## प्राक्कथन

राष्ट्रीय सांख्यिकीय कार्यालय (रा.स.का.) द्वारा संचालित अखिल भारतीय ऋण एवं निवेश सर्वेक्षण, विविध संकेतकों; परिसम्पत्तियों के संग्रह, ऋणग्रस्तता, पूंजी निर्माण एवं ग्रामीण/नगरीय अर्थव्यवस्था के अन्य संकेतकों, पर आंकड़ों का प्राथमिक स्रोत है। इनका उपयोग विभिन्न सरकारी संगठनों, शिक्षाविदों, शोधकर्ताओं और विद्वानों द्वारा योजना, नीति निर्माण और विश्लेषणात्मक अध्ययन के निविष्ट के रूप में किया जाता है।

राष्ट्रीय सांख्यिकीय कार्यालय ने एन.एस.एस. 26वें दौर (1971-1972) में ऋण एवं निवेश पर पहली बार सूचना एकत्र की। ऋण एवं निवेश पर आंकड़े अब नियमित आवधिक सर्वेक्षण के एक भाग के रूप में एकत्रित किये जाते हैं, और वर्तमान सर्वेक्षण से पहले यह सर्वेक्षण, एन. एस. एस. 37वें दौर, 48वें दौर, 59वें दौर और 70वें दौर में किया गया। परिसम्पत्तियों एवं देनदारियों की 30.06.2018 पर सूचना, ऋण एवं निवेश के वर्तमान सर्वेक्षण, एन.एस.एस. 77वें दौर (जनवरी-दिसम्बर, 2019) के दौरान एकत्रित की गई। इसके अतिरिक्त कृषि वर्ष 2018-2019 (जुलाई – जून) के दौरान परिवारों द्वारा विभिन्न शीर्षों; आवासीय भवन, कृषि व्यवसाय और गैर-कृषि व्यवसाय पर किए गए पूंजीगत व्यय धनराशि, की सूचना भी एकत्रित की गई।

अखिल भारतीय ऋण एवं निवेश सर्वेक्षण की यह रिपोर्ट पारिवारिक सम्पत्तियों एवं देनदारियों के महत्वपूर्ण संकेतकों, जैसे- सम्पत्तियों के औसत मूल्य, ऋण की औसत धनराशि, ऋणग्रस्तता की घटना, ऋण-सम्पत्ति अनुपात से समावेशित है। अखिल भारतीय स्तर पर इन महत्वपूर्ण संकेतकों का विभिन्न सामाजिक समूहों तथा विभिन्न सम्पत्ति धारक वर्गों के लिए अलग से सारणीयन किया गया।

राष्ट्रीय सांख्यिकीय कार्यालय के सर्वेक्षण अभिकल्प एवं अनुसंधान प्रभाग ने सर्वेक्षण पद्धति, सर्वेक्षण उपकरण को विकसित किया एवं इस दस्तावेज को तैयार किया। क्षेत्र कार्य, क्षेत्र प्रचालन प्रभाग द्वारा किया गया, जबकि समंक विधायन और सारणीयन का कार्य, समंक गुणवत्ता आश्वासन प्रभाग द्वारा किया गया। सर्वेक्षण समन्वय प्रभाग ने सर्वेक्षण से सम्बन्धित विभिन्न कार्यकलापों का समन्वयन किया।

मैं, सर्वेक्षण के विभिन्न चरणों में बहुमूल्य मार्गदर्शन प्रदान करने हेतु, राष्ट्रीय प्रतिदर्श सर्वेक्षण के 77वें दौर के कार्यदल के अध्यक्ष एवं सदस्यों एवं राष्ट्रीय सांख्यिकीय आयोग (एन.एस.सी.) के सदस्यों का अत्यंत आभारी हूं। मैं इस दस्तावेज को तैयार करने में सम्मिलित सभी अधिकारियों के प्रयासों की भी सराहना करता हूं।

मुझे विश्वास है कि यह दस्तावेज योजनाकारों, नीति निर्माताओं, तथा अनुसंधानकर्ताओं के लिए उपयोगी सिद्ध होगा। रिपोर्ट के प्रस्तुतीकरण, विश्लेषण आदि से सम्बन्धित पाठकों के सुझावों का स्वागत है।

## Preface

The All-India Debt and Investment Survey (AIDIS), conducted by National Statistical Office (NSO) is the primary source of data on various indicators of stock of assets, incidence of indebtedness, capital formation and other indicators of rural/urban economy. These are used for planning, policy formulation, and as input for further analytical studies by various Government organizations, academicians, researchers and scholars.

The National Statistical Office (NSO) first collected information on Debt and Investment in NSS 26<sup>th</sup> round (1971 - 1972). Thereafter, data on Debt & Investment have been collected in periodic surveys carried out in NSS 37<sup>th</sup> round, 48<sup>th</sup> round, 59<sup>th</sup> round and 70<sup>th</sup> round prior to the present survey. The present survey on Debt & Investment conducted during NSS 77<sup>th</sup> round (January – December, 2019) collected information on the assets and liabilities of the households as on 30.6.2018. Besides, the survey gathered information on the amount of capital expenditure incurred by the households during the Agricultural Year 2018-19 (July-June), under different heads, like residential buildings, farm business and non-farm business.

This report on All-India Debt and Investment Survey includes important indicators on household assets and liabilities like average value of assets, average amount of debt, incidence of indebtedness and debt asset ratio. At all-India level, these important indicators are tabulated separately for different social-groups as well as for different asset holding classes.

The Survey Design and Research division (SDRD) of the NSO undertook the development of the survey methodology, survey instruments and the preparation of this document. The field work was carried out by the Field Operations Division (FOD) of NSO while the data processing and tabulation work was taken care of by the Data Quality Assurance Division (DQAD) of NSO. The Survey Coordination Division (SCD) coordinated various activities pertaining to the survey.

I would like to express my gratitude to the Chairman & members of the Working Group of NSS 77<sup>th</sup> round and the National Statistical Commission for their valuable guidance provided at various stages of the survey. I also place on record my appreciation of efforts made by officers of different divisions of NSO involved in the preparation of this document.

I hope that this document will be found useful by planners, policy makers and researchers. Suggestions for improvement of its content and coverage will be highly appreciated.

## भूमिका

- ❑ राष्ट्रीय सांख्यिकीय कार्यालय आमतौर पर देश के ग्रामीण एवं नगरीय क्षेत्रों में अखिल भारतीय ऋण एवं निवेश सर्वेक्षण (एआईडीआईएस) आवधिक अन्तराल पर करता है।
- ❑ अखिल भारतीय ऋण एवं निवेश सर्वेक्षण श्रृंखला में नवीनतम, यह सर्वेक्षण जनवरी से दिसम्बर, 2019 तक की अवधि के दौरान किया गया।
- ❑ सर्वेक्षण में यह सूचना प्रतिदर्श परिवार के एक ही समूह से दो दौरों में (दौरा 1: जनवरी-अगस्त, 2019 और दौरा 2: सितम्बर-दिसम्बर, 2019) में एकत्रित की गई।
- ❑ सम्पत्ति एवं देनदारियों पर सूचना एकत्र करने की सन्दर्भ अवधि 30.06.2018 थी और पूँजी निर्माण के लिए यह अवधि 01.07.2018 से 30.06.2019 थी।
- ❑ यह सर्वेक्षण ग्रामीण क्षेत्रों में 5,940 ग्रामीण क्षेत्रों के 69,455 परिवारों एवं 3,995 नगरीय खण्डों में 47,006 परिवारों में फैला हुआ था।

## संकेतक

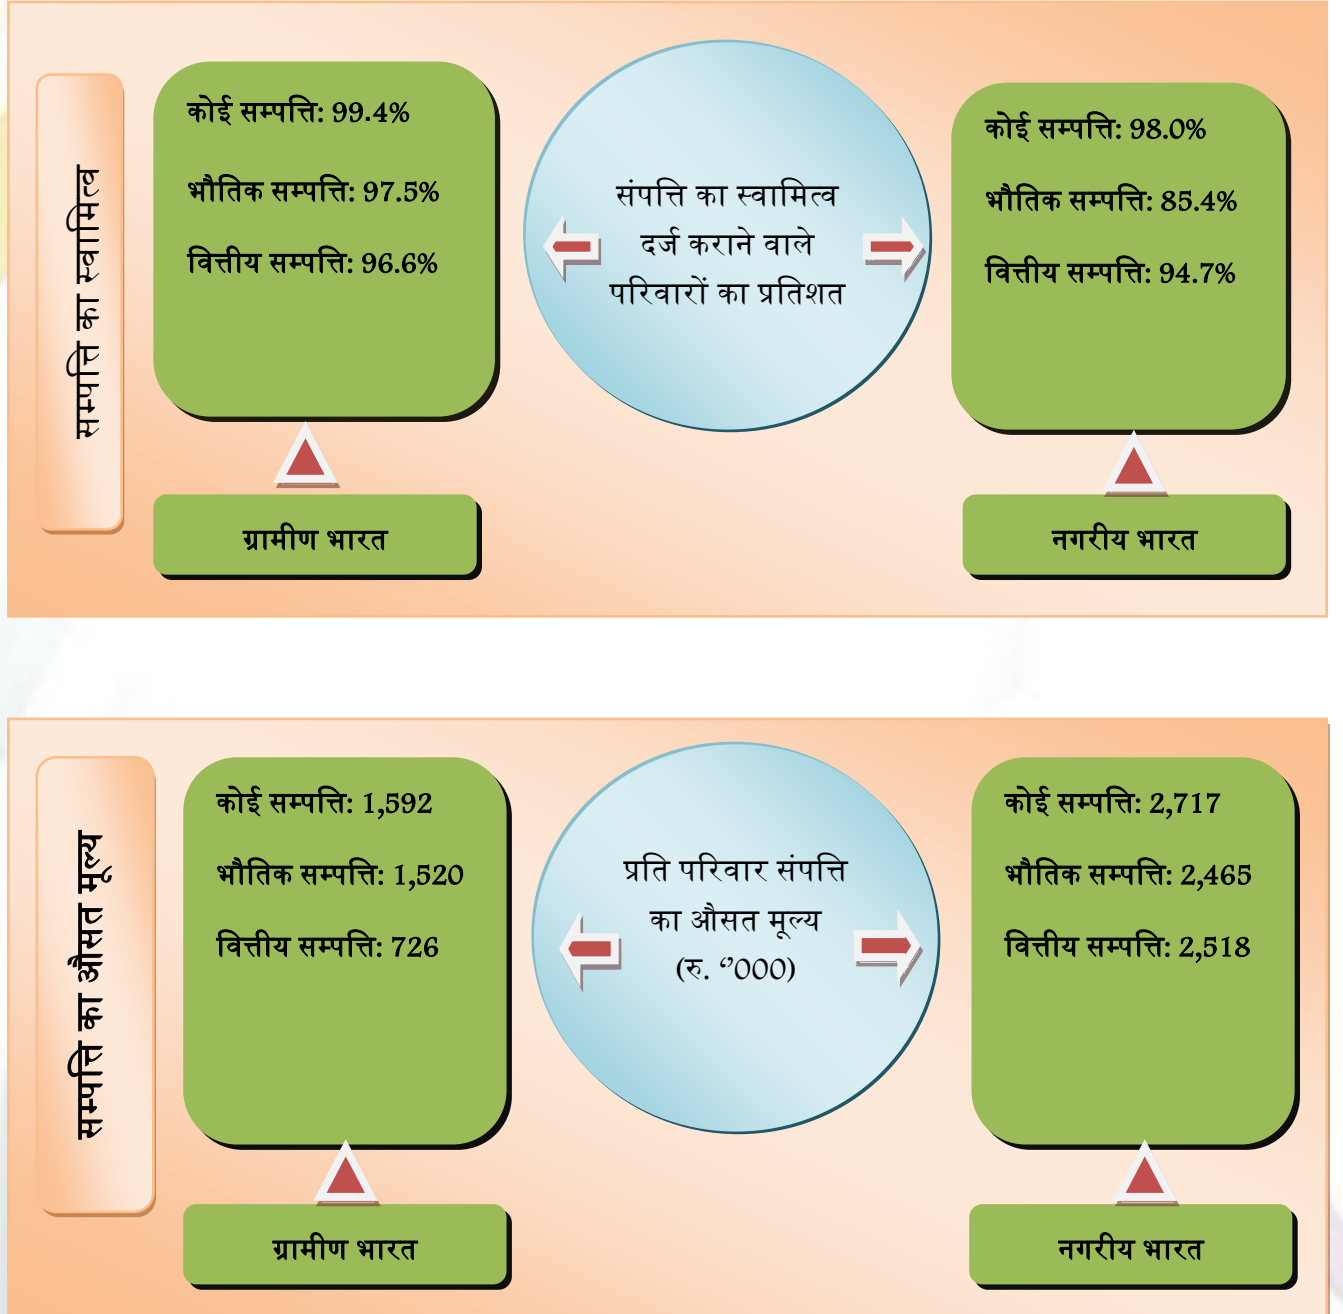

अखिल भारतीय ऋण एवं निवेश के सर्वेक्षण से निम्नलिखित संकेतक प्राप्त हुए :

- ❑ सम्पत्ति का औसत मूल्य (एवीए): 30.06.2018 तक प्रति परिवार अंगीकृत की गई सभी भौतिक एवं वित्तीय सम्पत्ति का औसत मूल्य
- ❑ ऋणग्रतस्तता की घटना(आईओआई): 30.06.2018 तक ऋण ग्रस्त परिवारों का प्रतिशत
- ❑ ऋण की औसत धनराशी (एओडी): 30.06.2018 तक प्रति परिवार औसत नगद बकाया धनराशि
- ❑ ऋण-सम्पत्ति अनुपात (डीएआर): एक परिवार समूह द्वारा दी गई तिथि तक बकाया ऋण की औसत धनराशि (एओडी) को उनके द्वारा अंगीकृत की गई सम्पत्ति की औसत धनराशि के प्रतिशत के रूप में व्यक्त करना

# HIGHLIGHTS

## *Introduction*

- ❑ The National Statistical Office (NSO) conducts All India Debt & Investment (AIDIS) survey in the rural and urban areas of the country at periodic intervals.
- ❑ The current survey, latest in the AIDIS series, was conducted during the period January to December, 2019.
- ❑ Information in the survey was collected in two visits (Visit 1: January-August, 2019 and Visit 2: September - December, 2019) from the same set of sample households.
- ❑ The reference date/period to collect the information on assets and liabilities was 30.06.2018 and it was 01.07.2018 to 30.06.2019 for capital formation.
- ❑ The survey was spread over 5,940 villages covering 69,455 households in the rural sector and 3,995 blocks covering 47,006 households in the urban sector.

## *Indicators compiled*

The following indicators were generated from the survey of All India Debt & Investment:

- ❑ **Average value of Assets (AVA):** The average value of all the physical and financial assets owned per household as on 30.06.2018.
- ❑ **Incidence of Indebtedness (IOI):** The percentage of the indebted households as on 30.06.2018.
- ❑ **Average amount of Debt (AOD):** The average amount of cash dues as on 30.06.2018 per household.
- ❑ **Debt-Asset Ratio (DAR):** The average amount of debt (AOD) outstanding on a given date for a group of households expressed as a percentage of the average amount of assets (AVA) owned by them on that given date.

# A. ASSETS

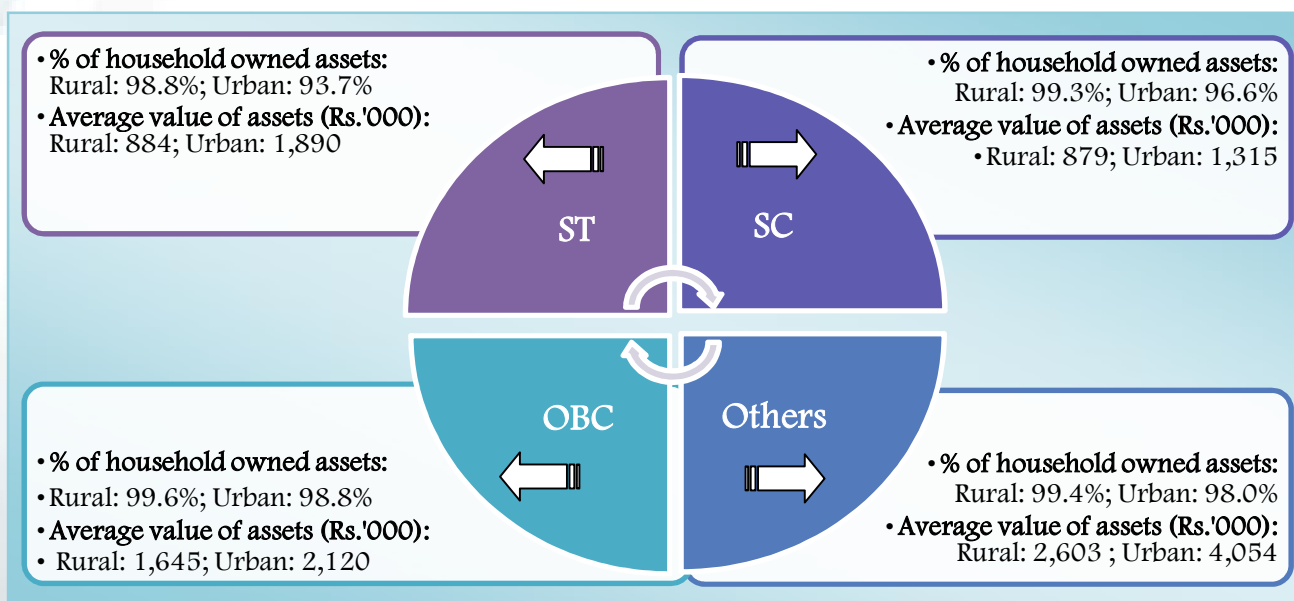

## A1. Ownership of Assets & Average value of Assets (AVA)

**A2. Percentage share of different components of assets in total value of assets**

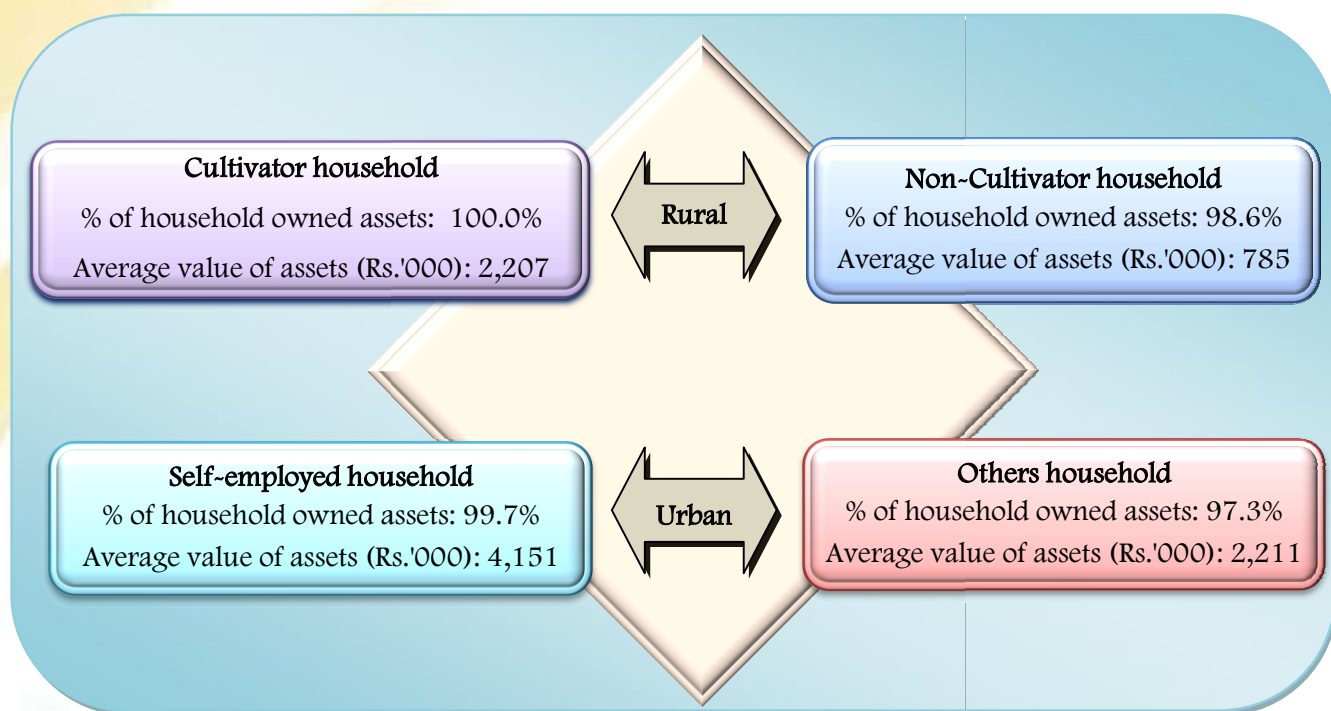

**A3. Assets owned by the household and AVA by Social Groups**

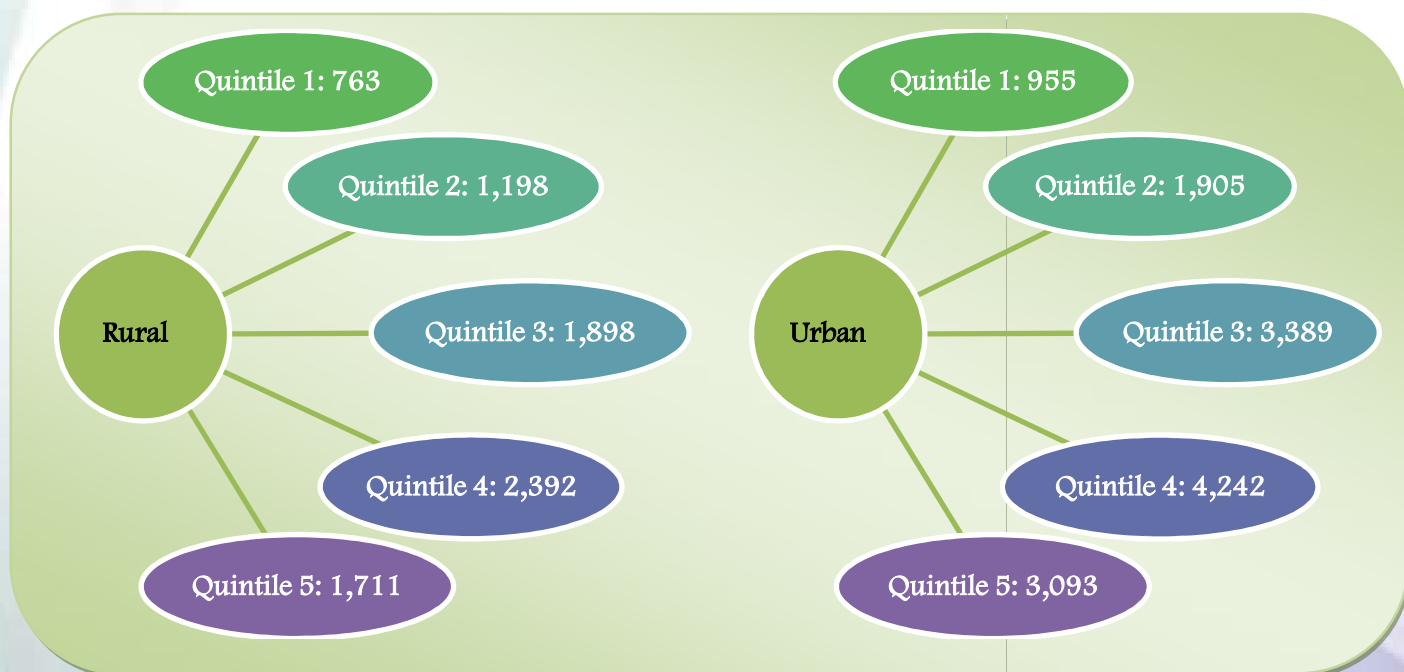

**A4. Assets owned by the household and AVA by occupational category of the household**

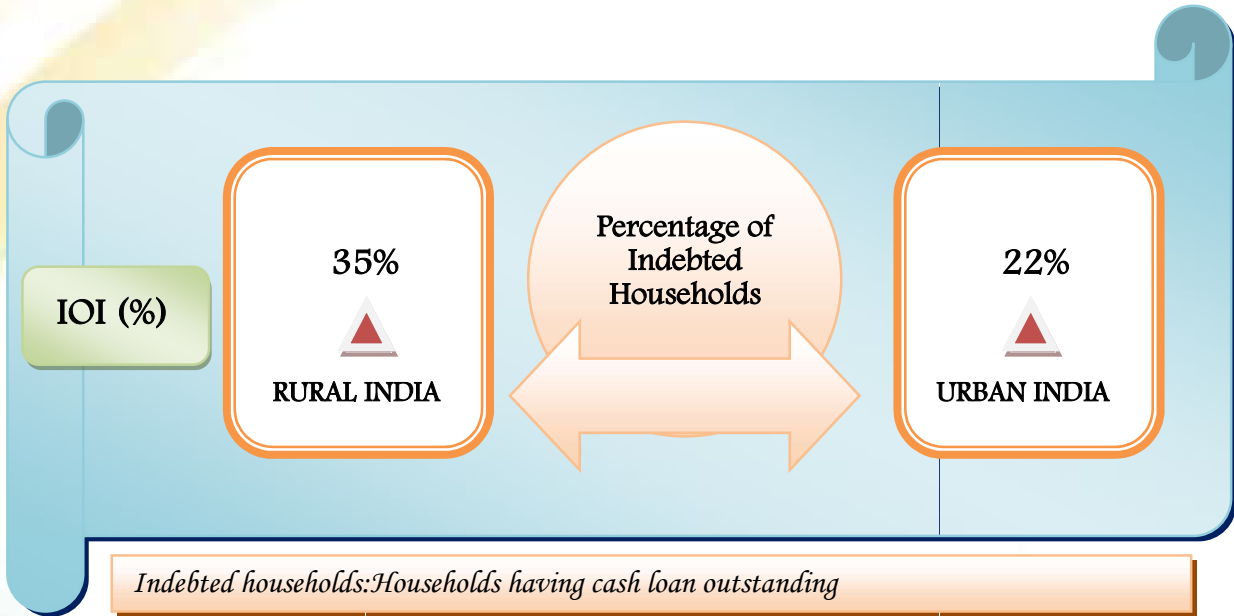

**A5. AVA (Rs. '000) by quintile class of household consumer expenditure**

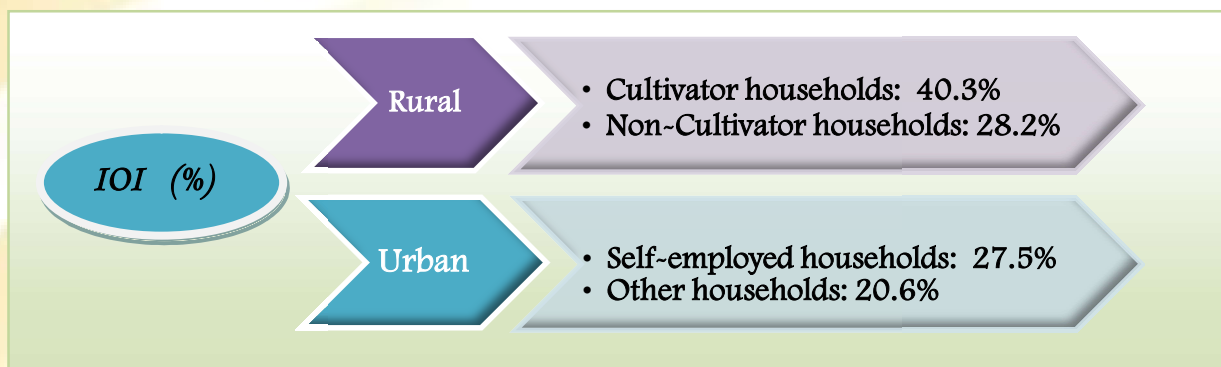

## B. INDEBTEDNESS

### B1. Incidence of Indebtedness (IOI) and Average amount of Debt (AOD)

**B2. Incidence of Indebtedness (IOI) by occupational category of household**

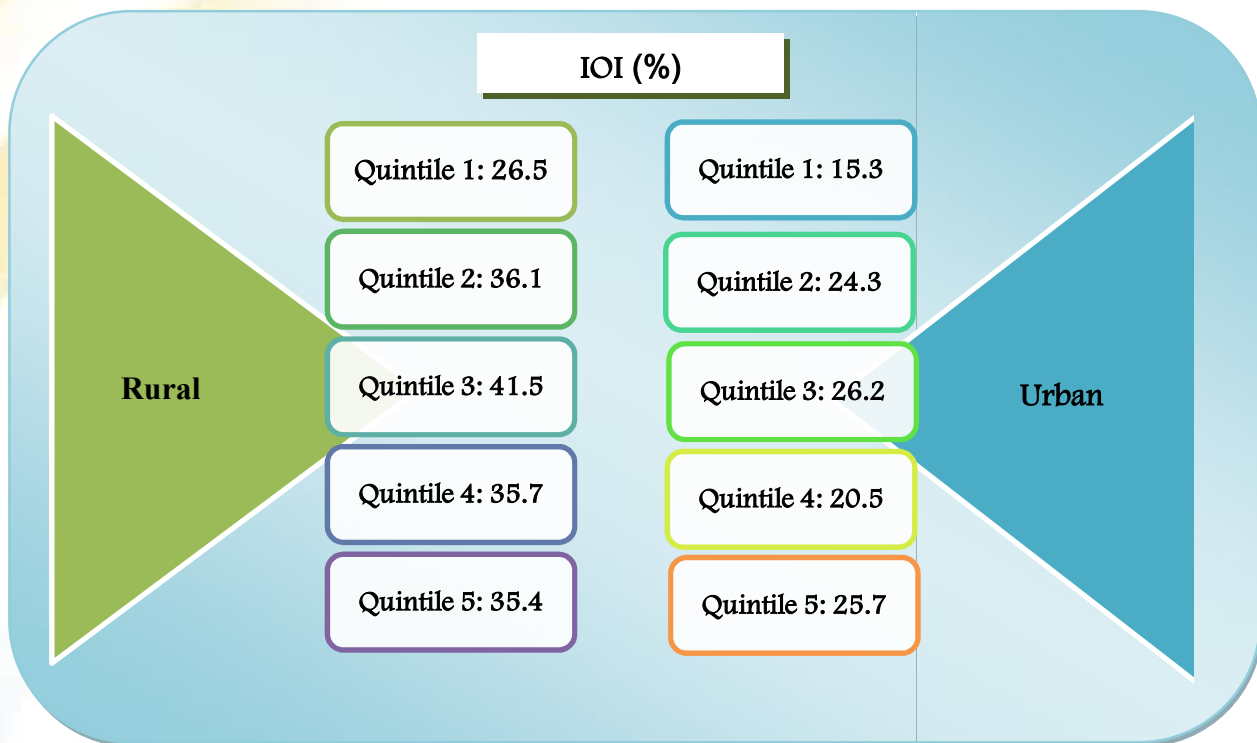

**B3. Incidence of Indebtedness (IOI): INTER STATE VARIATION**

IOI(%)	States/UTs- Rural	States/UTs-Urban

## Introduction

### 1.1 INTRODUCTION

---

1.1.1 The National Statistical Office (NSO) conducts nationwide Socio-Economic (SE) Surveys in the form of different rounds, each round being normally of one-year duration. Data is obtained through household interviews from a random sample of households selected through a scientific design and cover the entire geographical area of the country except the inaccessible islands of Andaman and Nicobar Islands.

1.1.2 The NSO has been conducting All-India Survey on Debt and Investment, periodically, since its 26<sup>th</sup> round (1971-72) in both rural and urban areas. The survey generates basic information on assets, liabilities and capital expenditure in the household sector of the economy. The present All-India Debt and Investment Survey (AIDIS), the eighth in the AIDIS series, was carried out as part of the 77<sup>th</sup> round of the National Sample Survey (NSS) during January to December, 2019. The current report is prepared based on survey results of the 77<sup>th</sup> round. It provides information on household asset and indebtedness as on June, 2018 and capital formation by the households during July, 2018 to June, 2019.

### 1.2 GENESIS AND OBJECTIVE OF THE SURVEY

---

#### 1.2.1 Genesis

1.2.1.1 The All-India Debt and Investment Survey (AIDIS) originated in the All-India Rural Credit Survey conducted by the Reserve Bank of India (RBI) during November, 1951 to August, 1952 in 75 selected districts spread across all over the country. The survey aimed to study (i) the demand for credit from rural families and (ii) the supply of credit by credit agencies – both institutional and non-institutional, in order to formulate banking policies.

1.2.1.2 The first Rural Credit Survey was followed by a similar survey in 1961-62 by the RBI and the scope of the survey was extended to include capital expenditure in the household sector and other associated indicators of the rural economy. The second survey thus, came to be known as the "All-India Rural Debt and Investment Survey".

1.2.1.3 The responsibility of conducting the third survey was given to NSSO and it undertook the All-India Debt and Investment Survey (AIDIS) covering both rural and urban areas, in its 26<sup>th</sup> round (1971-72), 37<sup>th</sup> round (1981-82), 48<sup>th</sup> round (1992), 59<sup>th</sup> round (2003) and 70<sup>th</sup> round (2013) prior to 77<sup>th</sup> round (2019).

## 1.2.2 The Objective

1.2.2.1 The objective of the AIDIS is to obtain quantitative information on the stock of assets, incidence of indebtedness, capital formation and other indicators for the rural/urban economy which will be of value in developing the credit structure in particular and also to obtain other allied information required in the field of planning and development.

## 1.3 MAJOR CHANGES AND COMPARABILITY WITH PREVIOUS ROUND SURVEY

---

1.3.1 The concepts and definitions followed in the AIDIS of 77<sup>th</sup> Round and 70<sup>th</sup> Round are similar except for valuation of building. Values of land and building on the reference date were recorded in the 70<sup>th</sup> round as per their normative/guideline values, whereas in the 77<sup>th</sup> round values of building were recorded 'as per the market price prevailing in the locality'.

1.3.2 The following additional components, mainly with respect to Financial Inclusion and SDG indicators, were added in the AIDIS of 77<sup>th</sup> round.

- ⊕ Information on deposit accounts in financial and non-financial institutions, contribution to Co-operative Credit Society/SHG/JLG, and deposit account in non-institutional agencies as on the date of survey from each household member
- ⊕ Possession of credit/debit cards, e-wallets and their use status during last 365 days for each household member
- ⊕ Ownership of land and ownership of agricultural land for each household member
- ⊕ Area operated under kitchen garden by the household

- ✿ Number of household members contributing to the government insurance/pension subscription viz., Pradhan Mantri Jeevan Jyoti Bima Yojana (PMJJBY), Pradhan Mantri Suraksha Bima Yojana (PMSBY) and Atal Pension Yojana (APY) etc.
- ✿ Area of land owned by the female members of a household
- ✿ Household's usual monthly consumer expenditure
- ✿ Premium paid by the household for life and non-life insurance

## 1.4 AIDIS REPORT OF THE NSS 77<sup>TH</sup> ROUND

---

1.4.1 The findings of the NSS 77<sup>th</sup> round survey on Debt and Investment are summarised in the present report titled '*All India Debt & Investment Survey - 2019*'.

## 1.5 CONTENTS OF THIS DOCUMENT

---

1.5.1 This document presents the results of NSS 77<sup>th</sup> round survey on Debt and Investment in summarised form. It contains three chapters and four appendices. Following the present introductory one, Chapter Two outlines the basic concepts & definitions and procedures followed in the survey along with the definitions used in this document. A brief discussion on the findings of the survey is presented in Chapter Three. In Appendix A, detailed tables at State/UT level and some detailed all-India level tables are presented. Appendix B contains values of Relative Standard Errors (RSE) for some major indicators. Appendix C contains details of the sample design and estimation procedure and the schedule of enquiry (Schedule 18.2, visit 1 and visit 2) that was canvassed in the surveyed households is included Appendix D.

1.5.2 Chapter Three summarises major findings of the survey and discusses the salient features relating to assets, liability of the households as on 30.06.2018 along with the capital expenditure incurred during July, 2018 – June, 2019 by the households. The observations are mainly confined to all-India estimates for rural and urban sectors.

1.5.3 While using the State/UT level estimates, it may be noted that the sample sizes for the smaller State or UTs may not be adequate for getting sufficiently reliable estimates for some of the indicators. If there is no sample observation available for any particular category, the estimate corresponding to that category is marked as a dash (-). If the estimate for any category appears as 'zero', it indicates that sample observation corresponding to that category is greater than 'zero' but the estimates are 'zero' when rounded off. In this report, no separate

estimate for transgender has been provided considering the constraints of sample size and transgender has been included in 'persons'.

## 1.6 INDICATORS

---

The following indicators are presented in this report:

- ✚ Assets
  - (a) Average value of asset by occupational category of household and by decile class of household assets
  - (b) Share of different components of assets in the total value of assets for each occupational category of households and for decile class of household assets
  
- ✚ Indebtedness
  - (a) Incidence of Indebtedness (IOI) and Average Amount of Debt (AOD) as on 30.06.2018 by occupational category of household and for decile class of household assets and for different social groups
  - (b) Variation in IOI of households as on 30.06.2018 by nature of credit agency, by terms of interest and rate of interest
  - (c) Debt-Asset ratio for decile class of household assets
  
- ✚ Capital Formation
  - (a) Percentage of households reporting fixed capital expenditure and average values (in Rs.) of fixed capital expenditure by occupational categories of households/household asset holding classes during 01.07.2018 to 30.06.2019
  
- ✚ Financial Inclusion
  - (a) Percentage of persons holding accounts in Bank and Post Office by gender and social group
  
- ✚ Inequality in distribution of assets

## 1.7 SCHEDULES OF ENQUIRY

---

1.7.1 Information in the survey was collected from a set of sample households through two visits to each household (*see Appendix D for detailed schedules*). Considering the operational convenience, the survey period of the first visit was fixed as eight months from January to August, 2019 and the survey period of the second visit was of four months duration from September to December, 2019.

1.7.2 In each visit, the liability position of the household was ascertained with reference to a fixed reference date which was the same for all sample households, viz., the 30<sup>th</sup> of June, 2018 for the first visit and the 30<sup>th</sup> of June, 2019 in the second visit. The assets position of the household on the other hand, was ascertained only in the first visit, with reference to a fixed reference date, viz., the 30<sup>th</sup> of June, 2018.

1.7.3 Broadly, the following information was collected in this round from each household:

1. assets (*owned*) of the household as on 30<sup>th</sup> June 2018, classified into (a) physical assets and (b) financial assets,
2. liabilities of the household as on 30<sup>th</sup> June 2018 in visit 1 and as on 30<sup>th</sup> June 2019 in visit 2,
3. amount of capital expenditure incurred (on all *transactions*) by the household during July 2018 - June 2019 on (a) residential plots, houses or buildings, (b) farm business and (c) non-farm business.

## 1.8 SCOPE AND COVERAGE

---

### 1.8.1 Geographical coverage

This survey covered the whole of the Indian union except villages in Andaman and Nicobar Islands that are difficult to access.

## 1.9 CONCEPTUAL FRAMEWORK

---

### 1.9.1 Reference period

1.9.1.1 All the estimates of assets and liabilities presented in this report are for a fixed reference date, viz. 30.06.2018. These are entirely based on the data collected during the first visit to the sample households. The position of liabilities of sample households as on 30.06.18 have been derived from the data on the date of survey and the data on transactions during the period from the reference date to the date of survey.

1.9.1.2 The estimates for assets and liabilities for the 77<sup>th</sup> round are obtained as on 30.06.2018 and the average value of assets and liabilities are obtained by considering the number of households obtained from visit 1 data.

1.9.1.3 The important classificatory characters used for tabulation are occupational category of the households (cultivator/non-cultivator in rural areas and self-employed/others in urban areas) and household asset holding class. For these classificatory characters, the group in which a sample household belongs was determined on the basis of the information collected in Visit 1.

1.9.1.4 For the purpose of estimating indebtedness of the household, the following items were recorded inclusive of interest in both Visit 1 and Visit 2.

- ✓ amount 'repaid' during a particular period
- ✓ amount 'written' off during a particular period
- ✓ amount 'outstanding' of the total loan amount as on date of survey.

### 1.9.2 Sample Design

1.9.2.1 The sample design adopted for the survey was essentially a stratified two-stage one for both rural and urban areas. The census villages/sub-units of villages and urban UFS blocks/sub-units of blocks were the first stage units (FSUs) for the rural and urban sectors respectively, while households were the second stage sampling units (SSUs) for both the sectors. The selection of FSUs was done with Simple Random Sampling Without Replacement (SRSWOR) scheme. In AIDIS, six second stage strata (SSS) were formed both in rural and urban sector considering the monthly per capita consumer expenditure (MPCE) and indebtedness of households. The sample households from each SSS were selected by SRSWOR.

### 1.9.3 Sample size

1.9.3.1 *First-stage units*: For rural India, the number of villages surveyed was 5,940 and the number of urban blocks surveyed was 3,995.

1.9.3.2 *Second-stage units*: As stated above, stratification of households was done on the basis of MPCE and indebtedness (to institutional agencies or non- institutional agencies or neither) of a particular household. For AIDIS, from each sample village and urban block, 14 households were surveyed. The sampling design and estimation procedure is presented in detail in Appendix C of this document. Schedule 18.2 was canvassed in 69,455 rural households and 47,006 urban households in Visit 1 and, the corresponding figures for rural and urban India were 68,291 and 44,781 respectively during Visit 2.

1.9.3.3 Statement 1.1 shows the numbers of villages and urban blocks surveyed, and also the numbers of rural and urban sample households in each visit, for each State and Union Territory. Number of households surveyed in visit 2 is lower than that of visit 1 for many States/UT as some of the households could not be surveyed in visit 2 due to some reason or other.

## 1.10 COMPARABILITY OF THE ESTIMATE ON INDEBTEDNESS FROM THE TWO SURVEYS OF NSS 77<sup>TH</sup> ROUND

---

1.10.1 In the 77<sup>th</sup> round of NSS, two surveys, namely, (i) Land and Livestock Holding of Households and Situation Assessment of Agricultural Households and (ii) All India Debt & Investment Survey (AIDIS) were conducted simultaneously during January- December 2019. In both of these surveys, information on indebtedness of the households was collected: while the first one collected information on indebtedness from the agricultural households in rural areas the later gathered information on indebtedness from all types of households both in rural and urban India.

1.10.2 In the Reports, prepared on the basis of data collected from these surveys, estimates of percentage of indebted households are provided as follows:

- ✚ In the Report No. 587 based on the survey on *Land and Livestock Holding of Households and Situation Assessment of Agricultural Households*, estimates of percentage of indebted agricultural households in rural areas are provided.
- ✚ In the Report No. 588 based on the *All India Debt & Investment Survey*, estimates of percentage of indebted households are provided for rural areas separately for cultivator households, non-cultivator households, besides providing the estimates of percentage of indebted households in urban areas.

1.10.3 It may be noted that coverage of *agricultural households* in Livestock Holding of Households and Situation Assessment of Agricultural Households and the coverage of *cultivator households* in All India Debt & Investment Survey are not same and as such these estimates are not comparable. Moreover, the estimates of percentage of indebted households obtained from the survey on Land and Livestock Holding of Households and Situation Assessment of Agricultural Households covers only the agricultural households in the rural areas, unlike in the All India Debt & Investment Survey which covered the entire rural areas. These aspects may be kept in mind while interpreting the results. Definition of agricultural households and cultivator households used in these surveys are given below:

### ❖ **Definition of agricultural households in the survey on Livestock Holding of Households and Situation Assessment of Agricultural Households:**

An agricultural household for 77<sup>th</sup> Round survey was defined as a household receiving value of produce more than Rs. 4000/- from agricultural activities (e.g., cultivation of field crops, horticultural crops, fodder crops, plantation, animal husbandry, poultry, fishery, piggery, bee-keeping, vermiculture, sericulture, etc.) and having at least one member self-employed in agriculture either in the principal status or in subsidiary status during last 365 days. Like in previous rounds, households which were entirely agricultural labour households and households receiving income entirely from coastal fishing, activity of rural artisans and agricultural services were not considered as agricultural households and they were kept outside the scope of the survey.

### ❖ **Definition of cultivator households in All India Debt & Investment Survey:**

All the households having area of land operated 0.002 hectares or more as recorded during the last 365 days preceding the date of survey was considered as 'cultivator households'.

# Chapter Two

## Concepts & Definitions

### 2.1 BASIC CONCEPTS

---

#### 2.1.1 Household

2.1.1.1 A group of persons normally living together and taking food from a common kitchen constitutes a household. It includes temporary stay-aways (those whose total period of absence from the household is expected to be less than 6 months during the survey period) but excludes temporary visitors and guests (expected total period of stay less than 6 months during the survey period).

#### 2.1.2 Household size

2.1.2.1 The size of a household is the total number of persons in the household.

#### 2.1.3 Household Type

2.1.3.1 The household type, based on the means of livelihood of a household, was decided on the basis of the sources of the household's income during the 365 days preceding the date of survey. For this purpose, only the household's income (net income and not gross income) from economic activities was considered; but the incomes of servants and paying guests were not taken into account.

In rural areas, a household was classified to belong to any one of the following six household types:

- ✿ self-employed in agriculture
- ✿ self-employed in non-agriculture
- ✿ regular wage/salary earning

- ✿ casual labour in agriculture
- ✿ casual labour in non-agriculture
- ✿ others

In urban areas, each household was categorised into one of the following four groups:

- ✿ self-employed
- ✿ regular wage/salary earning
- ✿ casual labour
- ✿ others

## 2.1.4 Occupational classification of households

2.1.4.1 The rural households are classified into two types, namely, cultivator and non-cultivator households using the criteria below:

- ✚ *Cultivator households*: households operating at least 0.002 hectare of land during the 365 days preceding the date of survey;
- ✚ *Non-cultivator households*: households operating no land or land less than 0.002 hectare of land.

2.1.4.2 For the urban areas, *self-employed* and *other* households are the two occupational categories of the households.

## 2.1.5 Household assets

2.1.5.1 Household assets represent all that were owned by the household and had monetary value. This includes physical assets like land, buildings, livestock, agricultural machinery and implements, non-farm business equipment, all transport equipment, and financial assets like receivable on loans advanced in cash or in kind, shares in companies and cooperative societies, banks, etc., national saving certificates and the like, deposits in companies, banks, post offices and with individuals. The AIDIS did not include crops standing in the fields and stock of commodities held by the household in the household assets.

## 2.1.6 Liabilities

2.1.6.1 All claims against a household held by others are considered as liabilities of the household. Thus all loans payable by the household to others, irrespective of cash or kind are deemed as liabilities of the households. However, in the report, only cash loan are taken into the consideration to generate estimates on indebtedness. Unpaid bills of grocers, doctors,

lawyers, etc., were also considered liabilities of the household. Different kinds of liabilities are defined below:

- ✚ *Cash loans*: All loans taken in cash are considered to be cash loans, irrespective of whether such loans were repaid or proposed to be repaid in cash or in kind. Cash loans, generally, covers borrowings at specific rates of interest for specific periods of time. However, if a loan was taken even at 'nil' rate of interest from relatives and friends, it was considered to be a cash loan. The loans may be taken against a security or without any security. Dues payable by the household owing to purchase of goods under a hire-purchase scheme were treated as cash loans.
- ✚ *Kind loans*: All loans taken in kind (except the cases of hire-purchase) irrespective of whether those were already repaid or yet to be repaid in cash or in kind are regarded as kind loans payable.

## 2.1.7 Valuation of assets

2.1.7.1 In the first visit, information was collected on assets (*owned*) and liabilities as on 30<sup>th</sup> June, 2018. The basis for valuation of assets is described below:

- (a) Value of land as on 30.06.2018 was reported as per their normative/guideline values. For buildings, valuation was done as per the market price prevailing in the locality.
- (b) Assets and liabilities of household enterprises were recorded only if the enterprise was fully owned by the household and not a partnership involving members of different households.
- (c) The value of the shares/debentures owned *on the date of survey* was evaluated as per the market price prevailing on the date of survey, if the shares/debentures were acquired before the reference date, i.e. 30.06.2018. On the other hand, if the shares/debentures were acquired by way of purchase or disposed of through sale between the reference date and the date of survey, then the purchase or sale price was recorded under 'acquisition' or under 'disposal', as the case may be. If they were acquired during the reference date and the date of survey by ways other than purchase (as inheritance, gift, etc.) or disposed of during this period by means other than sale, then the market price prevailing on the date of survey was considered to determine value of the transaction, and (in case of acquisition) for valuation of the asset owned on the date of survey.
- (d) In cases where it was not possible to ascertain the prevailing market price of a share, the paid-up value of the shares (if acquired other than by purchase) or the value paid by the household (if they were purchased) was considered.
- (e) In case of certificates and annuity schemes, the amount paid at the time of purchase was considered and in case of deposits, the face value was considered.

However, for the purpose of estimation of capital formation, actual expenses incurred on all *transactions* during the reference period (i.e., between 01.07.2018 and 30.06.2019) were recorded separately and were collected in both visits.

## 2.1.8 Farm business

2.1.8.1 Farm business comprised of household economic activities like cultivation, including cultivation of plantation and orchard crops, and processing of produce on the farm, e.g. paddy hulling and *gur (jaggery)* making. Although *gur (jaggery)* making is a manufacturing activity, this was covered under farm business only when such activity was carried out in the farm by indigenous method. Farm business also included activities ancillary to agriculture, like livestock raising, poultry, fishing, dairy farm activities, bee keeping and other allied activities coming under tabulation categories A and B of the National Industrial Classification (NIC) 2008.

## 2.1.9 Non-farm business

2.1.9.1 Non-farm business was defined as all household economic activities other than those covered in the farm business. This cover manufacturing, mining & quarrying, trade, hotel & restaurant, transport, construction, repairing and other services. For the purpose of this survey, non-farm business was excluded when such activities were carried out in non-household enterprises. Non-farm business enterprises, which were registered under section 2m(i) or 2m(ii) and section 85 of Factories Act, 1948 and *Bidi* and Cigar manufacturing establishments registered under *Bidi* and Cigar Workers (condition of employment) Act, 1966 were kept outside the coverage of the survey.

## 2.1.10 Enterprise

2.1.10.1 An enterprise was defined as an undertaking which was engaged in the production and/or distribution of some goods and/or services meant mainly for the purpose of sale, whether fully or partly. An enterprise may be owned and operated by a single household or by several households jointly, or by an institutional body.

## 2.1.11 Household enterprise

2.1.11.1 A household enterprise was defined as one run by one or more members of a household or run jointly by two or more households on partnership basis, irrespective of

whether the enterprise was located in the premises of the household(s) or not. In other words, *all proprietary and partnership enterprises were household enterprises.*

### 2.1.12 Non-household enterprise

2.1.12.1 Non-household enterprises were defined as those which were institutional, i.e., owned and run by the public sector (Central or State Government, local governments, government undertakings, etc.), corporate sector, co-operative societies, other types of societies, institutions, associations, trusts, etc.

### 2.1.13 Non-agricultural enterprises

2.1.13.1 All the enterprises covered under NIC-2008, 2–digit codes 05 to 99 were considered as non-agricultural enterprises.

### 2.1.14 Household asset holding class

2.1.14.1 This refers to the 10 decile classes of the Rural/Urban All-India distribution (estimated distribution) of households by asset holding size. In the tables, the different decile classes are referred to simply as 1 (lowest), 2, 3, ... 9, 10 (highest).

Thus, for example, the words “decile class 2” (or “10-20%”) in a table for the State Punjab, Rural sector, means households of rural Punjab falling in the second (second lowest) decile class of the estimated all-India distribution of rural households by asset holding size. The 10 household asset holding classes were determined separately for each sector based on visit 1 data by examining the distribution of sample households over the asset holding classes for all-India.

### 2.1.15 Capital expenditure

2.1.15.1 Fixed capital formation takes place by way of new purchase, construction for own use and improvement of physical assets which help in further production. Thus, expenditure on land development work, on fixed assets used in farm and non-farm business and on residential buildings were considered as capital expenditure.

## 2.1.16 Gini's Coefficient

2.1.16.1 This is a measure of inequality of a distribution. It is defined as the ratio of the area between the Lorenz curve of the distribution and the line of equality; and the area under the line of equality. The Gini's coefficient, should lie between 0 & 1 and is often used as a measure of income inequality. Here, 0 corresponds to perfect income equality (i.e. everyone has the same income) and 1 corresponds to perfect income inequality (i.e. one person has all the income, while everyone else has zero income). The Gini coefficient can also be used to measure wealth inequality.

# Chapter Three

## Summary of Findings

### 3.0 INTRODUCTION

---

3.0.1 This chapter discusses the findings of the All-India Survey on Debt and Investment (AIDIS) conducted by the NSO in its 77<sup>th</sup> round during January – December, 2019, covering estimates of key indicators, namely, assets accumulated and liabilities of the households as on 30.06.2018 and capital expenditure incurred by the households during July, 2018 – June, 2019, etc.

3.0.2 The indicators presented in this chapter are mainly confined to all-India estimates followed by an examination of the variations in ownership of assets and incidence of indebtedness across selected major States. The estimates for smaller States and Union Territories (UTs) have been provided separately in the Statement tables.

3.0.3 This Chapter is arranged in the following Sections:

- Section One: Asset holdings
- Section Two: Household indebtedness
- Section Three: Debt-Asset ratio
- Section Four: Capital Expenditure
- Section Five: Financial Inclusion
- Section Six: Inequality in distribution of Assets

## 3.1 SECTION ONE: ASSET HOLDINGS

### 3.1.1 Average Asset Holdings

3.1.1.1 Information on physical and financial assets owned by the households as on 30.06.2018 was collected in the 77<sup>th</sup> round survey on Debt and Investment. Assets like land, buildings, livestock, agricultural implements & machinery, non-farm business equipment, transport equipment were considered as physical assets, while cash and kind receivables and shares, deposits, etc. were considered as financial assets. All these assets owned by the households constitute the asset holdings of the households.

- ✿ All belongings of the household that have monetary value are considered as *Assets* of the household. These are classified into Physical or Financial assets.
- ✿ Average value of all the physical and financial assets owned per households is considered as *Average Value of Assets (AVA)*.

3.1.1.2 Percentage of household owning assets and average value of assets (AVA) for all-India is shown in Statement 3.1 below.

Statement 3.1: Average Value of Assets (AVA) as on 30.06.2018		
Indicator	Rural	Urban
(1)	(2)	(3)
Households owning assets (%)	99.4	98.0
AVA (in 000' Rs.) per household	1,592	2,717

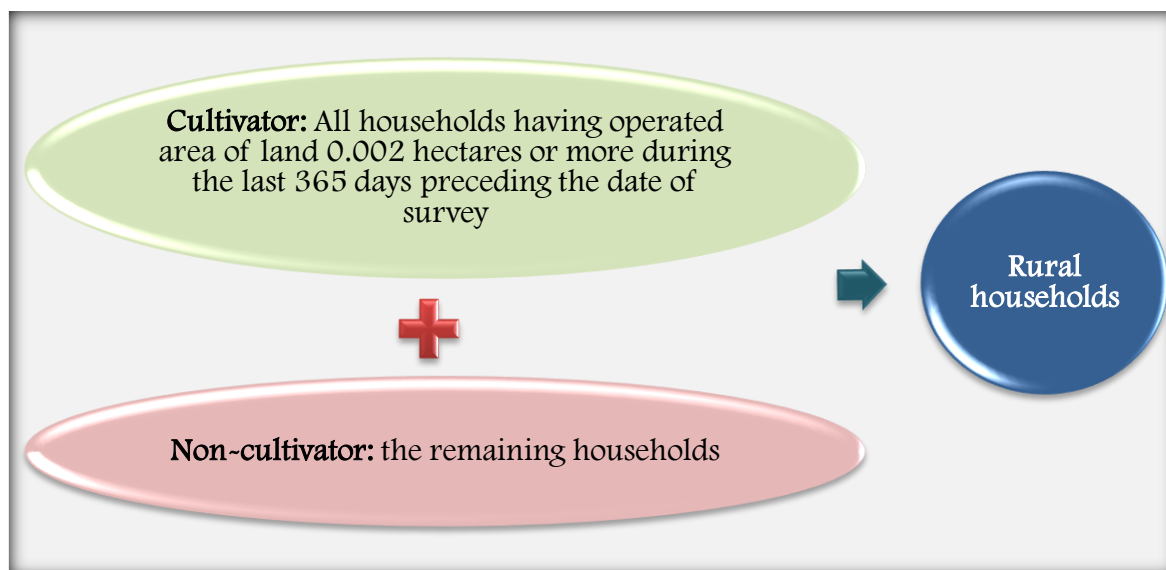

*Note: The estimates of AVAs for States/UTs are shown in Statement 2 & for household reporting assets are shown in Statement 4 of Summary Statement.*

### 3.1.2 Average Asset Holdings by Occupational category of the households

3.1.2.1 Two different classifications have been used for rural and urban areas for identifying the occupational category of a household.

3.1.2.2 **Categories of rural households:** The households in the rural sector are broadly classified as *cultivator* and *non-cultivator* households as explained below.

3.1.2.3 **Categories of urban households:** Depending upon its major source of income during the last 365 days, each urban household is categorized into one of the four household types: *self-employed*, *regular wage/salary earning*, *casual labour* and *others*. The urban households are further classified into two occupational categories as defined below:

3.1.2.4 Figure 3.1 shows the percentage of households belonging to different occupational categories, separately for rural and urban India.

3.1.2.5 The percentage of households owning assets and average asset holdings per household are presented in Statement 3.2 for each occupational category in rural and urban sectors of India.

**Statement 3.2: Percentage of households owning assets, Average value of Assets (AVA) per household as on 30.06.2018 by occupational category of the household**

Occupational category of the households	% of households owning asset	AVA per household (000' Rs.)
(1)	(2)	(3)
<b>Rural</b>		
Cultivator	100.0	2,207
Non-cultivator	98.6	785
<b>All</b>	<b>99.4</b>	<b>1,592</b>
<b>Urban</b>		
Self-employed	99.7	4,151
Others	97.3	2,211
<b>All</b>	<b>98.0</b>	<b>2,717</b>

*Note: The estimates of AVAs for States/UTs are shown in Statement 2 & for household reporting assets are shown in Statement 4 of Summary Statement.*

### 3.1.3 Average Asset Holdings by Social Group

3.1.3.1 The estimated average value of assets along with the percentage of households owning assets by social group of the households, separately for rural and urban areas are given in statement 3.3.

<b>Statement 3.3: Average Value of Assets (AVA) as on 30.06.2018</b>				
Social Group	Households owning assets (%)		AVA (in 000' Rs.) per household	
	Rural	Urban	Rural	Urban
(1)	(2)	(3)	(4)	(5)
Schedule Tribe (ST)	98.8	93.7	884	1,890
Schedule Caste (SC)	99.3	96.6	879	1,315
Other Backward Classes (OBC)	99.6	98.8	1,645	2,120
Others	99.4	98.0	2,603	4,054
<b>All</b>	<b>99.4</b>	<b>98.0</b>	<b>1,592</b>	<b>2,717</b>

*Note:* 1. The corresponding values for each social group and for States/UTs are given in the Statement 3 of Summary Statement.

2. The estimates of AVAs for category 'all' for each States/UTs are shown in Statement 2 & for household reporting assets are shown in Statement 4 of Summary Statement.

### 3.1.4 Average value of asset across 'decile' classes of household asset holding

**Decile class of household asset holding:** If all rural/urban households in India were ranked by value of asset holdings, the bottom 10% of the households may be referred to as the lowest decile class, the next 10% as the second decile class, and so on up to the top 10% which is called the tenth or top decile class. Decile classes are defined separately for rural and urban households at all India level.

3.1.4.1 The estimated average value of assets for different decile classes of household asset holding, separately for rural and urban areas is shown in Figure 3.2. The values of AVA for States/UTs are given in the Statement 2 of Summary Statement.

### 3.1.5 Inter-state comparison of average value of assets

3.1.5.1 Statement 3.4 shows the AVA as on 30.06.2018 along with the ratio of State AVA to all-India AVA ( $RSAI_{AVA}$ ) for 18 selected major States.

$RSAI_{AVA}$  for a State is defined as ratio of Average Value of Assets (AVA) for that State to the all-India AVA; Thus  $RSAI_{AVA} = \text{AVA for the State} / \text{AVA at all-India level}$

**Statement 3.4: Average value of assets (AVA) per household and  $RSAI_{AVA}$  as on 30.06.2018 in rural and urban areas of selected major States**

State	AVA per household and Ratio of State AVA to All-India AVA ( $RSAI_{AVA}$ )

## 3.3 SECTION THREE: DEBT-ASSET RATIO

### 3.3.1 Debt-Asset Ratio

3.3.1.1 Debt to asset ratio relates to all household debts to their asset holdings. This ratio serves as one of the components, which gives an understanding of actual burden of debt to the household.

*The 'Debt-Asset' Ratio (DAR)* is defined as the average amount of debt (AOD) outstanding on a given date for a group of households expressed as percentage of the average amount of assets (AVA) owned by them on that given date.

3.3.1.2 Statement 3.17 shows the Debt to Asset Ratio (DAR) along with the Average value of Assets (AVA) and Average amount of Debt (AOD) per household as on 30.06.2018 across different decile class of asset holdings for rural and urban India.

## 3.4 SECTION FOUR: CAPITAL EXPENDITURE

### 3.4.1 Capital Expenditure

3.4.1.1 Capital expenditure of a household includes

- Expenditure in cash and/or in kind that has been incurred for new purchase, construction, addition, major repairs and alterations and improvement of physical assets.

- ⊕ All expenditure on physical assets, except for purchase of land are considered to be *Fixed Capital Expenditure*.
- ⊕ *Expenditure on purchase of land* includes (a) expenditure for purchase of residential plots (b) purchase of land and land rights for farm business and (c) purchase of land for non-farm business.

### 3.4.2 Fixed Capital expenditure and Expenditure on purchase of land

3.4.2.1 Statement 3.20 shows the percentage of households reporting Fixed Capital Expenditure (FCE) And Expenditure on Purchase of Land (EPL) along with average amount of Fixed Capital Expenditure (FCE) and Expenditure on Purchase of Land (EPL) during 01.07.2018 to 30.06.2019 for rural as well as urban areas by household asset holding class.

## 3.5 SECTION FIVE: FINANCIAL INCLUSION

### 3.5.1 Financial Inclusion

3.5.1.1 In order to have an idea on financial inclusion of the members of the households, the information on deposit account in bank & P.O was collected from each household member for the first time in the AIDIS of 77<sup>th</sup> round.

Statement 3.23 shows percentage of adult population (18 years & above) having deposit account in bank across the major states for rural and urban India, separately for male & female.

The corresponding figures on deposit account in bank & Post Office across States/UTs are given in Statements 13 & 14 of Summary Statement respectively.

## 3.6: SECTION SIX: INEQUALITY IN DISTRIBUTION OF ASSETS: ALL-INDIA AND STATES

### 3.6.1 Inequality in distribution of assets

3.6.1.1 As a measure of inequality in distribution of assets, Gini's Coefficients based on the average per capita asset value, separately for rural and urban sector and for each State has been computed.

**Gini's Coefficient:** This is a measure of inequality of a distribution. It is defined as the ratio of the area between the Lorenz curve of the distribution and the line of equality; and the area under the line of equality. It should lie between 0 & 1 and is often used as a measure of income/wealth inequality. Here, 0 corresponds to perfect income/wealth equality (i.e. everyone has the same income/wealth) and 1 corresponds to perfect income/wealth inequality (i.e. one person has all the income/wealth, while everyone else has zero income/wealth).

Statement 3.25 gives the share of assets in different decile classes of asset holding on 30.06.2018 at each all-India rural and urban.

**Statement 3.25: Percentage share of assets as on 30.06.2018 in different household Asset Holding Class (AHC)**
