*for all crops except coconut, harvested quantity and yield rate are calculated considering those for which harvested quantity is reported in kg and for coconut, quantity and yield rate are calculated considering those for which harvested quantity is reported in numbers

total production also includes pre-harvest sale and by-products

Note: Estimated number of households given in this Table are design based estimates and may be used as control totals for combining and arriving at rates and ratios. These figures are not intended for providing the number of households

*to calculate the % of output sold in respect of coconut, only those households that reported quantity in number has been considered. For remaining crops, those households that have reported quantity in Kg, have been considered

Note: Estimated number of households given in this Table are design based estimates and may be used as control totals for combining and arriving at rates and ratios. These figures are not intended for providing the number of households
