as legal documents and secondarily as the source of vital statistics. Civil registration as a source of vital statistics is relatively less expensive, as the statistics generated from the registration records are the by-products of an essential administrative process. The registration records can also generate current and continuous statistics, which can be more accurate than any other method of data collection apart from being a continuous source of such data. However, the accuracy of the vital statistics obtained through the registration system depends much on the completeness and promptness with which events are registered and the correctness of the information in the registration records. The improvement in the system of registration of births and deaths is critically dependent on the importance given by the respective States and District administrations to this work and regular monitoring by them. Besides, the level of awareness among the general public about the utility of birth or death certificate is also equally and crucially important.

1.4 Vital statistics obtained through registration records at different administrative levels enable estimation of the size, structure and geographical distribution of the population except for migration. Vital statistics also enables the projections for coming years on the basis of probable trends of fertility and mortality as derived from these vital statistics and their interactions with social, economic and

other demographic factors. The vital statistics data generated through an effective Civil Registration System is of immense use for formulation of various development and welfare programmes/ schemes and increases their effectiveness at State and District level. The Civil Registration data acquires paramount importance in the wake of 73rd and 74th amendments to the constitution of India, as it can provide data at local level for micro level planning, monitoring and evaluation of schemes. At national level, the vital statistics data generated through Civil Registration is also quite useful for medical research and in the study of sex ratio, mortality and morbidity rates and also in the study of causes of deaths.

Registration of births and deaths in India

1.5 In India, the registration of births and deaths is carried out under provisions of the Registration of Births and Deaths (RBD) Act, 1969. The registration is done by the Registrar of the local area, appointed by concerned State/UT Government.

1.6 Provision for registration of births and deaths and the mechanism thereof had been in existence in India for more than a century. Earlier, the work of registration of birth and death was carried out under various laws and byelaws existing at that time in different parts of the country. The need for improvement in the vital statistics system was felt for long and, therefore, after detailed deliberations at various levels, the Registration of Births & Deaths Act, 1969 was enacted providing compulsory registration of births and deaths in India. Since then, this Act has been enforced uniformly across all the States and Union territories (UT). This Act provides for registration of births and deaths and publication of statistical reports annually based on the civil registration data. The enactment of this Act has provided a common framework for putting in place an effective system of registration of births and deaths in the country.

1.7 The registration work at various levels in States/UTs is performed by different Departments. The existing organizational set-up involved in the work of civil registration at various levels in different States/ UTs is given at **Annexure-A**. A uni-linear hierarchy exists in 11 States/ UTs where single department is involved at all levels of registration. In 9 States namely Assam, Chandigarh, Haryana, Lakshadweep, Meghalaya, Odisha, Punjab, Sikkim and A&N Islands; Health Department is involved at all levels of registration. Panchayat Department in Kerala, and Local Administration Department in Puducherry are responsible for execution of this work at all levels.

1.8 In order to simplify and speed up the process of registration and to bring in uniformity in birth and death registration formats, the registration system was revamped in the year 2000. Under the revamped system, the procedure for registration of births and deaths was also modified to some extent and the forms were redesigned. The revamped system became operational in 2000 in all States/Union Territories except Assam, Arunachal Pradesh, Gujarat, Haryana, Himachal Pradesh, Jharkhand, Odisha, Punjab, Uttarakhand and Uttar Pradesh. It was implemented in Assam, Arunachal Pradesh and Odisha in 2001, Haryana in 2002, Himachal Pradesh, Uttarakhand and Uttar Pradesh in 2003, Gujarat and Punjab in 2004 and Jharkhand in 2009.

Statistical Reports

1.9 System of registration of births and deaths is constantly generating statistical information at the local level. The information contained in the reporting forms is consolidated by the Registrar for onward transmission to the Chief Registrar of Births & Deaths or to any officer specified in the

concerned State/UT. The Chief Registrar of the States/UTs, who are the chief executive authorities for the activities on registration of Births and Deaths in the State/UT, are mandated to submit to the State Government Annual Report on Working of the Act in the State/UT along with the Statistical Report referred under section 19(2) on registered births and deaths for each year immediately following the year to which the report relates to. The Chief Registrars are also required to send a copy of these Reports to the Registrar General, India, Govt. of India.

1.10 Based on the Annual Reports prepared by the States/UTs, the Office of the Registrar General, India, brings out an annual comprehensive report entitled “Vital Statistics of India based on Civil Registration System”. These reports have been brought out since 1958 (Before the enactment of Act, only statistical reports were brought out). However, some of the States are not bringing out their Annual Statistical Reports in time, and this in turn, delays the publication of the corresponding national report. It has also been observed that some States also do not include all the prescribed tables in their reports thereby creating a limitation while bringing out the national report. However, notwithstanding all these constraints, this report provides vital indicators including the District-wise registered births and deaths along with infant deaths with the sex-wise and rural-urban break-up of registered events for the year 2020.

CHAPTER-II

ANNUAL REPORT FOR 2020 ON THE WORKING OF THE REGISTRATION OF BIRTHS AND DEATHS (RBD) ACT, 1969

2.1. **Annual report on the working of the Registration of Births and Deaths (RBD) Act, 1969:** Under the provision of Section 4 (4) of the Act, the Chief Registrars are required to submit an Annual Report on the working of the RBD Act to the respective State Governments. The Office of Registrar General of India consolidate/compile the working of said Act reports received from States/UTs and release working of RBD Act report at National level. The aforesaid statutory Annual Report for the year 2020 has been received from 34 States/UTs except State of Manipur and UT of Ladakh.

2.2. **Registration Machinery:** Section 3 to 7 of the Registration of Births and Deaths (RBD) Act, 1969 provides for the appointment of Civil Registration System functionaries at all levels like:-

- (i) National level:- Registrar General, India; section 3 of the RBD Act
- (ii) State level:- Chief Registrar; section 4 of the Act
- (iii) District level:- District Registrar/Additional District Registrar under Section 6 of the Act
- (iv) Local area level:- Registrar for a village, Panchayat, municipality, municipal Corporation or other local bodies; under Section 7(1) of the Act and
- (v) Sub-Registrar for specified area within the area under the jurisdiction of a Registrar under section 7 (5) of the Act.

The Central Government under section 3(1) of the RBD Act, 1969 appoints the Registrar General, India (RGI) at Central level who has been empowered under the said Act to take steps to coordinate and unify the activities of Chief Registrars of all States/Union Territories and issues general directions regarding registration of births and deaths under section 3(3) of the Act. The work relating to Civil Registration in the office of the Registrar General, India is handled in the Vital Statistics Division.

The State Governments under section 4 (1) of the Act appoints Chief Registrar for the State/UT. The Chief Registrars under section 4 (3) of the said Act has been declared as the chief executive authority in the respective States/ UTs for implementing the provisions of RBD Act and the Rules and orders made thereunder. The State Government also appoints District Registrar of births and deaths for each revenue district under section 6 of the RBD Act. The actual work of registration of births and deaths in the field is carried out by the local Registrars, who are appointed under section 7 of the said Act.

There is a wide variation in the registration machinery across the country, details of which are given below: -

- The Chief Registrars of births and deaths in 17 States and 4 Union Territories are from the Health Department, in 10 States and 1 Union Territories are from Planning, Economics & Statistics Department, in 1 State (Kerala) from Panchayat Department and in remaining 1 UT (Puducherry) it is with Local Administration Department. The Chief Registrar for the merged UT of DNH & DD and for the UT of Ladakh is yet to be appointed.
- The district level authorities in the States/UTs such as District Collectors/ District Magistrate, Additional Collector, Chief Medical Officers/ District Medical and Health, Civil Surgeon, District Statistical/ Planning Officers, Deputy Commissioner, Deputy Director, Panchayat and Dy. Director, local administration are appointed as District Registrar.

(State and UT wise detail of registration functionaries is attached at Annexure-A)

2.3. **Registration of Births and Deaths occurring to Indian Citizens abroad:**

Under the provisions of Citizenship Act, 1955 the event of births and deaths of Indian Citizens occurring abroad are registered by the respective Indian Missions/Consulates. Under Rule 5 of Citizen's (Registration at Indian Consulates) Rules 1956, Consulates are statutorily required to send the annual returns of births and deaths of Indian Citizens to the office of the RGI. It has been observed that requisite returns are not furnished by all Indian Missions/Consulates; such returns for the year 2020 have been received from 175 missions/consulates of 145 countries only, covering 51089 births and 10817 deaths. Out of total registered births at the various missions during 2020, Embassy of Dubai in United Arab Emirates accounted for 23.37 % births, Embassy of Abu Dhabi in United Arab Emirates 8.86%, Embassy of Kuwait City in Kuwait 8.22% births and Embassy of Riyadh in Saudi Arabia 7.77% births. In case of total registered deaths at various missions, Embassy of Riyadh in Saudi Arabia accounted for 22.47% deaths, Embassy of Dubai in United Arab Emirates 17.76% deaths, Consulate General Jeddah in Saudi Arabia 12.23 % and Embassy of Kuwait City in Kuwait 11.82% deaths in 2020. Details of information furnished by the Indian Consulates/Missions are given in the Statement No. 21.

2.4. **Inter Departmental Coordination Committees (IDCC):** In order to resolve the operational problems and for proper implementation of the provisions of the RBD Act and the State Rules, coordination among the implementing departments is essentially required. 3.9 Registration of Birth & Death within prescribed time limit of 21 days

3.9.1 The registered births and deaths have been classified in four categories depending upon their period of registration. The four time periods considered for the purpose are: i) within prescribed time limit (up to 21 days), ii) After 21 days but within 30 days, iii) After 30 days but within 1 year, iv) More than 1 year. For 2020, Thirty-three (33) States/UTs have provided data on Births and Deaths Registration within prescribed time period (i.e within 21 days). In respect of both Time Gap Birth and Death, partial information has been submitted by 3 States /UTs namely, Maharashtra, Sikkim and Delhi and therefore have not been taken into account while consolidating the data for Time gap in Registration of Births & Deaths tables.

3.9.2 On the basis of data received from States/UTs the percentage of registration achieved out of total registration undertaken in 2020 within prescribed time limit (21 days) is as under:

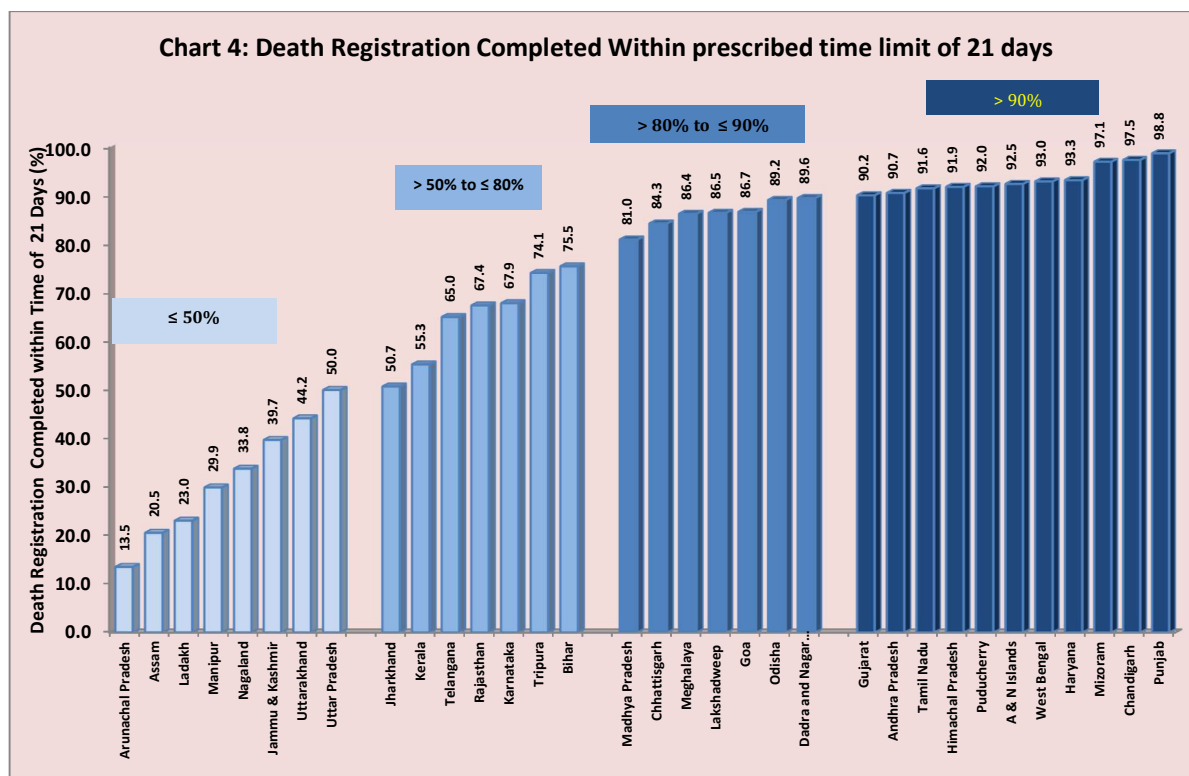

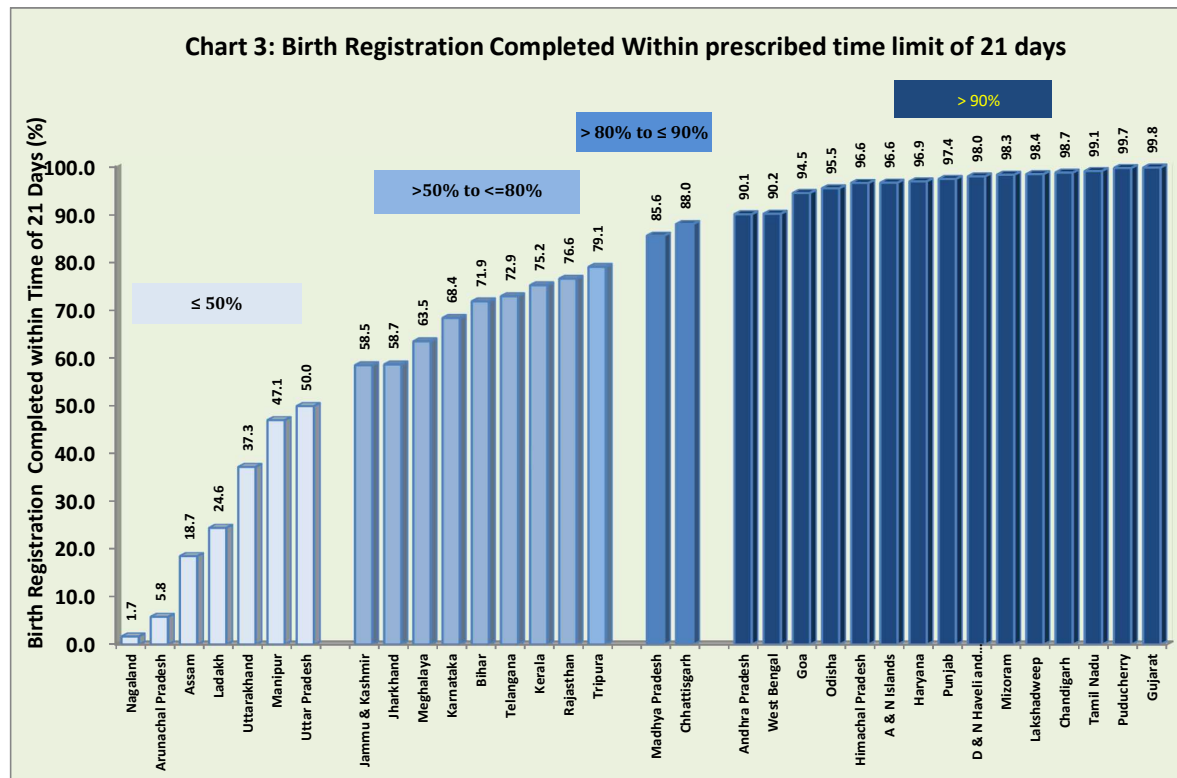

Statement 10: Distribution of States/UTs by Registration completed within the prescribed time limit (21 days)

Level (in %)	Name of the States/UTs	
	Birth	Death
More than 90%	Gujarat, Puducherry, Tamil Nadu, Chandigarh, Lakshadweep, Mizoram, D & N Haveli and Daman & Diu, Punjab, Haryana, A & N Islands, Himachal Pradesh, Odisha, Goa, West Bengal, Andhra Pradesh (15)	Punjab, Chandigarh, Mizoram, Haryana, West Bengal, A & N Islands, Puducherry, Himachal Pradesh, Tamil Nadu, Andhra Pradesh, Gujarat (11)
More than 80% to less than or equal to 90%	Chhattisgarh, Madhya Pradesh, (2)	Dadra and Nagar Haveli and Daman and Diu, Odisha, Goa, Lakshadweep, Meghalaya, Chhattisgarh, Madhya Pradesh (7)
More than 50% to less than or equal to 80%	Tripura, Rajasthan, Kerala, Telangana, Bihar, Karnataka, Meghalaya, Jharkhand, Jammu & Kashmir (9)	Bihar, Tripura, Karnataka, Rajasthan, Telangana, Kerala, Jharkhand (7)
Less than or equal to 50%	Uttar Pradesh, Manipur, Uttarakhand, Ladakh, Assam, Arunachal Pradesh, Nagaland (7)	Uttar Pradesh, Uttarakhand, Jammu & Kashmir, Nagaland, Manipur, Ladakh, Assam, Arunachal Pradesh (8)

3.9.3 The above Statement 10 shows the percentage of births registered within the prescribed time-period of 21 days to the total births registered in the state/UT. 15 States/UTs have achieved more than 90% registration of births within the prescribed time limit of 21 days. Further, 2 States/UTs are in the category of more than 80 to less than or equal to 90 percent, 9 States are in the category of more than 50 to less than or equal to 80 percent and, the remaining 7 States are under the category of less than or equal to 50 percent in completing the birth registration within the time limit of 21 days. In Statement 11, the State-wise percentage of birth registered within the prescribed time period has been arranged in descending order.

3.9.4 Statement 10 also shows the percentage of deaths registered within the prescribed time period of 21 days to the total deaths registered in the state and arranged in descending order. 11 States/UTs have achieved more than 90% registration of death within the prescribed time limit of 21 days. 7 States/UTs are in the category of more than 80 to less than or equal to 90 percent, 7 States are in the category of more than 50 to less than or equal to 80 percent, and the remaining 8 States are under the category of less than or equal to 50 percent in death registration within the prescribed time limit of 21 days. In Statement 12, the State-wise percentage of death registered within the prescribed time period

and arranged in descending order. Chart 3 & 4 shows the percentage of Births and Deaths registered within the prescribed time period respectively.

Note: * Total of male and female may not tally with persons due to inclusion of sex not reported.

3.10.1 Chart 5 on the sex-wise distribution of registered births reveals that the share of registered female births is about 4.0 percent short of registered male births.

3.10.2 On the other hand, in the case of death registration, the share of male registration is about 20.4 per cent more than female. (Statement 13). Sex wise distribution of registered deaths is presented in Chart 6.

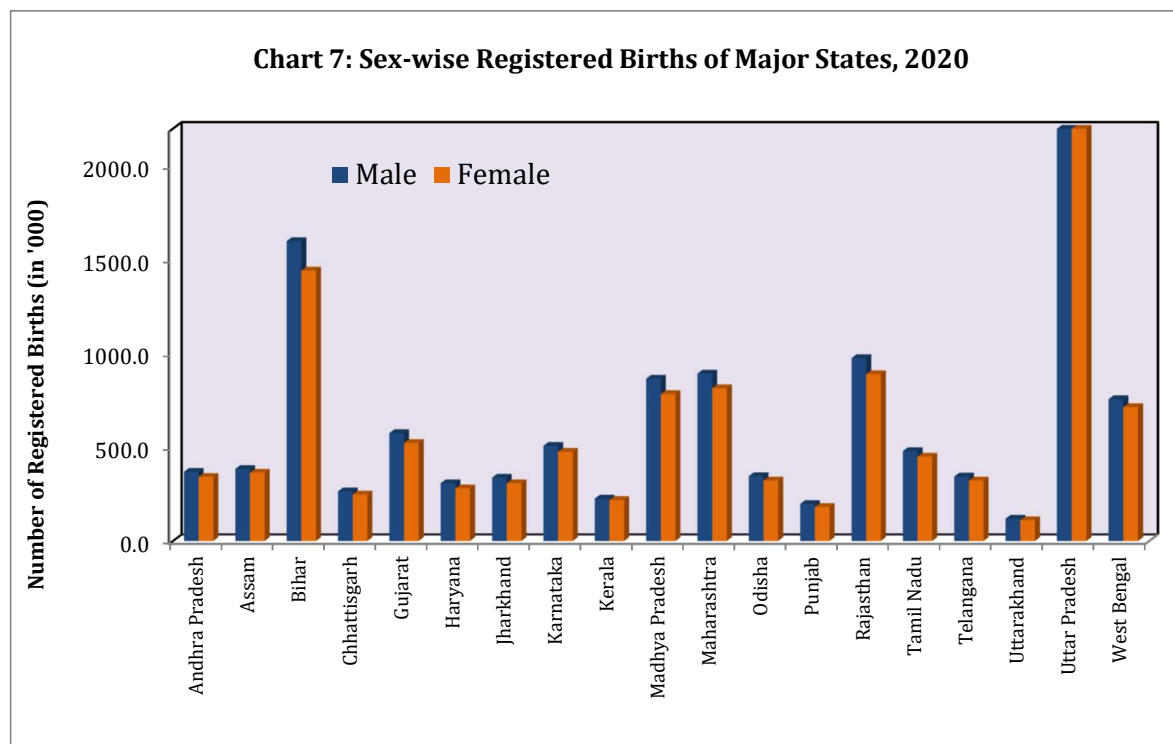

3.11. Sex-wise Distribution of Registered Births and Deaths of Major States

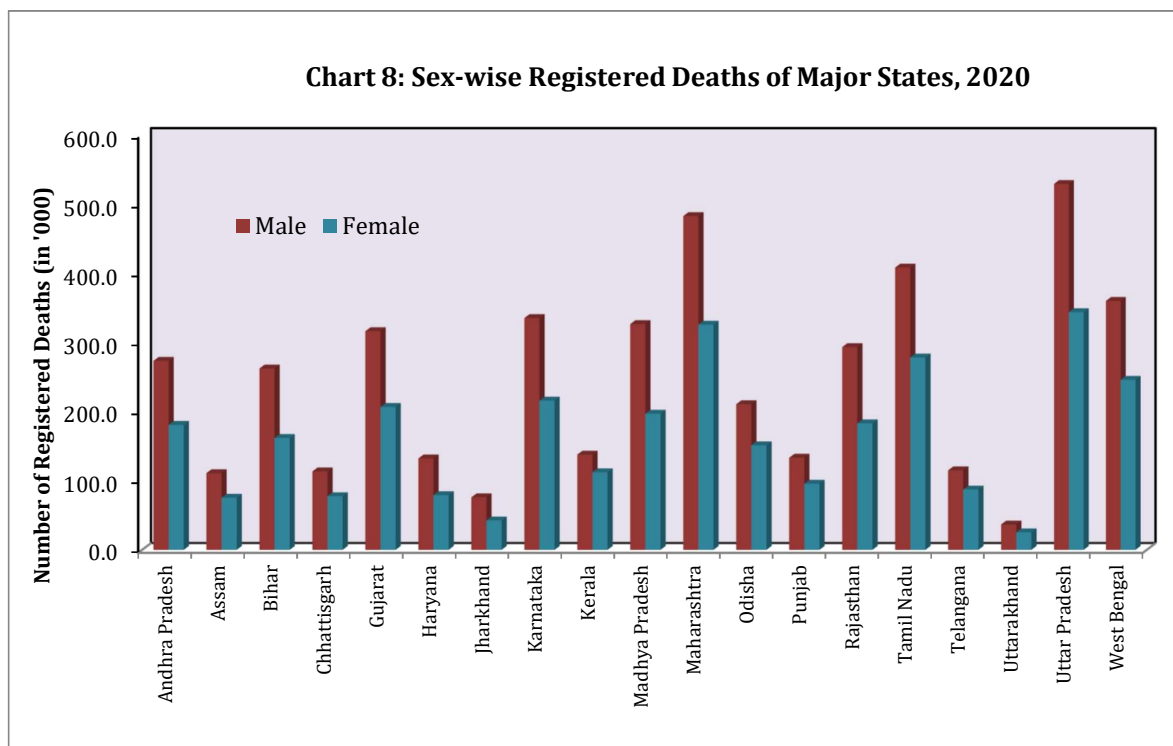

3.11.1 Chart 7 and 8 respectively shows the sex-wise distribution of registered births and deaths for the major States (population of more than 1 Crore as per Census 2011). The data on birth and death registrations reveals that the share of male registration is more than the female in almost all these major States. This gap is much wider in case of Birth registration in Bihar, Madhya Pradesh, Gujarat, Haryana, Jharkhand, Maharashtra and Rajasthan. While in case of Death Registration, the gap is wider in almost all major States viz. Jharkhand, Haryana, Madhya Pradesh, Bihar, Rajasthan, Karnataka and Uttar Pradesh. The State-wise figures have been provided in Statement 14.

Chart 7: Sex-wise Registered Births of Major States, 2020

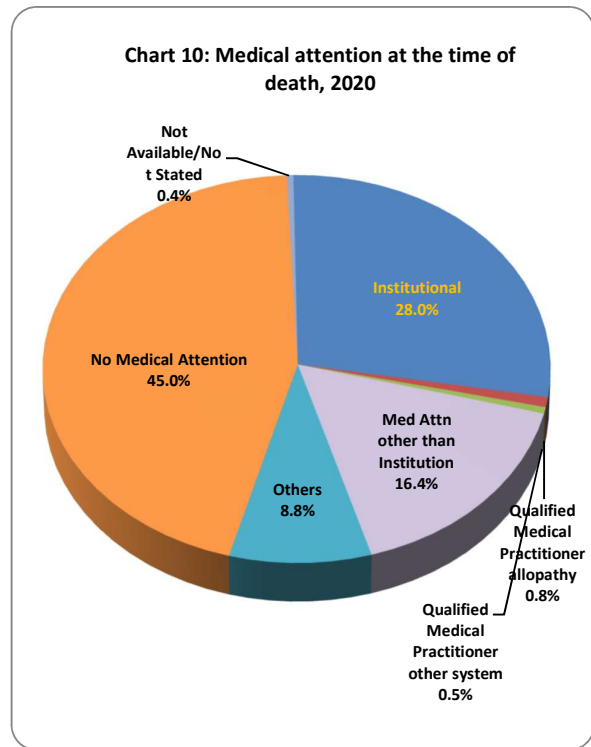

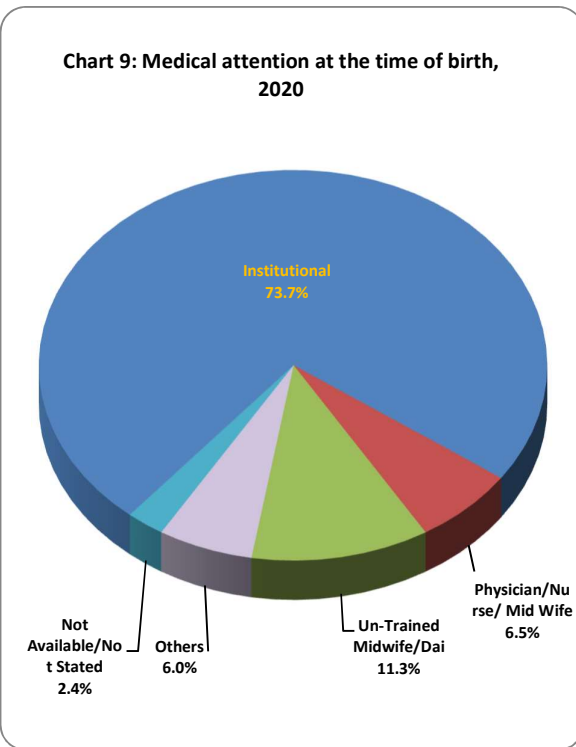

3.12 Medical attention received at the time of birth and death

3.12.1 The complete information for 2020 in respect of birth by type of medical attention received at the time of delivery has been reported from only 34 States/UTs. As partial information has been submitted by two States namely, Maharashtra and Sikkim, their data has not been taken into account while consolidating the data. The distribution of medical attention received at the time of birth for these States/UTs has been illustrated in Chart 9. While the data shows that majority of births have been occurred in an institution, either in Government or private hospitals. Institutional births occurred in about 73.7% of cases, 6.5% of the cases were attended by the Physicians/Nurse/Midwife. However, about 11.3% of the events are still attended by untrained Mid-wife/Dai and another 8.4% by others and Not stated/Not Available together.

3.12.2 Complete information on Medical Attention received by deceased at the time of death has been received from 34 States/UTs. Two States namely Maharashtra and Sikkim have submitted only partial data and therefore their data has not been used while consolidating the data. Chart 10 represents the distribution of medical attention received by the deceased at the time of death. It is evident from Chart that 28.0% of the total registered deaths have occurred in institutions and is on a higher side than that of other places from where the deceased had received medical attention. About 16.4% of Registered Deaths were reported under Medical Attention Other than Institutions. About 1.3% of the total registered deaths during 2020 have received medical attention from qualified allopathic professional and practitioner of other system together and 45.0% of deceased did not receive any medical attention at the time of death.

3.13 Infant Deaths

3.13.1 The infant deaths registered by place of occurrence (Rural /Urban) of the event for the year 2020 has been given in Statement 15. It may be observed that the share of rural area is only 23.4% while that of urban area is 76.6% in total registered infant deaths during the year. Non-registration of infant deaths in rural area is a cause of concern which may be due to non-reporting of infant deaths to the Registrars especially in case of domiciliary events.

Statement 15: Percentage distribution of registered infant deaths by place of occurrence, 2020

Place of Occurrence	No. of Registered Deaths	No. of Registered Infant Deaths	% Share of Registered Infant Deaths by Place of Occurrence	% of Registered Infant Deaths to Total Registered Deaths

Urban	3428108	109797	76.6	3.2
Total	8115882	143379	100.0	1.8

Statement 16 gives the percentage distribution of sex-wise infant deaths which reveals that the share of female deaths in total female deaths is slightly higher than the corresponding male figures.

Statement 16: Percentage distribution of infant deaths by sex, 2020

Sex	No. of Registered Deaths	No. of Registered Infant Deaths	% Share of Registered Infant Deaths to Total registered Deaths
Male	4882584	83313	1.7
Female	3233045	60028	1.9
Person*	8115882	143379	1.8

*: Includes the cases of sex not reported/available, so does not match with the addition of male and female.

3.14 Still Births

3.14.1 The World Health Organization (WHO) defines a still birth as a baby born with no signs of life at or after 28 weeks' gestation. Still birth, also known as foetal death, has been defined as *'death prior to the complete expulsion or extraction from its mother of a product of human conception, irrespective of the duration of pregnancy and which is not an induced termination of pregnancy. The death is indicated by the fact that after such expulsion or extraction, the fetus does not breathe or show any other evidence of life, such as beating of the heart, pulsation of the umbilical cord, or definite movement of voluntary muscles. Heartbeats are to be distinguished from transient cardiac contractions; stillbirths are to be distinguished from fleeting respiratory efforts or gasps.'*

3.14.2 Statement 17 presents still births registered by place of occurrence (Rural /Urban) of the event for the year 2020 and it may be observed that in total registered still births, share of rural registered still births is only 40.8% which may be due to poor netting of stillbirths in rural areas. In urban areas, this share is about 57.9% which may be due to better netting of still births from medical institutions. State/UT-wise registered still births have been depicted in Table 4.

Statement 17: Still Births registered during 2020

Place of Occurrence	No. of Registered Still Births	% Share of Registered Still Births by Place of Occurrence
Rural	65194	40.8
Urban	92374	57.9
Total*	159645	100.0

*Sum of Rural and Urban may not match with Total as some of States have not supplied Rural-Urban breakup.

3.15 Sex Ratio at Birth

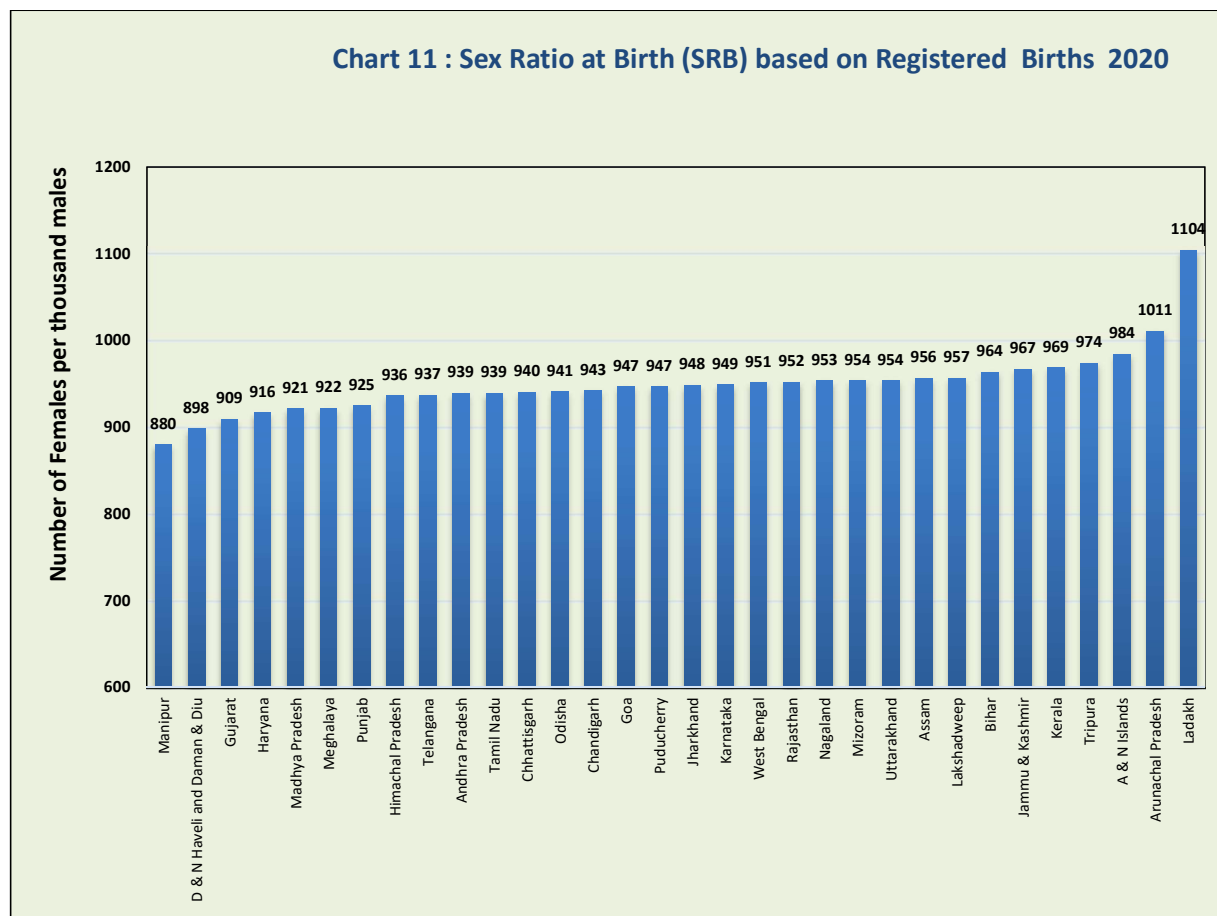

3.15.1 The Sex Ratio (Number of females per thousand males) at birth of registered events is an important indicator to map the sex differential of the population at the beginning of their life. The sex ratio at birth has been calculated after deducting the delayed registration of more than 1 year for the year 2020 and shown in Statement 18.

3.15.2 The requisite information from 4 States namely Maharashtra, Sikkim, Uttar Pradesh and Delhi is not available. The sex ratio at birth based on registered births has been worked out after deducting the respective time delay in birth registration of more than 1 year. These figures of Sex Ratio at Birth (SRB) based on Registered events from only 32 States/UTs are presented in Statement 18. The figure varies from State to State. Ladakh and Arunachal Pradesh registered top two slots respectively followed by A& N Islands and Tripura. None of the State/UT have recorded Sex ratio at birth below 880. Status of States according to Sex Ratio at birth in respect of registered births is shown in chart 11.

3.16 Time Gap in Registration of Birth & Death

3.16.1 On the basis of data made available by States/UTs, the national data table on time gap of birth and death registrations i.e. within time limit, More than 21 days but within 30 days, More than 30 days but within 1 year and After one year has been prepared and may be seen in Statement 19 and 20. The 3 States namely Maharashtra, Sikkim and Delhi have provided only partial data on Time Gap Births and Deaths Registration and therefore not included.
